W. S. Fullerton raised on house \$1,000.00

The Board recessed until 3 PM at which time they met with all present as before.

District No 23 Datil N. M.
Rea River Land and Cattle Co raised on pers. property \$1,000.00
Santa Fe Pac RR Co. The Board of Equalization of Catron County, New Mexico have agreed to raise the Santa Fe Pac. RR Co. on its lands in said county to an amount causing them to pay the same amount on their lands in said county as is paid by the rest of the tax payers of the county on their grazing lands. THEREFOR BE IT RESOLVED that the Board of Equalization of Catron County New Mexico have raised the said Santa Fe Pac. RR Co. on 47,840 acres of land from \$1,000 to a valuation of \$2,000 per acre.
Mr Frank Hubble filed with the Board a letter stating that he

would appeal from the action taking by the Board in placing a valuation of \$4.40 on the sheep owned by him, in Catron County.

District No 45. Box Lake.
Emil Blanknagle raised on House \$200.00 and 200 cows \$4,600.00
Fidel Armijo raised on 30 a land \$900.00
E. J. Windsor raised on 38 cows \$874.00
Jno. Jones Quemado raised on 20 a D. F. land \$600.00
Candelario Chavez raised on 33 cows \$759.00 and 6 horses \$150.00
The board took a recess until 2 PM when they met with all present as before.

District No 53 Alma
District No 56 Bursom
Geo. Salome raised on 160 a land \$320.00
District No 57 Fairview
The Board recessed until Saturday June 10th, 8 AM when they met with all present as before.

District 55 Datil
Eduardo B. Sanchez raised on 50 cows \$1,150.00
Selso Armijo lowered on 500 a land \$1,000.00
Jose Y. Aragon raised on 1200 sheep \$5,280.00
The Board recessed until June 30th at 10 AM at which time they will meet as board of equalization to hear appeals from those tax payers that have been raised by the Assessor and the Board of Equalization.

EXECUTOR'S NOTICE.
To whom it may concern:
Notice is hereby given that the undersigned was on the 2th day of June, 1922, by the Honorable District Court of the Seventh Judicial District of the State of New Mexico, in and for the County of Catron, duly appointed executor of the estate of Patrick McKeefry, deceased; therefore, any and all persons having claims against said estate are hereby notified to present the same; and those who are indebted to the estate are likewise requested to settle their indebtedness in the manner and within the time prescribed by law.
Dated at Magdalena, New Mexico, this 10th day of June, 1922.
JOHN D. FRASER,
Executor.

Local Items

Last week we reported that the work of plastering the Gaunt Building was nearing completion but for some reason it takes so long to "put the mud on" around the County Superintendent's Office windows, that we shall have to wait awhile to report the work complete.

Mr. and Mrs. J. D. Fraser and little daughters, of Magdalena spent a few days in Reserve visiting with relatives.

Miss Ethel Johnson of Reserve is spending the week on the Tularosa, visiting with Miss Edna Wheeler. The girls made a horse back trip to Eagle Peak Tuesday and say they had a wonderful time.

Mrs. Jack Dean and Miss Carrie McFatter spent Saturday in Reserve taking teachers examinations. Mrs. Dean will teach the Tularosa School next term. Miss McFatter told us all good-bye as she is leaving for her home in Canadian Texas.

Mr. and Mrs. Jack Foss and daughter, Marion of Magdalena where Reserve visitors Monday. Mr. Foss has made several trips to Reserve recently, but this was Mrs. Foss and Miss Marion first trip to the County Seat of Catron and they said they like it fine.

All the firefighters are again at home and they say they intend to stay there. Firefighting is no fun at all, especially after a stretch of fifty hours without food are sleep. They report the fire entirely out before they started home.

Frank W. Buster, who has been stationed at Fairview as Forest Ranger, is now trucking between Magdalena and Reserve.

Mr. and Mrs. C. A. McNabb of the Agricultural College at Las Cruces spent Monday and Tuesday in Reserve, guests of Mr. and Mrs. J. G. Koogler.

Miss Dell Snodgrass, who has been visiting with Mrs. Bill Ward returned to her home in Magdalena, Tuesday, and John left town Wednesday morning looking sad.

BOYS AND GIRLS LIKE CLUB WORK

Members Pay Way Through College From Money Earned in Different Branches.

GIRLS TAKE HOME ECONOMICS

Number in Southern States Attending School on Scholarships Won Is Placed at 1,056—Alabama Women Assisting.

(Prepared by the United States Department of Agriculture.)

In 15 southern states 2,042 boys' and girls' club members last year paid all or part of their school expenses from money earned in club work. In other sections 1,344 former club members are now attending agricultural colleges, most of whom are partly paying their expenses from club-work earnings. This does not include 405 girls taking home economics in various colleges. The number of boys and girls in all the states attending high schools, normal schools, and colleges on scholarships won for club work is 1,056. These clubs are an important feature of extension work as carried on by the United States Department of Agriculture co-operating with the state agricultural colleges.

Begun Work Early.

These boys and girls did not wait until ready to go to high school or college before starting their club work and savings. Some began two, three, or more years before, or, as one boy said, as soon as he could, meaning 10 years—the youngest age at which children are admitted to the clubs. Two girls of Mobile, Ala., with a flock of chickens, began their savings three years ago. In Georgia a number of club girls have started "go-to-college funds." They put the money realized from the sale of their club products, which are mostly fancy jacks of pre-

A Pig Club Boy Preparing His Prize Winner for the Show Ring.

erves, jams, and marmalades, in the bank to their own credit. Thus far 290 Georgia girls are attending school on the proceeds from their work.

Scholarship Is Voted.

Another development from the interest shown in education by the club girls is that in Birmingham, Ala., the members of women's clubs became so much interested that they voted an annual scholarship of \$200 to be lent to girls wishing to prepare for home demonstration work.

WARM RECEPTION FOR MITES

Kerosene Will Prove Efficacious in Keeping Pesticiferous Little Parasites Away.

Hot weather brings the roost mites. They multiply so fast that the hen house is soon swarming with them. The egg yield then drops to almost nothing.

"The process of keeping out the mites is one of the simplest in poultry culture," says A. C. Smith, head of the poultry division at University farm. "Kerosene will do it. It is easily applied, either by a broad flat paint brush or a spray. The paint brush will save kerosene, but takes time. The spray will save time and use kerosene. Take your choice, but paint or spray the roosts and supports with kerosene before the mites put in an appearance.

"The morning is the best time, as the roosts will be dry and much of the odor will have disappeared before the hens seek the roosts. Repeat every two weeks during warm weather."

KEEP UP VEGETABLE SUPPLY

Farmer Should Not Overlook Importance of Making Successive Plantings in Garden.

Do not overlook making successive plantings of vegetables in order to keep up as steady as possible a timely fresh supply. Among such vegetables are radishes and beans. Pale snap and pole lima beans will come nearer growing a supply of green beans than the bunch beans.

SUPERIOR FARM IMPLEMENTS

Good Tools of Far More Importance Than Some Farmers Believe—Poor Ones Unsatisfactory.

Good implements are far more important in good farming than some farmers believe. It is a very hard matter to do good farming with poor or unsatisfactory farm implements. Considering their utility, farm implements are cheap.

WASH ALL MILK CANS AS SOON AS EMPTIED

Most Dealers Have Appliances for Cleaning Utensils.

Hotels, Restaurants and Others Buying Milk in Wholesale Quantities Are Particular in Giving Attention to Containers.

(Prepared by the United States Department of Agriculture.)

The milk can has the same relation to the wholesale trade as the milk bottle has to the retail trade, and it is just as important that it be washed immediately after being emptied, says the United States Department of Agriculture. Milk dealers have appliances for washing and sterilizing the cans, but this does not excuse the buyer from rinsing them before they

Sterilizing Dairy Utensils is an Important Factor in Keeping Milk Sweet.

become sour as a result of the multiplication of bacteria in the film of milk left in the can. Cans that become foul in this way are hard to clean when they arrive at the plant.

Investigations show that hotels, restaurants, bakeries and other places which buy milk in wholesale quantities do not always give proper attention to the containers. As soon as the cans are emptied they are placed on the doorstep or left in a warm room until collected by the dealer. They return to the plant teeming with bacteria, and the mechanical washers will not always clean and sterilize them thoroughly. They must be soaked, washed by hand with a brush, and then sent to the machine washer. Consumers can help a great deal in making it easier to maintain a safe milk supply. All that is needed is a little care at the right time, says the department.

PLAN FOR SUMMER SPRAYING

More Care and Attention Necessary Than Work in Winter—Combinations Save Time.

Summer spraying requires more care and attention than winter or dormant spraying because summer sprays must be applied after the buds or leaves are started and hence when there is danger of injuring the foliage. The common spray for the control of chewing insects is arsenate of lead, but arsenate of calcium is gaining in favor. Paris green is still used to some extent on Irish potatoes and tobacco. Nicotine sulphate, or tobacco parts, sometimes called blackleaf, is effective against plant lice. Bordeaux mixture is an effective spray when reduced to summer strength for apples, pears, grapes and other fruits.

But there are combinations for various fungus diseases and insect pests that save time and trouble and are highly recommended by practical orchardists and gardeners.

SOY BEANS AND SUDAN GRASS

Combination Makes Good Feed and May Be Handled Like Timothy—Work Land Well.

Soy beans and sudan grass seeded together at corn planting time and cut for hay when the beans are in the dough stage make good feed, and may be handled same as timothy. Moist black land is suitable for this use, and some of the alkali peat soils may be used to advantage for this crop mixture. Work the land down well, and sow broadcast about 12 pounds of sudan grass to the acre, then drill in three pecks an acre of beans. The drilling will cover the grass seed. Mammoth Yellow or Hollyrock Mongil are good soys.

SWEET CLOVER FOR PASTURE

All Types of Plant Make More or Less Undesirable Hay Because of Its Coarseness.

Under most conditions sweet clover can only be used profitably as pasture. When it is decided to use it for this purpose, the cattle should be put on it and not be allowed other pasture until they start to eat it. This will take a day or two, after which they will thrive on it. All types of this plant make a more or less undesirable hay, because it is coarse and has comparatively few leaves. For the best quality of hay, it should be cut just as it starts to blossom.

Of Silk and Wool

Fabrics Popular in Construction of Simple Frocks.

Russian Motif in Trimming Is Pronounced—Patterns Executed in Beads, Metal and Silk.

The dress of the Russian peasant is not content with influencing cotton dresses, but has set its mark in a most pronounced way on the simple frock of silk or wool, states a fashion correspondent in the New York Tribune.

Models which have just been received from Paris show this influence exaggerated almost to the point of bizarreness. They are, however, extremely interesting from the viewpoint of fashions, as they embody ideas rich in suggestion and, of course, they are easily simplified and modified to meet many requirements.

Among the most elaborately embroidered new crepe de chine dresses are those which have Russian patterns executed in beads, metal and silk. Frequently the Russian motif is combined with other ideas, thus giving a tremendous opportunity for variety. The question of trimming is an important one at the present time, and in all trimmings an entertaining variety is seen. Manufacturers are doing an enormous business on beaded and embroidered crepe de chine dresses.

Frock of Crepe de Chine Elaborately Embroidered in Solid and Open-Work Designs, Colors Harmonizing With Background of Silk.

The demand is easily explained by the wealth of new ideas at hand. The full gamut of colors in exquisitely harmonizing and strikingly contrasting shades are run in the embroideries.

A typical model shows a combination of broderie anglaise, or openwork embroidery, with Russian embroidery in solid work, the latter in high colors harmonizing with the foundation shade of crepe de chine. There is often an intermingling of beads, notably steel,

MAY BE BIG DEMAND FOR LACE

Paris Is Sponsoring Material for Frocks, Hats, Neckwear and Other Accessories.

The outlook for laces this season is decidedly promising. Paris is sponsoring lace, it was said, not only in frocks and hats, but in neckwear and other accessories. This firm finds an increasing use of it on the part of the manufacturers as well as the dress-makers.

