VOLUME 1.

ALBUQUERQUE, NEW MEXICO, SATURDAY, AUGUST 15, 1891.

NUMBER 34.

JUSTLY INDIGNANT

The People of Santa Fe Denounce the Spanish Paper in this City.

New Mexico.

A rousing meeting of citizens, irrespective of religious creed took place at the court house last night, the object being to protest against an article which appeared in *El Defensor del Pueblo*, published at Albuquerque, of which Juan Jose Herrera is the proprietor, and in which article the editor attacks the worthy Archbishop Salpointe, his immediate predecessor, and the Catholic clergy generally of this territory. The court house was packed to its fullest capacity. Mr. M. Hess Dunlap called the meeting to order and Hon. T. B. Catron was by acclamation chosen to preside as chairman. Upon taking the chair, Mr. Catron, speaking in Spanish, explained the objects which had called forth this assembly and denounced in unmeasured terms the unbecoming assault which had been made upon the Catholic clergy of New Mexico by this bastard publication at Albuquerque under guise of friendship for the Spanish-American, working men of this territory. His address was a forcible and eloquent one throughout, which touched a responsive chord in the heart of every fair-minded man present, as shown by the frequent applause.

At the close of Mr. Catron's address the organization was completed by the election of Hon. L. Spengler, M. Hess Dunlap, C. M. Crocker and Prof. A. F. Handeher as vice-presidents of the meetings, Mr. Lohrdo Baca as secretary and Mr. Jose D. Sena, Jr. as interpreter.

On motion a committee of nine was appointed to draft resolutions expressing the sense of the meeting on the subject under consideration. This committee was composed of Messrs. Antonio Oriz Salazar, Aniceto Abeyta, L. Spengler, Henry Becker, C. M. Crocker, Q. Monier, A. F. Handeher, C. M. Crocker and B. M. Read.

While this committee was out attending to its duties stirring and appropriate addresses denouncing this outrage upon civil and religious liberty were made by Messrs. R. E. Twitche, J. D. Sena, Jr., Come Alarid and B. M. Read. The speakers took occasion to emphasize the late lamented Archbishop Lamy, his worthy successor, Archbishop Salpointe, and the Catholic clergy of the territory generally.

Appended are the resolutions in full:

Whereas, the paper entitled *El Defensor del Pueblo*, has in its issue of August 1, 1891, in an article, which may be qualified not only as indecorous, but indecent, attacked the memory of the illustrious, highly deserving and ever-lamented Archbishop Lamy; and whereas, the said article is in itself an assault upon the character and integrity of our prelate, the illustrious J. B. Salpointe, and of the vicar general, Rev. P. Eguillon, and other worthy ecclesiastics particularly, as well as of the clergy and religious orders in general, and

Whereas, the said article is in itself an aggregate of falsehoods, which fully affect the feelings of anyone who directly or indirectly has been acquainted with the deceased prelate was distinguished, and

Whereas, the memory of these accomplished men appeals to the feelings of every son of the New Mexican soil and arouses his indignation against the cowardly attack made upon his cherished memory;

Resolved, That we denounce the said article as the vilest perpetration ever committed, and emphatically condemn all its contents.

21. We condemn the said paper and declare it to be a scandalous, vicious and immoral publication, representing in its tendencies unworthy of a civilized community.

22. We know to the public as Herr Kyle, King of the Air. Peter was seen recently in Kansas City by Ernest Meyers. This morning Warren Burgess and Russell, two young boys, were out on the mesa riding a broncho. The animal threw the boys off, and then kicked Warren. Artie was not hurt. Dr. Warren was found by Dr. Hope in an unconscious condition and taken home. He will have to remain indoors several days.

Miss Jennie Chilcott has returned to her home, after an enjoyable visit to her cousins, Misses Maud and Maud. This morning Warren Burgess and Russell, two young boys, were out on the mesa riding a broncho. The animal threw the boys off, and then kicked Warren. Artie was not hurt. Dr. Warren was found by Dr. Hope in an unconscious condition and taken home. He will have to remain indoors several days.

6th. We recommend to all those who love and desire justice, to avoid and prevent, by all legitimate means the circulation of the paper mentioned, and should any of them have subscribed to it, suggest to them that for the sake of the good name of their own families, they should suspend their subscriptions at once.

7th. We, the Catholics present in this mass meeting, from the bottom of our hearts offer our thanks to those gentlemen who, while differing from us in matters of religious creed, still have taken substantial part in this meeting in vindication of offended justice.

8th. The secretary be instructed to remit a copy of these resolutions to the Most Rev. Archbishop Salpointe, to the Very Rev. Father P. Eguillon, to the director of the college of San Miguel, and to the superiors of each one of the convents of this capital, and to cause these resolutions to be published in the *Revista Catolica*, in *El Sol de Mayo* and in every paper published in the capital, and the territory in general.

Respectfully submitted,
ANTONIO ORIZ Y SALAZAR,
ALEXANDER F. HANDEHER,
LEONARD SPENGLER,
BENJAMIN F. READ,
CHARLES M. CROCKER,
J. HENRY BECKER,
CHAS. M. CROCKER,
ANICETO ABAYTA,
QUINTEZ MONIER.

A Case of Jealousy

El Paso does not appear to take kindly to suggestion, made first, we believe, in these columns, that the convention which will assemble in that town on the 21st of September to consider the extension of the Denver & Rio Grande as well as the project for the construction of a road between El Paso and Trinidad. Both projects could be considered in the one convention without conflicting with each other. El Paso is interested in both roads, for it needs both of them. But as the people of El Paso called the convention, outsiders should not try to force themselves into it against their will. We, therefore suggest to the people of Albuquerque that they invite the delegates whom Denver and Pueblo will send to El Paso to stop in Albuquerque for the purpose of meeting delegates from Santa Fe, Albuquerque, Los Lunas, Socorro and Las Cruces in considering the project for the extension of the Denver & Rio Grande.

