THE CIRT UNM NETWORK has been experiencing slow, intermittent or no connection from specific campus locations since the installation of new equipment to increase the campus gigabit backbone on Saturday, May 19 in the Engineering & Computer Engineering Building. The CIRT Networking Group is working with vendor engineers to troubleshoot these problems, but the causes have not been determined. System updates will be posted at <http://www.unm.edu/cirt/hotnews.html> as they become available.