The cutting-up trade favors Spanish flouncings and allovers both in staples and high shades. One dealer emphasized cinnamon brown as particularly good and named as other popular shades such colors as mimosa, cornflower, tile blue, ochre, mauve and sand. Though the usual designs for this type of lace are floral, an attractive Chinese pattern is shown. Spanish lace is being sold to the retailers as well as the manufacturers, it was said.

Hand-made filet is much in demand and a new type of work called Margot is being produced on a filet mesh. This house also shows filet patterns with touches of colored stitching.

Venise handings are very popular just now, it was stated, and a great deal of the new silk-and-wool lace is being sold.

Carriqueronross on filet is another novelty which is shown.

Lace is being used by blouse and millinery people as well as dress-makers, it was said. Scarfings and handings are being sold for hats in the high shades as well as staples, and the biggest demand centers about widths from six to twelve inches. Black is

FLORETTE HAT OF HORSEHAIR

Like the colors of the dawn, soft blue, gray and orchid, are the feathers on this Florette hat of horsehair in a deep gray-blue.

amber or jet, these lending themselves well to the color harmonies of the bright embroidery silks.

Fringes are persistent. Designers who advocate them cannot be said to lack tenacity of purpose. Over a year ago the tide of fringe ran high, and such a wave of enthusiasm for everything fringed swept the whole country that every one thought they had sounded their own death knell. But what looked like the termination of the vogue for fringe was only the beginning—a preliminary showing, as it were. It must be said, however, that its use is now more subtle than it was in the old days when long strands of plain silk fringe hung from the skirts and bodices of countless models.

PARIS FAVORS LONGER SKIRT

Length of Garment and Oddity of Sleeve Important Features of Frocks From France.

A Paris frock is known this season by its skirt length and the oddity of its sleeve. On formal and informal occasions the Parisienne wears her skirt ankle-length, and her sleeves are the combination of the art of the Parisian dressmaker. For out-of-doors the straight, slim silhouette is quite generally adhered to, but for dinner, dance and theater the full-skirted basque gown is the prevailing mode. Sport and semisport clothes form an interesting part of the spring mode. Especial interest is displayed in knickerbockers, which are worn quite generally, usually accompanied by a trim jacket, bright-colored sweater or a woolen overblouse. The simple one-piece frock made of rough-surfaced material is a favorite for general wear.—Designer.

Roses of Silk.

Small roses of the material trim many afternoon and evening gowns. One particularly pretty frock was of pink opera satin and showed the scalloped edges bordered with three rows of small silk roses. Similar roses formed a shaped dorde over which fell the edge of the long-waisted semi-fitted blouse, and the short sleeves were ornamented with the roses.

PILE GOODS FOR NEXT FALL

Added Demand Is Now Predicted for the Dress Goods Which Possess High Luster.

Next fall promises to supply an added demand for dress goods which possess high luster. The vogue for such materials is already well established among the better class of weaves. Pile-finished goods are expected to have a leading place in the business on cloakings. Twills, featuring the same luster, also promise well. The novelty cloths are tending toward those of rep character. Quadrilles, or line checks, appear to be favorites, together with the shadow plaids in which the pattern is defined with nubbed yarn.

Single Startling Ornament.

In contrast with the flower-laden hat, chapeaux that rely for smartness on a single startling ornament, are a late French fashion. One such hat is almost an exact replica of a Turkish turban of gray crepe morocain in soft folds; it has at its sole ornament, a tall, oval blade of real galleth stuck at the acute angle over the right eye. Another hat, wide brimmed and worn well over the eyebrows is of black satin with pleated edge around the brim. One long, slim quill of jade ribbon, notched in imitation of a feather, projects downward from the crown across the brim and a foot beyond.

Had Your Iron Today?

Never Mind—Re-vitalize

YOU BET it's warm—the more you need then for keeping the vitality up to par.

Vital men resist heat easily. Languid ones are floored. Re-vitalize yourself and you won't mind the weather.

Get new energy in little raisins.

1560 calories of energizing nutriment per pound in Little Sun-Maids. 75 per cent pure fruit sugar.

Wonderful because this sugar doesn't need, and, therefore, doesn't tax digestion and thus heat the blood. Yet energizes almost immediately.

Perhaps. Maybe the reason so many women insist upon eating things that disagree with them is because they love an argument so.

The woman who trusts all men is shy of experience.

All Clear Now. "Money is the root of all evil." That is the reason we all try to dig it up.—Columbia Jester.

Many a man resembles a mule when it comes to putting his best foot forward.

EACH IS A GENUINE GOODYEAR

Each of the two tires illustrated above is a genuine Goodyear through and through.

One is the famous reliable 30 x 3 1/2 inch Goodyear All-Weather Tread Clincher.

Its companion is the popular 30 x 3 1/2 inch Goodyear Cross Rib.

The Goodyear Cross Rib is built of the same high grade Egyptian cotton fabric that goes into the All-Weather Tread Goodyear.

It has a long-wearing but differently designed tread, and sells for less money.

More than 5,000,000 of these tires have been sold in the last five years.

Their fine performance has demonstrated the folly of buying unknown and unguaranteed tires of lower price.

Ask your Goodyear Service Station Dealer about their advantages.

GOOD ROADS

MAKE TESTS ON BATES ROAD

Has 63 Different Sections and Represents That Many Kinds of Construction.

(Prepared by the United States Department of Agriculture.)

Final series of tests on one of the largest and most comprehensive road experiments ever attempted began March 27. This road, located at Bates, Illinois, was designed and constructed by the Illinois division of highways under the direction of Clifford Older, chief highway engineer, with the bureau of public roads, United States Department of Agriculture co-operating. It is two miles long and includes 63 different sections representing as many different methods and kinds of construction, having various thicknesses of concrete, cement grout and asphalt-filled brick as well as asphalt concretes and concrete with rolled stone bases.

Since the completion of its construction in April, 1921, a corps of engineers has been kept busy making observations for effect of temperature changes, static and repeated loads and sub-grade conditions, thus collecting data which when analyzed will supplement the information necessary for the rational design of roads.

The road will now be subjected to the final test, that of very heavy truck traffic, for the application of which will be used a fleet of 10 motor trucks received by the state from the surplus of the War department. At first these trucks will be lightly loaded, but as the test progresses the load will be increased until a maximum is reached giving a 12,000-pound rear wheel load. The results will show definitely the types of pavements which can be expected to support

Building a Section of Bates Road.

heavy traffic, as well as those which will not satisfy the requirements of such traffic conditions as might be expected during the next 10 or 20 years.

The careful observation of the various sections in the absence of traffic which has formed the first part of the investigation, it is expected, will enable the engineers to ascertain the structural weaknesses which cause such failures as may take place in the traffic tests.

After the experiment has been completed, this road with its broken sections replaced will form a part of Illinois Federal aid project No. 13 from Springfield, Illinois to St. Louis, Missouri.

The test will be carried on under the direction of Clifford Older, with H. F. Clepper in direct charge of the experimental work and R. R. Benedict in charge of the trucks and maintenance. The bureau of public roads will be represented by A. T. Goldbeck and C. A. Hogentogler.

ROADS PAY DIVIDENDS

A wagon with a load of 3,000 pounds required an average draft of 108 pounds on a gravel road in dry condition, in a recent test at the Missouri College of Agriculture. The same load on a dry clay road required a draft of 321 pounds. This shows the great variation in the work done in hauling and in the size of load a team can handle, says J. C. Wooley, chairman of the agricultural engineering department, which conducted this test. The gravel roads prove their value even more completely under spring conditions. This load on the same roads after a heavy rain required a draft of 180 pounds on the gravel, and 372 pounds on the clay. This is only one of the many advantages offered by all-the-year roads.

Unnecessary Practice.

Oiling a concrete road or any properly surfaced highway is not only a nuisance to the public, but is a lamentable waste of a natural resource, says H. H. Franklin, who claims that the oiling system, a hold-over from the governmental days, is no longer necessary and should be abandoned.

Towers to Control Traffic.

Towers, erected in the middle of streets and highways for the control of traffic, were first operated in Paris in 1910.

GOOD TALES of the CITIES

Another Case of "Kidded by Experts"

BOULDER, COLO.—City authorities of Boulder have been requested to arrest University of Colorado students who, through a reprisal directed against visiting members of the Kansas City Chamber of Commerce, cost the Missouri Pacific railroad \$600.

The Kansas City business men were guests at a beefsteak fry on Flagstaff mountain, near the university campus. Every spring the students place a "C" fifty feet in diameter, on the summit of the mountain. Because of the park regulations the "C" is not painted, but is of white paper weighted down with stones.

The next morning a fifty-foot "K" appeared in front of the "C." Boulder, on seeing the initials on the

mountain, felt that the Kansas City business men had been unable to resist an impulse to advertise their home town.

The following morning it was discovered that during the night the twelve coaches which carried the Kansas City party carried the legends "U. of C." and "University of Colorado."

Superintendent Mitchell of the railroad said it would cost \$900 to repaint the train, and asked the city marshal to arrest whoever was responsible.

Do you remember the sad experience of former United States Senator J. Hamilton Lewis of Illinois when he undertook to kid a waitress at a restaurant frequented by college boys? The whiskered statesman really did a good job, but the waitress smiled indulgently and remarked: "You must remember, Senator, I have been kidded by experts."

Well, Kansas City may have a smart Chamber of Commerce. If so, its members will hesitate hereafter to start a game in which college men are the most expert players in the world.

Arrests? Nothing doing!

How to Play "Western Hospitality"

LOS ANGELES.—How to become a bunco stealer was explained in the Superior court at the trial of W. S. Kirby, alleged swindler, charged with bribery.

A. W. Stafford, deputy district attorney, read to the jury the rules and regulations of the game known as "Western Hospitality," an age-old scheme, according to Stafford, in which the chief points are "find the sucker, get the dough and get away."

According to Stafford a document called "Western Hospitality and How to Play It," was found in Kirby's possession after he had been arrested for swindling and had offered two detectives \$500 to let him go.

The rules of the game were neatly typewritten, explaining that A and B represented the bunco men and S the sucker. This is how it is played:

B finds the sucker. Then B and S also find a pocketbook with A's card in it. They return it. A wants to reward them, but they spurn payment for honesty.

"I would have lost my position with the brokerage firm if I hadn't got this back," says A. "I'm engaged to the boss' daughter. You boys have saved me from ruin."

Then B has an idea.

"If you want to reward us," he suggests, "give us some tips on the stock market."

A tip is given, B and S play it. They double their money. B then induces S to plunge. S mortgages the farm. Together they call on A. He gives them another tip. S's money is given to B with instructions to play a certain stock long. B departs. An hour later B returns.

"Did you tell me to play that stock long?" B asks A.

"Certainly," replies A. "Gosh!" exclaims B. "I thought you said short. We're broke!"

The state's attorney made it plain that playing "Western Hospitality" was forbidden without written permission from the chief of police.

Where Every Woman Wears a \$1,500 Ring

NEW YORK.—Wealth, appearing suddenly today in the poor man's court, caused a riot. Third Municipal court, Williamsburg, where those not possessed of an overabundance, or even an abundance, of worldly goods are wont daily to go for comfort and solace, was crowded.

A young lawyer was speaking in behalf of a widow with five children, who couldn't pay her debts. He was painting a picture of the life that is led by a family of six in one tenement room, third-story back. The courtroom was still—one could hear the sniffling of an old woman, whose sentiments had been aroused by the young lawyer's speech.

Then the lawyer stooped and picked

up a two-carat, blue-white diamond, set in platinum. He had stepped on it. He handed it to the judge.

"A funny place," said he, "for a thing like this to be found. To whom does it belong?"

Three women in the rear of the room squealed "Me!"

"What a noise youse girls has got," piped a girl on the aisle. "What a noise—why, me own Mike give it to me last night. 'E saved up fer three months to do it, too."

"Say!" yelled another girl in a threadbare suit, "you're a-lyin' like anything; it's mine."

Seven other women then claimed it and all started toward the judge.

The courtroom was in an uproar. The bailiff shouted for order, the judge rapped for order and two policemen tried to hold back the claimants of the ring. Reinforcements arrived and after fifteen minutes the courtroom was cleared.

The ring, valued at \$1,500, was placed in the care of the clerk. At nightfall it had been claimed by twenty women.