If El Paso does not want the larger convention, which the consideration of both projects would bring together, it ought not to be forced to receive it. But to a Denver man, it looks rather peculiar that the people of El Paso do not extend a welcome to Santa Fe and to Rio Grande valley towns—more especially since the extension of the Rio Grande would be of enormous benefit to their city. Presumably, the El Paso people know what they are after, but this is not the way that Denver would act under similar circumstances.—Denver Republican.

New Mexico's Grand Army

The first Grand Army post in New Mexico was organized at Santa Fe, Wednesday, October 9, 1887, with the following named charter members, viz: H. H. Heath, David A. Shultz, H. R. Whitling, Jose D. Sena, Wm. Breiden, H. M. Davis, Saml. B. Wheelock, Thomas V. Knapp, Thomas S. Tucker, John E. Wheelock, Charles C. Byers, Geo. T. Martin and John E. Cole.

This post was known as McLean post, No. 1, department of New Mexico, G. A. R., and within the next few years the following named posts were organized and mustered: Wingate post, No. 2; Dodd post, No. 3; and McPherson post No. 4. Those who served as department commanders were Gen. H. H. Heath, Capt. Henry M. Davis and Gen. G. A. Smith. Under their administration New Mexico was a "provisional department" until 1874, when all the posts were disbanded. In 1881 the Grand Army was revived in this territory and Carleton post and others were organized, and the work given a fresh impetus under the influence of the late Gen. Atkinson as department commander.

Get an Exhibit for the Fair

The county and the city of Santa Fe must be creditably represented at the coming territorial fair at Albuquerque; the indications are that the attendance will be very large and that people from other parts of New Mexico and eastern Arizona will take part or attend the fair.

For the purpose of the fair the convention of the "publican league clubs" will be held, for the railroad convention to take place, consideration of the extension of the Denver & Rio Grande via Santa Fe, and the Rio Grande and Albuquerque, which the county can make a very superior exhibition of its magnificent and rich soil, its fine antiracite and bituminous fire, its fine superb fruits of all descriptions and its garden truck and cereals, and to work and get up the exhibit.—*El Comercio*.

Received His Comps.

The editor of the *Star* and family acknowledge a complimentary invitation to the territorial fair to be held at Albuquerque, September 14-19 inclusive. The fair promises to be the most interesting and complete in every respect of the kind held in New Mexico, and the editor is pleased to note the fact that a number of Arizonians contemplate being present, and if it is in the range of possibilities the *Star* family or some of them will by their presence answer the compliments of Mr. C. C. Hall the president of the fair association.—*Tucson Star*.

Town Election at Gallup

The town election at Gallup, to select a board of trustees and marshal, came off Monday, and was orderly conducted, a light vote being polled. The following candidates were elected: Trustees—Alexander Bowie, John J. Keegan, Edward Hart, Frank Reitz and Wm. F. Kuehnbecker; Marshal—Cade Selvey. They are all good men and will make first-class officials.

RAILROAD RAILS

J. Welch, a machinist of the Raton shops, is in Texas on a sixty day lay-off.

About 2000 tourists have visited the Yosemite valley from San Francisco alone this season.

Ed. Boylan, who has been doing switching duty at Deming for the Southern Pacific, is in Las Vegas.

John Campbell, fireman on the northern division—that is at Raton, has gone to Kansas City for a vacation.

The Union Pacific has stopped running tourist sleeping cars. The low rates hurt the Pullman car business.

Engineer F. P. Stultz, on the extreme western division of the Atlantic & Pacific, is off on a thirty days' vacation.

Tommy Clancy, a brakeman well known to some of the railroad boys here, has recovered from a severe case of typhoid fever.

Mrs. W. F. C. Gibson, wife of an engineer at Needles, has returned to him after a visit of a few months with relatives at Gallup.

With a rate of one cent per mile nearly every man, woman and child in New Mexico living on a railroad will visit the Albuquerque fair.

Conductor A. Moody, a popular Atlantic & Pacific bell cord manipulator, is on duty again after a leave of absence of thirty days.

I. B. Harris, civil engineer, is now running a line for the Santa Fe line from Temecula to Vista, Cal., with instructions to find a sixty foot grade.

There is a great deal of activity in railroad circles in Florida, owing to the discovery of phosphate and the rapid development of the industry within the past year.

W. S. Hancock, master mechanic at Needles, a brother of "Our George" is off on a needed vacation. During his absence, Mr. Cochfield, will assume his duties at Needles.

The Atchison will run five special trains from different points in Colorado for the accommodation of visitors to Rocky Fort on "watermelon day," which is the third of next month.

D. B. Robinson, late general manager of the Atlantic & Pacific, leaves the city Saturday night for San Antonio, Texas. He at once assumes control of the San Antonio & Aransas Pass road.

Says Needles Eye: Albuquerque is all topsy-turvy over the loss of Mr. D. B. Robinson. He was one of the best and most progressive citizens that town ever had and we do not wonder at the sadness of her citizens.

Locomotive 1333, Pittsburg division Pennsylvania railroad, during the last year traveled 140,000 miles in its two daily round trips between Pittsburg and Altona, each a distance of 147 miles, and in that time it said to have required no repairs.

By recovering its bridge facilities at Omaha, the Rock Island can use 100 miles of connecting roads built last year, the cost of which appears in the floating debt account, over which there has been so much comment on the part of railroad wreckers.

