NATURAL RESOURCES JOURNAL

University of New Mexico School of Law

Annual Report

For the Fiscal Year July 1, 1973 - June 30, 1974

Continued growth and recognition for excellence marked the 13th year of Journal publication, during which there was an increase of 19% in subscription fee revenues (due in part to new subscription rates).

A simultaneous increase of 19% in foreign subscription sales brought the number of foreign readers in the total readership to nearly one out of five, or 18%.

Excelsior, Mexico's leading newspaper, in its March 15, 1974 issue, referred to the Journal as "la principal revista sobre asuntos ecologicos en el sur de Estados Unidos." This was occasioned by the Journal's participation in a bi-national conference on the U.S.-Mexican 1973 Agreement on the Colorado River. Six U.S. authorities met at Oaxtepec, Mexico, with six Mexican counterparts to critique the Agreement and the problem of salinity on the Colorado and Rio Grande Rivers. Proceedings of that conference will be published in the Journal.

Review of Publication Year

The October 1973 and January 1974 issues contained Parts I and II of the Coase Theorem Symposium. In addition, the issues of July 1973, and January and April 1974 carried articles on the topics of air pollution, economics, environmental control, indian law, international law, mines and mining, national energy policy, oil and gas, psychology, public lands, taxation, and water and water courses.

Student notes and comments published during the year were:

One Problem With Using An Escrow to Deter Nationalization of Foreign Investment, by William Darling

Tax Consequences and Distinctions Involved in the Sale or Lease of Oil and Gas Interests, by Richard B. Gregory

A Rebuttal to "The Preemption Doctrine and Colonias de Santa Fe, by Shirley V. Keith

Indian Law: The Preemption Doctrine and Colonias de Santa Fe,
by Marian A. Matthews

Toward a Rational Future Energy Policy, by Rolf A. Melkus

Federal Jurisdiction--Environmental Law--Damage Claims in
Pollution Actions Brought Under §304 of the Federal Clean
Air Act, by Charles Anthony Shaw.

Requests for Permission to Reprint

Requests for permission to reprint articles from volumes 3 to
13 were received during the past year as follows:

eral Republic of Germany

Staff and Operating Policy

The half-time clerical specialist position will need to be con-
sidered for amendment to more hours per week in the very near
future. Both the employee most recently in that position and
her predecessor stated that twenty hours per week was not enough
time to handle the many details involved in billing, receiving,

depositing, filing, mailing, duplicating, and other miscellaneous duties which should be taken care of by the clerical specialist. The large backlog of work left untouched by Ms. Ortega upon her departure testifies that more time is needed for the clerical specialist to be able to "keep current", which is, of course, essential in a position dealing with sales orders, payments for merchandise, and shipment of merchandise. Thirty hours per week would probably be a more realistic allotment of time for the performance of such duties, particularly as each increase in the number of subscribers simultaneously increases the work load.

Finances

Four issues were billed during the year, at a total cost of \$13,417.84. Reprints from the four issues cost an additional \$1,006.00. Subscription rates were increased to \$12. per year, and \$22. for two years, effective January 1, 1974. Due to the high annual inflation rate, it was decided to discontinue any promotion for three year subscriptions.

Mr. Schodorf, Director of the Printing Plant, in response to a memo asking his estimate of price increases to be planned for during fiscal 1974-75 in paper costs and printing charges, advised to budget for an average increase of 25% in total printing costs. During fiscal year 1973-74, each copy of the Journal cost \$1.95 (based on 7,400 copies printed), or \$7.80 per volume. Adding 25% to each single copy the cost would be \$2.44, or \$9.75 per volume. Of course, as the number of copies printed can be increased, the cost per single copy goes down, and it is anticipated that the printing order will be increased by one hundred copies per issue this coming year.

The attached financial statement shows that during 1973-74 the Journal's earned income was \$19,242.14 and accounts receivable at the close of that year were \$1,469.55, totalling \$20,711.69 in business transacted, while actual expenditure of \$20,678.16 was made. Therefore, one might say we appear to have reached a fairly firm financial position where we are more or less paying our own way.
