This Newspaper is brought to you for free and open access by the New Mexico Historical Newspapers at UNM Digital Repository. It has been accepted for inclusion in Reserve Advocate, 1921-1923 by an authorized administrator of UNM Digital Repository. For more information, please contact disc@unm.edu.

Mr. and Mrs. Reader

When you pick up a copy of your home paper, do you give any thought how it was produced, or the money that is spent to print it and deliver it at your home?

The newspaper of today, no matter if 25 cents a copy was charged, would be the cheapest thing you bought.

In the first place it represents an investment in plant and equipment of many thousands of dollars.

Its editor and staff work diligently day in and day out to gather all the news and present it to you in readable fashion. It aims to keep you informed on all the news that's "fit for ink."

With the average paper, the price you pay for subscription does not cover the cost of WHITE PAPER.

Yes, the newspaper is the cheapest thing you buy.

Think it over. Look it over. Then support your home paper. It's the best investment you can make, for it brings the largest returns.

Reserve 1922 Carnival A Huge Success People Came From All Over County

WE THANK YOU; COME AGAIN.

Every body had a good time and Reserve is glad to have had them. There was something doing every minute. Good, clean sports from early morning to early morning. It was a jolly crowd and it would have been a hard matter to have picked a quarrel. Roping, riding, bronco busting, racing, base ball, picture shows, dances; plenty of good grub and the glad hand. What more could one ask?

The true western spirit of good fellowship and genuine hospitality was every where manifest. For the time we were just one big family. And the kiddies; what a wonderful outing for them just one big circus.

The Reserve Carnival is now a permanent fact and will be held yearly.

Carnival Contests And the Winners

Matched pony race, 300 yards. Ho ses belonged to Geo. F. Farr and Henry Graham. They were ridden by Jasper and Dick Hudson. It was a tie.

Girls Cow Pony Race

Three hundred yards.
Maude Allred, 1st.
J. well Waters,)
(Mrs. Graham,) 2nd.
Edna Lusk, 3rd.

Bronco Busting

Three riders,
Gabaldon 1st.
Kelly 2nd.

Calf Roping

First Day

There were 15 entries, but only four who caught.
Owen Walters, .41
Dave Gordon, .41-1-2
Whiting, .55
Herod Hudson, .61

Second Day

Thirteen ropers, three had no time.
The time of the others follows:
Grover (Red) McFadden, .32
Owen Walters, .32 5-10
Wayne Honneycutt, .45
George Farr, .55 2 5
H. Graham, .55 3 5
H. F. Hudson, .58 5-10
Dave Gordon, .59 1 5
Dick Hudson, .63 3 5
Bowers, .79 2-5

Girls Foot Race

Edna Lusk, 1st.
Maud Allred, 2nd.
Jewell Waters, 3rd.

Greased Pole Climbing

Won by Doyle Castanos of Magdalena.

Girls Popularity Contest

There were a large number of beautiful and popular young ladies voted on. All could not win and some do not care to have their names published, therefore the names of the winners only will be announced.

Over 20,000 votes were cast. Of this number two young ladies received 6,375 votes, May Stevens receiving 3,295 and winning the first prize; a ladie's wrist watch. Mable Hudson receiving 3,080 votes, was given a handsome set of ear rings. Miss Stevens also was given a bar pin for selling the greatest number of nomination tickets.

Glenwood

Miss Muriel Shelton gave a party Wednesday to a number of her friends and all had a most enjoyable time. The party was entertained with outdoor amusements. Light refreshments were served.

Joe Campbell was bitten by a rattlesnake a few days ago while working his farm. He went to Silver City for treatment and is reported out of danger and improving rapidly.

The housewives are very busy at this time canning and preserving. Much of their time is also occupied getting the children ready for school.

The year old baby of Mr and Mrs Cleve Hickson has been quite sick for the past week, but reported better.

A number of the local people are talking seriously of going to Reserve for the September carnival. They hope to bring home some of the prizes.

An unusually large rattle-snake was found under a haystack. He did not sound the usual warning by shaking his rattles. The boys killed him with pitch forks.

Mr. and Mrs. C. B. Thomason attended the closing of the annual Baptist Campmeeting at the H-Y on Saturday and Sunday.

Albuquerque -- August 30, 1922.

The political pendulum as evidenced by the platforms adopted at the Republican and Democratic Conventions in Ohio swings favorably in the direction of G. O. P. success and the followers of the "donkey" are reaching out in the darkness, seeking vainly a place of anchor.

The platform adopted at the Republican Convention is a staunch declaration of confidence in the administration of President Harding and a complete endorsement of the congressional record of the party. The party's claims to the support of the electorate is based on great achievements in dealing with domestic and foreign problems--the long list of constructive enactments of the Sixty Seventh Congress--the inauguration of the budget system effecting a saving of \$750,000,000 annually--and the firm administrative foreign policy. These are a few of the items on which the Republicans of Ohio base their claim for the continued support of the voters of the state, a record unquestionably compelling pro-Republican argument.

Now comes, in striking contrast the feeble contentions of the Democrats. Having no party achievements justifying the support of the electorate, the Ohio Democrats are resting their case chiefly on the ancient tariff contention that has so long served as the main reliance of their organization and so often left them by the wayside. No sane minded citizen who has followed tariff legislation will be misled by such insane babblings, for the undisputed record shows that an ever increasing large element of Democratic strongholds is fast adopting Republican views relative to protection and that a large number of Democratic Senators and Congressmen lined up with Republican protectionists in support of high tariff. Thus, the "Bubble" breaks and the old democratic inconsistency is brought to light. It is a well warranted assumption that the American people still desire protection and the "protective tariff" mandate, which the electorate, in 1922, imposed upon Congress.

With a record of failure under the Wilson regime, which they can well afford to dodge, and with absolutely nothing constructive to offer, the democrats are compelled to resort to bare assertions in an effort to induce the voters to accept unwarranted contentions at the fictitious values placed on them by their sponsors. Such tactics will not carry far with New Mexico voters, who can plainly see the achievements of the Republican party and the weakness of the Democratic party.

If the Ohio conventions can be construed as adopting an outline of party platforms which will be general throughout the country, it will be up to our electorate to choose between a party which deals in unsupported assertions and quibbling contentions and one whose claims to support are based on great achievements and a constructive program for the future, and such a choice will insure a Republican victory.

Mr. and Mrs. Fred Lant gave one of the most enjoyable parties of the summer last night. With the able assistance of their two bright young daughters, Mabel and Thelma, the time for going home seemed, even to the older ones, to come too soon. Coffee and cake, candies and fruits were served.

Among those present were, Mr. and Mrs. Earl Fryer and two daughters. Mrs. Kelley Shelton, Mr. and Mrs. Ed Hudson, Misses Deen, Powell, Davis and Francis Williams. Charlie Deem Guy Shelton, Geo. Burns, Jim Hudson, Ed Shelton and wife, Misses Muriel Shelton, Francis Hollimon, Bessie and Lula Hudson.

Miss Holliman has been quite sick recently.

The drought and hot weather have served to make the climate here very oppressive during the past week. There have been a few local showers, within the last 24 hours.

Our Young People's Christian Endeavor is being well and enthusiastically attended and a lot of good is being accomplished, especially among the young people.

On account of the extremely dry, hot weather for some time past it has been difficult for the farmers to keep sufficient water in their cisterns for irrigation purposes.

Claud Shelton who recently moved to Las Cruces has returned to dispose of some of his stock.

Mrs. Kelley Shelton left this morning for Silver City where she will place her son Guy in the State Normal for the coming school year. Her daughter Muriel will also attend public school there.

Miss Bessie Hudson gave a farwell entertainment for her brother Jim who will go to Las Cruces to attend the state college.

It is reported that Mrs. Eli Hunter who is confined to a hospital at Silver City, is much improved.

Geo. W. Rowe, an old resident of this section passed away the night of August 31st, after a brief illness. He leaves a wife and three children. He died of pneumonia.

Mrs. Louis Jones had the misfortune to stick a rusty nail in her foot which has caused her much pain and inconvenience.

Miss Clara Jones will leave for Silver City to enter the State Normal University.

Quemado

A Republican meeting will be held here in the very near future. The Democrats are being invited to attend on condition that sufficient seats remain after the Republicans are taken, care of.

Mrs. Dominica Castillo of Magdalena arrived here Tuesday for the purpose of taking a place with the school faculty. Mrs. Castillo is an excellent teacher.

Miss Lila Johnson is expected to arrive soon from California where she has been on her vacation. Miss Johnson will occupy her position of last year, that of teacher in the public schools.

N. G. Baca has gone to Albuquerque as a delegate to the Democratic state convention. He is a strong supporter of Col. D. K. B. Sellers for governor. Ira Sweazea is also a delegate.

M. B. Baca of the Quemado Mercantile Co. is building a four room cottage across from his store which will be for rent when finished.

Prof. H. P. Collier has gone to El Paso but will return to join the school faculty early in September.

Mrs. R. F. Graham, mother of Jim Graham, who has been visiting Jim for a month past, has returned to her home in Dallas.

Tales Provencher, a rancher from the Salt Lake country, has been here for the past week and may locate here permanently.

The school janitor is busy getting in wood for winter use; oiling floors and making other preparations for the next school year.

BASE BALL

Two games were played between Socorro and Reserve, one of nine and one of seven innings. Socorro won both games. There was real team work in the Socorro nine and they carried home the bacon. Well, you won it boys, fairly and good naturedly and we acknowledge the victory over our home team and we are glad to tell you that you played real ball and that you are good sports. Some day we will meet you on your home ground where the fair ladies and big voiced men many root for you as we rooted for our home boys. But they needed it--and so will you.

The score between Reserve for the first game was:
Socorro 7
Reserve 5
Second game, 7 Innings.
Socorro 4
Reserve 1
Reserve 13
St Johns 3

EDITORIAL SAYINGS

Now we know Methusalem's secret. His glands were all right.

When the Desert of Sahara gets tired of being dry all she needs to do is to pass a Prohibition law.

The Literary Digest votes are divided between wets, damps and dries. To get the correct result, add the wets and damps and divide by the dries.

A Home In The West.

By J. E. Rhein.

To My Wife.

Oh, give me a home in the west, in the west,
Out where the pine trees grow.
Just let me be in the land of the free,
And let the old world go.

Oh, give me a home in the west, in the west,
And let me die there, too;
I'll go with the tide to the other side
And there I'll wait for you.

I'll wait 'mong the pines and skies of blue,
Where gentle breezes show
The smile of God above the sod;
As flowers bend, and blow
Sweet perfume rare from everywhere,
Just to welcome you.

From Poor Indian Girl To \$2,000 a Day

Exie Fife, 19 years old, was poor on government land which was unfit for cultivation, now receives \$2,000 a day because she allowed a stranger to drill for oil recently. She is fast becoming the wealthiest woman in Oklahoma. She says she wishes to study music and to send her brother to a big college.

Republican Delegates Elected to State Convention

Reserve, New Mexico, Sep. 5th 1922
The Republican County Convention was this day held to select 5 Delegates to the State Convention which will be held at Albuquerque New Mex. Sep. 7th 1922.

The following persons were selected as delegates to attend the State Convention: J. R. Gaunt, S. J. Kidder, W. S. Fullerton, Ira C. Bruce and Anastacio Baca. The time for holding the county convention to select candidates for county offices was not set.

There being no other business the meeting adjourned.

Attested,

A. T. Chavez, Secretary

Soldier Bonus Bill Passed U. S. Senate.

The bonus bill which, if signed by the President, will carry an appropriation of \$4,000,000,000, has been passed by the U. S. Senate. It is believed that President Harding will not sign the bill for the reason that it does not carry means for raising revenue.

To pass the bill party lines had to be entirely wiped out. The vote was 44 to 22.

LITTLE LAD A HERO

Only Six Years Old but Proves He Is Made of Real Stuff.

Billy Corsa of Pennsylvania Stands in the Path of Two Plunging Percherons and Saves the Life of His Brother.

Philadelphia.--"Billy" Corsa is only six years old, and lives on a farm in Bucks county, not far from Pottsville. But he is made of the stuff from which real heroes are made. He is the son of Mr. and Mrs. Howard P. Corsa. Billy rose to the heights when the life of his three-year-old brother, Dick, was endangered by a pair of plunging Percheron horses. Undismayed, the six-year-old stood in the path of the horses protecting his brother with one hand--and turned the steel-shod horses from their path.

With Billy Corsa it was entirely a problem like this--"I'll do what I can--but if Dick is hurt, I'll very likely be hurt--maybe, killed--too." Perhaps young Corsa didn't think in just that form, but the fact remains that he measured up to the highest standard of boyish bravery, and got away with it.

Dick was playing in the yard of the Corsas home. Boylike, he wandered into the roadway. In a nearby field the Percherons were unhitched, preliminary to being housed in the barn after the day's work. Frisky and active, the two big mountains of horse flesh, knowing the evening meal awaited in their stalls, started on a run for the barn--over the roadway where Dick Corsa was playing.

