VOLUME 1.

ALBUQUERQUE, NEW MEXICO, SATURDAY, SEPTEMBER 26, 1891.

NUMBER 40.

TELEGRAPHIC.

Veterans Re-Union.
Des Moines, Iowa, Sept. 23. The sixth annual reunion of Crocker's celebrated Iowa brigade, opened here today. The attendance of veterans is larger than any previous year and many affecting greetings have been exchanged by members of the brigade who have not met each other before since the war. Crocker's brigade was organized April 27, 1862, on the fortieth anniversary of the birth of General Grant, and it was continued until the close of the war an unbroken organization. This was the former home of Gen. Crocker and in the matter of decorations and the providing of an elaborate program of entertainment, the citizens have taken special pains to make the occasion one of great interest and pleasure. The annual address will be delivered this afternoon by Maj. H. C. McArthur of the Fifteenth Iowa Infantry Volunteers.

Anniversary of a Poet.
New York, Sept. 23. A dispatch from Berlin says: The one hundredth anniversary of the birth of Theodor Körner, the German poet, is being celebrated by literary and patriotic societies throughout the Empire on a grand scale. Few men died more than Körner to advance the cause of German independence. He died the death of a hero on the field of battle when only twenty-two years old. His famous song, "Die Schützen am Grazer See," remains one of the most popular compositions in German literature and his lines have inspired many a young officer to deeds of glory. In the war against Napoleon in 1813 he was a member of the well-known Lützow Jägers or Rangers, the body of enthusiastic thousands that did much to worry Napoleon's armies, and his name lives in the poetry and songs of Germany.

Methodist Conference.
Oshkosh, Wis., Sept. 23. The annual conference of the Methodist church for the Wisconsin district opened here today. Its deliberations are presided over by Bishop John H. Vincent, of Buffalo, who has been especially assigned for the purpose. His selection gives great satisfaction, and for the first time in many years the gathering will be harmonious and peaceful. Bishop Newman, who has been a thorn in the flesh of Wisconsin Methodism, will be conspicuous only by his absence, and all the questions which have caused so much hard feeling in the past have been so disposed of that it will find peace.

The special race of 600 yards between the ponies of J. Edwards Priest and John Weismann, for \$50 a cage, will take place tomorrow afternoon, and the prize fight in which Mr. Tregot took a decided part, was won with ease by his pony.

"Spoko," the smart water spout dog of C. B. Hawley, named after "Spokane Falls," died yesterday. For several days "Spoko" showed signs of illness and finally he turned up his canine toes in death. He was a valuable dog and was a great pet.

Chas. E. Rodemeyer, an Atlantic & Pacific brakeman, who was called to St. Louis on receipt of the news that his mother was seriously ill, returned home yesterday night, in time to take in the funeral of his mother. The campaign committee sent out by the national association of democratic clubs will arrive here this afternoon and will receive a cordial reception. To night addresses will be made by Senator Faulkner, of West Virginia, and ex Gov. Chauncey F. Black, of Pennsylvania. There will be another mass meeting tomorrow.

Republican League Convention.
Scranton, Pa., Sept. 23. The annual convention of the State League of Republican clubs opened here today with a very large attendance. A feature of the gathering will be the fight between Congressman John Robinson and ex-Congressman John B. Hays for the presidency of the League. The fight has been made a personal one and has been characterized by great animosity. Robinson seems to be in the lead.

Coopers in Session.
Indianapolis, Ind., Sept. 23. An international convention of Coopers opened here this afternoon, and a large number of delegates have already arrived. Considerable business of importance to the trade of this country and Canada is to be transacted. The convention will be in session for several days.

A Monument to Hudson.
Atlantic Highlands, N. J., Sept. 23. The committee having in charge the erection of a monument to mark the spot where Hudson first landed on Jersey shore prior to his discovery of the Hudson river, last evening concluded to receive plans for a monument to be dedicated September 9 next, that being the day Hudson was driven ashore by a storm on the beach where now stands Atlantic Highlands, in 1609. At the same time will be celebrated the discovery of America by Christopher Columbus in 1492.

The monument is to be of great height. Placed on the highest point overlooking Sandy Hook point it will be the first thing seen by a foreigner as he approaches our shores.

Had a Bullet in His Brain.
Sioux City, Iowa, Sept. 24. The post-mortem examination of the body of Charles Barowski, which was conducted

RAILROAD NEWS.

O. L. Allen, traveling agent of the Wabash road, is around to day. The Union division is hard on engines. Several are in the shops there for general overhauling.

W. J. Spence, day car clerk at the Santa Fe freight depot, will leave today for a visit to Toronto, Canada.

Heavy rains all along the Santa Fe and Atlantic & Pacific roads, but no washouts have been reported.

The fall rainy season has come, regardless of the rain makers, and serious trouble from washouts is expected.

The Denver Republican now suggests Hon. Otto Mears as the next president of the Denver & Rio Grande railway.

Dr. Kaster, the Atlantic & Pacific surgeon, headquarters at the hospital here, is making a business trip over the road.

President Manuel of the Santa Fe, is making a semi-annual tour of the system. He will be in this city in a few days.

B. E. Truesdell, traveling agent of the Chicago, Burlington & Quincy, has just his pass over the Santa Fe and passed lines.

Arthur Keith, the Santa Fe's night car clerk, left today for Los Angeles with a sick brother. He will be absent about a month.

Tom Smith, freight conductor of the northern division in New Mexico, with his wife and sister, have gone to Chicago on a visit.

W. G. McConville, brakeman on the Atlantic & Pacific, is suffering with croup in his eyes. He is compelled to wear eye glasses.

The railroad boys are marrying at a lively rate. The approach of winter is doubtless causing such a movement toward the matrimonial altar.

Chas. E. Cramer's engine, No. 36, has been overhauled at the shops and is now bright as a new silver dollar. He will take it out on the road to day.

There is a rumor among railroaders that the shops at Raton will be removed, a part of the men and machinery going to Trinidad and a part to Las Vegas.

The Santa Fe pay car, which should have arrived yesterday, is behind time. Some of the boys, anxious to handle their monthly earnings, are waiting for the coming car.

D. B. Robinson, former manager of the Atlantic & Pacific, is expected here tomorrow evening, from Chicago. Mr. Robinson is on his way to San Antonio, Texas.

Owing to the decline in the freight business on the Las Vegas and Raton division one crew has been taken off temporarily. Conductor Burkhardt and crew are the victims.

Letters dropped in the box at the depot will not be mailed until the day following. Therefore, hereafter put your mail in the box intended for its reception at the postoffice.

