CARRIZO TO BE INCORPORATED

Petition Circulated by Local Business Men Has Received Hearty Reception at the Hands of the Voters

PETITION TO BE PRESENTED TO COMMISSIONERS MONDAY

As we go to press this issue, we take pleasure in announcing to the world that Carrizozo is destined to soon leave the ranks of unincorporated and take its rightful place among the recognized and duly incorporated towns of New Mexico. Our announcement is justified by the hearty reception which a petition, circulated by progressive business men, has received at the hands of the voters within the proposed corporate limits of the town of Carrizozo. The final papers are now in process of being drafted preparatory to presentation to the Honorable Board of County Commissioners of Lincoln County when they convene to do business next Monday morning.

There were a number of considerations which demand this move without further procrastination. Progressive citizens and wide awake business men have long wanted to see the town assume the role of incorporation, but the benefits to accrue were either minimized or went unnoticed. But now that the little city contemplates to spread itself in such convincing persistence, new business projects are being put on foot, and the need of substantial public works is made evident, even the most skeptical, when the question was agitated some years ago, are now its most ardent supporters, and they have come to realize that all that is worth while here can best be fostered by a systematic administration of local affairs under a full incorporation.

Still a further possibility an extreme probability is that to continue unincorporated might eventually handicap the growth and proper maintenance of a standard high school in Carrizozo. This assertion is based on certain complaints made by an E. P. & S. W. attorney before the State Tax Commission, at its last meeting in Santa Fe and while the attorney decided to accede this time to the levy made, certain plans for local enlargement and improvement in school facilities were without doubt seriously impaired by objection from this quarter. In short the aspirations of local school authorities had to be materially altered by existing circumstances. The objection was based solely upon the fact that Carrizozo was not an incorporated town, and that the railroad company was paying taxes for the higher education of the youth of the county at Capitlan, all of which was only too true. To prevent the inevitable recurrence of this objection, it behooves every loyal citizen of this community to register a vote for incorporation on election day. Watch for the date the commissioners shall designate and do your duty by yourself and your neighbors.

If we are not greatly in error, Carrizozo is the only town in New Mexico of anywhere near its size which is not incorporated. Many little burghs much smaller than this place have realized certain benefits to come to a town of even a few hundred from an organized city government. A commendable demand upon this occasion of incorporation is a complete and full dose of the thing, and the papers presented for the consideration of the Board of Commissioners specify fully the complete incorporation sought for Carrizozo has never done things by halves, and now that this important milestone toward the goal of progress is soon to be passed, let us plan and work with an unprecedented co-operation of a bigger and better Carrizozo.

THE INHUMAN BRUTE

A number of Carrizozo's most valuable dogs have fallen victims to the ire of some person whose identity is carefully concealed of course. There are few dogs in Carrizozo without acknowledged owners, and such a procedure as has been taken to getting revenge against the genus canis in general is absolutely nothing short of criminality the wanton destruction of the rightful property of another and should be dealt with by due process of law, all due efforts being put forth to apprehend this low-lived two-legged creature as any other flagrant violator of the law of the land. We believe that such a person is low enough to destroy human life in some such underhanded way, if occasion made it possible to escape the clutches of the law. There are other ways to dispatch undesirable canines without resorting to promiscuous slaughter of all dogs who have an appetite.

SCHOOL NOTES

Two of the very latest editions of Webster's Unabridged Dictionary, with the most approved type of holders have been received this week and promptly installed as a part of the equipment of the school. The High school department was accorded one of the new reference works while the other was installed in the 7th and 8th grade room.

If enthusiasm and consistent practice count for anything, the minstrel show which the high school boys propose, to offer to the public next Friday night is going to be a record breaker for success. Many will remember the hearty reception which the boys received on a similar occasion three years ago, and will be interested to know that this performance bids fair to excel anything the boys have ever staged. Several new songs have been introduced to swell the ranks of mirth-provokers, so make your plans to attend this performance without fail.

KILLED BY TRAIN

Frank E. Richard is just in receipt of a letter from Mrs. Richard, who was called to Wellington, Kan., by her mother's death, which states that death came from a collision with a Rock Island freight train at Wellington. The buggy in which she was riding was carried several yards by the fearful impact.