The youngster saw them coming, turned to run into the yard, and fell directly in their path. Billy Corsa saw his baby brother's danger. Like a flash he ran into the road and pulled Dick to his feet. There was no time to dash to safety in the yard, so Billy Corsa practically threw his brother behind him, raised his arm high in the air, palm out toward the pair of horses, and shrieked, tense and piercing: "Back, Dan! Back, Cap! Back, back, I say!"

At that instant the pair of Percherons were but five yards away and coming fast. There wasn't really time for either Cap or Dan to halt the maddened dash, and to "back"--there wasn't time for either horse to obey literally--to turn and run back. But they--the Percherons--understood. They recognized that command in that boyish voice; that upraised arm. Cap swung to the right, Dan to the left, and the horses passed both boys by inches.

Then Billy Corsa took his white-faced, frightened brother into the house. He was unconscious of the fact that he had pretty thoroughly exemplified the real spirit of love for his brother, and had measured in every way to a heroic standard.

CROSSING PACIFIC IN A JUNK

Danish Captain on His Way From Shanghai in Little Vessel of Chinese Model.

Victoria, B. C.--Out on the tossing Pacific somewhere between Asia and North America, sails a cockleshell, 68-foot Chinese junk, bearing Capt. George Ward of Shanghai, a native of Denmark, who is on his way to this port, according to advices brought here on liners arriving recently from the Orient.

With a crew of three Chinese, Captain Ward is making this daring trip from China to Victoria simply to amuse himself in his old age and to prove his life-long contention that a Chinese junk, despite its appearance, is the most seaworthy craft afloat. The junk which he is using for his trip, however, was specially built for him in China, and is fitted with comfortable living quarters and a modern compass. Otherwise she is one of the typical affairs that team in Chinese waters.

"The Soul of America"

NEELEY blind veterans of the World war were guided into the gallery of the national house of representatives one day this summer. From there they went to the senate, then to a garden party at the White House. These veterans—from the navy and from every European battlefield where Americans fought—are being rehabilitated in the Evergreen School for the Blind in Baltimore. They want congress to grant them an incorporation for an association which shall keep them together and enshrine their common sacrifice.

It is Representative Thomas D. Schall of Minnesota who has introduced the incorporation bill. Calling the attention of the house to the visitors in the gallery, he made an eloquent speech that stirred even the blasé house and brought forth many bursts of applause. Probably one reason the speech was eloquent was because the speaker knew what he was talking about. For he had been under fire with the boys on the firing line. He was on the American transport Mount Vernon when she was torpedoed off Krest September 5, with a loss of 37 killed. He was in France during July and August of 1918 and followed the Americans in the Chateau-Thierry drive. As he said in his speech:

"I was with Major Fuchs in Coban, where white-hot fragments of shell lay smoking in the street, the town being shelled every 15 minutes. I experienced creeping upon hands and knees for about half a mile to avoid exposure to the enemy. I savored the heavy white dust, the flies, the heat, and the stink of water; the smell of decaying flesh, where the human dominated the animal. I heard the mighty uproar of night attacks, where like heat lightning the barrage played along the sky; the boom of artillery and the burst of shell; the heavy rumble of trucks bringing troops, munitions and supplies to the front; and ambulances setting out with the wounded.

"From actual contact with soldiers in action, in field and camp, I know something of what our boys suffered and what they accomplished over there. I dined with them at mess and communed with them in bivouac in the night, at a time when men's tongues are loosed and they talk. Today they narrowly missed death. Perhaps it would be their turn tomorrow, and so on the verge of eternity they spoke their hearts and told the plain truth without fear or favor. No winners among them. No losers. Just matter-of-fact, pure stuff, the cross burned away in actual fellowship with death, leaving their souls vibrant instruments of truth. If I had but one word with which to describe the American soldier, I would describe him with the word 'courage.' No nation in all the annals of war has produced average individuals with such predominant courage, such unheard-of heroism, such willing offering of life."

But Mr. Schall's speech was eloquent for another reason also: He himself is a blind man—"lost sight through electric shock," says the Congressional Directory. Said he, in his introduction:

"No doubt every one of these boys has cried out in his hour of trial, 'O Lord, if possible, take this cup from me,' and would have chosen to have remained upon the battlefield, with no wakening to bear, day after day, the heavy cross of silent waiting. The constantly recurring thought in the early days of blindness is, 'Is not death to be preferred? for they then reason with the mind of the seeing. I can remember upon losing my sight, acquaintances meeting me after a lapse of time would say, 'Schall, I heard you were dead.' I replied, 'Not dead, just blind.' But I could readily interpret what they thought. When they heard that I had lost my sight, they said to themselves, 'I would rather be dead.' And so, having said it, they concluded that I was dead. But I am not dead. [Applause.] And I am quite sure that the blind soldiers who are here in the gallery today will prove that they are not dead. [Applause.]

"These men are making good under their trials.

There is one young lad up there, deaf in one ear, both hands gone, blind, yet he is studying law. He has learned the typewriter, and he writes as fine a letter as any one of you can do with your sight. [Applause.] They are all very much alive. They have refused to be downed. They have tackled their handicap with the same spirit and go and dash that they bucked the stalemate of the trenches, and with a yell, 'Come on, boys, do you want to live forever?' sent the American spirit up and down the allied lines to win the victory for the world." [Applause.]

Here are some of the good things in the eloquent speech of this blind legislator speaking for the blind ex-service men:

"We have been accustomed to believe the European propaganda that everything overseas is far, far better than our home product; that to produce a soldier up to European grade, they must be drilled year after year. But here were these raw American boys performing deeds of judgment, decision and valor that forced from their war-trained allies and opponents the admission that they had never seen or heard the like.

"A heroic soul here and there would have been within the bounds of expectation, but the constant grade of the whole product of the nation, drafted and volunteers, with whom you came in contact there on the death fields could not but give you pause and force the thinking mind to ask why a nation had produced such universal phenomena.

"In touch with these wonderful men day after day, in whom heroism was as common as the dirt under foot, comparing them with the other soldier, I was impelled to ask myself what made this vast gap in the fortitude, courage, judgment, between human individuals of the same civilization, and the answer was driven in upon me that the difference lay in their greater soul power, because at last God had reared a government under which the soul, that thing akin to Him, could grow; a government whose aim was the development and fostering of initiative of the individual, where they had freedom to choose between right and wrong; where any citizen could aspire to the highest office in the land; where religion was unhampered, their thoughts unrestrained, where they dared to think and feel out loud; where equal opportunity was their birthright, and no high wall of 'Verboten' is endured; where each stands upon his own resources, for what he is and what he can do, and every man is the equal of his neighbor; where the Stars and Stripes from the towers of our public schools speak the spirit of America and beckon her children to a heart of understanding that can discern between right and wrong.

"It is true the allies furnished the guns, but America furnished the soul that won the war. [Applause.] Until that soul was loosed in combat upon the battle fields defeat of the allies was inevitable. Paris had been ordered evacuated. Big Bertha shells were bursting everywhere in the streets. Consternation prevailed. Lines of refugees were streaming from the city. A German army, headed by the Prussian Guard and commanded by the crown prince, was advancing with the steady precision of clockwork at the rate of four to five miles a day. German patrols had been captured within six miles of Paris. The terrible bombardment and onslaught of the shock troops had forced the French back and back until the Germans, gaining possession of the heights about Belleau Wood, had cleared the roads for eight miles in advance.

"With their march unresisted for several miles ahead, the Prussian Guard was ordered to put on their dress uniforms with spiked helmets. The officers decked themselves in dress regalia with starched bosom shirts. The Germans had no other thought but that they were going triumphantly into Paris. The French believed it, the English believed it, the Belgians believed it, the Italians believed it, all the world believed it. But the boys of four American regiments did not believe it. The Fifth and Sixth marines, the Ninth and Twenty-third infantry of the Second division, being the nearest at hand, were crowded into trucks as close as they could stand and hurried in the night to

striking distance of the enemy. As they passed the retreating French they were met with cries of, 'You're zigzag; you're crazy. Sure death ahead. There is no hope; go back.' But these eager, smooth-faced Americans, who had never smelled the smoke of battle were not made of the stuff that goes back when the enemy is in front. Unperturbed, they landed in the mud, and under cover of the woods formed their lines and calmly waited for the dawn, when about 15,000 Americans met and held and stopped five German divisions. [Applause.] So fierce and unflinching was the attack that the enemy took it for granted that there were unlimited reserves in the rear.

"The miracle was performed, the march on Paris stopped, the oncoming hordes turned back, the Chateau-Thierry drive began, the destiny of civilization changed. [Applause.]

"The soul of America had won because it had broken the cocksure spirit of the enemy, had rekindled in the breasts of the drooping allies a morale that ran from one end of the lines to the other. For the supersoldier of the world, with tremendous advantage of numbers, had been out-suppered by a few simple, modest, untrained Americans; and these same Americans were here in great numbers, and they were coming by the thousands. The war could end in but one way. At the height of the Chateau-Thierry drive, when the pall of that terrible certain daily advance, when the shelling of Paris and the nightmare of air raids was too recent to be forgotten, not a soul could be found in the ranks of any army or in any walk in life so base but he was free to admit that it was the American soldier who won the war, turned the tide, saved them when they had their backs to the wall. Yet now, when it is all safely over, there are those who ungratefully say, 'We would have won, anyway.' They would, like h-l. [Applause.]

"Our boys were far from their homes. It put shame into the hearts of men who were fighting for their very hearts' sides and families to see such daring and spirit in lads who needed no spur. It began June 6 at Belleau Wood and continued through the Aisne-Marne drive, the Somme campaign, St. Mihiel, Ypres-Lys, through the Meuse-Argonne, clear up to November 11. Six months and the job was done.

"Reared on American soil, imbibing her principles of freedom, the American soldier did not need years of intense training. He was used to thinking and deciding. In a pinch, every man was an officer. The intelligence of the American equipped him to understand the war game quickly. Heroes every one, they dared to move apart twenty, thirty, fifty, sixty feet; they dared to fight alone and die alone. The average run of the European soldier has not the private initiative to fight alone and die alone. He fights best in mass where he sees the form of his companion ahead, feels the rub of the elbow of his pal at his side, hears the tread of his comrade in the rear. He must have a crowd to give spirit and soul to do and die. The American soldier, because of his individual development has soul power that dars stand alone. The European must group this soul power to produce the necessary courage. The American soldier is a lion who dares forage alone. Wolves hunt in packs. The American soldier is an eagle who dares soar aloft in the awful solitude. Swallows hover in thousands. The American soldier dares to die right now. The European soldier tomorrow. Ask the German soldier or officer who won the war, and he will tell you that it was the Americans. That it was the Americans who advanced into no man's land without hesitation, and came on with that dogged determination that sharp-shooter, machine-gun nest, ambush, hand grenades, rifles, concealed mines, gas shells, curtains of fire, small and big artillery, the blasts of hell itself could not stop. [Applause.]

"It is the soul in the breasts of these boys up here in the gallery that is going to count. It is the soul that measures the size of the man, whether on the battlefield or in the conflict of life, and our blind friends in the gallery have been tried and found not wanting."

IMPROVED ROADS

GREAT SYSTEM OF HIGHWAYS

Scheme Being Worked Out by Federal and State Authorities to Surpass Other Countries.

(Prepared by the United States Department of Agriculture.)

A system of highways that will serve the whole country and will be far superior to any other in the world is being mapped out by federal and state engineers. It is estimated that the system will comprise 180,000 miles of road. The federal highway act recently enacted specifically requires that all federal aid be spent on a connected system of highways consisting of not more than 7 per cent of the road mileage in each state, and that this system shall consist of interstate or primary roads and intercounty or secondary roads.

Proposed systems have been received by the bureau of public roads of the United States Department of Agriculture from all but eight states. They are plotted on a large map of the United States and carefully examined

An Improved Michigan Highway.

as to co-ordination with the roads of adjacent states and service to all sections of the country. Where co-ordination is not satisfactory conferences are held with all interested state highway officials and routes adjusted.

Many states have already adjusted difficult problems with their neighbors. As an example the system sent in by Nebraska showed a big gap in an important road along the northern boundary. It was learned, however, that South Dakota would follow with a system that would fit like pictures on toy blocks. Since the federal highway act of last November became a law, only roads certain to be on the system have been approved for construction.

MUCH LOWER BIDS ARE MADE

According to Reports to Bureau of Public Roads Prices Will Be Greatly Reduced.

Early bids for the construction of federal-aid roads indicate that prices during the coming season will be materially lower than last season, according to reports received by the bureau of public roads of the United States Department of Agriculture. While bids have not been received on any large volume of work, there is, however, enough to indicate a lower level of prices.

Grading has been bid at 20, 23 1/2 and 30 cents a cubic yard in Missouri, Arkansas and Minnesota, respectively, as compared with an average of 35 cents for the section in which these states are located in 1921.

Prices of reinforcing steel in place range around 6 cents as compared with the 1921 price of 8 or 9 cents, and bridge steel at 4 1/2 cents against 7 to 8 cents.

A few bids, for the best grade of concrete, of about \$17 a cubic yard have been received in sections where the 1921 price was about \$25 a cubic yard.

