NORTH AMERICA'S biological field stations, such as the Sevilleta Long Term Ecological Research Field Station in Socorro, N.M., have long been home to a rich legacy of research results. In a paper published in the April issue of the journal *BioScience*, researchers affiliated with the National Science Foundation's Long Term Ecological Research (LTER) Network and other groups state that few people realize the value of the data and specimens held at field stations – until an event such as a disease outbreak or environmental disaster triggers their use.

LOBO ENERGY, INC., a non-profit corporation of the University of New Mexico, is currently looking for an energy conservation educator to assist with the implementation of the university's new campus-wide comprehensive energy conservation program. This program involves completing building energy audits, coordinating building system adjustments with appropriate maintenance and utilities personnel and encouraging members of the UNM community to work together every day to change habits and assure that energy is only being used when it is needed.

INSPIRE ANDERSON Marketing (I AM), a student-run marketing agency at the UNM's Anderson School of Management, is hosting two information sessions for those interested in a career with the Central Intelligence Agency's National Clandestine Service. This is part of a project the students are doing for the Agency. Both hour-long events will be held Tuesday, April 14 in the Isleta Conference Room at the UNM Student Union Building. The first session begins at 11 a.m. and will be followed by an afternoon session at 2 p.m. Seating is limited.