J. L. Nash, an engineer on the Atlantic & Pacific, met with an accident at Barstow in which one of his legs was broken. He was brought to the hospital here this afternoon.

The Santa Fe dispatchers over the entire system have been granted a raise to the old salary paid in 1888, previous to the reduction of that year. The raise goes into effect October 1.

Conductors in making up their break-in-two reports, must be sure to give the cause in every case, stating whether line broke, pin broke or jumped out, chain broke or whatever the cause.

Jack Kilien, engineer on one of the Brooks engines, No. 77, running west of Winslow, is in the city to meet his wife's mother and her sister, who are expected tonight from Williamsport, Penn.

Thos. Horn, special agent of the Denver & Rio Grande express company, who has been visiting Las Vegas, used to scout through the Indian country during the troubles with the red devil.

Queer Victoria is opposed to fast railroad traveling. When she made her journey to Perth recently on her way to Balmoral her train went at an average speed of only twenty miles an hour.

The question of giving Albuquerque day trains, both on the Santa Fe and Atlantic & Pacific roads, is being agitated by the head officials. The railroad company would consult their own interests by such a move.

The zone system, which is practically a 2-cent rate when tickets for over 100 miles are sold, has been adopted by the Georgia Southern & Florida, and it is this that has led to its being boycotted by connecting roads.

The board of railroad commissioners of Kansas have inspected the Ottawa branch of the Santa Fe, and are now interviewing the patrons of the Missouri Pacific from Winfield to Larned concerning the passenger service.

Edward G. Allen, a train dispatcher at the Las Vegas depot, working at night, was found dead in the hallway of the old Hotel Buckingham, where he had a room, at an early hour yesterday morning. He had been out during the night indulging in some drinks. The coroner's jury returned a verdict that his death was caused by an attack of cerebral apoplexy. He was about forty-five years old.

Miss Lillian Hirst, who has been one of the excellent clerks at the Santa Fe freight depot, left last night for Detroit, Mich., and thence she will visit New York.

It is stated on good authority that when she returns to the city she will soon afterwards become the wife of a very popular young gentleman who is a frequent visitor to the metropolis.

Carl Holton, steam engineer on the Atlantic & Pacific, is in Omaha, Neb., and will assist Deputy Sheriff Heenan to bring John Connel back to Williams, Arizona, where he is wanted for breaking into freight cars loaded with merchandise.

A. Brandtetter, check clerk at the Santa Fe freight depot, and Miss Alice Griswold, were married at the Catholic church last evening. The ceremony was witnessed by a number of the intimate friends of the contracting couple.

In the future conductors will notify the trainmaster's office when they have extra in their train, giving the date and hour that the stock was loaded, and whether or not they feed on the cars, also, whether or not there is feed on board.

H. A. Tice will take the position of trainmaster of the eastern division of the Santa Fe that has just been vacated by the promotion of J. E. Hurley to the position of assistant superintendent of the Chicago division, with headquarters at Marcelino, Mo.

There are two large compound Mexican Central engines now at Trinidad being taken apart in order to get them through the Raton tunnels. These engines set up are far too large to come through the tunnel, and are about the largest engines ever built.

Two Burlington boys, Omaha, named Frank Rosenbaum, better known as "Shaggy," and Fred Johnson, called "Bully," for short, settled their trumps the other day by entering a twenty-four foot rig and fighting a regular prize fight "Bully" won in ten rounds.

A man named Bart, who was driving a horse on the Nevada street crossing at Trinidad, was struck by passenger train No. 22 and killed. He was in a weak condition and his horse badly hurt. A cloud of dust prevailed at the time, and he did not see the approaching train, neither did the engineer see him.

M. D. Smith, the brakeman who had the ankle of his left leg broken in a recent wreck to the water train near Winslow, and who was brought to the hospital here for treatment, is reported improving nicely. He had a very narrow escape from a serious, if not fatal, accident.

E. L. Cooper, the extra freight conductor on the Atlantic & Pacific, at the depot, is suffering with brain trouble, is getting along as well as could be expected. He is not yet considered out of danger, but Drs. Kaster and Hines are giving him all possible attention and care are the victims.

WORTHY OF ATTENTION.
A suggestion made in these columns yesterday in relation to getting up a permanent exhibit of the products of the territory, is worthy of more than a passing notice. It is a plan, which, if properly carried out, may be made of great value not only to the town but to the whole territory. The city ought to rent one of the rooms on the ground floor of the new club building for this purpose, and if invitations were then sent out to the various sections of the territory, to send in samples of their products, an exhibit could be gathered at very little expense, which would enable the visitor to see at a glance what minerals, fruits, vegetables and grains are produced in the various sections of New Mexico, and thus probably cause many who are looking for investments, to interest themselves in localities which they might never know anything about if it were necessary for them to make a trip to such places. And such an exhibit could be housed and cared for at very little expense.

None in fact, except the rent of the room. Las Vegas keeps such a display of the products of Southern California, and the people of that place all agree that it is one of the best advertisements for the country they ever had, enabling the stranger to see without the trouble and expense of traveling about from one point to another, just what each particular district has to offer. There is no manner of doubt of the fact that such an exhibit would be worth many times more to the town than it would cost.

Paid the Company.
Superintendent Mudge in conversation with the Reporter scribbled, expressed his entire satisfaction with the result of the one cent rate given during the fair. The receipts have amounted to as much or more than they would had the rate been one far the round trip, and the attendance at the fare and its consequent benefits to the interests of the territory, which it is the policy of the company to foster, have been increased. San Marcial Reporter.

JOHN GREEN of Oklahoma Territory has decided that there is no law under which Indian children could be placed in government schools without the consent of their parents. It is extremely doubtful that the judge has the right view of the matter. If he has, the quick or the defect is remedied the better. To educate the young savage is a measure of public safety, and no consideration should be paid to the remonstrances of Lo pere, who would prefer doubtless to raise the teacher's scalp rather than the intellectual standing of his young one.

A Chapter of Royal Arch Masons will be instituted at Raton this week.

TERRITORIAL TATTLE.

Las Vegas needs another hotel. White Oaks is organizing a militia company.

The ore mills of Grant county are running steadily. Another big mineral strike has been made at Dolores.

Hay cutting is in progress all over northern New Mexico.

San Juan and Colfax, Taos and Rio Arriba will harvest big crops this year.

The business men of Santa Fe will organize a new social and commercial club.

The members of the National Laborers' association will soon visit Santa Fe.

W. L. Morgan, a mining man from Denver, has located with his family at San Pedro.

Magdalena note: Jonas Nelson is contemplating the erection of a hotel to cost between \$50,000 and \$100,000.

New water works have set Raton to growing at a lively rate, not a vacant house in town but a home building every where.