Prices bid for the construction of concrete roads per square yard are as follows: Ohio, \$1.52; Colorado, \$2.27, and Georgia, \$1.38, as compared with an average for the whole country during the period 1918-1920 of \$2.57 a square yard.

FEDERAL-AID ROAD PROJECTS

Total Mileage Under Construction in May Amounted to Nearly 15,000 Miles.

Federal-aid road projects totaling 603 miles in length were completed and 541 miles went under construction during May, bringing the total under construction to nearly 15,000 miles and the mileage in completed projects to 17,088, according to reports of the bureau of public roads, United States Department of Agriculture. These figures indicate that the federal-aid system grew at a rate of more than 20 miles per day on each working day of the month. Allotments of funds to definite projects amounted to \$7,828,000 during the month.

Mark Set for 1922.

Three hundred and fifty thousand miles of improved highways, extending through every state in the Union, is the mark set for the summer of 1922.

Kicks Would Pave Roads.

If we could cash in the kicks we make on poor roads, we would soon have them all paved.

Tuberculosis the Worst Enemy.

Tuberculosis in poultry causes greater loss than among cattle.

WRIGLEY'S

Utmost in Quality

Pure materials, scientific manufacture, absolute cleanliness—then sealed against all impurity.

That is Wrigley's as you get it—fresh and full flavored.

Aids digestion, keeps teeth white and clean—breath sweet and disposition sunny.

PRIDE IN SCHOOLS

Dominant Feeling Among Settlers in Western Canada.

Despite "Newness" of the Country, There Are No Better Institutions of Learning Anywhere.

tion is not limited to the three R's but nature study and manual crafts are taught, in order that the future agriculturist may have his education at foundation laid. Many rural schools have pleasant gardens attached, with flower and vegetable beds, and the visitor to one such school deep in the country says she will never forget the pride with which a little lad showed her the patch of onions in his plot. Thrift is also taught in the schools by means of the dime bank.

"Following the primary schools there are secondary schools, where training is free. This includes classics, modern languages, science, mathematics, advanced English, and often agricultural, commercial, and technical subjects and—but this concerns the girls—household economics. For three years this lasts, and then comes matriculation into the university, a matriculation which admits direct to the first or science degree, or the educator may be completed by a course in some special subject at a technical institute."—Advertisement.

YOUNG GIRLS NEED CARE

Mothers, watch your Daughters' Health

Health Is Happiness

From the time a girl reaches the age of twelve until womanhood is established, she needs all the care a thoughtful mother can give. The condition that the girl is then passing through is critical, and may have such far-reaching effects upon her future happiness and health, that it is almost criminal for a mother or guardian to withhold counsel or advice.

Many a woman has suffered years of prolonged pain and misery through having been the victim of thoughtlessness or ignorance on the part of those who should have guided her through the dangers and difficulties that beset this period.

Mothers should teach their girls what danger comes from standing around with cold or wet feet, from lifting heavy articles, and from overworking. Do not let them over-study. If they complain of headaches, pains in the back and lower limbs, they need a mother's thoughtful care and sympathy.

A Household Word in Mother's House writes Mrs. Lynd, about Lydia E. Pinkham's Vegetable Compound.

"My mother gave me Lydia E. Pinkham's Vegetable Compound when I was 14 years old for troubles girls often have and for loss of weight. Then after I married I took the Vegetable Compound before each child was born and always when I felt the least run-down. Both my sister and sister-in-law take it and have only the highest praise for it. It has been a household word in my mother's house for years."—Mrs. KATHERYN LYND, 2431 Gladys Ave., Chicago, Ill.

A Little Book Helped Her to Decide Milwaukee, Wis.—"My daughter took Lydia E. Pinkham's Vegetable Compound as she was so weak and did not feel like going to school. She was like that for a whole year before taking your Vegetable Compound. I found a little book of yours in our mail-box and decided to give her your medicine. She is now strong and well and attends school every day. We recommend your Vegetable Compound to all mothers with weak daughters. You may use this letter as a testimonial."—Mrs. E. KLUCZNY, 917 20th Ave., Milwaukee, Wis.

"I was always feeling tired and sleepy, was losing in weight and would faint at times. I had other troubles too, that made me feel badly. I read your little books and heard friends talk about the good Lydia E. Pinkham's Vegetable Compound had done them, so I have taken it too. The results are most satisfactory for I have gained in weight and my bad symptoms are gone. I recommend your Vegetable Compound to all my friends and you may make whatever use you like of this letter."—GLORIA RAMIREZ, 1116 9th Ave., Tampa, Florida.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to the Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

The Busy Wife.

Kriss—Why don't you get your wife to sew that button on your coat?"

Kross—She is too busy. She is working on four picture puzzles, reading two continued stories, and following up five serial pictures in the movies.—Judge.

FREEDOM FROM LAXATIVES

Discovery by Scientists Has Replaced Them.

Pills and salts give temporary relief from constipation only at the expense of permanent injury, says an eminent medical authority.

Science has found a newer, better way—a means as simple as Nature itself.

In perfect health a natural lubricant keeps the food waste soft and moving. But when constipation exists this natural lubricant is not sufficient. Medical authorities have found that the gentle lubricating action of Nujol most closely resembles that of Nature's own lubricant. As Nujol is not a laxative it cannot gripe. It is in no sense a medicine. And like pure water it is harmless and pleasant.

Nujol is prescribed by physicians; used in leading hospitals. Get a bottle from your druggist today.—Advertisement.

His good health, says a vegetarian, is the result of eating no meat and chewing it well.

Something to Think About

By F. A. WALKER

THE INEVITABLE EBB

The inevitable ebb fills his soul with inexpressible terror.

Though he shuts his mouth hard and says nothing to his suspecting wife, he cannot quell the sickening fear.

Danger lurks in the waves and in the wind—in the very breath of idle gossip.

The shoals are marked by fretting foam leaping high in the air, but the night is dark. His nerve is undone. His once keen perception fails him.

And yet, if he is a true man, or a man in the making, this is the one time in his life when he will show his mettle, grip the wheel with a firmer hold, bend his back and resolutely face the snarling gale panting in its effort to hurl his ship upon the rocks.

In every life there is a shipwreck somewhere buried in the sands of unremembered years.

It tells the tale of a day that is done, of fond hopes, that were swept to sea and sucked under the waters of the inevitable ebb, from which no man can always steer clear, but against which every brave man will battle until he makes port.

KIDDIES SIX

By Will M. Mauph

RELICS

A LITTLE box with tear-stained lid
Beneath which many things lie hid.
And often when the twilight's gloom
Paints memory faces o'er the room,
I leave the world of toil and care,
And seated in the old armchair,
I ope the lid and fondly gaze
Upon the things of other days.

A little box with tear-stained lid
Beneath which sacred things are hid.
A little shoe out at the toe—
O, baby boy, I love you so—
A tiny cap with upturned brim—
That eloquently speaks of him—
These are the treasures laid away
To gaze upon at close of day.

A little box with tear-stained lid
Beneath which treasured things are hid.
A broken top, a toy, a whip,
A crippled ox from Noah's ship;
A tiny stocking—all the wealth
That men secure by work, or stealth,
Would not suffice to buy from me
One thing I ope the lid to see.

A little box with tear-stained lid
Beneath which love-worn things are hid.
As long as Death's angel roams
To lay a blight on happy homes,
Full many a box will hide away
The relics of a happier day;
And when the evening's echoes call
Upon their lids hot tears will fall.

Uncommon Sense . . .

By JOHN BLAKE

ACCURACY FIRST

FIFTY years ago a mathematical marvel mystified audiences in small towns in the United States.

He would walk up to a blackboard and ask people in the house to give him two long numbers.

Given such numbers as 3,798,402,897 and 72,875,293,839 he would place one below the other, announce that he would multiply them, and write beneath them the answer.

No one understood how he could do it. The people who beheld him gasped in amazement at his powers. And he went from town to town for several weeks exciting wonder and admiration till some skeptic in the audience took the trouble to write down the numbers and multiply them himself.

Then it was discovered that the lightning calculator never made a multiplication at all, but merely wrote an answer in the proper number of units, which of course, was invariably wrong.

A telegram to the next town and prompt action by the local authorities put an end to the calculator's career.

It is easy to work rapidly if you do not work accurately, but it is of little more use than were the labors of the taker in the story.

In this world of progress men must work both accurately and rapidly to get ahead, but they must cultivate accuracy first.

Millions are lost in industry year through mistakes and carelessness of people who try to work faster than they can with care.

In every business accuracy is the

first consideration. When, either in figuring, or in writing, or in any line of endeavor you are sure that you can be accurate it is safe to cultivate speed.

But never work so fast that you are not sure you are getting down the right answers to your problem. Better creep for a while than fall every time you attempt to run.

The quick men are valuable, of course, but they are never judged for their speed alone. If their work doesn't check up, they hold their positions but a little while.

ONCE IS ENOUGH

NO!!! YOU'VE GOT THE WRONG NUMBER

3 A.M.

cold water and flavoring to taste. Beat the yolks until thick, add cold water and beat again until thick; sift the sugar several times, add it to the yolks, then the flour alternately with the whites, the flour having been sifted four times, three times after it is measured. Bake very slowly at first. Use a tube pan. The cake should, when properly made and baked, be the size of an eleven-egg angel food.

Corn California Style.

Take two cupfuls of corn, one cupful of milk, one cupful of bread crumbs, one-half teaspoonful of salt, one and one-half tablespoonfuls of green pepper, three slices of bacon, two tablespoonfuls of fat and three of flour. Cut the bacon in half-inch pieces, cook until beginning to color. Add flour to the bacon, stir in milk and cook until thick, seasoning with salt and pepper, mix corn (fresh may be used), crumbs, pepper and sauce. Put in a baking dish, sprinkle bacon over the top and bake in a moderate oven until the bacon is crisp and brown.

Vassar's Delight.

Soak one-fourth of a pound of prunes over night in cold water, cook until tender and cut the flesh in small pieces, discarding the stones. Add half as much coconut per measure as prunes, a little of the coconut milk, and one or two tablespoonfuls of orange marmalade. Roll and stir in three-fourths of a cupful of sugar. Beat two tablespoonfuls of butter to a cream, add two egg yolks, one after another and one-fourth of a teaspoonful of salt; stir and cook in the hot prune mixture until the egg is set. Have ready flaky crust baked over the pastry mixture and cover with a meringue made of the whites of the eggs piped over the filling. Dredge with sugar and bake ten minutes to brown the meringue. Sprinkle with chopped browned almonds or coconut shreds.

SCHOOL DAYS

FRAD OF HIM? OF COURSE I WANT AFRAD OF HIM! BUT YOU DONT SUPPOSE I'M GONNA FEART IN MY GOOD CLOTHES, DO YOU? AND GET 'EM ALL DIRTY? WHAT DO YOU THINK I AM?

YOU HEARD WHAT I SAID? INTO HIM, BULL!

YOU SCARED OF HIM?

YOU SCARED THEE, ARE YOU BEAT? YOURS, FRAD OF HIM! YOU'RE SCARED OF HIM!

THEM WAS THE HAPPY DAYS

THE FRIENDLY PATH

By WALTER I. ROBINSON.

DON'T be afraid to laugh. A hearty laugh is as good as medicine. It aids digestion. It shoves cares aside and brings happiness to those who are sad.

Thackeray declared that "a good laugh is sunshine in the house."

The world may be wild over jazzing; it may think too much about pleasure and show. But it is sorely in need of more whole-hearted laughter. When people really laugh out loud, their glee relaxes their nerves. They can feel the exhilarating tingle clear down to their toes.

A man needs rest from everyday cares. He needs to forget temporarily vexations and sorrows which burden his mind. He gets partial rest when asleep; but after sleeping he sometimes awakes more tired in mind and body than when he lay down, because mischievous troubles—usually imagined—have kept creeping through his mind.

But when a man laughs from pure joy or because he sees something or hears something which actually appeals to his sense of humor, he gives his mind a more complete rest than at any other time during day or night.

It pays in happiness; it pays in everyday accomplishments to see the sunny side of life.

The long-faced, dreamy mortal seldom has many friends. He finds more troubles than he actually has and exaggerates those which are real.

In our pathways of work and our pathways of rest we should seek real causes for mirth.

HAPPENINGS in the CITIES

Bolt Kills Man on Top of Longs Peak

ESTES PARK, COLO.—J. E. Kitts Greeley, Colo., was killed by lightning on the top of Longs peak (14,255 feet) in Rocky Mountain national park. J. E. Bullas of Topeka, Kan., was knocked unconscious at the same time.

Mr. Bullas started alone at sunrise from the Y. M. C. A. camp in the park to make the ascent. At timberline he came upon Mr. Kitts and Rev. Mr. Danbo and son of Greeley, and the party made the ascent, arriving at the summit at 12:30 o'clock.

They were standing beside the cairn that marks the extreme crest of the peak when a thunderstorm came up. The first stroke of lightning struck Kitts, killing him instantly. Bullas was rendered unconscious. Rev. Mr. Danbo and his son did all they could to revive Bullas, and falling, set down the peak to get assistance.

