CHICANO STUDIES PROGRAMS AT THE CROSSROADS: ALTERNATIVE FUTURES FOR THE 1980s

By
Luis Ramón Burrola
and
José A. Rivera
University of New Mexico

Introduction

Chicano Studies Programs across many university campuses are assessing their original missions in light of the economic constraints of the present and the potential role they might play the rest of the decade and beyond. Born in the heyday of Chicano Student activism in the late 1960s and early 1970s, the programs were formed in response to demands that the university curriculum was not reflecting the Chicano experience in traditional disciplines such as history, sociology, politics, literature and other fields. In relatively short order, curriculum was developed, faculty recruited and enrollment in the classes swelled.

Problem Statement

By now, most of the programs have acquired twelve to fifteen years of experience and their on-campus presence is characterized by diversity in scope, resources, visibility, administrative relationships, and also in the degree of institutionalization. The diversity of experience has never been documented. A search of the literature reveals that little is available pertaining to the collective history of
the programs, their institutional patterns, curriculum designs or their funding levels. Systematic data could prove very useful now that the programs are in the midst not only of self-evaluations but also as they confront the issues of the times.

Hard times have fallen on most institutions of higher education, especially on the disciplines of the humanities and social sciences. Since World War II, emphasis on technology has left a permanent mark on university priorities. Scientific breakthrough coupled with generous support for technological research has lured faculty and student interest into the fields of hard science and "high tech." In short, the declining interest in the humanities and social sciences, the academic core of Chicano Studies, has become serious and could become chronic in the years ahead.

Meeting the challenges of the 1980s will be difficult as the continuing recession affects state support for higher education. Revenue shortfalls have affected and will continue to affect all programs that receive state appropriations. Institutions of higher education in the State of New Mexico, for example, just recently received a mandate to curtail expenditures and to save $6.5 million, with the University of New Mexico having to reduce costs by some $3 million. In states such as California and Texas that maintain large university systems, fiscal impacts may be even more pronounced. Reportedly, financial difficulties at the University of
California at Riverside has resulted in the proposed "dismantling" of the Chicano Studies Program there. Budgetary cutbacks for the new fiscal year will be problematic for most public universities and no doubt the reductions will impact instructional budgets across the board. Very likely, however, the humanities and social sciences will assume a disproportionate burden as universities opt to protect the growth trend in the sciences and the applied fields of high technology.

The fiscal reductions may have a profound impact on the Chicano Studies Programs as they complete their self-evaluations and strive to expand their missions into research, publications and other areas. Cutback economics could mean that only essential courses will be offered, practically ending all opportunity to experiment with new curriculum and with interdisciplinary courses. The end result could be a reduction in faculty positions or perhaps the elimination of some programs altogether.

The growing conservatism in the country may also affect the future of Chicano Studies Programs. The backlash from the political right may resurrect the "reactionary attitudes" present at the time El Plan de Santa Bárbara was developed some thirteen years ago. This backward swing of the pendulum coupled with the politics of retrenchment threaten the survival of many university programs, Chicano Studies and otherwise, which do not assess their options for the future and take steps to realize their ideals.
Purpose and Method of the Study

The present study, "Chicano Studies at the Crossroads," began last November at the University of New Mexico with the idea of carrying out a small research effort that would serve to frame the issues of greatest concern to Chicano Studies Programs. The study was organized under the auspices of the Southwest Hispanic Research Institute with the collaboration of the UNM Chicano Studies Program and with the input of twelve knowledgeable respondents in as many university campuses in the West and Southwest. The twelve respondents were selected to serve on a Delphi Panel for a period of three months as they received and returned, by mail, two separate questionnaires requesting that they identify common issues affecting or likely to affect Chicano Studies Programs. All twelve panelists were current or past program directors, coordinators or had otherwise experienced Chicano Studies Programs firsthand.

