BOOK REVIEW

Walther Huebner. *Geology and Allied Sciences: A Thesaurus and a Coördination of English and German Specific and General Terms*. New York, Veritas Press, 1939. i-xvi; 1-405. \$7.50.

This book, compiled principally for the convenience of geologists, includes terms not only from various phases of geology but also from geography, biology, chemistry, and physics. Anthropologists should find it particularly useful for this reason and because a large number of important works in their field are written in German. Although more pretentious works of this type have appeared, there are few which, in compactness and thoroughness, can be of greater value to the amateur and professional anthropologist.

NECROLOGY

Abeita, Pablo. Former Lieutenant-Governor of Isleta Pueblo, war captain, and member of the Pueblo Cattle Commission. Secretary of the All-Pueblo Council from its founding in 1922 until his resignation in 1940. Died December 17, 1940, at the age of 70.