The lightning had burned the clothing from Kitts' body and had seared the top of Bullas' head and torn off his shoes.

Doctor Danbo and his son reached Longs Peak Inn at 4:30 o'clock in the afternoon and notified Chief Ranger Allen of the national park service of the tragedy.

Rangers immediately started up the peak to rescue Bullas, but met him coming down. The youth had recovered consciousness after the departure of his companions. He was severely burned on the head and was barefoot, but had managed to work his way down the rough trail.

Superintendent Roger W. Toll of the national park and Chief Ranger Allen formed a party and started at once for the summit of the peak to bring down Kitts' body. They got back the next morning.

Mr. Kitts had been occupying a cabin, with his wife, at the Dunraven camp, which is the summer home of the State Teachers' college at Greeley.

Rocky Mountain national park has had more than a million visitors since its creation in 1915. Longs peak, "King of the Rockies," has been ascended since 1868. This is the first death from lightning in the history of the park or the peak.

"Where Did You Get the Sable Furs?"

DETROIT.—Stolen sable or bought marten? On the answer to that question probably hinges the outcome of the \$25,000 slander suit of Miss Agnes Lage against Mrs. Smith-Bourke.

Miss Lage is a stenographer. Mrs. Smith-Bourke is one of the most distinguished society matrons here. Miss Lage is twenty-two and decidedly good-looking. Mrs. Smith-Bourke is slightly older and fair also.

Women are supposed to have an inalienable right to be curious, but her curiosity is just what made Mrs. Smith-Bourke the defendant in this damage suit.

"How does she do it? Where did she get them?"

Familiar questions as streets of business girls crowd the streets and from work.

Miss Lage says Mrs. Smith-Bourke accosted her on the street, seized the furs and demanded: "Where did you get the sable furs?"

Then the matron is alleged to have followed up the question with:

"You couldn't buy them, you know. They are sables worth thousands. No girl in your position could afford such furs."

All of which caused Miss Lage considerable embarrassment and mental

anguish as a crowd gathered on the thronged thoroughfare.

Perhaps it might be well to say that Mrs. Smith-Bourke, shortly before, had lost a set of sable furs from her home and suspected that they might have been stolen.

Miss Lage charges that the society woman continued to annoy her about the furs until she was driven to file her slander suit.

"I always dress as my taste and pocketbook dictate," Miss Lage said. "I intend to find out if an American girl must stand for such actions and resulting damage to her reputation. The furs are only marten, anyway."

Mrs. Smith-Bourke is a sister of Daniel Smith, who ran for mayor in the last election here. She is heiress to a vast fortune and noted in charitable activities here.

U. S. Marines Still Tempest in Teapot

CASPER, WYO.—The United States marines have been on some odd jobs in the course of their history, but here's one that has elements of novelty—the sight of marines in command of Capt. George Chulor standing guard over a well on section 20 of the Teapot naval oil reserve, 40 miles north of here, having carried out orders of Assistant Secretary of the Navy Roosevelt to oust drillers for the Mutual Oil company, who are said to have continued operations in defiance of Interior department orders.

Captain Shuler and four non-commissioned officers, who arrived at Casper and were rushed to the field by automobile without stopping to break fast, approached the rig a few minutes before ten o'clock. G. H. O'Donnell, Casper representative of the Mutual Oil company, met them at the gate of a small wire enclosure erected around the rig during the night and was informed by Captain Shuler that orders given the marines made it necessary for Mr. O'Donnell and the drillers to vacate the property as soon as the tools could be pulled from the well and a property inventory taken.

The next day Shuler reported to the Navy department that all private enterprise within the reserve had ceased and the oil well which was being sunk had been sealed.

"It is part of the basic law of the country that when states cede tracts to the federal government they also cede jurisdiction over those tracts," said William Spry, commissioner general of the land office, in discussing the Teapot Dome controversy. He said that as early as June 13 of this year formal notice was served on the Mutual Oil company, alleged squatter on a quarter section of the reserve, and rival of Sinclair interests for the tract, that it must vacate, and counsel for Mutual formally accepted service at that time.

It Was No Sight for a Bride-to-Be

DENVER.—Who was the wealthy Colorado Springs society girl who all but swooned in a hotel lobby at the sight of her intended husband, J. E. De Lazergne, well-to-do Wichita (Kan.) oil man, in the custody of detectives? Police were confronted with an absorbing tangle in attempting to unravel the strange case.

De Lazergne was arrested at the request of O. C. Hicklin, marshal at Wichita, on the charge of having passed a worthless check for \$500 in that city.

The young oil man arrived in Denver from Colorado Springs, where he had been stopping at a fashionable hotel. He told Detectives Harry Lane and Clarence Jones that he was to be married in Denver to a wealthy young society girl of Colorado Springs.

The two detectives took De Lazergne from his cell at the city jail and conducted him to the hotel to get some personal effects from his trunk.

In the lobby a pretty girl of about twenty years, fashionably dressed and accompanied by a group of friends, all of whom appeared to belong to Colorado Springs' elite, suddenly met him face to face.

With a cry the girl reached out as though to run to De Lazergne, and then nearly collapsed. Neither she nor her friends would divulge their identity, except to say that they were from Colorado Springs. They returned to the springs.

De Lazergne, who was well dressed and had the appearance of a man of social distinction, denied vehemently that he had passed a bad check for \$500 in Wichita.

He said he is prominently connected with some of the largest oil companies of the South, and that he had come to Colorado Springs and Denver for his wedding. He refused flatly to give the name of his intended bride.

AN EPITOME OF LATE LIVE NEWS

CONDENSED RECORD OF THE PROGRESS OF EVENTS AT HOME AND ABROAD.

FROM ALL SOURCES

SAYINGS, DOINGS, ACHIEVEMENTS, SUFFERINGS, HOPES AND FEARS OF MANKIND.

WESTERN

Mistaken for deer, three hunters have been shot since the deer season opened, according to reports which reached Portland from southwestern Oregon.

The thirty-five alleged members of the Ku Klux Klan, tried on charges growing out of the Ingleswood raid April 22 last, were acquitted in Los Angeles by a jury in the Superior Court.

Custom officials seized 10,000 rounds of ammunition and fifty German make rifles from the China mail liner Nile just before it cleared the San Francisco port for the Orient. The arms and ammunition were found hidden in the crew's quarters.

Howard D. Ranson of Ogden, a brakeman, was burned to death; Conductor Thomas Burke of Provo was badly injured and Fireman Honeycup of Provo slightly hurt in a collision in a tunnel on the Utah Railway Company line at Spring cañon, near Helper, Utah.

C. A. Schibred, famous as a federal district judge in southeastern Alaska in the gold-runs days of 1896 and thereafter, died at Corvallis, Ore., aged 71. At the time of the "Soapy" Smith gang's depredations at Skagway, Judge Schibred saved several members of the gang from lynching.

A complete skeleton of a saber-tooth tiger which roamed southern California and the Southwest generally in the pleistocene period, some 500,000 years ago, has been assembled at the Los Angeles County Museum of History, Art and Science in Exposition park, Los Angeles, after a long period of research.

Condemnation of the citizenship papers of James Rowan, convicted of criminal syndicalism in the Chicago Industrial Workers of the World trial of 1917 and sentenced to a term of twenty years in federal prison and a fine of \$20,000, is asked in a petition filed in United States District Court at Spokane.

WASHINGTON

Foodstuffs exported during July declined sharply, according to foreign trade reports issued by the Commerce Department.

Instructions have been sent to all postmasters by First Assistant Postmaster General Bartlett to require all householders within four months to install mail boxes or cut slots in doors to facilitate the delivery of mail.

Another union labor bank is being organized. E. H. Manion, president of the Order of Railway Telegraphers, filed application with Comptroller of the Currency Crissinger for a charter for the Telegraphers National Bank of St. Louis with \$500,000 capital.

Appointment of Edward R. Finch, justice of the Supreme Court of New York, to take the place of Cyrus H. K. Curtis, Philadelphia publisher, on the official American mission to the Brazilian Centennial Exposition has been announced at the White House. Mr. Curtis was unable to go.

Federal funds totaling \$400,000 have been allotted to states co-operating with the government in protecting forest lands from fire.

Rates maintained by western railroads on sugars, canned fruit, vegetables and fresh and evaporated fruits from California and Utah to Nevada points were held justified by the Interstate Commerce Commission, though five of the eleven commissioners dissented from the majority conclusion.

New regulations covering distribution of wine for sacramental purposes in accord with the recent opinion of Attorney General Daugherty, were issued by Internal Revenue Commissioner Blair, to become effective Sept. 25. The regulations provide that manufacturers or importers of sacramental wine may sell only to rabbis, ministers, priests or other authorized officials of a church. Church officers may not manufacture wine for their individual use nor for the use of the congregation, but may qualify as proprietors of bonded wineries for the purpose of manufacturing wine for religious purposes, or may be employed by qualified wine makers to supervise the production of sacramental wines.

Amendments to the income tax regulations covering oil and gas properties have been issued by Internal Revenue Commissioner Blair. The amendments cover depletion of oil and gas properties, estimates of probable resources, depreciation and similar factors.

The Senate has cleared the way for the President to appoint Maj. Gen. J. G. Harbord, deputy chief of staff, to the post of chief of staff upon the retirement of General Pershing, who will go upon inactive duty because of age limitations in another year.

FOREIGN

The newspapers of Naples report the discovery by the police of a band of criminals whose principal activities were devoted to counterfeiting American bank notes.

The American consul warned more than 500 American tourists in Vienna to leave the city as soon as possible for fear of riots, unless detained on absolutely urgent business.

The Turkish Nationalists launched a mass attack against Afim Karahissar in an attempt to pierce the Greek front. It is officially stated that they were repulsed by the Greeks.

A small party of Free State troops was ambushed recently at Glisson, a village near Athlone, by thirty Republicans. Free State Lieutenant McCormack was shot dead and the driver of his car badly wounded. A civilian wounded during the fighting succumbed later.

All is in readiness for the opening at Fairbanks, Sept. 18, of the farthest north college on this continent, the Alaska Agricultural College and School of Mines. The college, which is about three miles outside Fairbanks in the heart of a rich mining country, will teach mine engineering. Teachers and students will live in Fairbanks.

The possibility of Mexico being made a bone dry again is discussed seriously at Mexico City. It is announced that several deputies will propose a "dry" bill as soon as Congress begins its session. The belief prevails that a dry law modeled after the Volstead law in the United States will be introduced, although it is not believed the measure will be enacted.

Shanghai.—Sun Yat-sen, former president of China and later of South China, who has been leading conferences in Shanghai on plans to re-unite the country, outlined a plan to rehabilitate China's finances by having American take over China's debts to European countries on a refunding basis, as part payment of European debts to the United States.

The Polish-American Chamber of Commerce announces that in order to increase trade relations between the United States and Poland, an invitation to visit Poland has been extended to various American trade concerns and financial institutions. In answer to this invitation, twenty-two American organizations have promised to send their delegates to Poland.

Indian squaws, with eloquent shoulders, and braves whose feet have learned the tricks of the Broadway dance places, must go back to the old-fashioned, demurely simple waltz, says an edict of the council of Walpole Island, Ontario. Chief Redknife—incidentally manager of the island band, has protested against the invasion of the saxophone on the island. "They want to dance all night," says the chief, "and no one wants to work next day. Once they were satisfied with an ordinary band. Now they want cabarets."

Restoration of the employees bonus, discontinued Dec. 10, 1920, was announced recently by Gen. J. C. Greenway, general manager of the Casmel and Arizona Mining Company at Bisbee.

GENERAL

Tangible assets of Allan A. Ryan, Wall Street broker and manipulator of the famous "Stutz corner," who recently went into bankruptcy with liabilities of \$18,000,000, were sold for \$8,000.

The twelfth annual tournament of the Union Printers' International Baseball League opened in Cleveland, Ohio, the Cincinnati and Toronto teams being eliminated in the first round of play. St. Paul defeated Cincinnati, 5 to 4, and Cleveland won from Toronto, 9 to 8.

The skull of Miss Nona Skinner, Bloomington, Ill., school teacher, who, it was at first believed, died in the explosion of a gasoline stove at the home of a relative in Greeley, Colo., had been fractured, local authorities said after examination of the young woman's body at Leroy, Ill. Albert Love, her brother-in-law, is held at Greeley on a murder charge.

The rapid spread of typhus in Poland constitutes a menace to the whole world, said Health Commissioner Royal K. Copeland on his return to New York from Europe, where he has been studying health conditions.

Indications that Mexico's status is being considered in League of Nation circles were received with much interest in newspaper circles in Mexico City, but there was no inclination to believe that the Mexican government would make formal overtures for admission to the League.

Agreements which will immediately open mines in central Pennsylvania with an annual output of 20,000,000 tons of coal, were signed at Altoona by operators and representatives of District No. 2, United Mine Workers. The old wage scales with the check-off were accepted.

Fourteen-year-old Howard Wilson told his parents that he would not return to school—and he kept his word. A few moments after the bell sounding through the little mining village of Hermant, Pa., announced the end of summer vacation, the boy went to his room and shot himself through the head.