Circulars have been sent by traffic managers of some of the Western railroads to their Eastern agents instructing them to urge coal dealers to lay in their supplies at once, in order that some of the cars may be sent West to help move the great grain crop.

The new card time, which went into effect last Sunday, does not materially change the running of passenger trains in New Mexico. Dining cars were added to trains between Denver and Pueblo, and more chair cars put on. When will such easy traveling reach the south west?

Advance proofs of the introduction to Poor's manual of railroads for 1890 have been received. The tables are exhaustive and interesting. From them it is learned that in five years ending with 1889 railroad mileage increased 31,241 miles, or 29.8 per cent. Capital investment increased \$2,022,543,435, or 26.1 per cent.

Such lively times as the present have never been witnessed in the history of freight movement on the Southern Pacific's local lines. If the company had not anticipated the great rush by ordering many new cars, it would not be in a condition to handle a great deal of the fruit and grain freights that are now being offered.

The Southern Pacific company is re-laying twelve miles of track on the California Pacific division, between Susan and Sacramento, with seventy-pound steel rails. The old rails will be used on some of the valley lines, where heavy engines are not necessary. The steel rails used in this reconstruction are the heaviest in use anywhere this side of the Missouri river.

The Canadian Pacific has received information that owing to the great promise of the crops in Manitoba and the northwest, the Canadian Pacific railway company has ordered fifty new engines and 1500 box cars to transport the season's harvest to the seaboard. It is estimated that it will require ten trains daily for seven months to move the crop.

A rather curious practice is followed by some of the Baltimore and Ohio engineers on the eastern division, who are noted for making a smooth stop with a passenger train. Just before the train

stops, and while the brakes are still on, the throttle is opened and the engine pulls out hard for two or three revolutions, this tends to overcome the high rate of retardation which always occurs at the last part of a stop, and makes the rate of stopping more uniform.

It is announced that a syndicate has been formed which agrees to guarantee to provide the Union Pacific with all the money it needs to take care of its floating debt during the next three years. Messrs. Gould, Sage, Dillon, Ames, Dexter, Atkins and Dodge constitute the syndicate. Jay Gould issued to take an interest of \$5,000,000 in the syndicate and Russell Sage \$1,000,000.

A San Antonio, Texas, special dispatch says that attorneys representing the New York bondholders of the San Antonio & Aransas Pass railroad have filed an amended petition in the district court. The object is, if possible, to obtain a rehearing of the case and a reversal of Judge King's recent decision, whereby the local creditors were given preference over the bondholders. About \$165,000 of the railroad's assets are held in New York. This is the road over which D. D. Robinson assumes control.

The Raton Reporter says: Engine 753, Engineer Wize, while placing a car of coal to the chutes at Morley, met with a serious accident. It seems that after getting the car to the top of the chute the engineer reversed his lever with the intention of stopping, but one of the valve stems broke and the engine continued to move, pushing the coal car over the end of the chute, the engine tank following. Engineer Wize and his fireman thought the engine was going over also. Both jumped. Mr. Wize was painfully injured about the back, but it is thought not seriously.

They are getting exceedingly warm. The democratic land grant attorneys and corporation creatures on the democratic territorial committee rush frantically to print and deny that any alliance exists between themselves and the white cap organizations in San Miguel and Bernalillo counties, and that they are not responsible for the denigration and the mouthings of the white cap leaders and their papers like the *El Defensor del Pueblo*, *La Voz del Pueblo* and others. Their denials are not believed by sensible people at all acquainted with the facts.

During the last campaign the democratic executive committee advanced and paid over to the San Miguel county white cap leaders the sum of \$1,700 for supporting for delegate Antonio Joseph; during the past six weeks \$500 in cash were paid out by said committee for the purpose of moving *El Defensor del Pueblo* from Las Cruces to Albuquerque and establishing that sheet there, and what is more the promise was then made in black and white, that the sheet and its editor should have \$500 more in six months and much material and in the next year's campaign. The denials of the land grant nabobs and white cap bosses of the democratic executive committee will avail naught. They can tell these little pleasant fictions till doomsday, but they will not be believed by any one who knows them; by their works ye shall know them; and by their works these gentry will be known. New Mexican.

Report in Scotland

New York, Aug. 14. A dispatch from Glasgow, Scotland, says that elaborate arrangements are being made for the reception of the American Canadian football team, which will arrive there tomorrow. A reception committee will meet them at the depot and the lovers of the game will turn out in full force and give the visitors a hearty welcome. The team proposes to play a series of international games to determine the relative merits of Englishmen and Americans as football players. All matches will be played under the association rules, and the visitors will have some lively scrimmaging in order to vanquish their British cousins.

Carabinieri Competition

The twelve highest scores at the preliminary carbine cavalry competition on Aug. 12, at Fort Wingate, resulted as follows: Foley, private, 2d reg. troop, 153; Rosenberry, corporal, third regiment, troop G, 158; Carter, second lieutenant, third regiment, troop G, 156; Simpson, corporal, third regiment, troop I, 155; Henry, sergeant, second regiment, troop E, 155; Durholz, sergeant, second regiment, troop D, 154; Andrews, corporal, third regiment, troop B, 154; Lehman, sergeant, third regiment, troop B, 152; Heard, first lieutenant, third regiment, troop K, 151; Finnigan, corporal, tenth regiment, troop A, 149; Ford, sergeant, tenth regiment, troop H, 147; Farthing, corporal, second regiment, troop C, 147.

Managing

Richard Magallid White, one of the New Mexico commissioners of the world's fair, is in the city to-day, on his way home from Chicago, and will stay over to attend the entertainment this evening. He reports the condition of the work in this territory as very encouraging, and thinks New Mexico will be well represented. There is a good deal of interest manifested among the people in the "big show," and there is no reason to believe that the territory will have such a display as will do it a great deal of good.