"Can you describe it?" the clerk asked them.

"Yes," each replied, "it's a diamond."

Outdoes a "David Harum" Horse Trade

INDIANAPOLIS.—"New wives for old!" Mr. and Mrs. Bert Sanders and Mr. and Mrs. Leroy Green joyously began their second honeymoon after a double divorce followed by marriages in which the most complicated swap since "David Harum's" last "hoss" trade was effected.

For eight years Bert and Beatrice Sanders had danced and attended parties with Leroy and Maude Green, their friends and neighbors. Up to five weeks before last Christmas it was just a neighborly affair. Then something began to happen to change it all.

Mr. Green told Mrs. Sanders (according to Mr. Sanders' version) that she was the "most beautiful woman in North Indianapolis."

Mr. Sanders declined to reveal just what he told Mrs. Green, but he confessed his remarks "covered more territory than North Indianapolis."

Christmas day the couples had a holiday feast together. There were whispered exchanges between Mrs. Green and Mrs. Sanders. Both wives left home shortly afterward, going to live with relatives. Almost immediately Mrs. Sanders and Mrs. Green

filed suit for divorce. Staying out nights to play pool was Mrs. Sanders' chief complaint against her mate. "Desertion" was Mrs. Green's charge.

Then along came both divorces.

Immediately Mr. Bert Sanders and Maude Green, hieing themselves along with Mr. Leroy Green and Mrs. Beatrice Sanders, appeared at the marriage license clerk's window. There was much confusion when the clerk tried to re-espice "ne newly divorced couples, but th' thing being unraveled, marriages followed.

Then the newly-paired couples began seeking new homes, and quoth Mr. Sanders: "Wouldn't it be odd if we moved into the same double house?"

Striking a Stride With Polly

By JACQUELINE RUSSELL

© 1922, by McClure Newspaper Syndicate.

"Well, that settles it!" Polly's tone was rueful, even a bit discouraged.

From his stronghold as chief confidant and butt of all Polly's moods, Ned Turner listened, amused. Ned was almost 25, and at 25 he was privileged to look at Youth, in the person of Polly, with a patronizing air that was almost benign.

"Settles what?" he inquired lazily. To hear her "rave," her brown eyes earnest, her curly head vehement in her gestures, was worth sacrificing even a quiet reading, he decided. With Polly near he was certain to be disturbed sooner or later, anyhow; as well the sooner.

"It's this article," she explained, "Advice to Young Authors," written by Mary Ray George. Listen to this bit: 'I should counsel beginners to attempt only the simplest stories, teeming with action. Later, when they have "struck their stride," they can work out more complex plots and psychological character portrayal.'"

Ned cocked his head on one side with just the right shade of careful consideration.

"It sounds all right," he ventured, finally.

She pounced upon him in a verbal whirlwind.

"You don't understand," she wailed. "Of course it's all right! That's the trouble! But tell me, how can one ever manufacture plots teeming with action when one's experience is hedged in with teacups and other people's babies? I wish father had been a detective, or a policeman, or even a second-rate actor, instead of a suburban nihilist with a strong sense of duty!"

Ned's sobriety deserted him. A mental picture of placid dignified Mr. Maye in the role of a barn-storming actor was too much. His gale of laughter woke a spark of fine scorn in Polly's eyes.

"Of course you couldn't be expected to understand what my writing means to me," she commented, her tone dramatic.

"I am cramped, Ned. My experiences are so limited, yet I know I could do so much."

He was immediately all contrition.

"I'm sorry, Polly," he said, gently. "How shall we go about getting you this experience which you crave?"

She was instantly friendly again, won by his conversion to her cause. Her eyes were starry twins of eager light.

"Would you, Ned—would you help me?" she begged, breathlessly. His caution evaporated before the fire of her impatient terror. He knew, from past experience, that the adventure was sure to be a mad one, for Polly had an uncanny way of doing the least expected thing. Yet the thought of championing her through unknown experience gave him a warm rush of feeling as he promised.

She lowered her voice at her own boldness.

"I want you to take me to the night court," she announced.

Ned was shocked, protesting, but with the helpless sense of one who is sure of being worsted. Once determined, Polly was a resolute little tyrant.

"How can I ever write of people who suffer and sin if I never meet them?" she argued, all seriousness.

Ned had certain theories that the sinners should be as far removed as possible from the path of any hieing as much; but Polly snuffed derisively. After all, this theory of sheltering women was obsolete, wasn't it? She much preferred the enlightened modern woman to her simper, shielded predecessor. So Ned, with many misgivings, took her to night court, to steep her literary soul in the sordidness that she expected to be her inspiration.

A drunkard with a foul breath and a fouler vocabulary was just being removed when they arrived. For the hundredth time Ned regretted their

coming, during the trade which the incensed reprobate delivered to the weary attendant; but Polly did not flinch. She brushed herself with her notebook and showed a brave interest in the proceedings.

There was the usual assortment of cases—mostly of drunkards, disorderly in their besotted condition, many of them old offenders; and one or two depraved creatures whose sole claim to femininity which they may once have had lay in their staring, detached splotches of rouge on their ugly, wasted faces. They, too, were known to the judge, and were disposed of in short order, their whining oaths of innocence falling on ears long since wearied of such pleas.

Ned watched his companion anxiously, feeling like a beast for having brought her. Her notebook lay idle in her lap now and she was staring, pale, fascinated, at these strange creatures of another world. Suddenly, she seemed to have seen enough. Quietly she asked him to take her home.

"I didn't know that life was like that," she whispered, shuddering, when they were once more in the street.

"It isn't, Peggy," he assured her. "Life—real life—is the everyday existence of ordinary people. It's home, and love, and good purpose. Extraordinary, dramatic things, such as you are seeking, are artificial. They may be life to a certain few, but the majority find their experiences in simple, everyday content."

"The mission of the author should be to picture life through his own understanding," she mused. "And I suppose the greatest thing in life is love?"

"It certainly is!" Ned was emphatic. "Why, Peggy—love is everything! Without it no one can interpret the meaning of life! With it, fate is as simple as A B C—a series of episodes leading up to one great event which is to direct the whole future."

"Then I shall have to write of love," Peggy decided suddenly.

"Why not find it for yourself, instead, dear? I love you so much—"

The words rushed out of their own volition, and Ned was suddenly fired by the revelation of how true they were. He had always loved her!

Peggy paused for a moment, hushed by his earnestness. Then, suddenly mischievous, she snuggled against his sleeve.

"Gee," she scolded him, "I never expected to learn about my subject in any other way!"

HAVE NOT 'TAMED' LIGHTNING

Boast Not Infrequently Heard Is Not Borne Out by Facts Concerning Electrical Control.

When we wish to speak figuratively of our achievements in electricity we are accustomed to boast that we have "tamed the lightning," or something of the kind. But in reality we have done no such thing. Lightning is a well-known natural electrical phenomenon; but the electricity that we use is drawn from another source—it was "tame" to start with. To catch a lightning discharge and reduce its voltage so that it may be utilized is a different matter. It may be suggested that the result might not be worth the trouble.

Ever since Franklin's famous kite was sent upon its flight certain optimistic individuals have thought that this pretty experiment was the key to untold power and wealth. The tumult caused by a severe thunderstorm has evidently led them to believe that vast quantities of electricity are tumbling about in the upper air, and to render these available to man needs only some method of tapping the invisible reservoir. Now, it has been said that the quantity of electricity taking part in a flash of lightning could be collected on a thimble; but the handling and restraining of this thimbleful of electricity present a problem which few electrical engineers would care to undertake. It is a great achievement to use the water at Niagara to drive a dynamo; but most of us would hesitate at the thought of employing a stream of rifle bullets for the same purpose.—Kansas City Star.

Mistral. Mistral—last of the veritable Troubadours—was truly gifted in that he was an erudite philologist who possessed a rare creative sense of poetic form. His name had become greater than any direct appeal of the output of his pen; for only to the learned few does the bent of his labors mean anything. It was to the credit of this not ungrateful or ungenerous age that he reaped all the rewards of fame from a public which understood practically nothing of his work. While he humbly pushed away scholastic honors from himself, they only crowded the more thickly about his brow. The very nature of his undertaking disarmed criticism. There was none of his compatriots who really cared to say him nay, though he persisted in not using the national language except in translating his own books.—Stuart Henry, in "French Essays and Profiles."

Alimony Includes Loaf of Bread.

The Turkish girl is wedded with a great ceremony to a man she has never seen. The lady is escorted to his house by her friends and she is accompanied by a couple of loads of furniture which comprises a part of her dower. After entering his house the friends leave her alone with her husband and he is then privileged to remove the "fer-edge" or national veil and then he sees the face that he must look at daily for some little time. The veil is being discarded now and is used only in the more remote sections of the country. Divorce is somewhat easy and in this case her part of the alimony is a daily loaf of bread.

WORKING GIRLS LOOK HERE

Read What Mrs. Lucas Writes Concerning Her Troubles, Which May be Just Like Yours

St. Louis, Mo.—"I had troubles that all women are apt to have, with pains in my back, weak, tired, nervous feelings and a weak stomach. I had been this way about a year and was unable to work or stand on my feet for any length of time. My husband's aunt told me how much good Lydia E. Pinkham's Vegetable Compound had done her and begged me to try it, so I did. All my pains and weakness are gone, my stomach is all right and I do my work at home and also work for Swift's Packing Company. I recommend your Vegetable Compound to my friends and you may publish my letter as a testimonial."—Mrs. LULU LUCAS, 719A Vandewater St., St. Louis, Mo.

Again and again one woman tells another of the merit of Lydia E. Pinkham's Vegetable Compound.

You who work must keep yourself strong and well. You can't work if you are suffering from such troubles. Mrs. Lucas couldn't. She tried our Vegetable Compound and her letter tells you what it did for her. Give Lydia E. Pinkham's Vegetable Compound a fair trial now.

BETTER DEAD

Life is a burden when the bow is racked with pain. Everything worries and the victim becomes despondent and downhearted. To bring back the sunshine take

GOLD MEDAL HARLEM OIL CAPSULES

The National Remedy of Holland for over 200 years; it is an enemy of all pains resulting from kidney, liver and uric acid troubles. All druggists, three sizes. Look for the name Gold Medal on every box and accept no imitation.

Some girls are like brown sugar—sweet but unrefined.

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Advertisement.

In the country of silent people the parrots never talk.

Sure Relief FOR INDIGESTION

Western Canada Land of Prosperity

offers to home seekers opportunities that cannot be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms

Fertile Land at \$15 to \$30 an Acre—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is equally profitable. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.

Farm Gardens, Poultry, Dairying are sources of income second only to grain growing and stock raising. Attractive climate, good neighbors, churches and schools, good markets, railroad facilities, rural telephone, etc.

For certificate entitling you to reduced railway rates, illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, Alberta and British Columbia, etc., write

Judge Richard A. Ballinger, who secretary of the interior during President Taft's administration, died recently in Seattle after an illness of two days.

A crowd estimated by newspaper men at approximately 8,000 persons, watched at a distance the initiation of a class of Ku Klux Klansmen estimated at from 500 to 800, twelve miles south of Sacramento, Calif., near Franklin.

Sharp attacks on the proposed soldiers' bonus from the banker's viewpoint, and advice to bankers not to enter the bond business, were features of speeches delivered before the eighteenth annual convention of the Idaho State Bankers' Association, meeting at Hayden Lake.

George Von Elm of Salt Lake City retained his title of amateur golf champion of the Pacific Northwest by defeating Ben Stein of Seattle, 1 up, in their match of thirty-six holes at the Colwood links at Vancouver, B. C. Von Elm was 4 down at the end of the eighteenth hole, but gained steadily on the Seattle player and was all square with Stein at the thirteenth hole of the second round.

Ralph E. Trotter, alias Howard C. Williams, 27 years old, of Youngstown, Ohio, said by police to face charges of cashing \$25,000 in forged pay checks in various cities of the United States, is under arrest in Oakland, Calif. He was masquerading as a Shriner, according to police. Trotter has been sought since, police say, he disappeared from Youngstown with a pad of blank pay checks stolen from the Trusseau Steel Company of that city.