After his sister, 30 years old, had ended her life by taking poison, Paul Bertel, 25 years old, hanged himself from a rafter in his barn at Des Moines, Ia. Brooding over the loss of \$15,000 invested in oil stock was thought to have been the cause of both suicides.

Mistaken by her fiancé for a burglar attempting to enter the home which he was guarding in the absence of her sister's husband, Miss Calantha Atkins of Texarkana, Ark., was shot and instantly killed by Ernest Barfield.

Southwest News From All Over New Mexico and Arizona

The hunting season for doves opens in New Mexico Sept. 1.

Sheriff John C. Peck and deputy, J. E. Zumwalt arrested C. G. Beatenbow of near Elkins, whom they charged with the larceny of a beef.

Organization of a dairy and poultry products shipping association is being formed in Roosevelt county under the direction of the farm bureau of the county.

Federal troops under Gen. Angel Flores, military commander of the west coast of Mexico, are striving to capture alive the rebel chieftain Juan Carrasco.

D. J. Thomas, banker of Holbrook, Ariz., died suddenly a few days ago. The deceased and family were for many years residents of Gallup, where he practiced law.

A reduction of almost \$2,000,000 in the assessed valuation of Cochise county taxable property was made by the State Tax Commission in session in Phoenix recently.

The New Mexico Normal University of East Las Vegas has recently added to its faculty ex-President James M. Cook of the Baptist Montezuma College of Las Vegas.

John Perry Waldron, 83 years old, who had been lost in the hills near Crow King, Ariz., for seven days, was found unconscious lying near the road eighteen miles from his camp.

D. V. Kinney was instantly killed and six others seriously, but not fatally, injured when two work trains on the Santa Fé collided at a point seventy miles east of Kingman, Ariz.

Construction of 750 miles of electrified railway in Arizona with a main line passing through Casa Grande and a branch railway connecting with Tucson, is proposed in the near future.

Deputy sheriffs arrested Antonio Lovato of Escobedo, N. M., on the charge of unlawfully killing meat cattle, following reports coming to their office from the cattle sanitary board officers.

While neighboring states have had high death rates from smallpox, New Mexico has had only one in 1921, and none in 1922, so far, Dr. George S. Luccetti, public health director, said.

J. Farrell, who gave his home address as Elgin, Ill., was taken into custody by federal and county officers near Naco, charged with smuggling drugs across the international line.

Restoration of the employees bonus, discontinued Dec. 10, 1920, was announced recently by Gen. J. C. Greenway, general manager of the Casmel and Arizona Mining Company at Bisbee.

Just when the September term of Federal Court will open at Santa Fé with a jury has not been announced. But there will be no jury, grand or petit, during the Santa Fé fiesta, Sept. 4, 5 and 6.

Orders for the structural steel to be used in the construction of the new 5,000-ton concentrator of the New Cornelia at Ajo, Ariz., will be placed in September, according to General Manager Greenway.

A branch office of the federal Bureau of Public Roads, which approved plans for federal aid roads submitted by the State Highway Department, has been opened in Santa Fé, in room 8, Federal building.

The state highway from Vall to Tombstone has been overhauled by a maintenance crew and all the "corrugations" removed so that it is now as good as the balance of the road from Tombstone to Tucson.

Maj. E. L. N. Glass, Tenth cavalry, Fort Huachuca, Ariz., has been detailed as assistant military attaché in the American embassy at Mexico City.

Plans for the new building of the Silver City, N. M., lodge of Elks, have been completed by Trust and Trust of El Paso, and formal action will be taken at the next meeting of the members of the organization.

The Nogales Chamber of Commerce received word from the United States employment service in Phoenix announcing the need of several hundred laborers in the Salt River valley for the cotton picking season which opens Sept. 1.

Delegates from the ten chapters of the state organization of the American Association of Engineers will meet in Prescott Aug. 31 under the chairmanship of George R. Fansett, mining engineer of the Arizona Bureau of Mines at Tucson.

E. D. Osborn, president of the Mimbres Valley Growers' and Cannors' Association, states that he will cut the tomatoes from eighty acres this fall at Honsdale, N. M. An effort will be made next year to secure sufficient acreage to run the Daming plant.

Robert C. Stockdale, county farm agent, and W. B. Thorpe, a director of the Rio Grande Valley Dairy Association, made a tour of the Rincon and Mesilla valleys, to ascertain how much financing is necessary to place more dairy cows on farms in the district.

Jewel Wright, champion mason packer of the United States, who is packing salmon-tint (Burrell team) cantaloupes at Las Cruces, says the Mesilla valley fruit is the best and most uniform of its variety he has ever seen, adding that it should top the market.

316 DROWN AS SHIP SINKS

222 PERSONS ABOARD ILL-FATED SHIP; ONLY TWO PASSENGERS SAVED

ONCE IN U. S. DISPUTE

STEAMER FIGURED IN SENSATIONAL INTERNATIONAL INCIDENT YEARS AGO

Santiago, Chile.—Only six persons, including two passengers, out of a total of 322 on board the Chilean steamship Itata were saved when the vessel sank a few days ago off the Chilean coast, near Coquimbo.

The steamer sailed from Coquimbo with 250 passengers aboard. Of these ninety were laborers proceeding to Antofagasta. Heavy cross seas damaged the rudder of the vessel, which was overloaded.

In this helpless condition and caught in the strong south gale, the steamer was swept time and time again by the enormous waves. She listed badly and soon sank by the bow.

The Chilean warship Cacabuco, which speeded to the rescue, found only scores of drowned floating on the ocean and remnants of the wreckage. One boat carrying twenty persons captured and seventeen perished.

Another boat with many passengers and sailors aboard, and in which Captain Caldera, who had been grievously injured, was placed, also capsized near the beach. Only two passengers and one sailor of this group escaped.

San Diego, Calif.—The Chilean steamship Itata, reported sunk, figured in a sensational international incident nearly thirty years ago, when the vessel was overhauled far down the Pacific coast and returned by the United States ship Charleston, later wrecked in the Gulf of Mexico. Two days after was charged with having violated neutrality laws and orders were issued by the United States Navy Department to the commander of the Charleston, anchored in the San Diego harbor, to pursue and return the Itata to San Diego.

President Balanacocha of Chile, upon learning of the action of the United States, ordered the cruiser Esmeralda to proceed north to meet the Itata and convey the steamship to Santiago. For days the peoples of the two nations were in suspense as wireless was unknown at that time and hostilities were feared in the event of a clash between the Charleston and Esmeralda.

Nearly one week after the Itata cleared from San Diego, the ship was overhauled by the Charleston and a detachment of officers and sailors from the latter was placed on board the Chilean ship for the return trip to San Diego. Later, the Esmeralda put in an appearance and the Charleston was prepared for battle, but the Chileans made no demonstration and soon headed about for Santiago.

The Itata was brought to San Diego and, following lengthy proceedings in the United States courts, the owners of the ship were required to pay a heavy fine.

Coal Shortage Still Serious. Washington.—Chairman Cummins of the Senate interstate commerce committee, in his report on the coal control bill, said: "The present situation is an exceedingly grave one, adding that unless the railroads succeeded in measurably increasing their facilities for handling coal, the situation would be the same as though the bituminous strike was still in progress throughout the industry."

Driver of Collins' Car Shot. Cork.—Charged with having driven the automobile in which Michael Collins rode to his death, Edward Isherwood, an Englishman, was taken from his residence by an armed band and shot. His wounds were not mortal, however, and after feigning death for several hours he escaped and made his way to a hospital. Pinned to his breast was a tag inscribed: "Convicted spy. I. R. A. Beware."

Prisoners Break Jail. Muskogee, Okla.—Dashing pepper into the eyes of Jailer Hadley, William Bennett, prisoner, seized the officer's pistol, locked the jailer, John Watson, an attorney, and Charlie Bowman, assistant jailer, in a cell and allowed eight prisoners, including himself, to escape.

Train Kills Two in Yards. Chicago.—Unmindful of everything except the battle between them, Mike Burke, a special policeman, and James Wallace, a negro whom Burke arrested for trespassing, were struck and killed by the "Western" New York Central express as they fought on the tracks.

Senator Advances Compromise Plan. Washington.—A proposal that the strike in the anthracite coal fields be settled immediately on the basis of the wage scales in effect last April was advanced through Senator Pepper of Pennsylvania at a conference of representatives of operators and mine union officials. Some of those participating in the conference expressed belief that the proposal offered hope of ending the long continued suspension in the hard coal fields.

Something Mised. "The millionaire said he didn't know there was \$20,000 worth of liquor on board." "That's what he testified in court." "Umph! I suppose everybody in court snickered."

"Everybody but a friend of the millionaire, who had been invited to go on a cruise. He groaned aloud."—Birmingham Age-Herald.

New Name for Prevailing Style. Mary's home is in the country and she was unaccustomed to seeing children wear half hose. During a recent visit in the city, at which time the prevailing style impressed Mary greatly, she exclaimed, "O, mamma, won't you please buy me some low-down stockings?"

EVER THINK ABOUT NOTHING?

Courtelaine, Eminent French Philosopher, May Have Added Another Word to Language.

Courtelaine, the French philosopher, bids fair to add a new word to language, as did Osler and Fletcher. Perhaps we shall overhear the expression "to do a Courtelaine" applied to the attempt to think without a subject. A new edition of the "Philosophy of Courtelaine" has recently been issued, and the reviewer in Le Progres Medical assures the reader that in place of a system of metaphysics the book consists of a string of thoughts, maxims and reflections on the most diverse themes.

Courtelaine, or some one else, had heard a woman say that "she never thought, because thinking fatigued her; but if she did think she tried to think of nothing. This declaration he regards as great to the point of sublimity—the best thing that has been said since a certain gentleman went on record as "no lover of spinach." Such remarks are worth more than many acts of parliament.

Instead of giving rules about how to think of nothing, Courtelaine seems to think along absurd lines and thus reduce thought to absurdity. Thus he states that it is better to drink too much good wine than even a little poor wine, and that it is better to court two pretty girls at the same time than one aged spinster alone. He says of the doctors that they can frighten him, but never convince him; that when they tell him he has this or that trouble he has no difficulty in believing them, but when they tell him they can cure him he no longer takes their word. He would rather consult a small-fry doctor than a leading light of the profession, because the former, having no theories, is much less to be feared. The brainy doctor thinks more of justifying his theory than of curing the patient.

"Thinking about nothing," inconceivable in itself, becomes intelligible if we look upon it as thinking nonsensically to stumble now and then on a sensible conclusion.

Old Belief Proved Wrong. The London Times recently carried a news dispatch which indicates that a pet theory of the late Sir Norman Lockyer has just received a blow from which it can hardly recover. Accurate measurements made by the Egyptian survey have proved that never since the great temple of Karnak was built has the sun shone straight down its axis. Sir Norman Lockyer believed that this temple, and many others in addition, were constructed for the purpose of obtaining an exact observation of the precise time of the solstice—that is to say, the day of the sun's most northerly setting. But Mr. Richards, of the survey of Egypt, has proved that the sun has never been visible at all, at any moment in any day in any year along the axis of the temple, since about 6,000 B. C., and that it last set along the central line of this axis between 12,000 and 13,000 years ago. At this date Europe was still in the old Stone age; the cave period was at its zenith, and the hunters of the Dordogne were chasing reindeer over the French tundras. To suppose that the temple of Karnak can have been built then is out of the question. This would appear to dispose of the sun-temple hypothesis; and the survey of Egypt is to be congratulated upon a useful piece of work.

Love and Green Peas. Leguminous plants and divorce appear to have little in common, but, according to the Daily Chronicle, London, England, the pathological congress, recently held in Paris, discovered the analogy when considering divorce cases resulting from war-time marriages.

Haricot beans were stated to confer advantage upon brain and brawn; spinach would prevent dawdling in the household, but green peas were condemned as developing frivolity, making women capricious and reckless. Men and women, it was asserted, flirted under their influence, and the pathologists attributed a majority of the divorce cases to the consumption of peas.

Something Goes Wrong on Jupiter. Something has gone wrong with Jupiter, the great planet which is 1,000 times as large as Mother Earth. Frank Sargent of the Durham University observatory has reported to the Royal Astronomical society that an area of the planet's surface equal in size nearly to the continent of Europe was seen by observers to be moving seventy miles an hour slower than the rest. This was in 1921. This year a similar movement has been observed, but over a smaller area. The drift thus far has been about 50,000 miles. What this movement means is a mystery.

Appearance of Machine is Often Marred by Appearance and Condition of Tires. Tires tell mileage history more convincingly even than speedometers. The appearance of a car is frequently made or marred by condition of the tires. A new set of tires and a little cleaning up of the car, say old tire men, will accomplish the same results for the old car that a shave, a hair cut and a shine will do for the man with an old suit of clothes.

GUARD AGAINST STONE BRUISES

This Form of Injury to Tires is One of Most Common and Expensive to Owner.

BREAK IN FABRIC IS INSIDE

Inexperienced Driver Who Gets Hard Bump Against Curb or Any Other Object Usually Looks for Injury on the Outside.