The Delphi Panel was chosen as the research technique* for a variety of reasons. First, the study could be conducted via short questionnaires which could be exchanged by mail without having to convene a study group. Second, the Delphi

process assured anonymity to all respondents, an incentive for them to address the issues unrestrained and forthrightly. Third, the Delphi approach lent itself to the exploratory nature of the study in the sense that the panelists and their collective experience would generate informed judgements on the subject at hand. And fourth, the issue areas identified and later ranked by the panel held the promise of stimulating further study and dialogue by the staffs of Chicano Studies Programs.

The questionnaires for both rounds were developed at the University of New Mexico by a study team organized to oversee the project.* In the first round, the panelists were provided with broad discretion as to their choices for top issues of concern to Chicano Studies Programs. To aid in the collation of responses, however, the instrument did provide a minimum structure. In brief, the twelve panelists were asked to nominate the key issues, problems, initiatives, trends and future developments affecting or likely to affect Chicano Studies Programs in the next decade (1983-1993). The timeframe for the future was kept consistent in all communications with the panelists. In round one the panelists were asked to nominate "surprise events" in the future that could

*Study team members included Ramón Luis Burrola, Tobías Durán, Rita Martínez-Furson and José Rivera.
emerge and impact the programs positively and negatively.

The questionnaire concluded with an open-ended question asking each panelist to write a short narrative on what the future holds for Chicano Studies Programs in general.*

When the questionnaires from round one were returned, the study team checked each one for completeness and for preliminary analysis of responses. The team was well satisfied with the overall attention placed on the questions in terms of the corresponding entries, level of detail, etc. There was no doubt that the panelists had understood the sense of the questions, and that they had replied after careful thought and with a great deal of frankness.

By design, and as noted earlier, the questions had been phrased to solicit wide-ranging issues, utilizing a combination of semi-structured and open-ended questions. The study team compiled a master list of the responses and collated them into major categories in preparation for a round two questionnaire. In all, fifteen distinct items were identified, seven of which were then classified as "current issues affecting Chicano Studies Programs" and eight as "possible issues that may affect Chicano Studies Programs in the near future."

*See Appendix I for blank copy of questionnaire used in round one.
In the round two questionnaire* the panelists received a summary list of the fifteen items formulated now as "issue statements." For the set of current issues, they were asked to examine and compare the seven items and then rank each one according to a scale of "most important" to "least important." In brief, the issue statements addressed: (a) Need for Curriculum Redesign, (b) Perception of Programs as Peripheral, Marginal and Lacking Legitimacy, (c) Need to Improve Faculty Permanency and Quality, (d) Programs Operate in Atmosphere of Political Conservatism, (e) Decline in Student Enrollment, (f) Lack of General University Community Interest, and (g) Concern Over University Cutbacks and Financial Impacts. Likewise, the set of eight possible future issues were included. Here the panelists were asked to rank them according to a scale of "most likely to occur" to "least likely to occur." The eight issue statements listed were: (a) Programs Will Emphasize Academic Quality, (b) Courses will Become More Career Oriented, (c) Renewed Interest Due to Increase in Chicano Population, (d) Renewed Interest Due to Growing Importance of U.S.-Mexico Relations, (e) Programs Will be Eliminated and Courses Transferred, (f) Programs Will be Consolidated with Ethnic Studies, (g) Broadened Support Due to Renewed Militancy, (h) Program Expansion into Research and Other Missions.

*See Appendix II for blank copy of questionnaire used in round two.
Results from Rounds One and Two

Tables A and B, following, display the major issues nominated by the panelists in round one and subsequently ranked by them in round two. Table A lists the issue statements (abbreviated form) of current interest in the same order as they appeared in questionnaire two. The scale of importance, from one to seven, tallies by matrix cell the number of panelists who rated each issue statement as to its relative importance,* thereby showing the distribution of rankings within each issue. The final rankings across all items resulted in the following order of importance to the panelists:

<table>
<thead>
<tr>

program expansion into research and other related missions. The need for curriculum redesign was selected as the top priority in terms of current issues, while program expansion ranked at the top of future agendas most likely to occur. Ranking second from among the futures issues was the prediction that the Chicano Studies Programs will likely emphasize academic quality in the coming decade.