A five million dollar merger of tuna and sardine packing interests of southern California to be known as Van Camp Sea Food Company, Incorporated, has just been made public. Firms included in the merger are Van Camp Sea Food Company, White Star Canning Company, International Packing Corporation, Nielsen & Kittle Canning Co., Ltd., four of the largest fish packing plants of Los Angeles harbor, and two in San Diego, with several others acquired by association and purchase.

WASHINGTON

Federal control of the air to prevent radio congestion and to encourage the maximum of radio use and efficiency was proposed in a bill introduced in the House by Representative White, Republican, Maine. The bill sets up about twenty different classes of stations with appropriate wave allocations.

An unsuccessful attempt was made recently to set fire to the offices of the alien property custodian in the veterans' bureau building, according to official reports to the secret service. Hags soaked with kerosene were stuffed through a hole bored in a window sash and a match applied from the outside. The haze was discovered by a watchman and extinguished. Officials believe that an effort was made to destroy the records.

Government seizure and operation of coal mines was predicted by several senators during a discussion in the Senate on the coal strike situation. Senator Lenroot, Wisconsin, demanded that the government take over sufficient mines to supply coal that may be needed if this strike is not settled promptly.

If the railroad unions strike they will be liable under the provisions of the Sherman anti-trust act for conspiracy in restraint of trade by reason of the decision of the United States Supreme Court in the Coronado case, Jackson H. Ralston, counsel for the American Federation of Labor, admitted in Washington recently.

President Harding has signed the Wadsworth-McKenzie bill, returning the navy, army, marine corps and coast guard service to peace time pay standards. The bill, effective July 1, slashes \$14,154,000 from the pay bill of the four services. It reduces the \$30 a month war time pay of private soldiers to \$21 a month, but grants many special allowances which might run the enlisted man's pay as high as \$157.50 per month.

Within one month of the end of the fiscal year 1922, the government's ordinary receipts were \$1,245,000,000 under those for the same period last year, according to treasury officials. Total ordinary receipts for eleven months were \$3,626,000,000. In the same period last year they were \$4,860,000,000. The loss is attributed almost entirely to shrinkage in income taxes.

A bill designating the daisy as the national flower of the United States has been introduced by Representative Kissel, Republican, of New York.

FOREIGN

Imprisonment for an indefinite period was the sentence imposed in Tokyo on Ryichi Nakano, the Korean lad of 19, who assassinated Premier Takashi in a railway station at Tokio last Nov. 4.

Admiral Baron Tomosaburo Kato, head of Japan's delegation to the Washington arms conference and minister of the navy in the recently resigned Takahashi cabinet, has accepted the premiership of Japan.

Nine rebels, including Epifanio Mendez, chief of the anti-government forces in the state of Michoacan, Mexico, have been killed in a fight with federal troops, according to advices to the war office in Mexico City from Ixtlan.

Asuncion, capital of Paraguay, has been taken by the revolutionary forces, according to a dispatch from Posadas, on the Argentine-Paraguay border. The report, which has not been confirmed, was received at Posadas from Villa Encarnacion, Paraguay.

Reports circulated in Europe and America regarding the condition of Nikolai Lenine's health have been exaggerated, according to advices from Moscow. The rumor that Lenine has been compelled to resign as president of the council of people's commissaries on account of his health was denied.

Avoidance of any extensive reciprocal trade arrangement with the United States is Canada's right course, former Premier Arthur Meighen, leader of the Conservative party, declared in a debate on the budget in the House of Commons. He was opposed to reciprocity, he said, "because the power to terminate it rests with the United States."

Great Britain is planning to pay the United States \$250,000,000 annually for interest upon the money borrowed from the United States during the war, it was learned in London from a semi-official source. Beginning in October the interest will be paid in two installments, \$125,000,000 in October and \$125,000,000 in the last part of March of the first of April.

Serious disorders with some casualties occurred at Agram, Croatia, when Croat anti-Serbian and monarchist clashed during a public celebration of the wedding of King Alexander of Yugoslavia and Princess Marie of Romania. Menger censored dispatches say that the fighting, in which shots were exchanged, lasted for three hours, but details are suppressed.

Royal Canadian mounted police recently raided a farmhouse on St. Theresa Island, near Montreal, and seized nearly \$100,000 worth of forged United States Federal Reserve Bank notes. Phillip Briere, alias DeLoecker, and Alfred Jean were arrested. A large modern printing press was discovered in the house. The bogus bills were clever imitations of American currency, officials said.

GENERAL

The death toll of the brief, but terrific, hurricane that swooped down on New York City passed the sixty mark with indications that the total number of dead might go much higher.

Vice President James Starr of the United Textile Workers, who has been in charge of the textile strike in Manchester, N. H., since it began Feb. 15, will not be permitted hereafter to address open-air meetings in Manchester, the park commission decided. Other non-resident union leaders are also barred.

While additional wage cuts swung over the heads of 350,000 more railway employes and awaited only formal release by the railroad labor board to slash another \$40,000,000 from the pay rolls of the carriers, it was rumored in Chicago that any rail strike growing out of present threats may be directed and financed from Canada as a means of evading the recent decision of the United States Supreme Court holding unions liable for damages caused by their members.

Charles Shafstall, 20 years old, has been arrested in Philadelphia charged with obtaining \$25 under false pretenses from the wife of former Congressman Keating of Colorado. Shafstall is said by police to have confessed writing a letter to Mrs. Keating claiming to be her son Percy, 16 years old, who disappeared May 10.

Properties of the Willis corporation at Elizabeth, N. J., were bid in at auction by the Durant Motor Corporation for \$5,525,000. The second highest bid was made by the Maxwell Motor Car Company and was \$5,500,000. Sale of the Willis plant, which covers thirty-seven acres and had an estimated value of approximately \$11,000,000, must await confirmation of Judge Bodine in the Federal District Court at Newark.

Establishment of national agencies to eliminate strikes and solve other troubles of the building industry was favored by John Donlin, president of the building trades department of the American Federation of Labor, who told the department annual meeting at Cincinnati that the "whole nation is tired of strikes and lockouts and disgusted with such institutions that make them possible."

Chicago's police force has been increased by the addition of 778 new patrolmen. The increase was the latest step in the city's anti-crime crusade and followed approval by the Cook county board of a \$100,000 appropriation to State's Attorney Crowe in the prosecution of pending cases.

Bitter attacks on the present Congress and the forces hostile to union labor were outstanding in the report of the executive council of the American Federation of Labor, submitted to the convention of the federation shortly after it opened at Cincinnati.

Southwest News From All Over New Mexico and Arizona

(Western Newspaper Union News Service.)

The epidemic of smallpox in Mexico and other parts of the northern district of Lower California is "well in hand" according to Dr. Frederico Cota, health officer of Mexicali.

Mrs. Juan Cordova, widow of the man who was brutally murdered in the hills near Taos, N. M., some time ago, has been arrested, charged with the deed, and held for trial under bond of \$1,000.

The extensive building campaign that has been under way in Las Vegas for the past year came just in time to enable Las Vegas to take care of the largest summer school in the history of the Normal University.

The jury in the trial of S. B. Brown, charged with receiving deposits in the Central Bank of Willcox as cashier after he knew the bank was insolvent returned a verdict of guilty. It is reported that the jurors took but two ballots.

Plans are now under way to hold a big auto race July 4 in Las Cruces in which only Ford cars will be allowed to participate. The track is being worked over and will be in the best condition at this time and some good speed is looked for.

The 1923 convention of the Arizona division of the National Federation of Postoffice Clerks will be held in Nogales. Postmaster Charles Beatty announced that Nogales was chosen by a unanimous vote at the annual convention held in Tucson.

When the new Santa Fe shops in Albuquerque are completed and running on full time over 5,000 men will be employed according to reports of the officials in charge. The machinery in the new machine shop alone will cost over \$1,000,000.

Through negotiations that have been under way for the past month, the Alamogordo State Bank and the People's State Bank of Alamogordo and the First State Bank of Cloudcroft, have been merged and the business will be done in Alamogordo under the name of the First State Bank.

Charging that his good name and reputation were subjected to humiliation by reason of his arrest and imprisonment on a charge of having harbored bandits who held up the Golden State Limited train west of Tucson on May 15, Richard Starr has filed suit in Tucson against Sheriff Ben F. Daniels for \$10,250 and against the Maryland Casualty Company for \$10,000.

Pablo Ybarra, sentenced to be hanged at the Grant county jail in 1917 for the murder of Sara Lenos, a Hurley woman, and who recently escaped from the state asylum, is now in the county jail in Silver City, having been re-arrested in El Paso. The next step in the case will be to determine the sanity of the prisoner, and should he be found sane it is believed that the death penalty will be carried out. If found insane he will be re-committed to the asylum.

Following a meeting of Arizona state allocation board at Phoenix, it was announced that recommendations would be made by the board for the designation and location of seven additional units of the organized reserves in Arizona. The board will recommend that headquarters of the 205th infantry brigade and the brigade headquarters be transferred from Tucson to Warren, Ariz., and that the headquarters company of the 409th infantry be moved from Bisbee to Tucson.

Pascido Silvas, one of eight alleged bandits who robbed the Ruby, Ariz., postoffice last August, and shot and killed Postmaster and Mrs. Frank J. Pearson, was found guilty of a charge of murder by a jury in Superior Court at Nogales. The jury fixed punishment at life imprisonment.

Contracts for the construction of approximately thirty-two miles of the Old Trails Highway between Winslow and Holbrook have been awarded by State Engineer Thomas Maddock, and it is thought work will be started within a few days. Separate bidding was done on three different sections of the graded and surfaced road, and the lowest bids totalled about \$75,000.

Sheriff George Patton of Eddy county and a Mexican outlaw are dead, and Deputy Sheriff Stone Milburn is seriously wounded as the result of a gun battle at Hope, N. M., recently. Sheriff Patton and Deputies Stone Milburn and Sam Patton went to Hope to get the Mexican, who, according to information they had received was wanted in Texas for escaping from jail while serving a life sentence.

Cash and jewelry valued approximately at \$500 were stolen from passengers on the Sunset Express, Southern Pacific train, by John J. Kelly, now held in the county jail at Tucson in default of \$500 bond, according to an announcement by Special Officer R. Hughes.

The horizontal railroad freight rate cut of 12 1/2 per cent in the mountain district means much to the mines of Arizona from which business originates the greater amount of the freight handled in the state. A handicap of the mines has been the freight rates.

FURTHER PAY CUT EXPECTED

\$40,000,000 IS ESTIMATED REDUCTION FOR RAILWAY EMPLOYEES.

NEW WAGE REDUCTIONS

300,000 RAILWAY CLERKS WILL RECEIVE BULK OF LATEST WAGE CLASH.

(Western Newspaper Union News Service.)

Chicago.—Wage reductions estimated at not exceeding \$40,000,000 for 355,000 additional railway employes whose wages the carriers seek to lower through the railroad labor board, are expected to issue from the board within a few days to be effective July 1. The new decisions will make a total of approximately \$150,000,000 to be cut from the annual pay rolls of the roads.

The bulk of those whom the new cut will hit are railway clerks who number approximately 200,000. Their pay, it was said, would not be cut more than 5 cents an hour, however, and certain chief clerks and other supervisory clerical forces may not feel the order at all.

About 5,000 train dispatchers, generally considered as subordinate officials, while coming under the pending decision, will not suffer any reduction, according to authoritative information. Supervisory officials in the shop crafts whose pay was slashed \$90,000,000 likewise received no cuts.

Coal passers, officers and water tenders, including in the general classification of stationary engineers and firemen, and freight handlers and other common labor included in the station employes' group, are expected to receive a reduction of approximately 5 cents an hour, the same cut applied to common labor in the maintenance of way department. There are about 125,000 unskilled laborers in these two classes.

The signal men and marine employes, numbering 15,000 and 800 respectively, are expected to come under the reduction, but no figures were obtainable to indicate the amount of their cut.