A "stone bruise" is the term used to describe an injury to a tire caused by striking some object with sufficient force to cause the tire fabric to be broken. It need not be a stone that causes the damage.

The break in the fabric may be in only one ply or it may be in all of them; but in any case it is always the inside ply that breaks first.

An inexperienced driver whose tire gets a heavy blow from a stone or a curb usually looks over the outside of the tire to see if any damage has been done. But the old driver knows that if harm has been done the place to look for it is in the inside and that any break in the fabric will be registered on the inside ply first.

Inside Ply Shorter. Normally the inside ply is shorter than the rest and each ply is shorter than any of the others which are located outside of it. This is because it is on the inside of the curvature of the tire. Now if the tire is suddenly compressed at some point to a considerable extent, such as shown in the illustration, the relative position of the plies is reversed; that is, the outside ply becomes, at this particular point, the inside ply as regards the curvature and the inside ply becomes the outside ply as regards curvature.

If it should happen, as it often does, that only one or two inner plies are broken, there will not be any signs of the injury on the outside until a considerable time afterward. This is because the other plies still unbroken will continue to hold against the air pressure even though they will be under excessive strain. But continued flexing will eventually break them also, and the result may be a blowout, which may occur at any time, even on a perfectly smooth pavement.

Other Effects. Another effect of a break in one or two inner plies may be that from continued bending the broken edges of the fabric rub a hole in the inner tube at that point. Sometimes the break is so pronounced, especially in a fabric tire, that the air pressure forces the inner tube into the break, and as this is continually closing and opening, as the tire rolls, the action is like a pair of pinchers and cuts the tube.

If the tube is chafed through or cut after a bruise, such as described, the air will pass directly through the carcass and force the rubber side covering, and sometimes the tread, loose from the fabric. When this happens the user generally terms it a blowout, and as a matter of fact it is; but, contrary to the opinion often held, it is seldom the result of a defect in manufacture. It can generally be traced to an injury sustained some time prior to the final breaking down of the tire.

SATURDAY

May Be the Vice President's Mansion

At last the vice president of the United States may have an official home in the capital. According to rumors, this building, nearing completion at Sixteenth and Fuller streets, is to be the official mansion for the vice president. The architects have designed the interiors so that they might be used for state occasions and the completed building will be modeled after an Italian villa. Mrs. Calvin Coolidge is said to have already inspected the house and passed favorably upon it.

"Prince" Bared as an Impostor

Duped New York Society for Two Years With His Stories About Royalty.

NOW HE HAS TAKEN FLIGHT

Son of Connecticut Washerwoman Posed as Heir Apparent to Throne of France—Police Say He Has Three Wives in This Country.

New York.—How the part of a prince of royal blood, heir apparent to the throne of France, was played by the romantic son of a Yankee washerwoman is revealed in police records following the disappearance of his royal highness, Prince Louis Henri de Clatoux de Bassigny de Bourbon. The man, who for two years duped exclusive social circles and Fifth avenue establishments into accepting him as a Bourbon prince and former major general of Russia who had saved the life of the pasha, is entered as Just plain Harold Schwarz, twenty-one, factory hand of New Britain, Conn.

With the prince is some the princess and their dog, Prince, named, so his highness claimed, by the late Pope Benedict, whom he called a bosom friend.

Left behind are several trunks of royal uniforms and a gold-plated four foot sword, present from the late czar.

Also, the police say, left behind are three wives somewhere in the country. Among these is said to be Mrs. Everett Worthington of California, formerly Miss Emily Abels, and later, according to the police, the first wife of the unnamed royal heir.

Mother Still Loyal.

Back in New Britain, Mrs. Emily Schwarz, sixty-two, mother of Harold, the "impostor prince," sighed and said she hoped Harold wasn't in any serious trouble.

"But if he is," she finished, "he's my son, for all that, and I'll stick by him as a mother should. I'll go to New York if it is necessary, though I dread such a trip. And I don't know where I'd get the money."

From Joseph Terry, the "Terrific Secretary" to the vanished prince, details regarding his life were obtained.

Terry met the prince one day shortly after his discharge from the navy, and admiration of the prince's monkey led to a friendship that resulted in his becoming secretary.

"I returned a few weeks ago from a trip on a battleship, the Illinois," he said, "where I was a waiter. They gave me \$42 and of this I gave the prince \$4 toward the \$15 he owed the landlord for back rent. He was just short of change, he said, but expected to borrow money from some of his wealthy friends."

Terry gave the following vivid picture of the prince's daily schedule:

7 a. m.—Prince gets up and goes to work in Wall street broker's office.

10 a. m.—Prince breakfasts in bed, Terry serving. His crippled arm, received saving the czar from an assassination, and silver plate in his head, needed to heal a wound received in war, prevent his royal highness from getting up earlier.

10 a. m. to 5 p. m.—Prince and his wolf hound take strolls on Riverside drive, occasionally resting on a shady bench.

Praises the "Princess."

At five o'clock he would meet the princess coming home, and Terry would serve dinner.

"The princess is a good girl," Terry continued. "She believed everything the prince told her about saving the czar and his 14 wounds, and his being a major general. If she only knew."

Prince Louis, or Harold Schwarz, allowed his first taste for a knightly station in the days when he went

He Broke Monte Carlo Bank and Died Broke

Paris.—Charles Deville Wells, the "man who broke the bank at Monte Carlo" and hero of the song heard wherever the English language was spoken in the early nineties, died in Paris recently in such abject poverty that his death passed unnoticed until more than a month afterward. He was eighty-one years old.

Wells, after a record run of luck at Monte Carlo, soon became a bankrupt. He had many other vicissitudes, including several terms in jails and penitentiaries in England and France for obtaining money under false pretenses. He used to blossom out with many get-rich-quick schemes. One of them was a system whereby he claimed any roulette wheel might be beaten by a player with a sufficient bank roll. Applicants for the system, however, generally were relieved of their bank rolls before reaching the roulette wheel.

THIS ENGINEER WAS GALLANT

He Stopped His Train and Landed Big Tarpon Fish for Mississippi Woman.

Blox, Miss.—There is no lack of gallantry on the part of this Louisville & Nashville passenger engineer—or was it his overwhelming love for angling?

The chauffeur of one of the "Ellen's" palatial trains sped on to the bridge at Ocean Springs. On the bridge Mrs. W. M. Lampton was wrestling with a fishing pole that was jerked lither and you too wildly for feminine strength. It was a tarpon on the hook, whereas Mrs. Lampton had gone into the sport modestly hoping to catch a little mess of trout for supper.

For 45 minutes Mrs. Lampton and the tarpon fought a game battle with the score standing about even. The L. & N. engineer procured the heavy iron hook with which his fireman shakes down the grate bars and with this made the tarpon captive in a jiffy. The fish weighed 85 pounds.

All the passengers quickly became interested and hushed off the scales of the tarpon for souvenirs.

Hit by Bolt, Turns Somersault. Haddonfield, N. J.—Lightning struck a tree under which Edward Armstad was standing back of his home, 114 Potter street, caused him to turn a double somersault and he fell back apparently dead. Other members of the family who witnessed the flash caused him to be taken to the Cooper hospital.

HIGHEST PRICES FOR MARKET HAY

Farmers' Bulletin Discusses Merits of Consignment and Straight-Sales Methods.

MANY DETAILS ARE EXPLAINED

Shipper Must Consider Conditions and Determine Which Course is Most Advantageous—Simple Rules to Keep in Mind.

Prepared by the United States Department of Agriculture.

The merits of the consignment method and the straight-sales method of marketing hay are discussed in Farmers' Bulletin 1265, Business Methods of Marketing Hay, by G. A. Collier, recently issued by the United States Department of Agriculture. In addition, chapters are devoted to trade rules, when and where to sell hay, billing and invoicing shipments, and loss and damage claims. Explanations are given therein for some of the principal trade terms and suggestions are offered as to how the various aids to marketing may be applied by the producer or shipper.

Two Methods Explained.

The consignment method consists in shipping to brokers or commission merchants, who act as the shipper's representative in selling his hay on the market. By the straight-sales method the shipper sells his hay at a fixed price, either at the point of shipment or point of destination at a certain specified time. The shipper must consider conditions and decide which method is the more advantageous to use, for the method that may be advantageous one week may be not at all profitable the next.

It is important to know the preferences of the various markets, for it is the buyer's preference that prevails. In general, New England and Eastern markets prefer large five or six-wire bales weighing from 175 to 215 pounds. Southern, Southern, and Southwestern markets prefer small two or

Hay Loader in Operation.

Three-wire bales weighing from 75 to 100 pounds, and ranging in size from 14 by 16 inches to 17 by 22 inches by about 30 to 48 inches in length. In the Central Western markets the 17 by 22-inch bale is probably the most generally used, and on the Pacific Coast both this size and the large bale prevail almost exclusively.

To avoid differences between buyer and seller it is suggested that a few simple rules be kept in mind. The seller should state clearly all necessary factors, including quality and quantity of hay, time at or within which shipment can be made, routing, rates, price, and terms of payment. All sales should be confirmed by letter, stating all terms included in the original offer. When confirmation is received from the buyer any items that appear incorrect should be corrected immediately. Since much of such business is transacted by telephone or telegraph brevity is necessary, but a few extra words will often save much trouble and money. Sample telegrams covering various conditions are given in the bulletin.

Best Time to Market.

The time of marketing makes a great deal of difference in the price received for hay. Statistics compiled by the department and tabulated in this publication show that for a period of ten years ending in 1921 the highest average prices at two large markets were reached in April for prairie and alfalfa hay, and in May for timothy. The months of highest price are just before the new crop begins to come on the market.

Hay producers and shippers, says the bulletin, should secure all the information possible bearing on the marketing of hay. They may keep well informed by watching the reports prepared periodically by the Department of Agriculture. Copies of the bulletin may be obtained by addressing the department at Washington, D. C.

BEET TOP SILAGE FOR EWES

Material Will Increase Flow of Milk at Lambing Time—Gradually Increase Feeding.

Beet top silage will increase the flow of milk of ewes at lambing time. It is best to start feeding only about one pound per head daily and gradually to increase the quantity to three pounds per day. The udder may become feverish if this caution is not observed.

RED CLOVER MILDEW SERIOUS THIS YEAR

Severe Infestation Has Appeared in Several States.

Department of Agriculture Anxious to Secure Reports From Various Sections, Particularly as Affecting Horses.

(Prepared by the United States Department of Agriculture.)

The first severe infestation of mildew on red clover in this country has appeared east of the Mississippi from Wisconsin to Georgia this year. This mildew makes the plants look white. Last fall it was quite prevalent in the South and is worse there this summer. The amount of harm it does is a question yet unanswered. Some reduction in the yield of hay is due to it.

Turning Under Red Clover to Improve the Soil.

but this is not great. There are rumors, however, that the eating of mildewed hay causes inflammation in horses' mouths. The Ohio experiment station reports a quotation from a German writer stating that mildewed clover hay causes stomatitis in horses.

Unfortunately the exact identity of the mildew on American red clover has not yet been determined. When American seed is planted side by side with European seed, the mildew appears on the plants from American seed while only a trace of mildew appears on those from European seed.

The United States Department of Agriculture would be glad to get reports regarding the mildew in different parts of the country. It is particularly interested in learning if horses eating the mildewed red clover hay are affected.

EFFICIENT THRESHING HINTS

Uniform, but Not Too Rapid Feeding Constant Speed of Machine and Adjustment.

A few points to keep in mind for efficient threshing are: uniform feeding, not too rapid feeding, constant speed of the machine, and proper adjustment. Many times when a threshing man is anxious to complete his job, the work is rushed through at considerable loss to the owner of the grain. Greater personal interest in each job usually makes the small threshing outfit more desirable than the large one. With the large outfit a part of the crew is usually a long distance from home and they do not have the same interest in the work as when the entire crew is made up of men on adjacent farms.

CONTROL OF TUBERCULOSIS

Whole Areas Should Be Cleaned Up Rather Than Scattered Herds to Be of Permanence.

Tuberculosis in cattle cannot be kept under control, much less eradicated, if grade animals and single cows owned by families are omitted in the clean-up of any territory. Whole areas, therefore, like townships and counties, should be cleaned up rather than scattered herds, if the work is to be of permanent value and handled in the most economical way, says the United States Department of Agriculture.

DAIRY COWS ARE IMPROVING

In 45 Cow-Testing Associations in Nine Western States, 9,484 Make More Than 40 Pounds.

Dairymen in the 45 cow-testing associations in the nine western states now own 9,484 cows that have made more than forty pounds of butterfat in a month. Not many years ago a 40-pound cow was a rarity. There is much room for improvement, however, in the general run of herds in all parts of the country, says the United States Department of Agriculture.

ROAD IMPROVEMENT YOUNG

Eighty-Five Per Cent of American Highways Are Yet to Be Improved in Some Way.

While highway improvement has made tremendous strides in the United States in recent years it is still in its infancy. Eighty-five per cent of American roads are yet to be improved. It is not now so much a question of raising the money required to build good roads as it is the problem of spending wisely the large sums available in every state for this purpose.