Dr. G. W. Harrison returned to Burlington from Europe accompanied by his family. The family have been absent for several months.

Governor Prince has appointed thirty delegates to represent New Mexico at the opening of the Sioux City exposition October 1 to 17.

On the 10th day of the present month the San Germine festival will take place at Pueblo Taos. It is expected that many people will participate in the festivities.

The Denver News and Times, Pueblo Press, Springfield Stockman and Raton Range take occasion to pay high tributes to the memory of the late Col. Ned Wynkoop.

Dan Taylor has taken a contract to open the Rosemont at Dolores, owned by W. E. Gortner, W. G. Ashdown and S. D. Baldwin. A rich streak of tungsten has just been struck in this promising property.

There are at present thirteen insane persons in Santa Fe county. Five insane women and one man are in such condition as to require confinement, and these are in the county jail. To care for them, costs about \$5 per day, or \$1,825 per year.

Harry S. Clancy, of Santa Fe, declares San Juan county to be the most prolific fruit region in the west. Wm. Lack of Farmington, has an orchard of 1,500 trees that will yield him 100,000 pounds of fruit this season, and he mentions another San Juan citizen who has a rack of 10,000 tons of alfalfa, which sells at \$4 per ton.

The Territorial Fair.
The great territorial event of the year, the fair, to which we have all been looking and for which we have all been making plans, is over. While we all have a sigh of relief at the end of the long and arduous task, the complete realization of all our hopes. It was a success in every point. The attendance was large beyond expectation, reaching on Thursday about 10,000 people on the grounds. The city was crowded during the entire week with visitors from Arizona, Colorado, and almost every nook and corner in New Mexico. While these crowds taxed the capacity of the city yet Albuquerque was equal to the occasion and the accommodations were good as could be expected under the circumstances. The agricultural, mineral and fruit displays in the exhibition building, while not as general as by counties as they might have been, were large and highly creditable to the territory. The fruit display was particularly fine and fully warrants the claim that New Mexico is equal to any other place on the continent as a fruit growing country. The live stock exhibits were also of great interest and credit to the stock growers. The sporting features including horse racing, baseball, fireman's races, military drills, etc., were the best seen in the southwest. The military display, both by regulars and militia were very enjoyable features of the week, as was also the trades carnival and parade on Thursday evening. Several elaborate balls were given during the week at which were gathered many of the most prominent people in the territory as well as the youth and beauty of the metropolis. Large and profitable territorial conventions were held, including a railroad convention to devise ways and means of extending the narrow gauge system from Santa Fe to Cerrillos, Albuquerque, political conventions, industrial conventions of various kinds, and religious conventions. All these things not only brought together many of the leading people of the entire territory, but made the week the most useful and profitable one in its history. It must redound greatly to the credit and profit of New Mexico, to have made such a splendid exhibit of its industries and natural resources, and then to have manifested such life and interest in it as to attend in such unusual numbers. Both Albuquerque and the territory are to be congratulated on the splendid success of the eleventh annual exhibition of the industrial interests of New Mexico—Santa Fe Sun.

Joseph says he is tired and is willing to let some of the other aspiring democratic statesmen have the democratic nomination for delegate next year.

For Sale—1,000 Barrels Native Apples, from the best Nurseries in the Rio Grande Valley.

A Car Load Rocky Ford Watermelons and Canteloupes.
Also large consignments of California Fruits.

MORE FAIRS.
A large number of the citizens of Las Vegas, seeing the great good that is being accomplished by the territorial fair at Albuquerque, have signed a call for a meeting to organize a society for the purpose of holding an annual district fair at that place. This is a movement in the right direction, and if the object of the meeting is carried out it will result in great good, not only to San Miguel county, but to the entire territory. We cannot have too many fairs there ought to be one in each county, and the friendly rivalry that would exist among them would make them all better. But we want to call the attention of our friends in San Miguel county to the fact that they are making a mistake in organizing an eastern district for their fair. They ought to make it a northern district. They must remember that New Mexico is a big country, and the counties which they have included in their fair embrace a district covering five degrees of latitude. The time has come when the territory ought to be divided into districts for fair purposes, but the lines of the districts should run from east to west and not from north to south, because the difference in latitude between the northern and southern counties is so great that it will be impossible for them to get ready for a fair at the same time. Five degrees gives a very great difference even at the sea level, but in the case under consideration this difference is all most doubled by reason of a proportionate difference in altitude and altitude counts as much as latitude. A fair held at a time when the fruits of Elly were ready for exhibition would be at least two weeks too early for San Miguel, and if you should put it off till she got ready for it the date would be entirely too late for Elly. We have seen that fully illustrated at our own fair, and the exhibitors from San Miguel and Santa Fe know that they labored under a great disadvantage because of the fact that the exhibition came too early for them and their best fruits were not ripe yet, while Dona Ana complained that it was a week too late for her products to be seen at their best.

Every division of the territory for fair purposes should be by lines running east and west, so that all parts of the district would be in about the same latitude, and all be ready for the fair at about the same time. Until every county can have its own fair there ought to be a northern district composed of San Miguel, Santa Fe, Mora, Colfax, Taos and Rio Arriba, with an annual fair at Las Vegas or Santa Fe, and a southern district composed of Sierra, Grant, Dona Ana and Elly, with an annual fair at Las Cruces. These, with the territorial fair at Albuquerque, would enable the products of all parts of the territory to be seen at their best, and in their exhibitions the fairs would not interfere with each other, because, beginning on the south, one would be over before the next one north would begin. But it is impossible to show the fruits of the northern and the southern counties to good advantage at the same time.

A PERMANENT EXHIBIT.
We ought to have on permanent exhibition in Albuquerque a good collection of the products of New Mexico, such as maintained by the city of Las Angeles for Southern California, where a stranger coming to the town can go and inform himself in regard to the character and quality of the articles produced in the various districts of the territory. Such a collection should embrace ores, grains, grasses, fruits, vegetables, coal, salt, lumber, gypsum, building stone, and in short anything that the country produces, and if kept in a convenient place would be examined in the course of the year by a much larger number of strangers than would see it at the fair. We ought to commence on such a collection at once, and have it ready for visitors during the coming winter.

OF COURSE.