Anticipating a reduction, however, D. W. Helt, president of the signal men, declared the board would "probably hamstring us," adding that he could find no justification for the cut to present to his men and that he expected them to vote to strike as soon as a decision was issued. E. H. Fitzgerald, president of the clerks, likewise declared a further cut was unreasonable and that his organization would begin a strike vote immediately when the decision is announced. In line with the agreement of the eleven organizations affected by the cuts to take strike votes, made at the conference in Cincinnati recently.

Explorer to Fly Over North Pole.

London.—Capt. Roald Amundsen, the explorer, who is about to begin a five-year expedition into Arctic regions, says that the plan was for his ship, Maud, which sailed from Seattle, Wash., recently for Nome, to drift across the Polar ocean, while short reconnaissance trips would be made in small planes. Developments, however, had caused considerable change in the flying plans, and should conditions allow he would start with Lieutenant Omdal, his pilot, from Point Barrow, flying across unknown regions of the Polar basin, across the north pole and thence to Cape Columbia (Grant land) where a depot had already been established.

Labor Face Fight for Existence.

Cincinnati.—Facing a fight that leaders of organized labor regard as one for the very existence of unionism, the American federation here opened its forty-second annual convention, which was marked by the presentation of many issues to be considered during the next two weeks, and a speech by President Gompers, declaring "we do not fool ourselves into any fancied security." The issues were brought before the delegates by the report of the federation's executive council.

China Recalls Li Yuan Hung.

Peking.—Li Yuan Hung, who five years ago was forced out of the presidency of China by the militarists, has arrived here, and resumed the post of the nation's chief executive. Li came from Tientsin in response to the call of the revived Republican parliament, which recently met there, that he again assume the direction of China's affairs. President Li Yuan-Hung issued his first mandate shortly after assuming office, appointing as premier Wu Ting-Fang, former minister to the United States.

Vassar Seniors Lose to Fathers.

Poughkeepsie, N. Y.—Fathers of Vassar seniors permitted themselves a self-congratulatory smile at class-day festivities. Undaunted by the presence of three professors on the baseball nine of the Vassar senior team, fathers defeated daughters by the score of 11 to 3. After fanning consistently and courteously in the first inning, the "dads" later pounded gleefully the offerings of Miss Edith Fitch, Vassar's pitching ace, scoring six runs in the third inning and five in the fourth.

NEW PEDAL CONTROL ON ELECTRIC AUTO IS EXHIBITED IN NEW YORK

Miss Helen Heffernan is shown in the photograph demonstrating the new pedal control on the latest thing in electric coupes. Note the round heel pedal close to the seat. By shifting from the forward control, on which her foot is placed, to the heel pedal she can reverse at once, with no danger of stripping gears.

COOLING SYSTEM EFFICIENT UNIT

Average Owner Often Overlooks Existence of This Part of Car's Anatomy.

PLAN TO FORESTALL FAILURE

Not a Very Great Amount of Attention is Necessary, But All Parts Should Be Cleaned Yearly—Also Renew Rubber Hose.

One of the most thoroughly efficient units in the modern motor vehicle is the cooling system. The average car owner pretty nearly forgets the existence of this part of the car's anatomy except for the rare occasion when something goes wrong in it. Now, it is generally possible to forestall any failure in the cooling system if certain simple rules of maintenance are followed.

In the main, water cooling systems are all very much alike. The water in the jackets circulates around the cylinders, picking up the excess heat and then going to the top of the radiator, whence it flows downward to the bottom through cells or tubes, getting rid of much of its heat on the way. A fan is provided to send air in through the tubes of the radiator, assisting in the dissipation of the heat. Without the help of the fan, it would require a much greater area of radiator to get rid of the heat.

Water cooling systems are divided into two distinct types, known respectively as thermo-syphon and pump. The thermo-syphon depends for its effectiveness on the working of a simple natural law. Hot water is lighter than cold and rises to the top.

The thermo-syphon water system has the great advantage of simplicity; in fact, nothing could be simpler; it follows directly the working of a natural law. When properly designed, the system is quite adequate to ordinary demands. It is particularly effective on small engines. The matter of design is paramount with respect to this type of cooling system. In the thermo-syphon cooling system obstructions are more serious than in the pump system, because there is not the positive flow of water which tends to push minor obstructions of foreign matter out of the way. The thermo-syphon system must be kept rigorously clean.

In the pump cooling system a centrifugal pump, driven from the engine, forces the water around the system, thus maintaining the circulation needed for proper cooling. As long as the engine is running the pump is operating and the water is circulating. The pump system is more expensive to install, which explains why a majority of our American cars use thermo-syphon cooling.

The cooling system does not need any very great amount of attention. It should be thoroughly cleaned out at least once a year and it is advisable to take the radiator to a firm specializing in this work for cleansing. As such as four pounds of muck are often taken out of one radiator. Many car owners find it advantageous to fill the cooling system with a strong solution of washing soda and water and then run the engine for half an hour. This helps reduce scale deposits and when the system is drained and flushed out two or three times with clear water a noticeable improvement in operation is inevitable. Once a year the rubber hose connections should be renewed and the fan belt should be tested to see that it is tight enough to insure proper operation of this important unit.

YOU AUTO KNOW

That the squeak which frequently develops in a new car—an annoying little sound which seems now to be in one section of the machine and now in another—is usually due to lack of proper lubrication of the spring shackles. The best way to overcome this difficulty is to have the car jacked up, all the shackle pins driven out and the passages which the grease is intended to travel thoroughly cleaned.

Ordinarily, it will take some little time to attend to this, but the operation is well worth while because, until the grease passages are opened so that the lubricant can come directly in contact with the joint, the squeak will grow steadily worse—and, as every owner knows, the only thing worse than a squeak is a balky engine. Heavy grease should be applied directly to the bolt when this is slipped back into place and, in nine cases out of ten the elusive squeak will disappear immediately.

REVERSIBLE SEAT IS LATEST CONVENIENCE

Occupants of Automobile Can Face Each Other.

Particularly Handy When Lunching or Attending Outdoor Events and for Similar Purposes—Plan of Construction.

An eastern motorist has added something of novelty and convenience to his closed car by hinging the front seat so that it can be reversed to face the rear seat, when lunching in the car, attending games, and for similar purposes.

To do this it was necessary to remove the seat back altogether and upholster the lower edge as well as the rear edge of the seat. The hinges, which are also the seat braces, are made of wrought iron and are of equal length; they are padded and

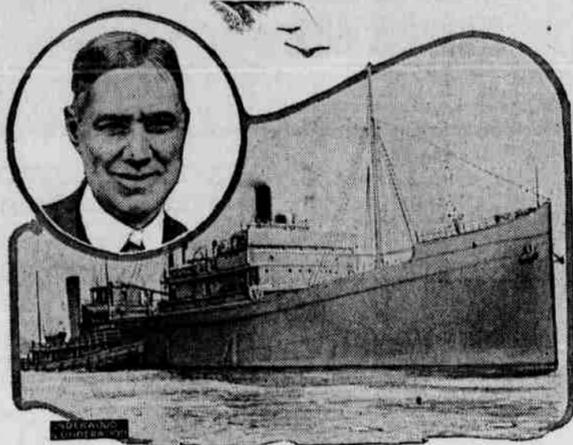

By Making the Front Seat of an Automobile Reversible the Occupants Can Face Each Other When Lunching or Attending Outdoor Events.

covered with material to match the upholstery of the car. L-shaped brackets are riveted to each side of the seat and back, as indicated in the drawing, for attaching the hinges. The seat is reversible by pushing at the top, in the same manner as the seats in a trolley or railroad car are reversed.—G. A. Luers, Washington, D. C.—In Popular Mechanics Magazine.

Survey of Motors.

The department of commerce at Washington has planned to make a world-wide survey of automobile markets.

Will Dive for Lusitania Treasure

The steamship *Blawie*, now outfitting on the Delaware river near Philadelphia, for an expedition to the spot where the *Lusitania* was sunk off the coast of Ireland during the war, to make an attempt to salvage the huge treasure carried by the ill-fated Cunarder. Inset is Benjamin F. Leavitt, chief diver of the vessel who has invented a diving suit in which he says he can go down 500 feet.

200,000 Killed by Earthquake

Word of Appalling Disaster in Kansu Province, China, Just Reaches United States.

MOUNTAINS MOVED IN NIGHT

Villages Were Swept Away Under Rising Sea of Loose Earth, Crevices Swallowed Houses and Camel Trains—Dragon Wagglers Tail.

Washington.—"One of the most appalling catastrophes in history and, perhaps, the most poorly advertised calamity that has occurred in modern times," is the way the National Geographic Magazine describes the earthquake in Kansu, China, "Where the Mountains Walked."

"Though the tremendous slaking-up occurred in December, 1920, the story is only now beginning to spread beyond the narrow defiles which guard the entrance to Kansu province," says the article.

"Mountains that moved in the night; landslides that eddied like waterfalls, crevasses that swallowed houses and camel trains, and villages that were swept away under a rising sea of loose earth, were a few of the subsidiary occurrences.

Mr. Josef W. Hall (Upton Close), who visited the earthquake area under the auspices of the International Famine relief committee, has brought back one of the first accounts of the devastated country and the strange things that happen when the earth turns itself into a contortionist. The area of destruction, 100 by 300 miles in extent, contains ten large cities, besides numerous villages.

"One of the most dramatic episodes of the disaster was the burial of Ma the Benevolent, a famous Moslem fanatic, and 300 of his followers, just as they had met in conclave to proclaim a holy war. The cave in which they had gathered was sealed by a terrific avalanche, while the group knelt on their prayer-mats.

Watchman Alone Escaped. "By some miracle, the watchman at the entrance to the cave escaped with his life, but the others were buried so deeply that, despite months of digging over an area of a mile, the Moslems have failed to recover the bodies of their leaders.

"In another district Mr. Hall and his party found that a whole mountain topped by a temple had slid into a valley. A little beyond they found that a road bordered by poplar trees had ridden the crest of a slide for three-quarters of a mile, without apparent damage to the trees or even to the birds' nests in their branches.

"The most appalling sight of all was the Valley of the Dead, where seven great slides crashed into a gap in the hills three miles long, killing every living thing in the area except three men and two dogs.

"In a small town on the highway two dangers had put up at the inn on the evening of the disaster. In the terror and confusion that followed the earthquake, the landlord completely forgot his two guests. It was not until several days later that he remembered them, and when, after considerable digging, their room was brought to light, both men were found alive.

"The subterranean dragon of Chinese cosmology who, according to the northwest China tradition, waggles his tail every three hundred years, this time played havoc, such as was never before recorded, with the face of the earth and the habitations of men. Likely no other earthquake in scientific annals ever changed the physical geography of the affected region to the extent of the Kansu cataclysm.

"The remoteness of the district in which the earthquake occurred cannot but intrigue interest. Although the concurrent quakes in Chile and Salvador, the tidal wave of Yap and the eruption of Mt. Asama, Japan, are all history, the Kansu disaster is still news. What actually happened in this

frontier province of China is only now, through the reports of the relief investigation expedition of which Mr. Hall was a member, being made known in any comprehensive way, even in China's capital and port cities.

Life Loss May Be 200,000. "Although the density of population is not more than one-tenth that of Shantung or the East China plain, the loss of life from landslides, collapsed cave homes, and falling buildings, together with death from exposure of the unsheltered in mid-winter in this high altitude, was, according to official

U. S. Completes Record Fleet

Last Ship on War Program Is Finished and Turned Over to the Government.

1,000 ARE NOW LYING IDLE

2,312 Vessels Built by Shipping Board in Last Five Years—New Liner, Western World, Marks End of Plan to Bridge Sea.

Washington.—When the Bethlehem Shipbuilding corporation delivered to the Shipping Board Emergency Fleet corporation the new liner *Western World*, for operation by the Munson line to South America, the greatest shipbuilding enterprise in history was brought to an end.

From May 24, 1917, when the wooden cargo carrier *North Bend*, the first vessel to be built under war contracts, was turned over to the government by Kruse & Banks, North Bend, Ore., to May 9, 1922, the shipping board constructed 2,312 ships of various types of 13,626,711 deadweight tons. At present more than 1,000 of these ships are lying idle, due to the depressed conditions in world trade and to the inability of American shipowners to meet foreign competition.

