### Initial Hospital Care: Medicare Reimbursements (2019)

99221: **\$102.63**  
99222: **\$138.02**  
99223: **\$203.47**

### Subsequent Hospital Care: Medicare Reimbursements (2019)

99231: **\$39.71**  
99232: **\$73.81**  
99233: **\$104.59**

### “Down-Coded” Notes Distribution

### PROBLEM:

- ~27-29% of psychiatry notes are down-coded
- Estimated \$11,542 per month (\$138,504/year) of inpatient lost revenue

### RESPONSE:

- Quality Improvement committee created to address the problem
- History of present illness (HPI), review of systems (ROS), history (PMH/SH/FH), and mental status exam (MSE) identified as most common problems. Medical decision making (MDM) also a reason.

### SOLUTION:

- Created auto-text templates for HPI, ROS, MSE, and MDM
- Department wide provider training for new auto-texts initiated February 2020.

### Initial Hospital Care January 2019

### Subsequent Hospital Care January 2019
