Saw Carrizos arroyo. This is shown as being permanent on the federal maps. It was dry where the road crossed.

Seined Majon Lugo Creek where the highway crosses. This is a small clear stream mostly 8-10 feet wide and 2 inches deep. Occasional pools are 2 1/2 feet deep. The bottom is clear sand. The current moderate. The stream is in a ~~run~~ rather large arroyo. N. 87 W 88 at 12:15 PM