LIVE STOCK

PREPARING STOCK FOR SHOW

Much of Improvement in Breeding Is Made Possible by Comparing Animals in Ring.

(Prepared by the United States Department of Agriculture.)

There are many of the elements of sport in preparing live stock for the show ring and in competing with other breeders for prizes, and showing animals at fairs and expositions is no mere fad, although there are still some people who seem to think so. Much of the improvement in the various breeds of animals in this country, says the United States Department of Agriculture, has been due to the comparisons made possible by bringing animals together in competition. Not only do the breeders who compete reap a benefit, but also every farmer and breeder who attends the show as a spectator. Many a man marks the beginning of his success from the time of some live-stock show where he was brought to a realization of the inferiority of the stock on his farm.

A good illustration of the value of a state fair as a live-stock improver comes from a state in the Middle West. A bill providing for the appropriation of \$50,000 to build a hog barn on the state fair grounds was up before the legislature where it was encountered much opposition because of the comparatively large expenditure planned and the short time the building would be used each year.

Finally, one legislator, a small-town banker who had never made a speech before, got the floor and in a few words convinced his hearers that the \$50,000 would be well spent. He told of having studied the list of depositors in his bank with the idea of finding out which were breeders of purebred stock and how they stood in comparison with the others. He found that 14 of them were breeders of purebred hogs and all of them were prosperous, far above the average. Then this banker went to see each one of the 14, and he found that almost without exception they gave the state fair or some other fair credit for having taught them the value of better blood and the right type for the market.

There are farmers who find it next to impossible to pick a real good animal unless they have the opportunity to make comparisons. They may be able to pick the best animal in a herd, but if the herd happens to be a mediocre one they will pick an ordinary

one. There are farmers who find it next to impossible to pick a real good animal unless they have the opportunity to make comparisons. They may be able to pick the best animal in a herd, but if the herd happens to be a mediocre one they will pick an ordinary

animal in the belief that they were getting a good one. By making his selection at the farm of a successful breeder or at a show where many excellent animals can be observed, his chances of getting the right sort of stock are greatly increased.

SHADE AND WATER FOR STOCK

Abundant Supply Will Result in Rapid and Economical Gains With Hogs and Cattle.

Experience has taught cattle and hog men that a good shade with an abundant supply of pure water near the feeding place will result in rapid and economical gains, whereas lack of shade or shortage of water or stagnant impure water make slow and costly gains. Flowing springs or fresh well water are the best sources of supply for stock.

USE PATIENCE WITH HORSES

Nothing Gained Where Animal Is Abused and Continually Kept Nervous and in Fear.

Horses that are handled quietly and patiently will do much more work and keep in better condition on a given amount of feed than will horses that are abused and continually kept nervous and in fear of the driver.

Beef Producer's Problem.

The beef producer's problem is so to feed roughage that it will bring him the greatest return. Corn fodder when fed with some kind of legume hay or nitrogenous concentrate to balance, makes a cheap and satisfactory ration.

Study of Feeding Value.

The beef producer must study the feeding value of the different concentrates and roughages, and should be guided by the market prices in balancing rations and feeding.

Requests Provisions in Swing Bill.

Washington.—Arizona's request for specific provision in the Swing bill for the participation of that state in the benefits expected to follow federal improvements for the control of the Colorado river will be presented to the House Arid lands irrigation committee when it resumes its sessions. Representative Hayden of Arizona, ranking Democratic member of the committee, has stated. A delegation from Arizona will appear before the committee, Mr. Hayden said, with a recommendation that the flood-protection section of the bill, contemplating the construction of a dam at Boulder cañon, contain definite apportionment to Arizona of electric power and of storage waters for irrigation purposes.

Reports on Grain Trading Bill.

Washington.—The Senate agricultural committee, informally reporting the Capper-Tincher futures trading bill, declared that the fluctuations in prices since the original futures trading act was held unconstitutional, had done much to "confirm the belief of the farmers that prices were being manipulated to his distinct disadvantage." Grain exchanges contend, according to the statement, that the fall in price was due to unusually heavy hedging sales, but the committee statement added, the belief persisted that the drop resulted from "short selling by professional speculators."

Vienna Unemployed Storm Capital.

Vienna.—Several thousand unemployed persons dissatisfied because the government had rejected or delayed its answer in their demands, unhinged the doors of the parliament building and entered, wrecking the furniture.

Colfax Business School

Colfax and Corona, Denver, Colo.

International Farm Congress May Move Home from Kansas City to Denver.

Denver.—Sites were considered, new directors were added to those already elected, and plans were made for the furthering of the plan for a gigantic Colorado Industrial exposition at a meeting held recently in the club rooms of the Gentlemen's Driving and Riding Club, 1525 Curtis street.

The idea of a great exposition and annual fair and permanent exhibits come into being at a meeting held in the club rooms a few weeks ago.

A. J. Simonson, one of the members of the board of directors, read a letter recently received from the International Farm Congress at Kansas City, in which it was said that Denver was being favorably considered for the permanent headquarters of the association. This, according to Mr. Simonson, would mean the bringing to Denver of a large number of persons engaged in the work of the association, and probably of the establishment of the permanent fair or exhibits of the association in Denver.

Rail Factions Stand Pat.

New York.—"We are like bats; we can't see the way out"—thus did the chief of one of the big five railroad brotherhoods describe the position in which the running trades found themselves after their latest efforts to settle the shopmen's strike, now nearing the end of its eighth week. Peace negotiations centered on conferences between the brotherhood chiefs, cast as mediators, and the executives of more than a score of roads.

SPURNED BY MAN, GIRL KILLS SELF

Flapper Love Sends Evelyn Couture to Death and Kenneth Gumm to Hospital.

BREAKS UP WEDDING

Marriage Festivities Turned Into Tragedy by Infatuated Girl—Bride Tells Story of Dead Girl's Persistence.

Toledo, Ohio.—Flapper love, violent and passionate, but shallow and impotent, sent Evelyn Couture, nineteen years old, of Sylvania, to her death by her own hand and put Kenneth P. Gumm, twenty-one, of Toledo, in a hospital with a bullet in his lung.

Mrs. Pearl Thomas Gumm, wife of the wounded man, is a candidate for the state senate in the primary election. She has espoused the cause of short skirts, bobbed hair and other features of a liberal platform.

Wedding festivities of young Gumm and his bride of a few hours were halted by an insistent knock on the

Pulled the Gun and Fired.

door of the bride's apartment on the evening of the wedding day. When it was answered Evelyn Couture, the sinister shadow of the Gumm's courtship, stood in the hall. She formerly had held a place in Gumm's favor.

Asks Girl to Depart.

Mrs. Gumm, realizing that the girl was agitated over the news that young Gumm had married, asked why Miss Couture did not go away and leave them alone.

"He's mine, Pearl Thomas," she replied to the bride who formerly was Pearl Thomas, manicurist and artist model. Mrs. Gumm attempted to persuade the girl to go away and not make a scene on account of the marriage.

"Oh, what's the use," she replied despondently.

Then, according to Mrs. Gumm, the Couture girl asked that Mrs. Gumm step out into the hallway.

"After a recent experience with her, I was afraid to do this. Then she said she wished to see Kenneth," the bride said.

"He came out of the bathroom and saw her. He said: 'Go home, we're married. Let us alone.'"

"She insisted that she wanted to see him for a moment and came into the room, carrying a flapper hat in her hand. Kenneth said: 'I suppose you have a gun again. Well, if you have, you might as well shoot. I eat bullets.'"

"Of course, he didn't think she would shoot, but she walked up to him and pulled the gun from under her hat and fired. I had started downstairs and turned at the shot. She had thrown her arms around him, but even though wounded, he flung her from him toward a corner. Then I heard another shot, and, running back, thought she had shot him again. When I reached the door she was falling to the floor. She had killed herself. When I saw her there, all crumpled up and Kenneth wounded, I fainted."

"She didn't love Kenneth and he didn't love her. She might have been infatuated with what I would call flapper love, but there was nothing deep about her affection."

"I truly love my husband, although it has only been in the last few weeks that we have been together much, after a long estrangement. During these weeks this girl continually followed us. Kenneth told me he was through with her."

"As late as two nights before the wedding I wanted to terminate our friendship and give Kenneth to her if he wanted to go to her, but he assured me that there was nothing to his friendship with her and that he merely had spent some time with the Couture girl while we were estranged. Three weeks ago he told me he was ready to settle down and we started going together again."

"Then Miss Couture interfered. Recently she met us on the street and pulled a gun on us. Kenneth told her to stop talking about him as he was through."

Blazing Footsteps Mark Wild Flight of Boy

Chickasha, Okla.—Avin Roberts, fourteen years old, put a tube of phosphorus in his pocket and is near death as a result. His clothing suddenly ignited and soon he was enveloped in flames. He rushed to a blacksmith shop, where he was sooted in a tub of water, but the fire started again when he was lifted out. The shop also caught fire. Rescuers' hands were seared as they stripped the child's garments from him, but his bare body blazed. Papers and blankets were consumed before the fire was finally extinguished.

Where the boy ran in his flight from pain, glowing footprints were left, where burning phosphorus dripped down his legs. He found the tube in an alley.

MOTHER HEN TOO MUCH FOR CROW

Black Marauder Put to Flight When He Attempts to Carry Off One of Brood.

Lewes, Del.—A mother hen belonging to George Walls, a farmer living along the Georgetown-Rehoboth Beach, has proved that the chicken is a better fighter than old Jim Crow. A day or two ago a hen of the common barnyard variety, while piloting thirteen fluffy youngsters through a wheat stubble, saw a big black crow pounce on one of her little ones and attempt to fly off with it for supper.

The mother then saw the peril of her progeny and leaped in the air, reaching the black kidnaper and laboring him so severely that he was obliged to drop the chick and fly into a high altitude for safety. Several automobilists who witnessed the battle declare the hen never showed the white feather for a moment nor hesitated in attacking the greatest foe of the chicken family.

They were, however, amazed at the ferocity with which she countered on the black marauder, and the crow himself was evidently taken by surprise at the violence of his assailant, for he winged away at top flight to the nearest woods, leaving two or three neck feathers behind as testimony of the prowess of the mother hen.

In such encounters the crow is considered almost equal to two barnyard

The Crow Was Taken by Surprise.

fowls under ordinary conditions, but a mother hen evidently is the better fighter of the two when the lives of her brood are at stake and need her defense.

IS WARNED BY MOONSHINERS

Georgia Pastor, Who Discovered 39 Still, Given One Week to Get Away, Will Stay.

Atlanta, Ga.—The Rev. Robert Stewart, Methodist preacher of Floyd county, Georgia, has been threatened with death because of his activities against "moonshiners" in the North Georgia mountains. A note of warning, found tacked to the parsonage, read:

"We have had enough reporting of stills in this settlement. We will give you one week to get away. If you don't, some one will have to take care of your wife and children."

Stewart turned the note over to prohibition officers and announced his intention of continuing his crusade.

"I know how to handle a gun and will not hesitate to use one if occasion demands," he said. He uncovered 39 stills in that region within the last three months.

Twins Look Alike to Mother. Baltimore, Md.—Edwin and Milton Gosiorowski are twin sons of Mrs. Philippa Gosiorowski. Edwin got lost. His mother left him on a street car. Mrs. Gosiorowski rushed to the police station, but could not remember which of the twins was lost, so she hurried home to ask the other which he was. He said he was Milton, so an alarm was spread for Edwin. Two hours later he was found.

LIKE SHORT COAT

Abbreviated Jacket Has Taken Paris by Storm.

Garment Cut on Straight Lines, of Finger-Tip Length; Straight and Wide Sleeves.

There is a veritable craze in Paris at the present time for the short separate coat to be worn either over a matching or contrasting skirt or over any sort of dress and for almost every occasion. In fact, the short jacket has taken Paris by storm.

These coats, which are similar to suit jackets, are cut on perfectly straight lines and are of finger-tip length with straight and wide sleeves. They may be worn with or without a belt. It is noteworthy that they are replacing to a considerable extent the full-length coat and the cape.

There is nothing unusual in the cut of these coats, but there is great novelty in the fabrics and trimmings used in their making. All the Rodier silks and satins in quilted and blistered effects which are having such a tremendous vogue at the present time are represented.

There is bulla, a blistered fabric which, as its name implies, is double. Again, there is cloquee, a quilted novelty. Certain definite patterns have specific names, such as mosaic cloques, bulla mosseaux and bargandine. The latter is a wonderfully interesting printed, embroidered and blistered silk crepe. In addition to coats of these cloque fabrics there are models of cloth and heavy silk crepes which are usually embroidered in Russian or Persian designs.

Practically all these jackets, whether of silk or cloth, are black and feature fur trimming of some sort. Rabbit is dyed to imitate squirrel, kolinsky and chinchilla. This lightweight pelt is lavishly employed in the form of standing collars, wide cuffs and deep bands around the bottoms of many jackets. Fur trimming is present even where a model carries embroidery.

In the novelty class is a jacket of India cashmere trimmed with monkey fur about the neck and sleeves and around the bottom.

