A brief survey of New Mexico historic sites was published in 1967 by the State Planning Office. However, it was not until 1968, when the Department of Housing and Urban Development agreed to provide the funding, that the state was able to undertake a thorough statewide survey and to prepare a comprehensive state plan for historic preservation. Aware of the need for professional review competence and the exacting requirements of the Federal agencies involved, the State Planning Office asked Governor David Cargo to appoint a small review committee composed of historians, architects, and archeologists. This was done in April 1968, and the program was underway.

In April 1969, the Governor signed the Cultural Properties Act. Drafted by the governor's review committee and the State Planning Office, this legislation gave permanence to the committee, outlined its duties and specified the professional fields from which the members could be chosen: history, anthropology, architecture and art. Further, the law states that: "Each appointed member shall have achieved recognition for accomplishment in his field in the American Southwest, and each shall have specialized knowledge of New Mexico."

Two years of monthly meetings by the whole committee, supplementary meetings by subcommittees, and many trips about the state by individual members have resulted in the publishing of a comprehensive document: "Historic Preservation — A Plan for New Mexico." The plan contains detailed proposals on several specific properties and lists the 168 sites which were approved for
listings on the State Register at press time. Subsequent listings have raised that figure upward and will continue to do so. The list is varied; it includes a small statue, c. 1625; a carved stone altar screen, c. 1760; archeological sites, and buildings; it spans the vast range of New Mexico history, from the Folsom man site (13,000-8,000 B.C.) to a contemporary adobe chapel designed by George Nakashima and completed in 1967.

Included on the New Mexico Register of Cultural Properties are these two mills. Although both were constructed during the same century, they represent opposite poles of economic affluence. The massive stone edifice represents the might of the mid-Nineteenth Century Anglo wealth and new political dominancy. The primitive, hand hewed log structure typifies the humble but industrious labors of the New Mexican Hispano.

The Aztec Mill in Cimarron was built in 1864 by Lucien B. Maxwell to furnish flour to the Jicarilla Apaches and Ute Indians. The Indians were then living on the old Spanish Grant
of Beaubien and Miranda, which had recently been acquired by Maxwell. In addition Maxwell was the Indian Agent for the district.

About 100 years ago, Mr. Acorcino Cordova and his wife, Genoveva Romero y Cordova, lived on their land at the foot of U.S. Hill near Vadito. Here on the bank of the Rio Pueblo Mr. Cordova built his mill. The logs for the millhouse were cut in the nearby mountains, and, about 20 miles away, near Dixon, he found the proper kind of rock for his millstones. There he chipped and fashioned the two stones. Each stone was about 30 inches in diameter