The agents of the agricultural department who wasted so much gunpowder and dynamite at El Paso a few days ago, now explain their failure to produce rain on the ground that "the conditions were not right." Undoubtedly that was what the trouble was, but what's the use of spending government money to produce rain by the use of explosives or anything else, if the work can only be made to succeed when "the conditions are right"—for

at such a time as that the clouds will rain of their own accord without any government aid. When the conditions are right the rain will come anyhow; what we want is to know how to make it rain when the conditions are not right. For instance, it would be of no particular advantage to us to know how to bring down rain in the vicinity of Albuquerque at the present time, because the conditions have been so favorable for the last few days that a very slight condensation would have caused the condensation of moisture in the upper air sufficient to make it fall in rain, a boy might have brought it down with a shot gun, but it would have been of very great advantage and value to us if we had been able to have caused this moisture to have gathered and fallen six weeks or two months ago. And the only value of the present experiment is in the fact that they may lead up to something that may teach us how to create proper conditions.

PUBLIC LIBRARY.
The public library may now be regarded as an assured fact; a very creditable sum of money has already been raised and, as the moneys say, there is a good deal more "in sight." Too much credit cannot be given to the public spirited ladies through whose energetic and untiring efforts this movement has been carried forward to a point where there is no longer any doubt of its ultimate success. They have worked under many difficulties and have raised all their funds thus far by public entertainments, which have cost them in every instance, more labor than would have earned the money received, at day wages. But now that the enterprise is fully on its feet, and people see that it is a reality, we have no reason to doubt that many liberal donations will be received from public spirited citizens who recognize the fact that the moral growth and development of the country are no less important than its physical growth, and the development of its physical resources. The public library goes hand in hand with the public school. We have already laid the foundation here for as good a public school system as can be found in any part of the country, and in the work which a few determined women have so successfully inaugurated we see the beginning of a public library that will be a credit to the city and the territory.

THE CATTLE OUTLOOK.
Although very copious rains have fallen over large portions of the territory during the past few days, the stock men all say that the water has come too late to be of any value to them. If the frost holds off till late the grass will grow a little, but it will not have time to mature, and will therefore be of no value for winter feed. Except in a few favored localities, the outlook for the coming winter is very discouraging. The rains during April and May gave promise of a very favorable season, but a long, hot summer, with absolutely no rain at all, caused all the changes to be so denuded that most of the cattle are going into the winter as poor as they usually are in the spring. What the consequence will be only too apparent, and the stock men who don't hang up the hides of more than half his cattle before spring will consider himself fortunate.

Not only in this territory, but in all other parts of the country, the range cattle business is surely and rapidly going to the wall. Not many years will elapse before all the great ranches will be things of the past, and our beef supply will be furnished by those who raise fewer and better cattle and make provision for feeding them and sheltering them during the winter. New Mexico is the best part of the whole country for the range business, but even here it will soon have to give way to better methods.

For many years Mr. B. F. Thompson, of Des Moines, Iowa, was severely afflicted with chronic diarrhea. He says: "At times it is very severe; so much so, that I feared it would end my life. About seven years ago I chanced to procure a bottle of Chamberlain's Colic, Cholera and Diarrhea Remedy. It gave me prompt relief, and I believe cured me permanently, as I now eat or drink without harm anything I please." I have also used it in my family with the best results. For sale by Thos. H. Burgess & Son, Druggists.

If we are all for statehood, why not begin to get together and urge the measure at the next session of congress?

THE RAILROAD CONVENTION.

The railroad convention of Friday and Saturday was a complete success in every particular, and gives us reasonable ground to hope that the line in the interest of which the convention was called, will soon become a reality. It seemed to show to the company the degree of interest that is felt by the people of this country in the proposed enterprise. Not only were all the points embraced in the call represented by their most prominent citizens, but a number of places not mentioned in the call, among which were Kingston, Silver City and Deming, presented delegations with a request for their admission, thus showing that the interest is not confined to those places immediately on the proposed route, but extends to all the adjacent country. All of New Mexico south of Glorieta is wide awake to the importance of the movement, and can be relied upon to aid in carrying out the work.

The convention on Friday provided for the appointment of a general committee to be known as the "committee of promotion," and this committee, which is composed of the most prominent and influential men of the district through which the proposed line is to pass, had a meeting at the rooms of the Commercial club on Saturday morning, and organized by electing Hon. H. B. Ferguson of Albuquerque, vice-president, and Gen. E. L. Bartlett of Santa Fe, secretary. At this meeting all the preliminary details were arranged, committees of active and energetic men were appointed to take charge of business in their respective districts, and the whole enterprise was put upon a practical working basis.

Mr. Patterson expressed unbounded enthusiasm at the extent and nature of the resources of this country, and said if the leading citizens of Denver could be made to realize the amount of trade which they might draw from this place alone, all the money necessary to build the road could be raised in that city.

The several committees appointed to gather information in regard to the products and resources of the country, are composed of active and intelligent men, and when the result of their labors is presented to the convention at its session which is to be held here on the 29th of November next, it will convince the railroad company and the public that such a line as that proposed will pay a good return on the money necessary for its construction.

BRIDGE BONDS.

In accordance with the action of the county commissioners at their last session, an election is to be held in this county on Wednesday of next week to vote upon the question of issuing the bonds of the county to the amount of fifteen thousand dollars for the purpose of building a bridge over the Rio Grande at Corrales, and fifteen thousand dollars for the purpose of building a bridge immediately south of Albuquerque.

The people north of us will attend to the Corrales matter, but they have no interest in the proposition to build a bridge south of Albuquerque, and that part of the question must be attended to by the people of Albuquerque, Bernalillo, Atascadero, Pajarito and Padillas. It is a matter of much importance to us.

The rich and populous districts on the west side suffer great inconvenience for want of proper facilities for crossing the river. There are times every year when it is impossible to cross the stream without going nearly a day's journey around to cross by the present bridge, and during those times when a bridge is most needed that is frequently impassable, and there is no way of getting across at all. A bridge located just south of town, at or near the point where the ford now is, will be a matter of great convenience to the people on the other side, and of much value in a business way to the town. There will be no doubt of the proposition being carried if we give it our attention, but as we have said above we must attend to it ourselves, since it is a matter that does not concern the people of any other part of the county. All that is necessary is for the people of the several precincts named to keep the business in mind and see to it when election day comes that a full vote is polled. In Albuquerque and the precincts south of here, there will be no opposition to the proposition, but the danger is that votes against it in other parts of the county may defeat it, and for that reason it is important that we should make arrangements for getting out a full vote.

THE WAY TO BUILD A TOWN.

The Deming Headlight, copies under the above caption, an editorial from last Tuesday's CITIZEN, and prefaces it with the following remarks:

"The following, from the Albuquerque CITIZEN, fairly illustrates not only the methods whereby the people of Albuquerque have brought their city to its present state of prosperity and growth, but also the philosophy of town building. It shows a pride of locality and an indomitable undivided energy that never did and never will fail. It is the way to build a town—and what builds towns will also develop and build up a state."

