present

Corner of Third and Central looking west, showing through traffic, parallel parking, uncontrolled graphics, and asphalt acreage.
Same area developed into a pleasant shopping environment by eliminating present traffic congestion, developing inviting pedestrian areas, and organizing graphics.

NMA July - August, 65
Use **DUO-WIRE**...a better masonry wall reinforcement

- **DUO-WIRE** cross ties are full mesh welded and project slightly beyond side tension wires providing eight positive mortar locks every 16" in the wall.

- **DUO-WIRE** cross ties are spaced every 16" (modular spacing) to avoid blocking core areas subject to other uses such as vertical reinforcement, grouting or filling of core with insulation, duct or conduit areas.

FIREPROOFING FOR THE LAZY

Zonolite® Mono-Kote® is a one step, direct-to-steel fireproofing material. It is sprayed on to the thickness required for the fire rating you want and that's all there is to it. You don't have to revisit the job again and again to see whether it's still the proper thickness after tamping, because it needs no tamping.

Zonolite offers such a broad range of fire ratings that you can specify it on almost every job. So take the lazy way out. Call your Zonolite representative for details today.
