A few comments about the String Trio
(for violin, viola and cello)

by Alan Schmitz

1999

This trio has three movements arranged in medium, slow, and fast tempos. The piece (all three movements) is built almost entirely from a single theme:

Moderato \( \frac{3}{4} \)

This theme is manipulated rhythmically to create different moods. In some places the theme’s meter and rhythms are converted into a waltz, while in others a quick \( \frac{6}{8} \) (duple) feel is used. Also, the theme is presented in two different “keys,” which are a tri-tone apart (instead of the tonic to dominant relationship associated with most tonal music). Many of the ideas introduced in the first movement return in the other two movements.

The third movement is longer and might bear a little explaining. It is constructed like an old-fashioned combined form piece from the Classical Era: the Rondo-Variation. All four “A” sections are in \( \frac{6}{8} \) meter (with the exception of a few bars of \( \frac{4}{4} \) in the finale). These constitute the “variations.” The finale also uses the stretto technique found in Bach’s fugues (another old-fashioned, but useful, technique). Between the “A” sections are three “B” sections that consist of short cadenzas (in \( \frac{4}{4} \)), one for each of the trio members. In terms of “key” and accompaniment, these sections are developments of the second movement, while the “A” (variation) sections are derived, at least in terms of “key,” from the first movement.