CHARGED WITH STEALING TUNGSTEN ORE

H. H. and F. G. Newbury are in Jail Charged With Stealing a Quantity of Tungsten Ore at White Oaks

ORE RECOVERED AT NEWBURY HOME BY J. B. BAIRD

H. H. and F. G. Newbury were taken in custody last Tuesday by Undersheriff J. B. Baird and brought to this place from White Oaks to answer to the charge of having stolen a quantity of tungsten ore from the White Oaks Mines Consolidated Company of the latter place. The day previous H. H. Newbury had been a Carrizozo visitor to answer before Justice Massie for a complaint relative to this charge of having spirited away the valuable rock from the possession of its rightful possessors, but insufficient evidence was evinced by the trial to incriminate the prisoner and he was set at liberty in due time. Upon his dismissal the plaintiff swore out a search warrant to further probe the suspicious nature of the case. Deputy Baird was again put on the job and steered his car to the Newbury place, about a mile from White Oaks to put his warrant into execution. We do not know whether Mr. Baird has ever done any prospecting, or even has mining proclivities, but he certainly knows how to find the ore, since a careful search disclosed ten sacks of high grade tungsten concealed beneath the floor, valued at \$2000.

Accordingly the two brothers and the ore in question were brought to Carrizozo Tuesday, as stated above. H. H. Newbury, upon arraignment before Judge Massie, entered a plea of guilty and his bond was fixed at \$1500. In default of the stipulated bond, the accused was remanded to the county jail to await the action of the District Court regarding the charges against him. The case against F. G. Newbury will come up for trial here tomorrow. The former was until recently in the employ of the plaintiff, viz., the White Oaks Mines Consolidated Company, but had been summarily dismissed. However, it is thought that he had assistance, other than his brother, in spiriting away the tungsten, and it is believed that others will be eventually implicated as the result of a thorough investigation now in progress.

AUTO BUSINESS GOOD

Automobile business is certainly on the hum in Carrizozo. We have quit trying to keep up with the new ones. Nor would we try to mention those who have bought within the last week or ten days, for we'd be sure to omit several. Local dealers have been conspicuous in the sale of Overlands and Dodges but El Paso distributors have also landed some Buick sixes in our midst. Simply another index finger pointing straight to prosperity.

PUMPMAN AT COYOTE INJURED

Pumpman Bethea of Coyote sustained a severe shake-up last week when his gasoline bus-car left the rails when going at a rapid pace. Mr. Bethea is able to be about to the gratification of his many friends.

CHICKEN PIE SUPPER SUCCESS

In spite of the very inclement weather, the chicken pie dinner given by the ladies of the Methodist Church was a pronounced success. In a driving gale, augmented later in the evening with a blinding whirl of snow, Sam Fambrough, with his trusty Overland, did excellent service for the cause, transporting load after load of people to and from the church who would otherwise have been unable to attend. Much credit is due Mr. Fambrough for his generous contribution to the success of the dinner. Besides chicken pie, a menu of creamed potatoes, fruit salad, coffee, ice cream and assorted cake was served. Practically all of the articles of food prepared found a ready sale, and upwards of thirty dollars was realized and the gross receipts of the evening.

OUT ON BOND

Guillermo Salazar faced Justice Massie yesterday afternoon to answer to a charge of brandishing a deadly weapon with one Hilario Lucero as the object. Taken into custody, after a season of festivity extending into the morning hours, incriminating evidence was forthcoming. Preliminary trial, however was waived and the bond was fixed at \$500 which was duly furnished and his release from custody accomplished.

CAMPAIGN CARDS

Candidates for the various offices who are now entering the field will please bear in mind that the Outlook is prepared to print candidates cards on short notice. We have just received a large stock of cards and can furnish them in any size up to the large tack up cards. Half-tone cuts will also be secured for all who desire them.

ENTERTAINS PASTIMERS

Mrs. E. D. Lewis was hostess Tuesday afternoon to the Pastimers and a representative membership enjoyed a season of fancy work, punctuated with plenty of music and culminated with refreshments. Mrs. Wm. Chisholm was a visitor. Mrs. Bert Mahan will entertain the Club at its next regular meeting.

NEW AUTO DELIVERY

The Carrizozo Trading Co., true to its progressive principles, is now delivering cars and other merchandise in a canopy-topped auto delivery van. Ziegler Brothers and Patty & Hobbs have also recognized the auto for some time as a business proposition, and old Dobbin may be reasonably sure that his rest will not be disturbed by a return to the old regime for the success of the stunt is unquestioned and the experimental stage is past.

