Various Maps of Mexico, Central and South America. Both German and American, as a rule the German maps are the more accurate.

Master Thesis (U.N.M.) from 1930 to present.

????????????????

Those who read the last issue well would have seen, tucked modestly in a corner, the query: "Can you take it?" Probably the most inquiring (including the Quintuplets) might have wondered at the portent of this strange interrogation. We, if we may, will proceed with the enlightenment. A select group (we say so ourselves) of the more liberal and advanced thinkers of the department have felt it imperative that they form an anthropological fraternity to end all anthropological fraternities, Oh, Yes? We have our Tiwa--it is always with us; few but the most benighted would deny the presence of our Mu Alpha Nu.

But a need is felt, my friends, a need that New Mexico, noted for its good, old-fashioned dirt archaeologists, should have a grouping of these fine specimens of humanity, banded together for their common weal and the promotion of life, liberty, and the pursuit of sappiness.

Thus we give you---THE BUZZARDS CLUB (see footnote at bottom of page--where do you think it would be?) A tentative list of the requirements for membership follows:

A member must be able to:

1. Dig and move a cubic yard of earth in a day when picking is necessary, two yards in soft earth.
2. This earth must be carefully checked over and ALL cultural material removed.
3. Go on a twelve hour field trip (with the sun shining) with only three drinks, of water
4. Eat one bowl of the hottest of Jemez chile with no glances at the container of water placed beside him.
5. Have an elementary knowledge of map reading.
6. Cuss and discuss in three languages.
7. Follow the charter members through the field for a day
8. Demonstrate a good elementary knowledge of North American natural history.
9. Show ability and training as a pathfinder.

Note:- This name may be considered only temporary, and further suggestions will be given the consideration that they merit.