A CAPE FOR GENERAL WEAR

Here is a charming cape of tan and brown that attracts the flappers as well as those desiring a cape outfit for general wear.

Dainty Touch. Dainty rosebud applique adds a pretty effect to the top of the pink corset.

PLAITING IS MUCH FAVORED

Trimming Form in Limestone on Chic Summer Dresses—Tasteful Is Always Winsome.

Plaiting is a trimming form much favored for the summer dress. If the skirt is not knife or accordion plaited, it is likely to introduce plaits in the form of inset or flying panels.

One lovely white crepe de chine frock uses flat bands of plaits to outline its bateau neck and deep armholes and drops slender plaited panels from its lowered waistline.

Batiste, delicately embroidered and lace-trimmed, is always attractive for summer. It is best when simply made, so that it relies on its exquisite work for its effect.

Under this heading come frocks of crepe batiste made over black satin or charmeuse slips. One smart one shows the fachu treatment which crosses above the plain, short-sleeved, black satin bodice, while the batiste overskirt parts at the center back to reveal its black satin foundation.

STRAPS OF PEARL AND METAL

Dainty Shoulder Pieces Are Used on Some of the Summer Lingerie Instead of Ribbons.

Tiny shoulder straps of pearl and metal are used on some of the summer lingerie instead of ribbons that so easily wrinkle and soil. Some time ago there came into existence the thin silver or gold cord, replacing the ribbon shoulder strap. The idea of the silver or gold cord or chain was that it would be invisible. Not so with the

GOWN FOR AFTERNOON WEAR

For informal afternoon functions this black moon-glo satin crepe makes a strong appeal. It has been made distinctive by the chinchilla collar and long sleeve panels.

ORGANDIE FOR EVENING WEAR

Summery Fabric, Considered Too Fluffy for Daytime, Crowded Out by Dark Silk.

Summer isn't over and organdie has always had a place in the heart of the American girl who is often at her best in this sheer, summery fabric. Of late years it has been considered too fluffy for daytime wear and has been crowded out by dark silk gowns, which women prefer to wear in spite of the heat. Now, however, it is offered as one of the latest materials for the summer evening gown and one is entirely surprised at what is being done with it in this line.

The organdie gown of today is not ruffled, tucked or lace-trimmed, but is used with one color over another and trimmed with self-toned flowers and pleating. Rose over lavender gives a two-toned effect that is lovely. Yellow over orange is also very attractive.

One of the prettiest combinations is shown in a frock of pale green made over a foundation of old blue. The usage of these two colors gives a bronze effect. Twisted about the low waist is a sash composed of folds of deep lavender, dark green and bronze organdies.

These organdie gowns are at their best when made simply with the snug-fitting bodice that is sleeveless and with quite a full skirt which may be pleated in scallops. The neck and armholes finish in pleating. Stockings should match the color of the under-slip.

Feathered Gown.

An exquisite version of an evening gown made entirely of feathers is worn by a popular actress. The color chosen is heliotrope, which sets off to advantage the lady's coloring. Ostrich feathers are admirably suited to the popular bouffant skirt, overlapping in such a way as to form innumerable points. The new decollete line is a deep oval filled in with small feather flowers which also decorate the grille. This feather gown is the last word in originality and charm.

pearl and metal straps. The more these are seen the better, from the Parisienne's standpoint. And in truth these trimmings form an extremely dainty adjunct to the summer costume.

HINT ON IRONING WITH GAS

Single Burner Can Be Made to Heat Several Flatirons; Much Can Be Saved.

Get a strip of metal large enough to hold four or five flatirons and heat the irons on this. A single gas burner will heat the metal from end to end, and thus do the work of three or four. The same strip of metal can be used for making griddlecakes.

Turn over the irons a metal pan so as to save the top heat, and turn the gas down low. With care four or five flats can be kept hot at a cost of about 10 cents for an ordinary ironing. Do not put flatirons directly over a gas flame, as the watery vapor from the flame will rust and consequently roughen them.

Dressmaking Hints.

There are a number of lovely ways to finish the serviceable and smart cretonne gowns. Organdie, in the predominating color, may make an inch-wide binding at sleeves, pocket and bateau neck. Through this, ribbon in a harmonizing tone is run and tied in pretty bows. Either ribbon or a slender string belt is used and tied at the left front. Another good-looking finish which is seen on a number of imported cretonne frocks is button-holding done in colored wools. And still another binds the edges with linen.

Shame on Them.

PERHAPS there are a few mothers who do not know the virtues of Fletcher's Castoria. Perhaps there are a few who know that there are imitations on the market, and knowing this demand Fletcher's. It is to ALL motherhood, then, that we call attention to the numerous imitations and counterfeits that may be set before them.

It is to all motherhood everywhere that we ring out the warning to beware of the "Just-as-good". For over thirty years Fletcher's Castoria has been an aid in the upbuilding of our population; an aid in the saving of babies.

And yet there are those who would ask you to try something new. Try this. Try that. Even try the same remedy for the tiny, scarcely breathing, babe that you in all your robust womanhood would use for yourself. Shame on them.

Children Cry For Fletcher's CASTORIA

Your Friend, the Physician. The history of all medicines carries with it the story of battles against popular beliefs; fights against prejudice; even differences of opinion among scientists and men devoting their lives to research work; laboring always for the betterment of mankind. This information is at the hand of all physicians. He is with you at a moment's call be the trouble trifling or great. He is your friend, your household counselor. He is the one to whom you can always look for advice even though it might not be a case of sickness. He is not just a doctor. He is a student to his last and final call. His patients are his family and to lose one is little less than losing one of his own flesh and blood.

Believe him when he tells you—as he will—that Fletcher's Castoria has never harmed the littlest babe, and that it is a good thing to keep in the house. He knows.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS Bears the Signature of

Chas. H. Fletcher.

10 Cents Gives Charming New Shade to Old Lingerie PUTNAM FADELESS DYES—dyes or tints as you wish

A Difference. Collect and congregate are synonymous, yet the church often finds that there is a vast disparity between the collection and the congregation.—Omaha World-Herald.

A few people read the Declaration of Independence and tell the rest what's in it.

A life of longing is less criticised away from home.

A man often feels the loss of his first wife most after securing a second.

What becomes of a man's respectability after death?

U. S. LAND OFFICE at Las Cruces, New Mexico, August 19, 1922.

NOTICE is hereby given that Joseph S. Beatty, of Greens Gap, New Mexico who, on September 20, 1921, made Homestead Entry, No 018647, for W $\frac{1}{2}$ SE $\frac{1}{4}$ E $\frac{1}{2}$ SW $\frac{1}{4}$ Section 11; SE $\frac{1}{4}$ NE $\frac{1}{4}$; E $\frac{1}{2}$ SE $\frac{1}{4}$ W $\frac{1}{2}$ E $\frac{1}{2}$ NW $\frac{1}{4}$; NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 14; SE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 15 Township 3 S., Range 12 W. N. M. P. Meridian, has filed notice of intention to make final three years Proof, to establish claim to the land above described, before Justiniano Baca, U. S. Commissioner, at Magdalena, New Mexico, on the 11th day of October 1922.

Claimant names as witnesses: L. O. Fonville, James Cowart, John Lawrence, of Greens Gap, New Mexico, Frank Landavano, of Datil, New Mexico Nemecia Ascarate, Register.

August 26 to September 23

Railroad and Coal Strike at a Glance.

An attempt to blow up a car in which 11 workers were sleeping at the Santa Fe shops was frustrated by a guard at 1:40 this morning when he discovered a bomb which had been placed under the car and threw it on an ash pile, where it exploded. No damage was caused. The watchman noticed a man running away from the car and fired several shots at him. One dead and three hurt in an attempt to wreck a train. A new train wrecking plot has been discovered in an attempt to blow up a train near Alton, Ill. One person was killed and three severely injured.

It is evident that there is a new train wrecking plot because of the discovery of attempts to blow up trains, and shops where non-union men are employed; the burning and dynamiting of bridges and other railway property, greasing of tracks and slugging of workers.

Otis Clark has been indicted and is held without bail in the Marion jail. He is confined in the same narrow cell which was occupied by Settini Desantis, who precipitated the riots at Wert Frankfurt several years ago while waiting to ascend the gallows.

Clark is president of the local miner's union at Weaver, Ill. He is charged with having killed C. K. Mc. Dowell, crippled superintendent of the Lester Strip mines, near which the massacre occurred.

New York Bootleggers

N. Y. Bootlegging Ring Smashed with two Arrests, reads a headline. Not as numerous in the metropolis as in the mountains.

Turpentine Possibilities in New Mexico.

It is claimed by I. F. Eldredge, inspector from the Washington office of the forest service, that within five years New Mexico will be the turpentine center of the United States.

About 30% of the turpentine produced in the United States comes from a few of the southwestern states which will become exhausted within five years, according to Mr. Eldridge, and the industry must move to other fields if it continues at all. The new fields are New Mexico, California and Old Mexico.

Experiments which have been conducted for a long time prove that the New Mexico western yellow pine will produce as good turpentine and resin as the long leaf pine of the southeastern states.

En la Corte del Distrito del Condado de Catron, Nuevo Mexico. ESTADO DE NUEVO MEXICO. DEMANDOR.

La propiedad delincente y las personas mostradas en la lista de asamiento por el ano de 1920 y a todas los duenos y a las personas teniendo estado, derecho, titulo o interes en ella.

TIBET SECRETS TO BE UNVEILED

Great Britain About to Send a Mission to That Little Known Land.

CAREFUL STUDY TO BE MADE

Explorers and Scientists Will Examine Rare Books and Manuscripts and Thoroughly Investigate Customs on the "Roof of the World."

London.—Great Britain intends to make a thorough study of the little known land of Tibet, where devil-worship and belief in ghosts still exist.

A mission composed of some of Great Britain's ablest explorers, scientists, missionaries and ethnologists soon will leave London for the city of Lhasa, which is buried behind the world's greatest rampart of mountains, the Himalayas, between India and China. The mission will proceed under the auspices of the International Buddhist union, representing all schools of Buddhism, including the Buddhist society of the United States.

Rare Books to Be Studied. The mission will make a closer investigation of the Tibetan people, their customs, religion and language than has yet been possible, together with a study of rare books and manuscripts known to exist in the monastic libraries. These are expected to prove of the greatest value, not only to Buddhist scholarship and to the study of comparative religion, but in filling many gaps that at present exist in the world's knowledge of the early history of a country which to the present day is veiled in mystery.

The Tibetans live in mountain strongholds 15,000 feet above the level of the sea, 500 feet higher than Mount Whitney, the highest peak in the United States. They have always proved inhospitable to foreigners and to the introduction of modern ideas. Little is known of the origin of the people. Local tradition has it that the progenitors of the race were "a she-demon of the Himalayas" and an ape from the plains of Hindustan.

The last foreigner in Tibet was an American missionary, Dr. A. L. Shelton of San Francisco, who spent 17 years at Butang, near the Chino-Tibetan border.

Last of Theocracies.

In its form of government Tibet is one of the few remaining theocracies in the world. The people lead a nomadic life. Monogamy, polygamy and polyandry flourish. Under the polyandrous system the eldest son of a family marries a woman and she becomes the common wife of himself and his brothers.

Doctor Shelton found that the Tibetan woman usually marries three or four brothers, and in one case that came under his observation a woman had six brothers for husbands. The oldest brother is considered the father and the other brothers the uncles of the family.

Woman occupies a superior position. She is master of the home and farm. Grass, worms, fungi and the horns of young deer, ground to powder, are considered by the Tibetans infallible medicinal remedies for all ills and are even held in high favor as table delicacies.

Thousands of years of isolation have paralyzed the progress of the people. There is no public instruction. Pagan forms of worship prevail. Only the most elemental form of government exists.

Offenders against the law, which is derived largely from the Kanjur, the Buddhist bible, a work of 106 volumes, are punished by having their hands and feet amputated.

When a Tibetan dies his body is dismembered and fed to vultures. The people are extremely poor. They dress in sheepskins and the usual rule is one garment to a person.

MUTE, 10, SUDDENLY SPEAKS

Boy Gains Power After Praying at Altar in Tented Church of Evangelist.

Clarksburg, W. Va.—Clarence McAfee, ten years old, a mute since birth, suddenly gained the power of speech after praying at the altar of a tented church where evangelistic services were being conducted by the Pentecostal denomination.

The story of the seeming miracle was told by Mrs. Ida Tribett of Sturgis, Mich., the evangelist in charge of the revival. Those acquainted with the boy say he had never spoken before. The case is vouched for by various persons who attended the meeting.

Wages in Hungary.

Vienna.—A table comparing the pay of officers of the inter-allied commissions in Budapest and that of high Hungarian officials, published by the newspaper Szozat, shows that a British colonel receives 8,000,000 kronen a year and a British captain three to five millions, while the Hungarian regent receives only 3,000,000 and a cabinet minister 105,400.

Trades Son for Horse.

Quebec.—A Quebec farmer, maintaining that his nineteen-year-old son was his property, exchanged the boy for an old horse with some gypsies. The boy was rescued by his uncle.