Ayer's Hair Vigor

Ayer's Hair Vigor restores color and vitality to weak and gray hair. Through its healing and cleansing qualities, it prevents the accumulation of dandruff and cures scalp diseases. The best hair dressing ever made and by far the most economical.

THE MANAGER

There has been a good deal of talk in all the papers about who is to succeed Mr. Robinson as general manager of the Atlantic & Pacific, and the subject is one that immediately concerns the people of Albuquerque, since we are more directly interested in the matter than any other community. We have come to recognize the Atlantic & Pacific as our road, and very properly, too, because this has always been its headquarters, and the only big town on the line. But whoever may succeed to the management, we may rest assured that nothing will be done to the injury of Albuquerque, because the returns, from year to year, have shown such a rapid and regular increase of business here that it is to the interest of the company to do whatever it can to foster and encourage the trade of this point. Railroads are not governed by the personal likes or dislikes of officials, but by business considerations, and experience has shown the Atlantic & Pacific people that it would not be "business" to do anything to displace two interests of Albuquerque.

The most pleasant opinion is regarded to the future management of the road is that it will be in the hands of Mr. A. A. Robinson, former vice president and general manager of the Atchison, Topeka & Santa Fe. The Atlantic & Pacific is now a part of that system, and there are very many and strong arguments in favor of having the entire system under one management, but the talk about putting the line under the charge of the manager or superintendent of the Southern California company, it seems to us, is entirely without any good foundation. To put the Southern California under the charge of Atlantic & Pacific officials, would be entirely reasonable, but to reverse the order and make the Atlantic & Pacific officials an annex to Southern California, would be a very striking case of tail wagging the dog.

But whatever the outcome of the matter may be, Albuquerque has nothing to fear; of course, we would much prefer to have the road under the charge of a man friendly to our interests rather than one unfriendly or indifferent, but whatever the disposition of the new manager may be we may rest assured that no policy will be adopted that will injure Albuquerque, because the said road has a greater interest in the growth and prosperity of the town than any individual in the town, and railroads can always be relied upon to look out for their own interests.

If, as we believe it will, the road passes into the management of the general manager of the Santa Fe system, it will be under the control of one who is entirely friendly to Albuquerque and who has full faith in the future of this place, and the superintendent to be put in immediate charge of the line will probably be one of our own citizens, who can always be relied upon to do anything for the interest of the town not inconsistent with the interest of the company.

THE BEST WE HAVE

Whatever criticisms may be made upon our other claims, those of us that live here know that in this part of the Rio Grande valley we have the best climate in the world—a climate that will keep those well that are in health, and will restore to health those who are sick. Our claims in this regard do not rest alone in our own opinions, but are substantiated by the judgment of all those from abroad who have been here to see for themselves.

Statistics gathered from the officers of the United States show that there are at this time more than fifteen millions of people in this country who are afflicted with lung troubles in some form or other, and since the climate of this vicinity is better than that of any other on the continent for people of this class, why not press the point vigorously upon the attention of people abroad and leave other features to come afterwards?

We believe that Albuquerque is a great place for a man who desires to go into manufacturing of any kind, and we believe, also, that it is a grand location for one who desires to go into mercantile business of any kind, but we know it is a good place for a person to come to who is afflicted with any kind of lung disease, in its earlier stages. Then why not turn our attention to that feature which we are sure of, rather than to those which there might be doubts about? Let us advertise the climatic advantages of Albuquerque all over the country and make this the greatest health resort in the United States.

MONEY IN CIRCULATION

While the national bank circulation continues to decline the total amount of all kinds of money in circulation continues to increase. The twelve months since August 1 of last year witnessed a decline of about \$17,000,000 in the volume of national bank notes. On the other hand, the total circulation was increased by over \$28,000,000. Of this increased circulation over \$12,500,000 consisted of gold coin. There was an increase of nearly \$3,500,000 in subsidiary silver. There was a falling off in the volume of gold certificates amounting to about \$16,700,000. Silver certificates on the other hand, show an increase of about \$8,500,000. About \$43,000,000 of treasury notes were issued under the act of July 14, 1890. The total circulation of all kinds on August 1 amounted to \$1,500,022,815.

NATIONAL SANITARIUM

Dr. Danter Well Pleased With His Visit to the Mountains

Dr. Danter went to Camp Whitecomb yesterday morning in company with a committee from the Commercial club, and spent most of the day at that popular mountain resort having an excellent opportunity to judge from practical experience of the character of the air and water, as well as a chance to talk with patients who have been saying there for some time. The doctor expressed himself perfectly satisfied with the conditions existing there, and thinks the advantage of a mountain resort of that kind as convenient to town adds a great deal to the value of Albuquerque as the proper point for a National Sanitarium. There are a number of consumptive patients now at Camp Whitecomb and the doctor spent much of the time of his visit in conversation with them informing himself as to the effect of the climate in different cases. Every one who had been there for any length of time, stated that his health was improving, and that he was growing stronger and the actual experience of the patients themselves is worth more than any amount of theory. The only objection he expressed to a mountain location was the fact that there was so little opportunity there for giving the patients useful employment, and thus, he thinks, is one of the most important considerations, since it is next to impossible to restore a consumptive patient to comparative health unless you can give him some employment that will keep his mind off his physical troubles. This is why the doctor intends to advise the association which he represents to secure a tract of land in the valley or on the mesa if water can be had and divide it into small tracts of two to four acres each, to be devoted to fruits and vegetables, and put a family on each tract. This would give the patients the benefit of the climatic conditions as well as something to occupy his attention—it would keep his mind away from his disease, would keep him out in the air, and would make him, in whole or in part, self supporting—and to a majority of patients the last named point would be a very important consideration.