BELL'S STORE AGAIN BURGLARIZED

Burglarizing the Stores of Carrizozo Seems to be an Easy Task for the Thief and of Frequent Occurrence

THEY HELP THEMSELVES AND WALK OUT UNMOLESTED

At an unknown hour last night a burglar entered the grocery store of John E. Bell, effecting entrance by breaking a pane of glass in a rear window. Having gained entrance into the store, the bar which holds the rear door fast was easily removed and the open door made the rest of the depredation a simple matter for the intruder. Some twelve or fifteen dollars worth of merchandise was taken and the cash register rifled of some three dollars it contained. Officers were duly notified of the theft, but up to the time of going to press no one has been apprehended of the crime. Mr. Bell is positive, however it is the work of local parties, since perfect familiarity with the surroundings has been indicated.

Last week's Outlook contained the account of a burglary against this business house, but entrance was effected on this occasion by climbing over a transom which had been left open after scrubbing the floor just before closing. Evidently the intruder of last night was a Bryanite as he went strong on grape juice helping himself to some five bottles of the popular beverage.

We feel sure that this outrage, and the memory of others too numerous to mention, will cause the people of this community to look forward with genuine satisfaction to the time when Carrizozo will be fully incorporated and systematic provision made for a competent night watchman to protect the interests of its merchants when thugs and dead-beats are on the job. Be at the polls on election day and cast your vote for a stride toward the goal of effective patrol of our streets so that these burglaries will at least be less blaring if not wholly eradicated.

TO GIVE MINSTREL

On Friday evening, April 7, one week from tonight, the boys of the Carrizozo High School will pull a minstrel show which bids fair to be the reigning stunt of the season. Three years ago these boys showed that they could sing, stamp and get the laughs like seasoned veterans. Now they propose to show that they can come back, and even stronger than before, with a new stock of local hits, popular songs, quartettes and choruses, which would get a rise from a wooden man. Hear the big specialties, "Lindy", "It Takes a Little Rain with Sunshine", "Can't You Hear Me Callin'?" "Caroline!", and you auto bugs get next to that benzine buggy hit, "I Didn't Raise My Ford to be a Jitney." Come hear you or your neighbor get a little joke pulled off at his expense. The prices are popular, 25 and 35 cents. Remember the date and come. The boys will do the rest.

KIDNEYS CLOG UP FROM EATING TOO MUCH MEAT

Take Tablespoonful of Salts If Back Hurts or Bladder Bothers—Meat Forms Uric Acid.

We are a nation of meat eaters and our blood is filled with uric acid, says a well-known authority, who warns us to be constantly on guard against kidney trouble.

The kidneys do their utmost to free the blood of this irritating acid, but become weak from the overwork; they get sluggish; the eliminative tissues clog and thus the waste is retained in the blood to poison the entire system.

When your kidneys ache and feel like lumps of lead, and you have stinging pains in the back or the urine is cloudy, full of sediment, or the bladder is irritable, obliging you to seek relief during the night; when you have severe headaches, nervous and dizzy spells, sleeplessness, acid stomach or rheumatism in bad weather, get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning and in a few days your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidneys, to neutralize the acids in urine so it is no longer a source of irritation, thus ending urinary and bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink, and nobody can make a mistake by taking a little occasionally to keep the kidneys clean and active.—Adv.

"That actor puts a great deal of spirit into his acting, doesn't he?" "Sure does; can't act without it."

THICK, GLOSSY HAIR FREE FROM DANDRUFF

Girl! Beautify Your Hair! Make It Soft, Fluffy and Luxuriant—Try the Moist Cloth.

Try as you will, after an application of Danderine, you cannot find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most, will be after a few weeks' use, when you see new hair, fine and downy at first—yes—but really new hair—growing all over the scalp.

A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is immediate and amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable luster, softness and luxuriance, the beauty and shimmer of true hair health.

Get a 25 cent bottle of Knowlton's Danderine from any store and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment—that's all. Adv.

The downhearted man should cheer up; the chances are his wife isn't a mind reader.

GAS, DYSPEPSIA AND INDIGESTION

"Pape's Diapepsin" settles sour, gassy stomachs in five minutes—Time it!

You don't want a slow remedy when your stomach is bad—or an uncertain one—or a harmful one—your stomach is too valuable; you mustn't injure it. Pape's Diapepsin is noted for its speed in giving relief; its harmlessness; its certain unfailing action in regulating sick, sour, gassy stomachs. Its millions of cures in indigestion, dyspepsia, gastritis and other stomach trouble has made it famous the world over.