The importance placed in the academic and research areas appears to respond to a frequent comment in the round one questionnaire that the programs as a group were affected by a general perception of marginality. By itself, the issue statement in round two on the perceived lack of legitimacy also rated high on the scale of importance: as shown in Table A, this issue ranked second on the list of seven possibilities. The related issue of lack of general interest in the programs by the university community was not far behind, appearing as the fourth most important issue. The need for continued professional development on the part of Chicano Studies faculty also made the list as a major issue statement, the fact that it ranked sixth out of seven current issues does not necessarily lessen its importance of having been nominated as a real issue.

The concern over university cutbacks and the possible impacts on Chicano Studies Programs, of course, was not surprising. Apart from having been nominated as a major issue by several panelists, Table A shows it as the third most
important issue presently of concern to the programs. The panelists were not asked to translate potential cutbacks to any of the scenarios or possible futures listed on Table B. Of interest, however, is the fact that the panelists did not rank program termination as among the most likely futures. Instead, the panelists as a group thought other outcomes were more probable. For example, the possibility of Chicano Studies Programs being consolidated with other Ethnic Studies ranked higher than termination as an event likely to occur, ranking third versus fifth on the list. Overall, though, and as reported earlier, an increased emphasis on academic quality and program expansion into research and other missions were selected as the alternative futures most likely to occur.

Of the nominations affecting renewed interest in the programs, the growing Chicano population rated higher than other possible factors. Whereas this item ranked fourth in likelihood of occurrence, renewed interest due to the growing importance of U.S.-Mexico relations ranked fifth. The possibility of broadened support due to renewed militancy on college campuses, presumably by faculty and student groups, was rated as the least likely future.

Two issues were nominated directly around student issues. Table A shows that decline in student enrollment in Chicano Studies classes was of concern to the panelists although it received a ranking of sixth out of seven in terms of relative importance. In Table B the possibility of courses becoming
more career oriented tied for fifth out of eight possibilities.

**Conclusions: Scenario Themes for Future Study**

Mainly the Delphi Panel Study was organized to solicit the top issues of current concern as well as likely developments that will affect the Chicano Studies Programs in the coming years. Due to limitations of time and resources, the modest study was carried out only through two rounds of input from the Delphi Panel. The feedback from the Panel, however, suggests many possibilities for future research. As a preliminary design, the study team submits the following scenario themes for consideration by other researchers:

**Scenario A:** Status Quo Scenario stressing program maintenance, self-preservation, minimal or no expansion with a few retrenchment impacts but overall continuation of the programs as they now exist campus to campus; basically a holding pattern with no real determination of the ultimate character of the programs.

**Scenario B:** Consolidation/Absorption Scenario where many Chicano Studies Programs would be combined with other Ethnic Studies Programs on campus as one variation or perhaps a more direct absorption of the Chicano Studies curriculum into the traditional disciplines as another; "permanency" might be achieved but with the trading off of autonomy and Chicano control.

**Scenario C:** Obsolescence Scenario where some Chicano Studies Programs no longer serve a recognized university purpose and coupled with the need to conserve scarce resources as well as recognition of substantial national conservatism, universities justify elimination of all "peripheral" programs related to the declining enrollments in the social sciences and humanities, an action which does not single out Chicano Studies Programs per se but no matter.
Scenario D: Program Development Scenario where Chicano Studies Programs successfully expand their original instructional missions by adding components in research, publications and community outreach; supplemental resources from on-and off-campus would be sought and acquired although competition for new funds would intensify accordingly; links to community development activities, such as Chicano leadership training would become more common; Chicano Studies courses would lean toward professional preparation of students into new careers.

Scenario E: Post-Revisionist Scenario where the field of Chicano Studies would increase in importance to academicians and researchers who perceive the field as an extension of the growing interest in Borderlands Studies, Hispanic Politics, etc.; the growing Hispanic population added to a new era of U.S.-Mexico relations surfaces the need for more studies about and by Chicanos, particularly for use in public policy discussions with a focus on borderlands issues; Chicano Studies would outgrow the earlier revisionist approach and focus more on knowledge-building around issues at the cutting edge of the Chicano experience; centers of excellence would emerge from campus to campus as the programs specialize in areas of the field in line with their resources and natural interests; a "publication explosion" results, signaling a permanent field of study.