THE RAILROAD CONVENTION

Santa Fe joins heartily with Albuquerque in the movement for a convention at this place in favor of the extension of the Denver & Rio Grande into the lower Rio Grande valley, and we have every reason to believe that similar reports will come from all the other towns interested in the matter as soon as we have time to hear from them. The people of all those towns to be affected by the proposed extension are deeply interested in the movement, and we do not see any reason why the convention at Albuquerque on the 15th of September should not be one of the best and most influential meetings ever held in the territory.

Presbyterian Statistics

New York, Aug. 14.—Rev. William Henry Roberts, D. D., the stated clerk of the General Assembly of the Presbyterian church, has completed the compilation of the statistics presented by the delegates of the last meeting of the general assembly in Detroit, and the result will be sent out to the various Presbyteries of the country this week. The report will show that there are now in this country 806,736 communicants reporting to the general assembly an increase of thirty-one thousand during the past year. There are also 70,070 churches, an increase of 176. The number of Sunday school teachers has increased in the same period by 26,217, making a grand total in May last of 983,280. The Presbyterian church is liberal with its money, as witness the fact that during the past year its contributions exceeded four million dollars. Twenty-two thousand adults and twenty-six thousand infants were baptized during the year.

THE EFFECT OF THE TARIFF

The decline in exports since the McKinley tariff has gone into operation has created almost a panic in various parts of England. The newspapers there take an exceedingly gloomy view of the situation and some of them have already discovered the fact that the statements of the free traders to the effect that the new order of things will seriously damage the United States are false and deceiving and that the shoe is on the other foot. A falling off of several millions in English exports has already been discovered during the few months in which the new tariff has been in operation. The question naturally arises as to where the goods purchased to make up this deficiency are obtained, where the money for them is spent and who is directly benefited thereby. Under the old order of things millions of dollars worth of manufactured goods were annually imported from England to the United States. Large sums of money were sent abroad to pay for them which found its way into the pockets of English manufacturers and a large proportion of it was again paid out to English workmen. Under the present condition of affairs American goods are substituted for imported articles, the money is retained at home and much of it is paid out to American workmen and by them in turn is handed over to our home merchants and farmers.

The late heavy drain of gold from the United States to Europe, which has caused so much uneasiness on the part of the financiers of the country can never be repeated as long as the present tariff upon imported goods remain in force. The reason is simple. The people of the United States will not find it profitable to import any more than a small fraction of the huge quantities of merchandise which they have purchased in Europe in times past, and when we are not in debt to the people of that country it will be a difficult matter for them to obtain much of our money. Of course some of it can be withdrawn by means of the sales of American securities held on the other side, but the money must come here first with which to purchase our stocks before they can be sold back to us.

THE LADIES WOULD ABANDON COSMETICS

If the ladies would abandon cosmetics and more generally keep their blood pure and vigorous by the use of Ayer's Sarsaparilla, naturally fair complexions would be the rule instead of the exception, as at present. Pure blood is the best beautifier.

Mrs. Dr. Moore and daughter, Miss

Oreta, of Lawrence, Kansas, are visiting the parents of Mrs. Moore, Major W. A. Rankin and wife. The visitors will remain over the heated term.

[From the Daily, Aug. 9.]

J. N. Shiffon, ex-mayor of Socorro, is at the Armijo today.

Dr. T. G. Ames, the dentist, is making a business trip through the Pecos valley.

Major Maynard and wife took last night's passenger train for a two month leave of absence in the east.

Jose Haca, a general merchant of Park City, near Socorro, is here to buy a stock of goods. He registered at the Armijo.

James Crockett, a brother of Charles Crockett at the City restaurant, has returned to his home at Oange City, Kan.

Mrs. A. Harsch is celebrating her birthday today. She is holding a party this afternoon and is being congratulated by a legion of friends.

The eldest daughter of June Hunt died at Baton and District Court Clerk Charles F. Hunt left for that place last evening to attend the funeral.

Daniel Stamp, a young man employed by William Farr to repair his boiler in the sawmill factory, caught his hand in the machinery and the thumb was badly mangled.

Davison Superintendent Mudge and Tison master Kasky, who have been working in the yards here during that delayed strike, returned to San Mar last night.

Mrs. Lamm and son, A. Lamm, not the daughter as was first reported, arrived here last night from Denver. Lamm, Lamm, the neck son, is reported very much better this morning.

Dr. Smith has been suffering for the past few days from white oak points which he contracted while out in the mountains last Sunday. The poison is quite disagreeable to the doctor.

W. A. Bassell, general passenger agent of the Atlantic & Pacific, headquarters at San Francisco, is in the city, and company with D. H. Robinson called this morning at the Commercial club rooms.

L. Besinger, Harry C. Hardy, Patrick H. and W. L. Putnam, soldiers from Fort Huachuca, Arizona, came in last night. They left on a later train for Fort Wingate, to take part in the capture there.

F. G. Pratt, the groceryman, has been confined to his room with sciatica for the past few days. He is up today and probably going out to hear music this evening, where his wife and children are camping.

J. H. Ballard, a cousin of M. H. Ballard, formerly station agent here, is back from Mexico, where he has been an engineer on the Mexican Central. He will probably accept a "sit" on the Atlantic & Pacific.

Rev. James A. Meadell, synodical secretary for the Presbyterian church in New Mexico and Arizona, will preach in the First Presbyterian church of this city, tomorrow morning at 11 o'clock. He is cordially invited.

Lavern Schellenberger, carpenter for H. Drury, while working at the Green street property, met with a painful accident, by having one of the panes of glass break and fall on his left hand, cutting several of the fingers. A doctor sewed up the cuts.

