Formulating Research Questions

September 8, 2011.5:00-6:30pm. Med 2 Classroom

Print Name Legibly _____

Why do you think that formulating research questions will be important for your MPH degree?

- 1.
- 2.
- 3.
- 4.

Activity One:

Diabetes

Activity Two:

Substance abuse

Tips for Formulating Productive Research Questions:

- 1.
- 2.
- 3.
- 4.
- 5.

Activity Three:

Insert the *first* letter of your *first* name inside this box:

If your *first* name *begins* with the letter in the box, develop these crude beginnings of research questions now into refined, answerable questions below. Try to think in terms of frequency, prevention, or population characteristics aspects that you might want to include:

A-B: Child malnutrition

C-E : Contraception

F-H: Health disparities

I-M: Homelessness

N-P: Immigrants

Q-S: Immunizations

T-V: Obesity

U-Z: Pandemic flu

OR, you might select your own question, in consultation with the instructor.

Formulate a concise and productive research question below based on your first name letter above:

Discussion outcome:

Please return this completed worksheet to Dr. Eldredge when the lab ends in order to receive credit.
