

REGIONAL CONFERENCE ANNOUNCED

The following letter contains the first announcement of the 1967 Regional Conference.

Mr. James M. Murray, III, President
New Mexico Southern Chapter
New Mexico Society of Architects
South Broadmoor Building
Hobbs, New Mexico

Dear Mr. Murray:

The Southeastern Section of the Colorado Chapter AIA invites you and the members of the Southern Chapter of the New Mexico Society of Architects to the 16th Western Mountain Regional Conference.

The Conference will convene on Sunday, November 5th at the Broadmoor Hotel in Colorado Springs. From then until the close of the conference on Wednesday, November 8th, we will present a provocative, entertaining and memorable schedule of events.

The theme, "THE TOWN AROUND US" will guide us through an examination of the sources of waste and ugliness which surround us and how the Architect is avoiding his responsibilities to his community.

We would appreciate the publication of this information in your Society's newsletter, and are looking forward to seeing you in November.

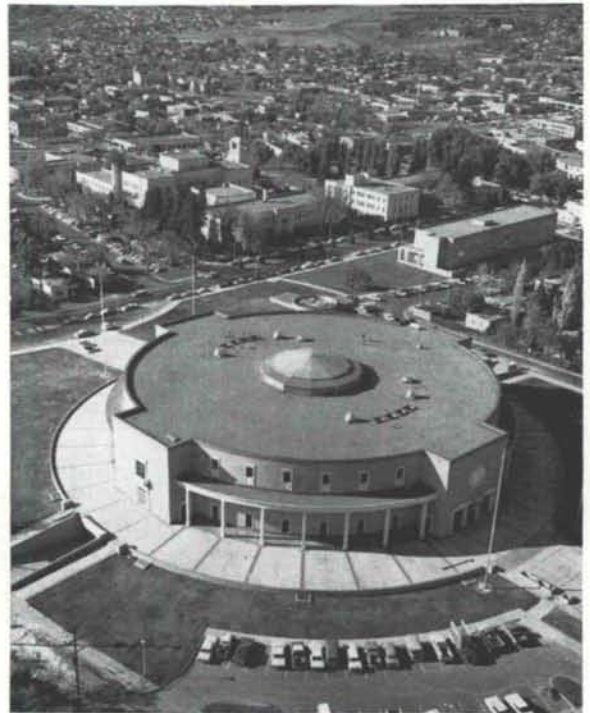

Sincerely,
John B. Ten Eyck, AIA chairman
16th Western Mountain Regional Conference

Mr. Architect

let us show you why a large percent of Building owners in New Mexico rely upon us for dependable Vertical Transportation.
Hunter-Hayes Elevator Co.

106 Buena Vista S.E.

PRESTRESSED CONCRETE PRODUCTS, INC.
MANUFACTURERS OF ROOF AND FLOOR DECKS

THEY EXCEL IN

- ECONOMY ● PERMANENCY ● DURABILITY
- VERSATILITY ● FLEXIBILITY
- and most important ● FIRE RESISTANCE

1900 MENAUL ROAD N. E., ALBUQUERQUE, NEW MEXICO 87106

(505) 345-2536

Penasco Elementary School — Penasco, N. M.
Harold R. Benson, A.I.A. Architect

" . . . No other structural system proved feasible
for both the form and the budget."

Three key words are contained in that statement by Harold R. Benson, A.I.A., of Taos . . . "feasible," "form" and "budget." With the Trus Joist system, new and unique shapes for greater design freedom are entirely consistent with economy.

Mr. Benson also says, "The profile adaptability of Trus Joists led to the design for the skylight." (emphasis, ours). Here's another instance where TJ opened new vistas of design possibility and the creative architect capitalized on it.

. . . to EVERYONE'S benefit.

George B. McGill
