Cystic Lesions of the Aerodigestive Tract: Anatomic Relationships and Differential Diagnosis

Matthew VonLoh, PGY2 Radiology Resident
Gamaliel Lorenzo, M.D. Assistant Program Director, Radiology Residency
UNM Department of Radiology

FINDINGS/DISCUSSION
Cystic lesions will be discussed from cranial to caudal, labelled 1-10:

1. NASOPHARYNGEAL SKULL BASE CELOCELE

2. ANTROCHOANAL POLYP

3. MEDIAN CLIVAL CANAL

4. PERSISTENT CRANIOPHARYNGEAL CANAL

5. RETENTION CYST OF THE MUCOSA

6. TORNWALDT CYST

7. RANULA

8. LARYNGOECELE

9. THYROGLOSSAL DUCT CYST

10. BRANCHIAL CLEFT CYST

REFERENCES

The findings discussed in this presentation are based on literature review and case reports. Further research is recommended to improve diagnostic accuracy and treatment outcomes.