In announcing the end of the wartime program, which extended for three and a half years after the armistice because of the contracts entered into during the war, the shipping board made public some interesting statements showing the size of the great fleet.

Capacity of 388,363 Freight Cars. If all the vessels on the program were placed in a straight line, stem to stern, they would extend for 158 miles, and if steaming a mile and a quarter apart they would reach from New York to Southampton, England. The total tonnage is equal to the carrying capacity of 388,363 freight cars loaded 35 tons to the car. As there are approximately 2,800,000 cars in the United States, nearly one-seventh of them would be required to load the ships. For manufacturing the rivets alone a steel rod three-fourths of an inch in diameter and 37,500 miles long would be necessary. This would extend one and a half times around the earth.

The building of the gigantic fleet was not confined to the United States. Japan constructed 30 steel cargo carriers of 243,200 tons each, and China four steel ships of 40,000 tons.

The original program called for 3,270 ships of 18,407,276 deadweight tons. After the armistice all construction was canceled except when it was found that the government would lose more by giving up the project than by completing them. This reduced the program by 858 ships of 4,770,562 tons, which represented approximately 50 per cent of the vessels that were not 85 or 90 per cent finished.

1,017 Wooden Ships Built. In August, 1917, 431 vessels under construction in United States ship-

figures, 200,000, and according to the estimate of the foreign investigators more than half this number.

"Following the Sianfu-Lanchowfu-Turkestan highway, we ascended a small valley of steep grade directly west of Tsingling. Suddenly the high road for a length of a quarter of a mile dropped out of sight. It had been cut as if chopped off with an ax, leaving the fifty-year-old poplars and cottonwoods with which it is lined partly uprooted, like sentinels stricken at their post.

"It was in this Valley of the Dead that the most arresting freak of the cataclysm occurred. Two sections of the ancient, well-packed highway, accompanied by the tall trees which bordered it, were cut from the line of road following the side hill, swept hundreds of yards over the stream-bed, and set, intact, upon an angle on top of the heap of loose loess."

Drops Half Mile in Log Chute; Uninjured

Snoqualmie, Wash.—Stepping out to the edge of a snow-covered precipice to point out some scenery to his wife and little son, Howard Rupert, a salesman, disappeared into loose snow.

Mrs. Rupert quickly notified men nearby, who looked for Rupert. They were about to give up the search on account of darkness when the missing man appeared. He declared he had dropped into a loose snow-drift and falling through, landed directly into an unused log chute to carry timber in summer to the river far below.

Rupert said the chute was filled with ice and that he tobogganed down into the valley as such a high rate of speed he could not yell loud enough to be heard. Loggers found he had taken a ride of fully half a mile in the ice-bound log chute. Rupert was uninjured, but was minus a large part of his wearing apparel.

Tombstone at Parents' Grave Seized for Debt

New York.—A tombstone on a plot in a cemetery can be seized and sold at auction to satisfy a debt for an unpaid balance on the stone. It was decided by Justice MacCrate in Queens Supreme court.

The makers of the monument, which was ordered by Joseph Brandl, said that their attorney is arranging to auction the stone.

The firm contracted with Brandl August 26, 1920, to put up a monument and four name posts on his lot in Calvary cemetery for \$1,250. Brandl paid \$475 and had the bodies of his father, mother and two sisters buried in the plot. Other installments were not met, and after trying vainly to find Brandl, the company brought suit.

BLACK HAND FORBIDS BOY VICTIM'S TOMB

Threaten to Kill Father of Giuseppe Varotta, Who Squealed on the Gang.

New York.—The fear of the Black Hand has never yet been lifted from the heart of Salvatore Varotta, although it has been almost a year since his five-year-old son, Giuseppe, was kidnaped and his body thrown into the Hudson river.

Frequently agents of the Black Hand come to the corner where Varotta struggles to make a living by selling vegetables and fruits from a pushcart, and tell him that the Black

"You'll Get Killed."

Hand still remembers that it was on his testimony that five men were arrested for the crime, and that one of them is now in the death-house at Sing Sing awaiting execution.

Varotta saved every penny possible for many months, enough to make a deposit on a monument for the grave of his son. This will bear a portrait of the boy and this inscription:

"Here lies the remains of Giuseppe Voretta, a five-year-old boy killed by the Black Hand. He was kidnaped by the Black Hand on May 24, 1921, and his body was found in the Hudson river, off Piermont, on June 11, 1921. Erected by his father."

"Nobody but me and my wife knew of the monument, we thought," said Varotta, "but the Black Hand found it out. A man came to my pushcart and said: 'You mustn't do that, Varotta. You'll get hurt, Varotta; you'll get killed.'"

"Then the man ran away before I could call the policeman, who stands near my pushcart all day."

AVIATOR ATTACKED BY EAGLE

King of Birds Breaks Neck Against Airplane Strut in Battle in Air.

Quantico, Va.—A combat in the air between an eagle and a marine corps plane, in which the king of the air lost his life, took place near Quantico.

Lieut. R. O. Sanderson, flying near the flying field, saw a flock of birds and gave chase. An eagle which had been hovering high over the flock wheeled on his approach and at top speed flew directly toward him.

The bird struck one of the wire braces of the plane with such force as to break the brace and the eagle's neck. The bird then was caught in the braces of the plane. The eagle measured seven feet between the wing tips.

Struck by Lightning in Chair.

Fort Wayne, Ind.—While sitting in a chair at his rooming house one afternoon Orville Callaway, age twenty-three, was struck by lightning. Ruth Hutson, a sister-in-law, was sitting on the arm of Callaway's chair and, although shocked, was not hurt seriously. Callaway was taken to a hospital. He will recover.

SPARED JAIL FOR SAKE OF FAMILY

Bigamist Placed on Probation When Loyal Wife's Plea Wins Judge.

TWO WIVES DIFFERENT

Second One Wants Man Sent to Prison as Example While First Wife Asks He Be Returned to His Family.

Detroit.—For a stage setting, a somber courtroom; the chief performer, a confessed bigamist, his loyal wife, the girl he wronged; the plot, a struggle for mastery between the wife's desire to restore to her children their father and the girl's demand for justice for her baby and herself; the wife won.

William R. Orton was brought before Judge Thomas Cotter in Municipal court for sentence. Last week he confessed he had wed Hulda Nicholas June 6, 1921, although he had a wife, Florence Evans Norton, daughter of a wealthy Brockton (Mass.) manufacturer, and three children, living. Mrs. Orton accompanied her husband and the detective who brought him here from Brockton. When he pleaded guilty she expressed a willingness to adopt Hulda's three-months-old daughter, Hazel, if the court made a condition of probation.

Two Women in Court.

When Orton faced Judge Cotter his wife and Hulda stood on either side of him. Flanking Hulda were her brother, Arthur Nicholas, and Arthur's wife, with whom she and the baby have been living. A probation officer stepped forward and handed to the court a report recommending Orton to be placed on five years' probation on condition that he pay Hulda \$5 a week for the support of the child.

"Do you want your husband back?" Judge Cotter asked Florence. "I surely do," she answered. "I love him, no matter what he has done, and my children need their father."

"And you?" the judge turned to Hulda. "What do you say?" The girl's eyes flashed. She dug her fingers into the supporting arm of her brother and bit her lip.

"I want him sent to prison," she cried. "Make an example of him. I want justice. His word is no good. Put him where he can't do this to some other girl."

Florence threw her arms about Orton's neck and wept. He comforted her. She dried her eyes and addressed the judge.

Wife Begg for Mate.

"She'll get \$5 every week," the wife assured. "I'll see to that. Will makes

"What Do You Say?"

only \$25 a week, but we can scrape along. Please let me take him home."

"I deserve no leniency for myself," Orton interjected. "I am thinking only of my wife and children."

"It's high time you started thinking of them," Judge Cotter told him. "If it wasn't for them you'd be on your way to the penitentiary to serve five years."

ROMANCE OF GIRL, 14, JARRED

Sheriff Arrests Bridegroom on Delinquency Charge Few Hours After Wedding.

Port Clinton, O.—The romance of a twenty-two-year-old youth and a fourteen-year-old girl was blocked here by Sheriff C. J. Starkloff.

Earl Williams, twenty-two, and Ruth Besso, fourteen, daughter of Fred Besso of Port Clinton, eloped and were married at Monroe, Mich. Starkloff found them a few hours afterward at the home of Williams' parents here.

Charges of having contributed to the delinquency of a minor have been made against the youthful bridegroom. He pleaded not guilty. Bail was placed at \$1,000.

FARM LIVE STOCK

IMPORTANT WORM DISCOVERY

Zoologists Find That Carbon Tetrachloride Is Effective in Destroying Parasites.

(Prepared by the United States Department of Agriculture.)

The toll exacted from the live-stock industry by internal parasites such as worms is enormous, and because of this drain on the herds and flocks the zoologists of the United States Department of Agriculture keep up an unflagging search for chemicals and treatments that may be used to combat these organisms. Recently they have discovered that a certain chemical once used in medicine as an anesthetic and now used variously as a fire extinguisher, cloth cleaner, insecticide, and solvent for fats and gums, is very effective as a destroyer and expeller of intestinal worms. The name of this chemical is carbon tetrachloride.

The effectiveness of this chemical against certain round worms has been announced by the department, but what may be the most beneficial use has just been brought out by tests on animals infested with hookworms. In the case of sheep the minimum effective dose has not yet been determined, but all the doses used, from 12 cubic centimeters to 48, in each case given in two ounces of castor oil, removed all stomach worms and all hookworms. It has been equally effective for hookworm in dogs and foxes, and has been used with success against some of the various kinds of worms that infest the digestive tract of pigs.

The fact that a species of hookworm also affects man makes this discovery of the efficacy of this chemical against hookworms in various

Alfalfa is One of the Best Forage Crops for Hogs and Animals on This Kind of Pasture Are Most Healthy.

animals of interest to medical men as well as to veterinarians and live-stock growers. Medical men are now trying it out at several places as a possible cure for hookworm disease in man, and it gives promise of success. As a result of the work so far completed, scientists in the bureau of animal industry consider that this drug will prove of special value in the removal of the various kinds of blood-sucking worms in domestic animals.

FEED FOR FATTENING STEERS

Corn and Corn Silage With Cottonseed Meal and Alfalfa Favored at Iowa College.

That corn and corn silage, supplemented with cottonseed meal, alfalfa hay and salt make the best ration for fattening steers was shown to Iowa farmers recently. Steers fed this ration made substantial gains in experiments at Iowa State college and although they were ordinary steers they made \$13 per head. This indicates that the feeding business, properly handled and where good-quality steers are started with, will pay the farmer a profit.

Other roughages, such as clover hay, corn stover and mixed timothy and clover hays were experimented with. The red clover ration made a good showing but the other roughages lost money.

Cottonseed meal was used to an advantage in these experiments and made a fine balancer for the ration. In speaking of the use of this protein feed for steers the animal husbandry men say that during the last 12 years it has been used in experiments at the rate of three pounds to 1,000 pounds of steer. It was fed for a period of one to six months with corn silage and good results were obtained.

Cottonseed meal, however, as a hog feed has caused some doubt as to its value due to toxic qualities but the Iowa station has found that when fed in rations where cottonseed meal is used at the rate of one part to four parts of ration no harm has resulted.

OBSTACLE IN RAISING SWINE

Round Worm is One of Greatest Cause of Loss—Many Remedies, but Prevention is Best.

One of the greatest obstacles encountered in hog production is the parasites which are found where hogs have been raised for a number of years. Probably the round worm is the one which is most numerous and causes the most losses. There are many worm remedies but the best cure is prevention.

UMBERTO SENT BY WIRE

This photograph of Prince Umberto, heir to the Italian throne, was transmitted by telegraph from Rome to Milan in the presence of the king. This was a feature of the opening of the Commercial fair at Milan.

Unveiling of a New War Memorial in New York

Scene in Mitchell square, New York city, at the unveiling of the memorial to the war dead of the Washington Heights section of the metropolis; and Mrs. Harry Payne Whitney, sculptor of the monument, as she appeared at the ceremonies.

