One of the ways in which we recognize our faculty at the University of New Mexico is through *Faculty Publications & Creative Works*. An annual publication, it highlights our faculty's scholarly and creative activities and achievements and serves as a compendium of UNM faculty efforts during the 1999 calendar year. *Faculty Publications & Creative Works* strives to illustrate the depth and breadth of research activities performed throughout our University's laboratories, studios and classrooms.

We believe that the communication of individual research is a significant method of sharing concepts and thoughts and ultimately inspiring the birth of new ideas. In support of this, UNM faculty during 1999 produced over 2,292 works, including 1,837 scholarly papers and articles, 78 books, 82 book chapters, 175 reviews, 113 creative works and 7 patented works. We are proud of the accomplishments of our faculty which are in part reflected in this book, which illustrates the diversity of intellectual pursuits in support of research and education at the University of New Mexico.