IN ORDER NOW.

The fair and the railroad convention was each in its way a grand success, and each accomplished work that will result in great benefit to Albuquerque, but in the midst of our rejoicing over what has been done, we must not lose sight of what we still have to do—and the enterprise that now has the floor is the proposed bridge over the Rio Grande at a point opposite the Atlantic & Pacific shops. We called attention to this work in these columns yesterday, but we cannot too often or too earnestly urge upon the people of Albuquerque the importance of taking such an interest in the matter as will lead to the polling of a full vote. It is possible that the proposition to issue bonds by the county for

this purpose may not be opposed, and yet it is possible, on the other hand, that it may be, for there are a number of precincts in the county that have no direct interest in a bridge over the river at this point, and it would not be at all unusual for them to oppose a proposition which, they argue, would increase their taxes without conferring any corresponding benefit, and unless we take some interest in the matter, to see that our people are kept in mind of it, and brought out to vote, we may wake up after the election to find that the proposition has been lost. The Commercial club is relying on the people to look after everything of a public nature, and it has been suggested that the club appoint a "bridge committee" to stir up public interest in the matter and that such steps are taken as will lead to a grand vote. There will, of course, be no opposition to the measure in this part of the county, but that is exactly where the danger comes in, if there were a few persons here making a vigorous fight against it, that would stir us up and we would all turn out and vote, but as long as the opinion prevails that everybody is for it, a minority may stay away from the polls by reason of the most trivial matter, saying "there will be enough there without me." There is no danger of the proposition being defeated if those who desire it are not stirred up and come out and vote, but if those who are in opposition to it are not stirred up, it is possible to lose.

A railroad bridge has right of way in a legal contest as to all that claim for it as well as a thing for public utility to be built on the side of the highway, whether right or wrong, that an enterprise of such character is worthy of note.

Some time ago, Mr. Fred Harvey, proprietor of all the eating houses of the Santa Fe railway and who has made a large fortune out of the same, sent out a circular asking for an application to reorganize the company from putting dining cars on its trains, and to prevent it from stopping trains for needs of passengers other than those at which he had eating houses. A temporary injunction was granted, and when the case came up for hearing, a few days ago, the injunction was made permanent, and the Atchison, Topick & Santa Fe railroad company is thus commanded by the court to refrain from dining cars on any of its lines, but to feed all of its passengers at the eating houses of Mr. Fred Harvey and at no other places.

This may be, and doubtless is, according to the letter of the contract, but it is not required by the demands of justice, nor by the public interest or convenience. It may be true, as Mr. Harvey alleges in his petition, that those eating houses have cost him a large sum of money, but it is equally true that he has made it all back, three or four times over, and he ought to be willing now to let the public have a chance to be better accommodated. The dining car has become a necessity on all the great lines, and no eating house monopoly should be allowed to stand in the way of its coming on the Santa Fe. If he has such a contract as he alleges, and he probably has, then it should be set aside by the court on the ground that it is contrary to public policy.

AN AUDACIOUS PROPOSITION.

A gentleman from California now in the city, who visited the fair last week, says that he saw fruits of certain classes there which any competent judge would pronounce far superior to any of the same classes that can be raised in California. He mentioned especially the apples, pears and plums, and proposes to the Commercial club that if that organization will send him samples of such fruits renewing them from time to time as may be necessary, he will keep them on exhibition at the Baldwin hotel or some other equally prominent place in San Francisco, as "specimens of New Mexico fruits." To put our fruit on exhibition in the chief city of what is supposed to be the chief fruit district of the world, would seem to be a very audacious proceeding on our part, but the gentleman referred to assures us that it would be one of the best advertising arrangements we could make, for he declares that such apples as he saw at the fair last week cannot be grown in California, and he is confident that if they were once introduced, there the demand for them would be great. The demand for New Mexico apples would take all that we would be able to supply.

If those who had fine apples on exhibition last week will send in some of their best specimens, we are confident that the club will forward them, and, in that way, we can build up a market for our fruit in California, it will establish New Mexico's reputation as a fruit country all over the world.

TO THE POINT.

"The Judge," received yesterday, has a cartoon which sets forth the political situation better and more forcibly than it could be expressed in columns of words. On one side is a sign bearing the words "England Free Trade" and under this are a number of starving faces of Ireland, Scotland, England and Wales, appealing to the world for bread, and on the other is a sign with the words "Protection," and under this are a number of fat and well-fed faces, standing by the side of a placard in his hand which announces to the world that he has "A thousand million dollars' worth of food to sell this year." That expresses it all. Major McKinley and Speaker Reed, and all the rest, in all the speeches they will make this fall, will not be able to put the leading issue of the day before the people in a more forcible manner than this.

The magnitude of the persecution of the Jews by the Russian government may be understood when it is known that over eight thousand of these people, all engaged in business in Odessa, are under notice to depart.

WONDERFUL RESOURCES.

The Denver News had a full column in small type, received by telegraph, in reference to the proceedings of the Albuquerque railroad convention. The paragraph in relation to Mayor Thornton's

EDITORIAL NOTES.

Work for with the new county bridge. What has become of Col. Smith and his irrigation company?

A note in a big brick block will be erected in this city this winter.

At least fifty thousand dollars were spent in this city by visitors last week. It is building a number of new houses, houses this fall, and showing many signs of prosperity.

The people of New Mexico have no time to stop and listen to the few grocers at public enterprises.

New Mexico doesn't like Jay Gould, but it would like to hear that he had bought the Denver & Rio Grande railroad.

El Paso railroad convention, and many of them, in Las Vegas and White Oaks, are the only New Mexico towns represented.

El Paso has had a fine success, and it is a success that is not to be despised. There is no such thing as a free lunch, and it is not to be despised with some of the things that are being done in this city.

New Mexico doesn't like Jay Gould, but it would like to hear that he had bought the Denver & Rio Grande railroad.

THE RAIN MAKERS.

It is a fact that the rain makers are not the only ones who are making money out of the rain. There are many other people who are making money out of the rain, and they are not the rain makers.

A note in a big brick block will be erected in this city this winter.

At least fifty thousand dollars were spent in this city by visitors last week. It is building a number of new houses, houses this fall, and showing many signs of prosperity.

BROADGATE.

A convention was called at El Paso Monday of this week in the interest of a movement to build a railroad from Trinidad to El Paso—a line which, if built, would be a direct competitor with the Atchison, Topick & Santa Fe, and yet, that organization, instead of doing anything to discourage the movement, as it should by extending the courtesy of excursion rates to delegates on all parts of its line. That is an act of generosity such as is but rarely accorded to the credit of a railway company, and is calculated to give the impression that here is at least one corporation that has a soul, and a good one, too. Or perhaps the company thought the danger to be apprehended from the movement in question was too remote to worry about.