Keep this perfect stomach doctor in your home—keep it handy—get a large fifty-cent case from any dealer and then if anyone should eat something which doesn't agree with them; if what they eat lays like lead, ferments and sours and forms gas; causes headache, dizziness and nausea; eruptions of acid and undigested food—remember as soon as Pape's Diapepsin comes in contact with the stomach all such distress vanishes. Its promptness, certainty and ease in overcoming the worst stomach disorders is a revelation to those who try it.—Adv.

GOOD JOKES

PHILOSOPHIC VIEW.

"I'm out of patience with my car," said the fretful motorist.
"Ah! Do you ever have any tire trouble?"
"I should say so!"
"Engine work all right?"
"It balks frequently."
"Maybe you need a new car?"
"No. I rather think I need the kind of disposition that will enable me to endure the usual annoyances of motor- ing with calmness and fortitude."

Limited Capacity.

"That chorus girl is very attractive, I'd like to give her a small part."
"I don't think she could learn a part."
"Still, she is so pretty that I should like to feature her in some way."
"Well, you might let her raise her eyebrows in response to something said, I think she could learn to do that."

A PREJUDICED AUDITOR.

"Did you enjoy the grand opera?"
"No. You see I had to buy my ticket from a speculator. The grand opera was all right, but I couldn't help thinking about the petty larceny."

A Simple Schedule.

The styles in clothes, alas, have not the change they ought to show! In summer let's be Hottentot; In winter Eskimo.

The Passionate Pilgrim.

He—Didn't I write to you every day, and now when I come back I find that you've been flirting all over the place!

She—Dearest, they were such passionate letters I couldn't help it!—Bulletin (Sydney).

The Way Nowadays.

The Questioner—Does an author's success nowadays depend upon how well he can write?

The Magazine Editor—No; on how much he can write.

His Fortunate Infirmary.

Miss Sweet—Gelday always looks so pleasant when he plays bridge.

Miss Dear—Yes; he's quite well, you know, and can't bear the things his partner says about his playing.

Papa's Idol.

Mr. De Wealth—How ridiculous for you to fall in love with that artist! I don't believe he ever sold a picture.

His Daughter—But, papa, he says if he marries he won't have to.

Less Trouble.

Evelyn—Papa says that Fred Clever is sure to make his fortune.

Marion—That may be true, but I prefer a man who inherits a ready-made fortune.

A GOOD THING.

Mr. Divorsey—Baby is very hard to amuse—he's had my safety razor, my fountain pen, my penknife and he's still restless.

Mrs. Divorsey—Ah! Show the little fellow my two divorce decrees.

SAD NIGHT.

American Contractor—These pyramids have been here for some time, haven't they?
Egyptian Guide—Thousands of years, sir.

American Contractor—Um. Pity to let all that material go to waste. Why, there's enough for the foundation of a whole city of houses; and practically all ready.—Judge.

In the Sanctum.

"Ex-Congressman Flubdub wants a little writup," remarked the magazine publisher. "What shall we say about him?"

"What did he ever do?"

"Nothing."

"Say he upheld the best traditions of congress. That means little, for or against."

Sure of His Salary.

"Yes, I'm press agent for a popular star."

"Better get into something where you will be sure of a salary. The public doesn't believe a word of that stuff you write about the talents of your star."

"Don't worry about my salary. She believes it."

Nice Remedy.

Nervous Neighbor—In the name of heaven, Frau Bormann, how can you give your little son such a noisemaker as that trumpet?

The Lady—Oh, I only let him have it when he cries, to make him keep still.—Meggendorfer Blaetter (Munich).

Not to Be Missed.

Wife—We surely must go to Egypt this year.

Husband—Why Egypt?

Wife—On account of those pyramids. I see by this magazine that they are slowly wasting away. It would hardly do to miss 'em.—Judge.

Musical Measurement.

"Waldo, I wish you would put that fifth nocturne on the piano."

"Eight in the morning is a trifle early for music, my dear."

"I know. But the length of time it takes to play is just right for boiling an egg."

Mostly.

The Teacher—Meter means measure—thus, a gas meter measures gas. Can any little boy tell me what the meter in poetry measures?

Willie—Hot air, ma'am!

HIS REASON.

Magazine Writer—You're nearly a hundred years old, and I'm sure the public would like to know how you managed to reach such a ripe old age.

Old Man—Well, I just kept right on living, that's all.

