## General Information

The data represents one of several projects examining the federal regulatory rulemaking process and its interaction with agency strategy, corporate and media influence, and judicial review. The data was collected with the intent of assessing agency and corporate activity within the context of their interactions across multiple regulatory notice and comment periods. The additional influence of media coverage and its impact on agency and corporate interaction was also assessed. Whereas the regulatory notice and comment process has commonly been a focus of public administration research, this particular study is unique in accounting for media influence on the frequency of corporate or industry comments together with their ultimate impact on regulatory outcomes.

### Involved Parties

**Data Set Owners:**
- David Cavazos (University of New Mexico; Assistant Professor: ASM Organizational Studies)

**Data Set Contacts:**
- David Cavazos (University of New Mexico; Assistant Professor: ASM Organizational Studies)