Mrs. M. E. Harrison, owner of the property at the corner of Railroad avenue and Second street, left last night for her home at Beatrice, Neb. Frank Harrison, her son, went to Santa Fe, but before going left the contract for a concrete sidewalk around his mother's property.

Prof. A. E. Blount, of the faculty, and A. Whitmore, of the board of regents of the College of Agriculture and Mechanical Arts of New Mexico leave tonight for Washington to attend the meeting of the Association of the Agricultural College and experiment stations which convenes on the 12th inst.

Peter Zimmerman or Kyle, who formerly drove a hack in this city years ago, went to El Paso, where he soon became a balloon ascensionist, is now with L. A. Norris, the celebrated aeronaut, and is known to the public as Herr Kyle, the King of the Air. Peter was seen recently in Kansas City by Ernest Meyers.

This morning Warren Burgess and Russell, two young boys, were out on the mesa riding a broncho. The animal threw the boys off, and then kicked Warren. Artie was not hurt, but Burgess was found by Dr. Hopewell in unconscious condition and taken home. He will have to remain in bed several days.

Miss Jennie Chilcott has returned to Webb, Col., after an enjoyable visit to her cousins, Misses Mame and Maud Simpson of this city. The evening before Miss Jennie left a "hammock" party something new in this section was ordered her by a number of young gentlemen and ladies. Some who participated in the party are still suffering from the falls.

Brickman Hays, coming south on night train No. 35, met with a painful accident this morning. Between this city and Wallace his train parted and he was end came back on the front portion with a violent bump. Hays was sitting in the cupola of the caboose and when the cars struck his head was run through the window, cutting him in several places on the face and head. Dr. Wroth was summoned on the arrival of the train and dressed the wounds.

Albuquerque can at last boast of having as fine an orchestra as there is on the side of the Mississippi. Messrs. A. Boling, N. D. Mauro, J. W. Forrester and Chas. Stever have joined hands and organized what has long been wanting—an orchestra, first-class in every respect. With such founders as the above

named gentlemen, every one of them is an artist on his instrument, we have no doubt as to the success, and Albuquerque hereafter will be delighted by the sweetest strains at its social and concerts.

Married in New York
From a marked copy of the Middleton, (N. Y.) Times the following marriage item is clipped:

A happy event, which was fore-shadowed by the announcement that appeared in the Times several days ago, consummated in the village of Chester at 3 o'clock this afternoon. At that hour the marriage of Rev. T. Cumming Heattie, formerly pastor of the Presbyterian church there, but latterly of Albuquerque, New Mexico, and Miss Ruby P. Miller, daughter of Guy Miller, Esq., an old and prominent resident of Chester, was solemnized in the chapel of the church.

The ceremony was performed by Rev. David Heattie, past of the Presbyterian church at Southtown, father of the groom, assisted by Rev. Dr. Burrows, pastor of the Presbyterian church at Chester.

The chapel had been handsomely decorated by loving hands with red flowers and ferns and presented a most beautiful appearance.

There were some seventy-five invitations sent out, but these were confined to the immediate relatives of the respective families, and to the Sunday school class of the bride. Miss May Miller, sister of the bride, was maid of honor. The guests were Albert Chamberlain and Joseph R. of Chester.

The newly married couple leave this evening for an extended bridal tour of some three weeks during which they will visit the principal places of interest in each of the states.

They will return here and remain until late September 1, when they expect to leave for their new home in the far west in the Territory of New Mexico, where a dwelling is in process of construction for them.

There was a large array of handsome and costly wedding presents.

Rev. Heattie is the excellent and popular pastor of the Presbyterian church, his wife, while the bride is a sister of Guy Miller, Jr., the worthy clerk at the common house of Summa & Summa.

The happy couple are expected to arrive here, their future home, sometime in September, when a reception will be tendered them.

Who Can It Be?
An American familiar with the Spanish language, is reported traveling through the bowels of the Sandia mountains in an almost nude condition. He was at San Antonio, Texas, days, wearing only a breechcloth to hide his nakedness. He was offered clothes, but refused stating it was impossible for him to wear clothing since he had been weaned poisoned. He was then given food, and it was about eight time he was reported to remain there. He would not consent unless assured that no person would occupy the room with him during the night. He is represented as being about 5 feet 6 inches tall, well built and about 30 years of age, acted rather queer, but carried on a good conversation, both in the English and Spanish language, and stated that he was on his way to Los Lunas to see a brother who had promised to cure him. The man left San Antonio without giving his name. The Mexican residents of that town believe that the wanderer is slightly demented but he did not appear in the least unkind.

Death of Judge Axell
The news was received at Santa Fe yesterday of the death of Judge Samuel H. Axell which occurred at Morristown, New Jersey, on Thursday last. Judge Axell was born in Ohio in 1819, and had a busy career. He went to California in 1851 where he was three times elected district attorney and twice elected to congress, from San Francisco.

He was appointed governor of Utah in 1874, by Gen. Grant, and in 1875 transferred to the governorship of New Mexico. In 1876 he was one of the judges at the great centennial at Philadelphia, and in the fall of 1878 was superintended as governor by Gen. Lew Wallace. In 1882 he was appointed chief justice of New Mexico by President Arthur. On May 1, 1885, he tendered his resignation which was accepted to take effect on the 25th of the same month. He has since that time resided at Santa Fe, which he considered his permanent home.