Most of the Chicano Studies Programs were introduced in the late 1960s and early 1970s at scores of colleges and universities as a response to student grievances that the mainstream curriculum in the traditional disciplines ignored vital elements of the Chicano experience. Part of the initial mission of the programs has been accomplished as evidenced by the introduction on many campuses of new courses, special topic seminars, the recruitment of Chicano faculty to teach the courses, including some permanent faculty by now tenured in the departments, and on some campuses, research components
have been added to stimulate new areas of study in and out of the classroom. The full story has never been told. The challenge of the 1980s, however, may not be to tell a story about the past, but to create a new vision for the future.
Appendix I: Round One Questionnaire

II: Round Two Questionnaire
Appendix I: Round One

QUESTIONNAIRE: Background Information and Instructions

1. Purpose: The attached questionnaire is designed with a twofold objective, firstly to gather basic information about each of the Chicano Studies Programs participating in the study and secondly, to solicit nominations of key issues that are affecting or are likely to affect the Programs at large in the next decade (1983-1993).

2. Process: The questionnaire includes a total of 17 items. About half of the items can be completed simply by a checkmark or by an entry of a specific numerical response (Section One). The other half of the items call for short, narrative responses that can be entered without having to look up any reference material (Section Two). These latter responses, however, do require careful thought and reflection just prior to entering the specific comments.

3. Time Required: A trial run of the questionnaire indicates that all items can be completed in about an hour. Please read the questionnaire all the way through once before starting to enter the responses so that you can become familiar with the instrument as a whole, but also, so that you can get a "feel" for the differences across the questions (especially those in Section Two).

4. Confidentiality: The analysis of responses will be presented in aggregate terms with no reference whatsoever to your particular responses or to the Chicano Studies Program with which you are affiliated now or in the past.

5. Questionnaire Results: Once the general responses have been analyzed and recorded, you will receive a summary report of all responses for a second round of participation (mid-February). After the second round, the summary findings will be presented at two upcoming conferences:

(a) the National Association for Chicano Studies Conference in Ypsilanti, Michigan (April); and,
(b) the Chicano Studies Section of the Western Social Science Conference in Albuquerque (April).

Whether you are able to attend any of the conferences or not, you will nevertheless receive a copy of the final paper concluding the study.
QUESTIONNAIRE

Section One:

Background Data on Chicano Studies Program at your Institution

1. Year in which the Program was started? 19__

2. Check major components in the Program.
   ___ Instruction
   ___ Research
   ___ Student Services
   ___ Other(s) (Please specify)

3. Does the Program lead to and offer a degree(s)?
   ___ Yes
   ___ No

3a. If yes, at what level?
   ___ Bachelor's
   ___ Master's
   ___ Other (Please specify)

4. Number of faculty affiliated with the Program?
   ___ Full-time
   ___ Part-time & Adjunct

5. Average number of students enrolled in Chicano Studies classes per semester? ______________

6. Does the Program have Departmental status?
   ___ Yes
   ___ No

7. What courses are offered officially through the Program and the cooperating departments? (Please attach a current, available list).

8. How is the Program organized internally and within the university administrative structure? (Please attach a current, available organizational/administrative chart).
9. (Please attach any other available information about the Program, for example, brochures, annual reports, etc.).

Section Two:

Nomination of key issues, problems, initiatives, trends, events and future developments that are affecting or are likely to affect Chicano Studies Programs at large in the next decade (1983-1993).

10. Please nominate the top two ISSUES of any kind, that are presently of vital importance to Chicano Studies Programs at large. (Please enter below two short sentences or phrases).

1. ________________________________________________________________

2. ________________________________________________________________

11. Nominate the two major PROBLEMS presently confronting Chicano Studies Programs that you are familiar with.

1. ________________________________________________________________

2. ________________________________________________________________

12. Please identify any present INITIATIVES (by the Programs) you are aware of to resolve the kinds of problems noted in question 11 above.