First Picture of President's New Yacht

Exclusive and first picture of President Harding's new yacht, bearing him from the Mayflower to the Naval Academy where he attended the events of the first day of June work. The President's seal and four stars may be seen on the bow. Naval aides and secret service men are on deck while the president and Mrs. Harding are in cabin.

Hiking With Only One Leg Apiece

Two veterans of the World war, each of whom lost a leg in the conflict, have started from Chicago for San Francisco to attend the disabled men's convention, which is to open June 20. The boys will walk the greater part of the way and will follow the Lincoln highway. In order to defray their expenses they will sell a magazine along the road. Left to right they are William H. Roethel and Leonard Jay.

Touch of Winter in the Summer

This isn't a winter picture, just a summer scene in Rainier National park, Washington, snapped at Paradise Inn, 5544 feet above sea level. These tourists have driven from Seattle, only a few hours away, and are viewing the snow banks which are to be found here during the entire summer.

VICTIM OF CHILD LABOR

This little girl is kept at her task of stringing labels, pay for which is one cent an hour. A thorough investigation of the child labor conditions in Rhode Island has resulted in startling disclosures of the hardships, long hours and small pay that more than five thousand children have been subjected to by manufacturers of cheap jewelry, small wares and hosiery.

MAY BE ANOTHER CARUSO

Up in Milwaukee a singer has been discovered whose voice, according to musical critics, may almost equal that of Caruso. He is a paperhanger and his name is Joe Braman.

NOT TOTAL LOSS

Writer Is Philosophic Concerning His Investments.

After All, He Ruminates, Knowledge Gained in the School of Experience is Worth Something.

Owing to circumstances that I seem to have proved myself inadequate to control, I have become, as the lawyers say, "seized" of certain properties and possessions that require management and intelligent personal attention. I feel, in the custodianship of these things, as if I were a nervous woman who had been presented with a den of snakes or a roomful of mice to care for.

I keep these various evidences of alleged wealth in a long sheet-steel box with a hasp over the end, which is, in turn, kept in a hole in the wall of a steel-lined room. I cannot get into this pigeon hole without the assistance of a uniformed attendant who comes and makes medicine with a key that has a strong family resemblance to one I own. After he has primed the lock I can insert my own key and the door flies accommodatingly open. Then I haul out that box and open it and look awestrickenly at its contents.

Some of the handsomest of these contents, that I admire most from a wholly scenic standpoint are, I am told, of least value commercially. I have, for example, some mining stock. I know it is good, for I know a man who went through the mine himself, personally accompanied by the owner and his daughter, and this friend of mine saw the gold just as plain as could be. So at 10 cents for each hundred-dollar share, I bought a thousand of them. Subsequent anxious efforts on my part to locate that mine and to find out anything complimentary about it have proved very discouraging indeed. And as for dividends on that stock, periods have passed with the most commendable regularity. I have occupied the reviewing stand while they passed. A man to whom I showed the stock laughed and said it was worthless. But it was by believing a fellow that I was led originally to buy the stuff. So I will not believe anybody again. I shall hang on to that stock. I feel sure I shall.

However, far be it from me to raise Ned about any of these stings I have been vouchsafed by the smooth boys. When a fellow will pay \$100 for that much of that sort of stuff, he is very badly in need of good sense, and any price he may pay for it must not be regarded as exorbitant. And it is well to be stung just enough in early life by buying fake stock so that one is, as it were, vaccinated or inoculated. It may save him hundreds or thousands later on. So my worthless stock is in some ways the best investment I have. It not only was, but it still is, very dear to me.—Strickland Gillilan in Farm Life.

Prehistoric Cemeteries.

Warren K. Moorehead, archeologist of Phillips academy, Andover, Mass., has unearthed three cemeteries, 52 skeletons, 23 funeral urns and countless small art objects of prehistoric residents of that section in the Cahokia mounds near East St. Louis, Ill. Professor Moorehead is doing research work under the direction of the University of Illinois.

This discovery tends to substantiate the theory that the mounds are of human construction rather than natural hills, it was said. At the base of one mound a large altar was found, and Professor Moorehead explained it was customary for the "mound builders" in other sections of the Mississippi valley to cover over the altars, after they had served their usefulness, to great heights—hence the mounds.

Indications of an effort to smelt lead were found in one mound, the professor explained. A smelter of baked clay, in the form of a semi-circle, was discovered, and beside it chunks of lead. Near it was a vessel in the shape of a modern chemist's crucible.

Going to Try It Again.

Five-year-old Mary Jane had a pet bantam hen. Recently the latter hatched six little chickens, but she proved herself to be an unnatural mother and wouldn't take care of them.

The family was provoked and Mary Jane's father threatened to sell the hen if she didn't take care of the chickens. That brought Mary Jane to strategy. That evening when her father came home she was waiting for him.

"Where's your hen?" he demanded. "Oh, no." Mary Jane was very serious. "She's in the hen coop getting ready to lay some more eggs to hatch some more chickens."

Encouraging French Birth Rate.

In France there is a good-sized fund for the purpose of encouraging large families. Upon three different occasions rather large sums of money have been given for this purpose by M. Cognacq. The principal awards are 100 prizes of 10,000 francs each to be distributed annually to the deserving heads of families of more than five children and 90 prizes of 25,000 francs for the heads of families of at least nine children. The donor of these awards accumulated his wealth in the operation of a large department store in Paris and during his lifetime it was a constant source of concern to him to note the dwindling birth rate of his country.

WANTS VOTE ON SHIPPING BILL

PRESIDENT THREATENS SPECIAL SESSION TO CONSIDER SHIP SUBSIDY BILL.

INSISTS ON MEASURE

LABOR CONDEMNS SHIP SUBSIDY AS HARDING URGES PASSAGE.

(Western Newspaper Union News Service.)

Washington, taxidermist and shoemaker, 249 Main St., Delta, Colo., says: "My back was lame and hurt me when I stooped. My kidneys were disordered and the secretions unnatural. The drinking of Doan's Kidney Pills brought this trouble on. I heard of Doan's Kidney Pills and tried them. Doan's benefited me in every way and I haven't had any symptoms of kidney trouble for a long time."

The President's views on the question of an extraordinary session were set forth in a letter written May 26 to Chairman Campbell of the House rules committee expressing the hope that the committee, in charge of legislative machinery, would open the way for speedy consideration of the measure. Copies were obtained meanwhile by the merchant marine committee, framing the bill, and Republican committee members declared the notice served by the President would rally many Republicans to its support.

It was disclosed at the White House that the President could suffer no greater disappointment than that which would come through failure to put the shipping bill to a vote. House leaders who have talked with him on the subject have stated that he has been most insistent that the measure be taken up, if necessary, as a straight party issue, believing its enactment of the greatest value to the business welfare of the country.

While the merchant marine committee was working rapidly to have the bill in shape for the House, Representative Davis, Tennessee, a Democratic member, launched the first minority attack on it, declaring it "vicious" in its provisions, and that it gave more power to the shipping board than "good men ought to want, or bad men ought to have."

Considering the Democratic opposition and Republican "disaffection," one of the Republican leaders asserted that as matters stood it was extremely doubtful if a special rule, giving the bill the right of way, could be passed in the House.

Cincinnati, Ohio.—Unqualified condemnation of the ship subsidy bill was voted unanimously by the delegates at the American Federation of Labor convention, almost simultaneously with President Harding's dispatch of a letter asking Congress to pass the measure, under threat of an extra session. The convention also voted to send a protest against passage of the bill to the Senate and House leaders.

The bill was termed by the resolution adopted by the convention as a "cunningly devised scheme to enrich certain classes of so-called American ship owners at the expense of the truly American taxpayer, and also to provide patronage which is certain to be used for purely political purposes."

The resolution concluded with the statement that the bill was "condemned as inimical to the public interest, and particularly destructive to the nation's hope for sea power."

France Firm on Russian Policy.

Paris.—Premier Poincare, in his note to the British government, in reply to the recent British memorandum, does not recede an inch from the position taken in his memorandum of June 1, with respect to The Hague conference. He insists that if the powers come to an agreement in advance and present a united front to the Russians at The Hague and not permit them to stray from the point they can and will accept all required of them. As proof of this, M. Poincare instances what they have done for Italy in the treaty just concluded.

Colorado River Floods 2,000 Acres.

Brawley, Calif.—The Colorado river levee broke at Raab ranch, two miles east and a mile and a half south of Blythe, Calif., according to messages received here. The gap in the levee measures 200 feet and is expected to widen, according to the messages. Two thousand acres were inundated. The town of Blythe itself was reported to be in no danger.

300 Persons Drowned in Flood.

San Salvador, Republic of Salvador.—Three hundred persons are known to have been drowned and many persons are missing following an abnormal rise in the Aveluante and Arenal rivers, which overflowed their banks and joined together in one stream, inundating the Candelaria district of this city. Several houses were swept away by the raging torrent. The government has sent a relief expedition here to succor people in distress. A large subscription list has been started for the relief of the sufferers.

The Cuticura Toilet Trio. Having cleared your skin keep it clear by making Cuticura your every-day toilet preparations. The Soap to cleanse and purify, the Ointment to soothe and heal, the Talcum to powder and perfume. No toilet table is complete without them.—Advertisement.

It is within the powers of the least of us to be polite, straight from the heart.

Help That Aching Back!

Is your back giving out? Are you tortured with backache and stinging pains? Doer any exertion leave you "all played out"? Feel you just can't keep going? Likely your kidneys are to blame. Overwork, strains, hurry and worry tend to weaken the kidneys. Backache is often the first warning. Headaches and dizziness may come, too, and annoying bladder irregularities. Help the kidneys with Doan's Kidney Pills—the remedy recommended by thousands. Ask your neighbor!

A Colorado Case

A. Bruton, taxidermist and shoemaker, 249 Main St., Delta, Colo., says: "My back was lame and hurt me when I stooped. My kidneys were disordered and the secretions unnatural. The drinking of Doan's Kidney Pills brought this trouble on. I heard of Doan's Kidney Pills and tried them. Doan's benefited me in every way and I haven't had any symptoms of kidney trouble for a long time."

MOONEY BACK IF IT FAILS

You can join the "Edgeworth Club"

There are thousands of members, most of whom don't realize they belong. There are no initiation fees. No dues. No assessments.

Nearly every man who smokes a pipe is either a member or a prospective member. (We say "nearly" because there are some men who find Edgeworth not just right for them.)

Any pipe-smoker becomes a member of the "Edgeworth Club" as soon as he starts to smoke Edgeworth.

It won't dawn on him at first, perhaps, but after he has smoked a few cans he will notice other Edgeworth smokers.

He will find a comradeship that he shares with them—not easy to explain or understand, but real and lasting.

Suddenly he knows he belongs—that he is a life member of the "Edgeworth Club."

Edgeworth smokers are generally good, likable chaps. It isn't smoking Edgeworth, of course, that makes them so. They happen to be the kind of men who choose Edgeworth.

If you have never tried Edgeworth and think you might like to join the "Club" we'll be glad to introduce you as our guest.

Write to us.

A post card will do. Just send us your name and address and say "I'd like to try Edgeworth," and we'll send you free samples of

Plug Slice and Ready-Rubbed. If you'll add the name and address of the dealer you usually buy your tobacco from, we'd appreciate the courtesy.

Edgeworth comes Ready-Rubbed or Plug Slice.

Edgeworth Ready-Rubbed is already rubbed for you. You pour it straight from the can into the bowl of your pipe.

Both kinds pack nicely, light quickly, and burn freely and evenly.

Edgeworth is sold in various sizes to suit the needs and means of all purchasers. Both Edgeworth Plug Slice and Edgeworth Ready-Rubbed are packed in small, pocket size packages, in handsome tin humidors and glass jars, and also in various handy in-between quantities.

For the free samples address Larus & Brother Company, 00 South 21st Street, Richmond, Va.

To Retail Tobacco Merchants: If your jobber cannot supply you with Edgeworth, Larus & Brother Company will gladly send you prepaid by parcel post a one- or two-dozen carton of any size of Edgeworth Plug Slice or Ready-Rubbed for the same price you would pay the jobber.

Something to Think About

By F. A. WALKER

SILENCE

PLAY the silent part in all your joys and sorrows. Let neither excessive happiness nor great grief overwhelm you.