A NEW DISTRICT.

The building of a bridge over the river on the south side of town, will open up what will be practically a new district. It is true that there are old and important settlements on the other side of the river, opposite and south of the town, but the difficulty, and at many times the danger, of crossing, isolates them from the town and the settlements on this side, to a great extent, and operates very much to their disadvantage and their injury. But the building of a good county bridge will remedy all this, will enable the people to cross without trouble, danger or expense, and will make property on the west side of the river as desirable and valuable as that in any part of the county.

President Maxwell of the Atchison, recently wrote a letter to Senator Plumb, of Kansas, in which he said that the Atchison cannot consider favorably the building of any new lines or extensions in Texas on account of the reduction ordered by the Texas commission.

speech shows up some of the marvelous resources of this part of the country in such a manner that it deserves to be kept before the public. We quote "Mr. Thornton, on taking a brief for the temporary chairman, made a speech of about thirty minutes, in which he presented the resources of the country, which which the proposed line is to pass, in a very forcible and convincing manner. The coal and iron of the district, the timber of the Santa Fe mountains, and the fruits, grains and vegetables of the Rio Grande valley would contribute to the sufficient to make the line profitable, and this was only the beginning of his remarks. The bulk of the freight to be carried would be found between Albuquerque and White Oaks, in a country not touched at present by any railway. In illustrating the wonderful resources of the district in question, he exhibited a sample of coal which had been mined and processed in a manner that was well adapted for domestic use. There is, he said, a great deal of coal in the district, and it is well adapted for domestic use. He also exhibited a sample of iron ore, which had been mined and processed in a manner that was well adapted for domestic use. There is, he said, a great deal of iron ore in the district, and it is well adapted for domestic use. He also exhibited a sample of timber, which had been mined and processed in a manner that was well adapted for domestic use. There is, he said, a great deal of timber in the district, and it is well adapted for domestic use. Weekly Citizen

(From the Daily, Sept. 21.)
F. W. Parker, the White Oaks miner, is in the city.

The next big local event is the circus, which will be here October 7th.

District court convened at Las Vegas this morning. The docket is a light one.

Sol Block, with his bride, came in from the west last night. He is a merchant at Grants.

Andrew Smith purchased the El Paso trotter, El Alamo, paying \$250 for the animal. He is a speedy trotter.

Mrs. E. E. Ruedenbach, wife of Mr. Ruedenbach at J. B. Hushell's, had here last night from her visit to Sandusky, Ohio.

Felipe Hubbard of Paguete presented this office with one of the premium watermelons at the fair. It weighed 63 pounds.

Miss Barbara Aragon, of Las Vegas, returned to her home this morning, much to the regret of R. J. the "Blondy" of the Atlantic & Pacific road.

The ball at the Armory Saturday night, in honor of the military officers then in the city, was the most successful during the week, a glorious success.

Mrs. E. L. Gilbert, wife of W. E. Gilbert, a popular local agent, left last night for a visit to two months with friends and friends in Kansas City.

Capt. C. A. Hudson, of El Paso, father of Painter Hudson, returned home last Saturday night, after spending the past week as guest of his son here.

H. S. Nones, who takes life insurance from railroad employees for the "Travelers" company, is in the city from Denver, arriving too late to take in the fair.

One of the back drivers charged A. E. Walker \$2 for taking a horse out to the fair grounds one day not so long ago. The regular fare on the tracks was 50 cents.

J. W. Whipple, a painter who thrived and prospered in this city about two years ago, has returned to Paducah, his present home, after spending last week in the city.

J. C. Two, local auditor of the Wells Fargo express, with his wife, leaves tonight for San Francisco, Cal., where they will visit for a few weeks.

Married, at the court house in old town, yesterday the 20th inst., by Justice of the Peace J. H. Madison, Professor Nicolas de Mauro and Dona Petra Griego de Contreras.

S. P. Conger, who is making money out of the San Lazarus mine at San Pedro, not only for himself but for several others connected with him in the working of the mine, is in the city.

The driver for L. B. Putney drove in to J. Edward Frost's horse, killed in the alley below the office of Justice Madison's this morning, and the horse was badly cut and otherwise hurt in several places.

The special race of 600 yards, between the ponies of J. Edward Frost and Jake Weismann, for \$50 a side, came off at the fair grounds yesterday afternoon, and the prize fight in which Mr. Frost took a decided part, was won with ease by his pony.

"Spoko," the smart water spaniel dog of C. B. Hawley, named after "Spokane Falls," died yesterday. For several days "Spoko" showed signs of illness and finally he turned up his canine toes in death. He was a valuable dog and was a great pet.

Chas. E. Rodemeyer, an Atlantic & Pacific brakeman, who was called to St. Louis on receipt of the news that his mother was seriously ill, returned home Friday night, in time to take in the great territorial fair on Saturday. Charley left his mother much improved in health.

W. H. Cook, of Los Angeles, Cal., came to the city several days ago to visit the territorial fair. He is still in the city and is so well pleased with Albuquerque that he is debating the question of making this city his home. In any event, he was around this morning looking at some property, and if he doesn't buy here he will become a valuable real estate owner.

C. O'Connor Roberts has secured a fine collection of ore, about six tons in all, for a permanent exhibition at the depot in this city. The project is a good one and will attract general attention to our mines. Among the exhibit is a large piece of copper mine from the Santa Fe Copper company's smelter at San Pedro, kindly contributed by Manager McLaughlin through Alex Rogers.

Miss Minnie Walter, who was formerly assistant matron at the government Indian school, is in San Francisco, at the woman's hospital, where she will take a course of two years to become a trained nurse. Out of 250 applicants, Miss Walter was the only one chosen, and that on account of her good health, physique and general appearance. The lady came here from Indiana, and remained two years.

The climate of the Rio Grande valley made her robust.

J. M. Curry, president and manager of the Seattle, Wash., Soap company, is in the city, and paid his respects at the Commercial club rooms this morning. Mr. Curry thinks seriously of closing out his business at Seattle, and is making a tour of the southwest country, with a view of looking up a good location to set up some kind of mercantile business. He is a very pleasant gentleman, and would add immensely to the business circles of this city should he agree to remain here.

Rev. Steward Conrad Wright, formerly pastor of the Methodist churches of this city, and wife have returned from their protracted visit to relatives and friends in Canada. While away Rev. Wright delivered several addresses upon New Mexico, which will prove of great benefit. He told the Canucks all about the nat-

ural resources of the territory, spoke especially of the city of Albuquerque, and alluded to the superior winter climate of the Rio Grande valley in his speeches. Rev. Wright and wife are welcomed back to the metropolis.

