This Annual Report is brought to you for free and open access by the Administration at UNM Digital Repository. It has been accepted for inclusion in HSLIC Strategic Plans by an authorized administrator of UNM Digital Repository. For more information, please contact disc@unm.edu.
University of New Mexico Health Sciences Library and Informatics Center (HSLIC)
Strategic Plan
FY2015 – FY2018

**HSLIC Vision**
We aspire to be New Mexico’s agent for health knowledge

**HSLIC Mission**
We connect the UNM HSC community to quality information and services by delivering health resources and instruction, advancing the science of informatics, and promoting health information access for New Mexicans.

**Strategy 1**: To foster dynamic learning environments, student collaboration and success, HSLIC will continue to make incremental improvements to the spaces it manages.

**Objective A**: Improve spaces for HSC students, faculty and staff:
- **Task 1**: Create additional collaborative study solutions in HSLIC building for small groups. (Project Lead: Holly Buchanan)
- **Task 2**: Transition the Domenici Center west building lobby into permanent exhibit space. (Project Lead: Laura Hall)
- **Task 3**: Expand potential formats for exhibits in the HSLIC Building, including use of digital signage. (Project Lead: Laura Hall)
- **Task 4**: Investigate and explore an innovation space concept, and implement like services (e.g., 3D printing, multimedia recording for educational support, electronic posters). (Project Lead: Monica Rogers and Cathy Brandenburg)
- **Task 5**: Modernize permanent signage within the HSLIC building. (Project Lead: Cathy Brandenburg)

**Objective B**: Define a vision for the future of print and electronic library resources:
- **Task 1**: Update the HSLIC Collection Development Policy to guide the future direction of collections, with consideration for storage of print materials and provision of perpetual access for electronic materials. (Project Lead: Laura Hall)
- **Task 2**: Research the feasibility of moving library collections to compact shelving within the HSLIC building. (Project Lead: Laura Hall)
- **Task 3**: Develop processes for the appraisal and transfer of proposed institutional records, plan for permanent storage and preservation. (Project Lead: Laura Hall)
- **Task 4**: Determine HSLIC’s policy regarding resources to include mobile accessibility. (Project Lead: Laura Hall)

**Strategy 2**: Modernize aging infrastructure and building systems (e.g., HVAC, lighting, power, network access) in HSLIC-managed spaces to insure business requirements for HSLIC services are met and the risk of service interruptions is reduced.

**Objective A**: Create a plan to update key infrastructure over the next 10 years:
- **Task 1**: Identify and make recommendations for capabilities that are needed to support converging digital technologies. (Project Lead: Steve Stockdale)
Task 2: Work with HSC leadership to assure infrastructure needs are addressed and determine future priorities for use of HSLIC-managed spaces. (Project Lead: Holly Buchanan)

Strategy 3: Exploit and develop technologies to improve the access, delivery and value of HSLIC services for its users.

Objective A: Identify and implement opportunities for greater use of mobile apps and capabilities for HSLIC resources and services.
  Task 1: Assess HSLIC’s electronic collection for opportunities to provide more mobile content and implement. (Project Lead: Laura Hall)
  Task 2: Update HSLIC website for responsive web design. (Project Lead: Sally Bowler-Hill)
  Task 3: Assess and implement opportunities to provide more mobile-enabled services (e.g., browsing in EMS, self-service study room reservations, print collection map, mobile-enabled reference, mobile-enable feedback). (Project Lead: Steve Stockdale)

Strategy 4: Use standardized lifecycle, design and promotional methods to manage HSLIC services in a way that optimizes value for its users.

Objective A: Define the roles performed by HSLIC’s Service Point (tier one) for IT services:
  Task 1: Define and codify the Service Point’s role in providing IT services (Project Lead: Steve Stockdale).
  Task 2: Develop SLA’s between HSLIC and HSC IT (Project Lead: Steve Stockdale).

Objective B: Improve HSLIC’s ability to deliver quality services in a consistent manner:
  Task 1: Conduct a pilot with the Service Point and library faculty to identify the tasks employees perform to deliver key services, and develop a template that other HSLIC units may use. (Project Lead: Monica Rogers)
  Task 2: Develop a template to define employee competencies and assessments, and write competencies. (Project Lead: Cathy Brandenburg and Monica Rogers)
  Task 3: As a pilot, develop Service Point competencies using the template (Project Lead: Monica Rogers).
  Task 4: Based on the pilot and competencies, develop appropriate training and ongoing monitoring to improve service quality and consistency. (Project Lead: Cathy Brandenburg and Monica Rogers)
  Task 5: Extend to the rest of HSLIC by December 2017, by each employee writing three competencies for major aspects of their job. (Project Lead: OMT Managers)

Strategy 5: Reify HSLIC’s role at the HSC as a leader in Biomedical Informatics (BMI) research, training and scholarship:

Objective A: Support BMI training programs:
  Task 1: Revise and update HSLIC BMI Research Fellowship. (Project Lead: new BMI faculty/Phil Kroth)
  Task 2: Create an Accreditation Council for Graduate Medical Education accredited Clinical Informatics (CI) fellowship with Internal Medicine. (Project Lead: Phil Kroth)
Objective B: Increase awareness of extramural awards and BMI research:

Task 1: Partnering with the Translational Informatics Division, create an HSC-wide informatics web page highlighting BMI research and training programs across the HSC. (Project Lead: Phil Kroth)

Task 2: Develop a communications plan to promote awareness of informatics research activities. (Project Lead: Phil Kroth)

Objective C: Create a Biomedical Informatics Research, Training and Scholarship (BioMIRTS) Unit physical presence in the HSLIC building (216):

Task 1: Complete remodeling of 216 suite. (Project Lead: Cathy Brandenburg)

Task 2: Create a plan to co-locate the CI and BioMIRTS fellows in HSLIC. (Project Lead: Phil Kroth)