Control your speech and spirit under all conditions, even when the clanging din around you urges you to trumpet-tongued retorts.

When the storms of mischief-makers shake your house of clay to its very foundations and cause your soul to tremble with apprehension, hold your peace.

Be cool and calm and patient. To be otherwise is perilous as it invites fresh attacks from those seeking your destruction.

Curb resentment through the snarling temper; lift up your face to the whirling clouds, and remember that beyond them there is always the clear, serene sunlit sky, indifferent to the clamorous noises below.

"Let not your heart be troubled." Think of the content that will ultimately be yours if you hold loyally to the right course and continue in well doing.

Think of the eyes that are watching you, the loved ones who are dependent on you, trusting and believing in the nobility of your soul.

Do nothing, think nothing and say nothing that will shake their faith in you, or cause you to lose faith in yourself.

By keeping still in great stresses of emotion the atmosphere around you becomes cooler, and your enemies or accusers gradually lose their heat and become more easily susceptible to reason.

Silence is the most magnificent and impressive thing in the universe.

What more sublime than the hush of a starry night in the solitude of vast hills or endless plains?

What more than silence impresses so deeply, so profoundly, the thoughtful man or woman of his or her insignificance?

These close intimacies with Nature, beyond all others, bring home to us long forgotten promises, old faces and friendships lost in the mist of years, with startling clearness.

But the best thing about silence,

whether we be with it in the verdured fields or forest, or in our own rooms, is that we get a closer view of our faults and frailties in quite a new and surprising light, frequently dazzling our wondering eyes and changing us for the better.

Uncommon Sense . . .

By JOHN BLAKE

ENJOY THE GAME

GENTLEMEN who play golf will tell you that the man who tries too hard never does very well at it. Incidentally, he never gets any fun out of the game.

There are many parallels between golf and life, which is doubtless the reason that so many people are devoted to it.

Golf, of course, is a game, and only a game. Yet there are many of its followers who can see only the advantage of winning, and who come in sour and ill-tempered if they lose.

Others, while they try to win, get just as much fun out of it if they lose. And they never stamp on their clubs or throw them away, or swear at the caddies.

It is very important to win in anything. But it is more important to get your allowance of fun out of it as you go along.

Sitting wheezily in any rich man's club you will find old gentlemen who wanted to win more than anything else, and who did win fortunes, but lost their health and their happiness in the effort. And, with all their money, you can set them down as losers.

There is good sportsmanship in all human effort. There are things the good sportsman will not do, even to win. One of them is cheating; another is becoming so absorbed in the pursuit of victory that he forgets everything else as he goes along.

John Burroughs, who probably never had more than the necessities of life in all his existence, got full measure of enjoyment that was denied to many who made a thousand times as much money. Incidentally, he was a very successful man, for he added to the sum of human knowledge.

Win if you can. Get a fortune if you can. Money means independence, and the ability to do good in the world.

But never forget that there is enjoyment as well as trouble in life, and that if you are not too intent on winning that the world calls success, you will be happier as you go along, and stand just as good a chance of making your life worth while, and the world better off because you lived in it.

Mother's Cook Book

"He who receives and entertains his friends, and who does not, himself, personally, give supervision to the repast which he offers them, is not worthy of having friends."

FRESH FISH

IN THE parts of the country where fish may be caught, cooked and eaten the same day, there is no more appetizing and healthful food. Fish should be cleaned and placed on ice, never leaving it until put into the oven or broiler; then the flavor will be good and the dish appetizing.

Pike, bass, pickerel and perch all abound in the fresh waters. There are many number of ways of serving them. Stuffed and baked, the pike and pickerel are excellent. The perch are usually fried until crisp and brown. They should be rolled in seasoned flour before cooking.

A meaty fish is very good boiled in acidulated water and served with cooked spinach and this sauce:

Banana Filling.

Scrape and mash two ripe bananas, add one tablespoonful of lemon juice, two tablespoonfuls of powdered sugar and one-half cupful candied orange peel. Use on yellow cake, top with whipped cream.

Creole Sauce.

Sift one can of tomatoes (a pint), season well with one teaspoonful of salt, a dash of cayenne. Add one cupful of fresh mushrooms that have been cooked in butter for five minutes. To the butter left in the pan add two tablespoonfuls of flour; stir until smooth. Add to the sauce and cook all together until thick. Add two teaspoonfuls of onion juice, one green pepper, finely chopped, and pour the whole over the boiled fish.

COULD NOT HIT A LICK FOR MONTHS

Petersburg Resident Says She Had About Lost Hope of Getting Better—Now Well and Happy.

"Tanlac has been such a blessing to me I can't help singing its praises," said Mrs. T. J. Archer, highly esteemed resident of 1147 Shepard St., Petersburg, Va.

"I had indigestion so bad I couldn't eat a thing without being in misery for hours, and the pain around my heart caused by the gas seemed all I could stand. I constantly had headaches and awful spells of dizziness. Then to make matters worse rheumatism in my arms, shoulders and knees almost drove me to distraction, and for three months I couldn't do a stroke of work."

"I had just about decided it was no use to take any more medicine when my husband brought me a bottle of Tanlac. Now I never have a touch of indigestion. Headaches and dizzy spells are a thing of the past, and rheumatism has left me entirely. I never have known a medicine to equal Tanlac."

Tanlac is sold by all good druggists.

Pay your debts first and give presents afterward.

SAVE SHOES AND STOCKINGS

WOMAN HAS HISTORIC PEN

Used by President Harrison When He Signed the Present American Copyright Bill.

The recent celebration by the League of American Pen Women of their twenty-fifth anniversary, or "silver jubilee," makes this story timely:

During the administration of Benjamin Harrison, the present American copyright bill was passed. William McKinley, then a member of the house of representatives, offered the bill, the data for which was supplied by Margaret Sullivan Burke, newspaper correspondent, and afterward first president of the League of American Pen Women. She gave this league its first home and its name.

Afterward, when President Harrison signed this bill, the pen with which he signed it was presented to Mrs. Burke by Elijah Halford, his private secretary, and one of her old Indiana friends. This pen is now in the possession of her daughter, Hilda Burke.

If you want "Uncle Sam to do it," of course, he is going to take your money to do it with.

THE PRAYER OF A HORSE

By Laurence E. Cash.

O MAN, my Lord and Master, hear Thon my prayer:

Water me, feed me, keep me clean and work me in reason. O Lord, when my day's work be done give me shelter from rain, wind and cold and a clean, dry bed in a stall wide enough for me to lie down in comfort. Do not tie my head in an unnatural position or cut off my tail, which is my only defense against flies. O Man, drive me rapidly down hill. O Lord, do be merciful and considerate of me in hot weather, and do not kick, strike or otherwise abuse me when I do not understand your desires. Prod me not with merciless spurs. Teach Thou me to understand Thy desires. Speak gently unto me, O Lord, Thy voice means more to me than whip and reins. I have a sense of humor. Play with me, and pet me, O Man, and I will gladly lend myself to Thee in willing service.

Have mercy on me, O Master, when I have colic, and do give me one spoonful of Di-Col-Q. It will relieve me quickly. When I have scours drench me with Di-Col-Q. And, O Master, when I be galled, have sores on shoulders or back, wire cuts, scratches, mange or swellings, apply Thon Di-Col-Q to mine affected parts and I will praise Thee for relief from mine afflictions. Di-Col-Q will enable me to do Thy bidding with delight.

O Man, Di-Col-Q is just as good for similar human ills.

Remember, O Lord, Di-Col-Q is made in mercy by New York Drug Concern, 401 Lafayette Street, New York City. Praise Thon Thy firm for their alleviation of beastly ills.

O Master, when I fail to eat examine my mouth for the cause. Do not work me when I can not eat. Be merciful unto me, O Man, and I will serve Thee and Thy family many years with a glad heart.

Finally, O Lord, when my youthful beauty and strength be gone, and my days of service ended, neither turn me out to starve and freeze, nor sell me to some cruel man to be tortured. O Man, if Thou be financially unable to care for me in my old days, take Thon my life in the kindest way.

Hear and answer my prayer, O my Lord, and YOUR God will reward you both here and in the hereafter.

With all reverence I so pray unto Thee in the name of Him, who was born in a manger.—AMEN.

Like Father, Like Son.

Billy had received a small book for Easter containing Bible verses, on the cover of which appeared a picture of Jesus as the Good Shepherd seated amidst His flock and holding a lamb in His arms.

His father carefully explained the significance of the picture and added: "And you, my son, are one of His little lambs."

The child studied the picture a moment.

"And you are one of the old sheep, are you, daddy?" was his guileless comment.

How It Is at College.

At one of the dormitories of a well-known college for women two young housemaids were comparing notes on academic life.

"Well," said Nora, dimpling, "the faculty has the brains, and the college girls has the clothes, but, believe me, the maids has the looks!"

Disturbed Sleepers.

My sister and her two young sons visited grandmother last summer. The older one, who had a new toy dog, was much disturbed lest his dog's slumbers be disturbed by the noisy young brother.

One afternoon, shortly after their arrival, an elderly neighbor in answer to a persistent ringing of the bell, discovered my young nephew at the door with his woolly dog tucked under his arm.

"Would you please put my little dog to sleep in your bed?" he queried. "It is too noisy at grandmother's."—Chicago Tribune.

Anxiety

The fortune teller held his hand and followed his lines.

"You are about to have serious trouble," she said, "with a dark gentleman who—"

"A moment," he said, nervously. "See if his name is Mose, and if he is my junior."

Some start the day's work and some passively allow the day's work to start them.

SCHOOL DAYS

THE WAY OF A MAN WITH A MAIN

The Friendly Path

By Walter I. Robinson

THINK FOR YOURSELF

IT IS always good policy to read clean literature, to consider the advice of those who should know what they are talking or writing about, and to listen to good sermons, but no one ever was kept on the right pathway by what he read or heard spoken unless he used his brain.

Everyone's life is in his own keeping. Whether he is happy or unhappy, whether he is successful or unsuccessful, whether he is earning for himself an eternal home in heaven or hell depends on himself. Wise men and honest men may direct one to the proper road, but no one can make a human being do what is right if he refuses to do so.

Nearly every one remembers that old proverb, "You can take a horse to water, but you can't make him drink." But too often the lesson it is supposed to teach falls on deaf ears.

It is always dangerous to follow the mob. One may become quite popular with a certain class if he will do as that class wishes. But popularity of that sort is seldom worth a great deal. Those who find real enjoyment in life and those who stand out as leaders are

seldom found in the midst of the most popular crowd.

If one's mentality is normal, whether he is educated or uneducated, he is likely to come near the proper goal if he uses his brain. But let him constantly depend on the judgment of others to direct his footsteps and the chances are ten to one that he'll be headed toward a fall.

No one knows as well as oneself what is good for him, except when illness comes and the skill of the physician or surgeon is necessary to mend the bodily damage. Yet millions constantly go whining about, seeking advice from their fellows, the while losing much of their just share of happiness.

When one accidentally stumbles or when he is pounced upon by the rattler hidden beside his path, his misfortune is excusable. But it is no excuse for man or woman of normal mentality blaming downfalls on others.

The wisest persons are those who do not think they know it all.

(Copyright.)

Asiatic Peoples.

Alpine people are frankly Asiatic. They originally come from the Pamir uplands. Half of the Alpine types of the present world, the Turkoman, the Turkish or Tartar, the Armenian and the Levantine are still natives of Asia. Living men of Homo Sapiens Alpinus or the normal round-heads of France and Germany have been found in Afghanistan and Samarkand, places from whence their ancestors had never migrated.

Here's a real treasure from Nature's storehouse

GOOD old Mother Nature has placed in wheat and barley the wonderful food properties which build and sustain life and health.

Many so-called "refined" foods are robbed of vital elements which the body needs.

Grape-Nuts—that famous wheat and barley food—brings you all the natural goodness of the grains in perfected form, with a crispness and flavor that charm the appetite.

You will find Grape-Nuts an ideal dish for breakfast or supper-time. Ready to serve from the package, with cream or good milk.

Order Grape-Nuts from your grocer today.