A drunken brute visited the residence of Rev. Rosenstengel, the German Lutheran pastor, and made an indecent exposure of his person. Mr. Rosenstengel was absent, and the obscene brute nearly scared Mrs. Rosenstengel and the children to death. If he can be captured, a severe example will be made of him.

Fourth street, between Railroad and Gold avenues, is in a horrible condition from the large amount of dirt left there. This morning, in moving the merry ground outfit to the depot for shipment to Santa Fe, Billy Barnett, driving one of Frank's powerful delivery teams, stalled for an hour in the soft sand. By the way, there are many of the streets of the city that need looking after, they have been left in a very miserable condition.

Foot Horses.
Immediately after the horse race at the fair grounds Saturday afternoon, a special foot race of 100 yards for \$20 a side, was gotten up between Rata Granger, of the city, and E. C. Watson, better known as "Grass," of Hermosa. It was this that Bluffell, of Prescott, had the day before defeated Granger, but still for Albuquerque friends considered him fast enough to beat Watson, and when Hermosa man sang out, "81000 Watson," it was promptly taken. The foot race was measured off and the course was a perfect one. At the start, Granger leaped ahead, but Watson pressed him closely all the way to the finish. Here it was apparent that Granger was an easy winner, and he kept the distance between him and his opponent about a yard, passing him in the last few yards. Several spectators indicated their time but a few minutes later Granger finished the race, as was the time to the Territorial. About \$200 changed hands in the race.

Friday night a sprinter, named W. A. Ophiant, a Philadelphian who is a champion runner, appeared in the city, but kept his identity and object secret until Saturday night. That evening he happened in the White Elephant and he was announced his desire to run any person within hearing of his voice a foot race of fifty feet for four bottles of Mumm's extra dry. George Neher, feeling in a humor to capture such an honor and be a hero for his hour, promptly took up Mr. Ophiant's bold challenge. Both gentlemen dressed in light trousers and were weighed, Ophiant tipping the scales at 254 pounds, Neher at 205. J. W. Coy, of Denver, the humorous knight of the strip, was chosen as starter, and Marshall Matson and J. J. Phelan, identified as judges at the finish. A great start was obtained and away they flew, Ophiant, who is known on the road as "Babe," leading for three yards. Here Neher pressed ahead and, the two feet having been sprinkled a few minutes before, flew up in the face of the oncoming sprinter. At the twenty-five foot pole Ophiant fell to the ground and the earth trembled for a few seconds. He failed to arise and on examination it was found that he had sprained the cords in his left leg near the knee. He was put in a back taken to his room and a doctor sent for. He won the streets today, but has to limp when navigating. The race was fifty feet and Neher won in three minutes, eight seconds, and the plaudits of the midnight crowd.

John a Thief.
The trial of Juan Herrera, for stealing \$15 in money from Francisco Martinez, is in progress before Justice Denham. It will be remembered by the readers of the Citizen that only a few weeks ago the only Juan figured prominently in police circles as a vagabond, and for ten long days he haunted very accurately the shadows of the streets of the city. He is now in back again, with fair chances of going over the street car line to the county jail.

Later, just as the Citizen closes for the day the trial ends and Juan will serve out a sentence of sixty days.

Just Delivery.
Last night, about midnight, William Berry and T. Ritchie, two brickmasons, and an Atlantic & Pacific brakeman, who had been confined in the city for being drunk and disorderly, broke jail by knocking a hole in the brick wall. The brakeman was captured and this morning he paid a fine of \$10 and costs. The brickmasons could not be found, and no doubt have left the city. At the time there were nineteen prisoners in the jail, but the three above were the only ones to take French leave.

The Socorro Advertiser says: It is the general opinion that the fair held last week in Albuquerque was the most successful of any yet held by the association, with the possible exception of the races. The exhibits were more territorial in character than ever before, and for that reason attracted more than usual attention.

A Show Worth Seeing.
The only really good tented exhibition we shall have in our midst this season will be the Adam Forepaugh shows. In the past, extending over a period of almost a generation, this magnificent exhibition "gained the glorious word of popular applause," and now, as in the past, it is a warrant for its welcome. Everybody will be willing to admit that "good things should be praised," and therefore is the Adam Forepaugh Shows worthy of all the praise they are constantly receiving on all sides and in this respect, we agree with a distinguished writer, who, in alluding to the circus wrote:

"I hold there is nothing like a good show. It speaks the universal language we all understand, and though we affect at times to be permeated with other ideas, and interested in literary or scientific culture, give us a good show, and we are more delighted with it than with all the poems and elegies which science has given us."

On Wednesday, October 7, the great Forepaugh Shows will be here.

THE CLOSE.

The Last Day of the Fair a Great Success.

Hattie S. Wins with Ease the Trotting Event.

JOHN WINDFELD THE RUNNING.

The Territorial fair closed Saturday, and although the crowd was not as large as the previous day, the events were equally as exciting and interesting.

The trotting race between the leaders, Hattie S. and Bird, was at times very close and elicited considerable excitement from the spectators. The running race, although John Windfeld took both heats and the race was not won with ease, for the lucky winner had to use all his running powers to keep in the lead.

The base ball match between the kid teams of Santa Fe and this city was really a feature of the day's sports, and the first race between Watson, of Hermosa, and Granger, of this city, also came in for a share of the pleasures of the day.

Saturday night President Hatt, Assistant Secretary Harrison and E. R. Tackett, Secretary, and Superintendent Metcalf and other busy officials transacted a few business matters and then retired to their homes, but the fair was not closed until a very late hour.

Baseball's Games.
In the 250 class, purse \$200, the following horses were entered: Bird, bay gelding, owned by D. W. Collins, of Pueblo; Annie R., bay mare, by Birch & Standish, of Pueblo; Spanish Maid, colt, mated by S. A. Weaver, of this city; and May Queen, bay mare, by J. T. Johnston, of this city; Hattie S., bay mare, by Chas. E. Snyder, of Colorado Springs.

The result of the heats are as follows: First heat, Hattie S., first; Bird, second; Annie R., third; Spanish Maid, fourth; May Queen, fifth. Time, 2:43. Second heat, Hattie S., first; Annie R., second; Bird, third; May Queen, fourth; Spanish Maid, fifth. Time, 2:44.

Third heat, Bird, first; Hattie S., second; Annie R., third; Spanish Maid, fourth; May Queen, fifth. Time, 2:40. Bird having taken a lead, he was the favorite of the crowd, and he was not disappointed, as he won the race by a wide margin.

