Thata and Thisa

By Pauline Clark

Well folks, we am back again after a short layoff. We are very happy to say that the News will be on time all the time and will probably have lots of daily stuff next week such as comics and such. We wish to thank all you folks for being so patient with us in our efforts to give you a good paper. You folks may not realize it, but the News is one of the leading weekly publications in the state and it will be up to all of us, you and I and

the others. I am glad to say that I don't think I need point out the facts that you and I wish to keep on doing this work

A lady told me the other day of one of her neighbors who had a cow to sell and when she suggested a price she was told by the lady who owned the cow said, "Oh, that costs money, we are saving the money for the rent," and spent an entire day rounding up the prices and the next day another asking them to tell everybody in the neighborhood, and no one could get a rent. Now either of those people who are doing this or the person who told me about this should be ashamed of themselves, but the time you have taken to round the time and reach one hundred times as many people I pity you.

I see there is a new campaign in Central America against Midas. It seems that the cow is thought to be fat for the good. And the other that the cow was a barrier in Gallipolis for a few.