1. ________________________________________________________________

2. ________________________________________________________________
13. In your observation of or experience with Chicano Studies Programs over the past few years or so, can you identify a couple of noticeable TRENDS in the structure, purpose or general operations of the Programs? (Please nominate the two trends that you consider of the highest significance.)

1. 

2. 

14. Looking now to the FUTURE of Chicano Studies Programs, i.e., the next ten years or so, please nominate the top two issues or problems that the programs will most likely face.

1. 

2. 

15. Apart from your response to question 14 above on the most likely future items, please nominate two "SURPRISE EVENTS" that could emerge in the next ten years that would affect the Programs in a positive way.

1. 

2. 

16. What about two "SURPRISE EVENTS" in the next ten years that would affect the Programs in a negative way? (Please nominate two).

1. 

2. 
17. Lastly, please enter a general statement below as to what you think the future holds for Chicano Studies Programs (the next ten years or so).
Appendix II:
ROUND TWO QUESTIONNAIRE

Part I: Current Issues Affecting Chicano Studies Programs

Instructions:

Below is a summary list of the major issues nominated by respondents in the Round One Questionnaire. Please examine and compare the seven items and then rank each one according to a scale of most important to least important (1 = most important, 2 = second most important ......7 = least important). As your frame of reference, please consider not only the Chicano Studies Program at your institution but also keep in mind other Chicano Studies Programs you are reasonably familiar with.

Dear Sir:

The Clearinghouse on Rural Education and Small Schools (CRESS) is part of the Educational Resources Information Center (ERIC), a national information system designed to store and disseminate educational literature. ERIC/CRESS is responsible for acquiring the most significant educational literature pertaining to American Indians, Mexican Americans, migrants, rural areas, and small schools, as well as outdoor education.

As the Information Specialist for Mexican American Education for ERIC/CRESS, I am greatly interested and concerned with collecting and making available resource materials on Mexican American education. To help us secure pertinent documents, would you please send us the most LEGIBLE copy(ies) available of the following:

"Alternative Futures for Chicano Studies Education: Scenarios for the 1980's"
(Paper presented at the 25th Annual Meeting of the Western Social Science Association, Chicano Studies Section).

Please notify me if there is a charge before sending the requested document. If you do not have the requested material, please indicate an alternate source.

Thank you for your assistance.

Respectfully,

Manuela L. Quezada-Aragon
Information Specialist for Mexican American Education

MLQ-A/mc
Enclosures
WHERE DO DOCUMENTS IN ERIC COME FROM?

They come from YOU!

WHAT HAPPENS TO A CONTRIBUTED DOCUMENT?
1. A thank-you card is sent when document is received.
2. If accepted, a reproduction release must be obtained from the author or sponsoring agency.
3. The document is catalogued, abstracted (no more than 200 words), and indexed (using the ERIC thesaurus).
4. Completed documents are shipped each week to a Central Processing Facility (Bethesda, Maryland).
5. After technical processing and filming, documents are announced in RESOURCES IN EDUCATION (RIE), ERIC's monthly announcement journal.
6. You receive notification of the announcement of your contributed document along with a complimentary microfiche of the document.
7. Your document is now available from the ERIC Document Reproduction Service (EDRS).
8. Elapsed time from contribution to announcement is usually 2-3 months.

HOW CAN YOU CONTRIBUTE DOCUMENTS TO ERIC?

We need one black-and-white copy of the clearest print available (an excellent xerox is acceptable).

You may contribute directly to the clearinghouse most appropriate for your paper, or we will be glad to transfer the document if it is relevant to our clearinghouse.

The process is facilitated if you include an author abstract and an ERIC reproduction release (supplied upon request).

On the back of this page is a list of the kinds of documents presently found in the ERIC data base. We solicit these or any others you would care to share.

We will be glad to answer any questions you may have concerning contributions. Please direct your inquiries to:
