

Sept. 1, 48.

Had considerable trouble locating Zuni  
Governor and was delayed several hours.

Went down the Zuni R. to the point  
where it leaves N.M. Most of the stream  
bed was dry. A few ~~shallow~~ - 2 ft deep - pools  
<sup>were</sup> ~~remained~~ <sup>used by birds</sup> ~~remained~~. There were several thoroughly reseeded  
but no fish were taken. *A. t. o. m. e. t. e. d.* were  
abundant.

Went up to Ojo Caliente. A fairly large  
spring - Ojo Caliente - plus a few smaller  
seeps provide water for a small lake. The  
spring contained L.M. Bass & sunfish, probably  
bluegills. The lake contained many ~~the~~ L.M. bass,  
and some bluegills. Local Indians state that it  
contains the above and perch, catfish.

Elev. 7320, pond - 2-3 acres. - low - moderate  
fluctuation. A. 89. 081 1500, W.C., Cat, Brook  
with H2S, Shore mead, watershed cult & prairie  
juniper, Method Light, angling, 6 ft seine. 1330-1500  
none saved. Too many L.M.B.

WJK48-09-01-01

The Zuni R. one mile below the Pueblo  
apparently goes dry from time to time. It is  
small in a wide arroyo. The riffles were

Sept. 1, 48<sup>th</sup>

divers of fish. Fish were found only in the deeper quiet backwaters - One species Lepomis cyonellus. Sined 1/4 mile.

Filer 6200; 5ft x 5in - 15ft x 2in, one P. 2ft deep, condition low, great fluctuation. R 87 WS at 1745, Pt. Cloudy & Storm, WWT, Cur, Bit, Veg. sparse, fil. algae in P. Stone ground & duplex, watered Pinarjuniper. Time 1630-1730.