A Mad Wolf
The people of San Antonio, in the Sandia mountains, are considerably worked up over the appearance in their midst of a peculiar looking beast. Their other night Manuel Gutierrez had occasion to go out into his wheat field, when he was startled by seeing a few feet in front of him a strange animal. For a time he could not move so thoroughly frightened was he, but on recovering his composure he ran rapidly back to his house and summoned to his aid several of his neighbors. They secured their guns, and on going to the wheat field the animal had disappeared. Gutierrez describes the beast as being about the size of a wolf, its eyes flashing fire and sunk back in its head, and its color gray. It has been seen several times and the Mexicans of San Antonio are under the impression that it is a mad wolf.

Premature
Ex-Congressman McLaughlin of the first ward, who a couple of years ago looked after the democracy his constituency, proposed this year to see that the Grand Lodge of Odd Fellows was run on business principles. So bent was his mind on the good time he would have and the legislation in which he would distinguish himself, that he forgot to consult his audience as to the time of the annual meeting. He went up to Raton Saturday night last, and not finding a committee and a brass band at the station to welcome him, he began to feel sick and wonder why the Ratonites were so inhospitable. Upon inquiry he was informed by the good people of that place that he had been elected to the Grand Lodge would not convene until the 17th inst. as provided in the constitution of the order. The ex-congressman remarks that he has returned loaded with more experience and less confidence than when he left.

LOCAL INVENTION.
Joe De Mars' New Lock and the Organized Company.

Albuquerque keeps up its reputation as a live, progressive American city in all lines that constitute genuine growth and material prosperity.

In no particular is it more distinguished than in invention and discovery, which have been so largely developed by American genius. While engaged in the arduous labor of developing a new country and in establishing a city which in a few years has assumed metropolitan proportions and influence, the active brains of its citizens have taken an even wider scope and in numerous instances subjected the forces of nature and the knowledge and skill of the scientist and the mechanic to inventions for the benefit of mankind.

Prominent among these inventions is a new lock invented by Mr. Joseph De Mars. It is a simple contrivance, but very effective. It is made of iron or brass and has only four parts, so that it is not liable to get out of order. The action of the lock is direct and easy. It is inserted in the lower sash of the window and has two actions. It either fastens the upper and lower sashes together or secures the lower sash to the window frame. These actions may be operated singly or together. By its use the two sashes may be firmly secured to each other, thus preventing rattling. The sashes may be locked together at any point and at the same time secured to the frame. In this way one may have the windows raised from the bottom and lowered from the top, and at the same time firmly lock the sashes to each other and to the window frame so that they cannot be moved.

There is no such lock now made that will do the same work. It accomplishes something that is needed. There have been lots of inventors who have endeavored to supply the demand for such a contrivance, but the result of their efforts has been some complicated machinery liable to get out of order, and very expensive. Mr. De Mars, after his attention was called to the matter by his own personal want, studied up the subject and by a fortunate inspiration conceived the idea which was afterwards developed into a working model and for which he received a patent. He was assisted in working out his conception into practical shape by the mechanical skill of Mr. E. McKinley. His invention combines those qualities that are required for success in utilization. It is simple, inexpensive, and supplies an almost universal demand.

Mr. De Mars has but recently returned from a trip in the interest of his patent. Wherever he went he met with the most unqualified encouragement. Architects, builders, hardware men and manufacturers, with no exception, pronounced the lock superior to anything on the market. He met, however, with the experience of most inventors. Those who were in a position to manufacture and sell the lock would not touch it unless they owned the patent absolutely and they were unwilling to pay Mr. De Mars anything that seemed to him to be at all reasonable.

Mr. De Mars was convinced by them that his original idea that his patent was a valuable one, was correct, and he was unwilling to part with it without adequate consideration.

While in New York he secured the contract for placing the lock on several large buildings now in course of erection, and in Chicago he received assurances that his lock would be placed on the buildings for the World's Fair.

At Bridgeport, Conn., he found that the locks could be manufactured at such a price as to afford a large profit even when sold to the consumer for much less than the ordinary and much inferior such lock.

Upon his return to Albuquerque Mr. De Mars attempted to raise some money for the purpose of manufacturing a sufficient number of locks to supply his contracts and to effect an introduction into the market, but he found that owing to the stringency of the money market he could not secure the requisite funds without seriously sacrificing his private property.

Under these circumstances and upon consultation with some of his friends, a joint stock company was organized with a capital stock of \$50,000, divided into 5,000 shares of the par value of \$10 each.

The following were selected as officers of the new organization:
President, Joseph De Mars.
Vice president, F. E. McKinley.
Secretary, Joseph E. Kuhn.
Treasurer, R. W. Hopkins.

Directors—Michael Mandell, R. W. Hopkins, Joseph H. Kuhn, F. H. Kent, Perfecto Arriaga, Charles E. Bonnell, Ben L. Jones.

As will be seen the new company is composed of some of the leading citizens of the city, and their names are a guarantee that the efforts of the company will be faithfully administered and the interests of the stockholders carefully considered.

The owners of the patent will place a few shares of stock in the treasury for sale for the purpose of raising a small sum of money to manufacture and introduce the locks.

Those who are acquainted with the merits of the lock are positive that the income from the sale of the locks will soon not only pay all the costs of manufacture, but add materially to the funds of the company.

It is the intention of the company to begin the manufacture of the locks at Bridgeport, Conn., utilizing one of the many manufacturing establishments of that busy city, but as soon as possible a plant will be established in this city, and the locks will be made here. All the officers of the company are peculiarly interested in the stock of the company, and are anxious to advance the interests of Albuquerque by the location here of manufacturing industries.

It will be a thoroughly home institution as all the treasury stock will be sold here.

It is to be hoped that the anticipations

of success indulged in by the promoters of the company will be fully realized, and no one who understands the mechanism and object of the invention, can fail to share the expectations of the most sanguine of its friends.

[From the Daily, Aug. 10.]
Editor Jones of the Flagstaff Democrat is in the city.