Fourth heat, Hattie S., first; Bird, second; Annie R., third; Spanish Maid, fourth; May Queen, fifth. Time, 2:41. May Queen, the pride of Albuquerque on the trotting turf, unfortunately appeared this time in company a few seconds faster than she and in consequence failed to take a race. Her owner, Jim Johnston, still has confidence in the little mare, and believes that she has not yet reached the limit of her speed.

Running Race.
John Windfeld, Speculation, Flaxey and Mayflower were entered for the running race, half mile heats, purse \$150. Windfeld took the first and second heats and the race, each heat being run in 52 1/2 seconds. Flaxey secured second money, although Speculation came in second in the first heat and third in the third heat, making a better record than Flaxey. The judges, however, for some reason awarded second money to Flaxey.

Thus ended the races of the most successful meeting the fair association ever held.

From the Daily, Sept. 22.
Gladup has eighty licensed dogs. San Marcel is to have an Odd Fellows lodge.

There are 28 Indian children in the Daves institution at Santa Fe.

Miss Mattie Webb, from Garden City, Kansas, is visiting J. H. Drury's family.

The little baby of Andrew Palmer, an Atlantic & Pacific engineer, is very sick.

G. W. Meyer, the popular proprietor of the San Felipe hotel, visited Santa Fe yesterday.

Henry N. Jaffa and family have returned to Trinidad from an extended tour of Europe.

A Sumner and wife mourn the death of their infant son. The funeral took place yesterday.

County Commissioner J. M. Sandoval, chairman of the board, is in the city from Las Corrales.

Dr. A. P. Meyer and wife are at the San Felipe from New York. The doctor is a brother of G. W. Meyer.

Brookmasons commenced laying brick on Father Peyton's three-story business building on First street this morning.

Prescott gave their horse team a trip on its return from the fair with the champion bull still in their possession.

D. B. Robinson, late general manager of the Atlantic & Pacific road, will arrive in the city on Friday from Chicago.

Matron Dow, merchant, and J. W. Price, the saw miller, out in the Child neighborhood, are here on business today.

The house G. Scott is erecting on South First street is being rapidly completed. It has now reached the second floor.

The democrats of this territory now say they are in favor of statehood. Their committee last week passed a resolution to that effect.

Mrs. E. L. Bartlett, of Santa Fe, has been elected president of the territorial board of lady managers of the Chicago World's fair.

Deputy Sheriff Thos. Hubbard is summing the jurors for the October term of court, which convenes in this city, Monday, Oct. 5.

Arthur Everett has received a letter from S. Golder, agent of the Humbler bicycle, London, which states that every thing is progressing favorably on Mr. Everett's special machine, an improved

lucyle. Mr. Golder says: "Our design is to make it the best two-wheeled speed car he has seen."

Mrs. J. W. Bennett, wife of the merchant at Houch's Tank, Arizona, came in from the west last night and is registered at the European.

The Gallup Elk says: Albuquerque's Commercial Club building would be a credit to a city like New York. The building is simply immense.

Page Otero, of Las Vegas, is still in the city. Page claims that in point of thrift and enterprise Albuquerque is made him very marked Denver.

Mrs. H. C. Mudge, wife of the mining superintendent of the Santa Fe road at San Marcel, came up from the south this morning and is at the San Felipe.

G. E. Young, a stockman of Gallup, is in the city from a visit to Olathe, Kansas, and Katoosa City. He states that Albuquerque has the most healthy look of any city he has seen.

Married at the parsonage of the Methodist Episcopal church, William Murray, of the Atlantic & Pacific shops, and Lena Shores, of E. Paso. Mr. and Mrs. Murray will make their home at Albuquerque.

A man by the name of Graham, arrested at Chaperito, has been taken to the Corral county jail for a charge of larceny. He is charged with having stolen a horse from the number of Asher Jones, a respected citizen of that county, who was recently murdered there, some months ago.

G. E. S. St. Louis, of Santa Fe, who is interested in a new process for finding minerals, and which is said to be a valuable discovery, and one which will be very profitable to Mr. St. Louis, and the company with which he is interested.

Gov. Prince's address at the opening of the New Mexico Exposition and the opening of the fair at Albuquerque was an able one. The governor is the son of a New Mexico settler, and is one of her warmest friends. (Gallup Herald.)

Mrs. King, who resides on L. E. street, was arrested on a police warrant against Frank Hart and wife this morning, and taken to the city jail.

Justice Madison put Hart and wife under \$1000 bail, to keep the peace for six months.

Pete Billy has left San Francisco, having several hundred dollars. He was reported to be in the city last night. Billy was a member of the San Pedro district, and had been taken to his associates, which he finally beat out of their hand earned money.

On Sept. 18, between L. E. street, C. J. O'Malley, J. D. Jones, W. F. Bennett, W. D. Jones, G. E. Allen and J. E. Kelly, part of the alleged advertising brigade of the "Pueblo Press," arrived in Albuquerque, and were taken to the city jail.

On Sept. 18, between L. E. street, C. J. O'Malley, J. D. Jones, W. F. Bennett, W. D. Jones, G. E. Allen and J. E. Kelly, part of the alleged advertising brigade of the "Pueblo Press," arrived in Albuquerque, and were taken to the city jail.

END OF A LONG CHASE.

John Carson, Who Broke into Freight Cars, Captured.

It was his constant habit, by the rule of the Territorial fair, for several years past, freight cars on the Atlantic & Pacific have been broken into at different stations, and contents to the value of several thousand dollars stolen. The thieves, for there was more than one of them, covered up their work well, and officers were baffled in their search for the right parties. Finally, Deputy Sheriff John C. Kennedy, of Conejo county, Arizona, took charge of the matter, and by some shrewd detective work he has located them at Williams, the head of the gang. By some means Carson found out that he was wanted and immediately left Williams. The deputy sheriff kept on his trail, and the persons being after traveling some miles were rewarded with their prize. Carson, since of the capture, is being held in custody at the territorial jail at the Territorial fair.

John C. Kennedy, a detective in the employ of the Atlantic & Pacific railway company, and Deputy Sheriff, J. D. Jones, of the territorial fair, are in the city, having just returned from their trip to Williams, where they captured Carson.

Carson was wanted by Williams, Arizona, on a charge of larceny. He was charged with having stolen a horse from the number of Asher Jones, a respected citizen of that county, who was recently murdered there, some months ago.

The method was a desperate one, but it was successful. Carson was taken to the city jail, and he is now being held in custody at the territorial jail at the Territorial fair.

Carson was taken to the city jail, and he is now being held in custody at the territorial jail at the Territorial fair.