W. S. Burns has trimmed his whiskers. Let the improvements go on.

President Hall is at Las Vegas chatting with the people about the territorial fair.

A cement sidewalk is being laid in front of Lasser & Leachman's on Railroad avenue.

Frank Sheets has returned from the Las Vegas railroad hospital, much improved in health.

W. S. Williams of the Socorro Chief is taking baths at Las Vegas hot springs, and putting himself in fighting trim.

Col. Barredale left this morning on a buckboard for a trip through Lincoln county. He will be gone about ten days.

Charles F. Hunt, the court clerk who has been in Baton on the mission of buying a house, returned home yesterday.

It is understood that a "white cap" lodge has been organized in old town. The number of members is kept a profound secret.

Jesus Arriaga and family, who have been at San Lorenzo Springs, in the Sandia mountains, for the past ten days, returned home last evening.

Major Berry and Lieut. Saltmarsh, of the frontier were guests at Fort Wingate yesterday, returned home on this morning's passenger train.

Amador C. de Barea is no longer interested for the board of county commissioners. This morning, Mr. A. C. de Barea was appointed to fill the position.

One Smith, one of the postal clerks on the Santa Fe road, will take duty next month, and visit home in Illinois. He has not lost a day in four years.

Perfecto Arriaga recommends the opening of Fourth street to the Indian school, and the county board will probably adopt that route for the new county road.

The Albuquerque Gun club held a very interesting shoot yesterday, and Backus, Barnett, McVain, Lindley, Kuhn, and Pope made some excellent records.

Miss Lizzie Brockman, will leave the city tonight for London, N. M., on the receipt of a letter informing her that her sister, Mrs. Chas. Fetterly, was very sick.

The finance committee's meeting with splendid success in soliciting funds for the territorial fair. No one in the city can afford to refuse to assist this worthy enterprise.

Each of the three banks in this city have contributed \$100 to the territorial fair, and Manager Robinson, of the Atlantic & Pacific, has contributed \$200 to the fund.

Joseph Lantienko, an uncle of Adam Delois, who died on the mesa three weeks ago, to day assumed charge of the latter's property. Mr. Lantienko is a citizen of Chillicothe, Ohio.

F. M. Murphy, a prominent mining man of Prescott, Arizona, is in the city. He is on his way home from Colorado, and feels convinced that the road south from Prescott to Phoenix will be built.

Yesterday, "Reddy" Welsh, the humorist, appeared at the residence of William Ruby, and visited that gentleman and his family. This morning, a warrant was sworn out for his arrest, and Constable Priest met the fellow on Second street. "Reddy" went quietly to Justice Mad del's office, but as he was drunk and the complainants were not ready for trial, he was marched off to the city jail to remain until 6 o'clock this evening, when he will have a trial. Since winning the Saturday evening's glove contest over Stock, he thinks himself a regular pugilist and believes in his own mind that he can do all comers.

Territorial Taxes.
The territorial board of equalization adjourned today, having completed its labors. The taxable value of live stock in New Mexico was fixed as follows: Cattle \$8 per head; American stallions, \$150; ponies, \$25; stock horses, \$12.

In the matter of the appeal of the New Mexico Railroad company, regarding Sierra county's assessment of the Lake Valley branch of the A. T. & S. F., the value of the track was fixed at \$4,500 per mile.

The value of the Las Animas Cattle company's cattle was fixed at the regulation amount, \$8.

The A. & P. railroad grant in Valencia county was reduced from 50 to 30 cents an acre, and the Mitchell Bros' timber land in this county was assessed at 40 cents an acre.

In Bernalillo county the A. & P. grant lands were assessed at 30 cents and the Mitchell lands at 35 cents.

The appeal of the Sierra Land & Cattle company, asking that the assessed value of their goats be fixed at \$1 per head, was allowed.

Rev. Gentile's appeal from the action of the Bernalillo county authorities in assessing his property at \$10,435 was allowed, the amount being reduced to \$11,000.

The assessment of the Albuquerque Townsite company was increased from \$21,500 to \$22,074.

The property of Francisco Arriaga Otero in Albuquerque was reduced \$1,041, leaving it at \$14,727, and the Nicolas Arriaga estate was fixed at \$46,580 instead of \$50,532.

The assessment of the Southern Pacific railroad company was fixed at \$6,000 per mile, the board declining to grant the appeal from the Dona Ana county assessment.—New Mexican.

The trees along the streets are suffering for water.

LAS VEGAS DEFEATED.
The Maroons Add Another Flower to their Wreath of Victories.

Yesterday afternoon the reorganized Las Vegas team, organized for the special purpose of defeating the celebrated Maroons of this city, with a pitcher named Huggins, from Sioux City, Iowa, and that celebrated Baltimore catcher, Jack Chiles, to backstop him, came down, and the whole outfit was defeated in one of the prettiest games played on the home grounds. For seven innings the score stood 2 to 0 in favor of the Maroons, so close and effectively did the Las Vegas boys keep the champions from increasing their lead, and when with a base hit or a misplay could have had the score. The boys hit Maroons, the celebrated teacher of the Albuquerque, but he was awarded phenomenal support, both in and out of the field, and was able to keep the Maroons from increasing their lead, and when with a base hit or a misplay could have had the score. The boys hit Maroons, the celebrated teacher of the Albuquerque, but he was awarded phenomenal support, both in and out of the field, and was able to keep the Maroons from increasing their lead, and when with a base hit or a misplay could have had the score. The boys hit Maroons, the celebrated teacher of the Albuquerque, but he was awarded phenomenal support, both in and out of the field, and was able to keep the Maroons from increasing their lead, and when with a base hit or a misplay could have had the score.