Forebodings.

"A penny for your thoughts," quoth he. "And quite expensive that is! For when we're married, I foresee you'll give them to me gratis."

Rather Personal.

Reggy—I saw a very-aw-peculiar thing in a show window the other day, doncher know. It was an-aw-ankle corset for the-aw-support of weak ankles.

Peggy—It's too bad some genius doesn't invent a brain corset for the support of weak brains.

Providential.

A Jewish rabbi, whose stipend was small, was asked how he was getting on. "Poorly," he answered. "If it were not for the numerous fasts which our religion prescribes I am sure my family would die of starvation."—Boston Evening Transcript.

A Hot One.

Miss Antique—What was the greatest fairy story you ever heard?

Miss Caustique—The time you told me you had eight proposals of marriage in one season.

DRINK HOT WATER AND RID JOINTS OF RHEUMATIC RUST

Why rheumatism and lumbago sufferers should drink phosphated hot water each morning before breakfast

Just as coal, when it burns, leaves behind a certain amount of incombustible material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which is not completely eliminated each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left-over waste material, toxins and ptomaine-like poisons, called uric acid, is formed and then sucked into the blood where it continues to circulate, collecting grain by grain in the joints of the body much like rust collects on the hinge as shown above.

Men and women who suffer from lumbago, rheumatism or sore, stiff, aching joints should begin drinking phosphated hot water, not as a means to magic relief from pain, but to prevent more uric acid forming in the system. Before eating breakfast each morning, drink a glass of real hot water with a teaspoonful of limestone phosphate in it. This will first neutralize and then wash out of the stom-

ach, liver, kidneys and bowels the previous day's accumulation of toxins and poisons; thus, cleansing, sweetening, and freshening the entire alimentary canal, each morning, before putting more food into the stomach.

A quarter pound of limestone phosphate costs very little at the drug store but is sufficient to make any rheumatic or lumbago sufferer an enthusiast on the morning inside bath.

Millions of people keep their joints free from these rheumatic acids by practicing this daily internal sanitation. A glass of hot water with a teaspoonful of limestone phosphate, drank before breakfast, is wonderfully invigorating; besides, it is an excellent health measure because it cleanses the alimentary organs of all the waste, gases and sour fermentations, making one look and feel clean, sweet and fresh all day.

Those who try this for one week may find themselves free from sick headaches, constipation, bilious attacks, sallowness, nasty breath and stomach acidity.

Sunny Side of March.

To Build Up After Grippe, Colds Bad Blood

Take a blood cleanser and alternative that starts the liver and stomach into vigorous action, called Dr. Pierce's Golden Medical Discovery because of one of its principal ingredients—the Golden Seal plant. It assists the body to manufacture rich red blood which feeds the heart—nerves—brain and organs of the body. The organs work smoothly like machinery running in oil. You feel clean, strong and strenuous. Buy "Medical Discovery" today and in a few days you will know that the bad blood is passing out, and new, rich, pure blood is filling your veins and arteries.

Out of the Question.

"I was afraid you and Dubwaite would come to blows yesterday."

"When we had our little argument about the war?"

"Yes."

"No danger of that. You see, neither of us is a pacifist."

The Big Standing Army.

"Are you in favor of a big standing army?"

"No. I'm a member of it. And it's already too big."

"What do you mean?"

"There aren't nearly enough street car seats for all."—Detroit Free Press.

BACKACHE, LUMBAGO

Uric acid causes backache, pains here and there, rheumatism, gout, gravel, neuralgia and sciatica. It was Dr. Pierce who discovered a new agent, called "Anuric," which will throw out and completely eradicate this uric acid from the system. "Anuric" is 37 times more potent than lithia, and consequently you need no longer fear muscular or articular rheumatism or gout, or many other diseases which are dependent on uric acid within the body.

If you feel that tired, worn-out feeling, backache, neuralgia, or if your sleep is disturbed by too frequent urination, go to your best drug store and ask for Doctor Pierce's Anuric Tablets, full treatment 50c, or send 10 cents for a trial package of "Anuric" Tablets to Dr. Pierce, Invalids' Hotel, Buffalo, N. Y.

HIGH PRICES— GOOD CROPS

And Good Demand for All Farm Products.

It is no new experience for settlers located in a fertile country such as Western Canada, where lands may be bought at very reasonable prices, to harvest a crop that in one season pays the entire cost of their farm. Undoubtedly this was the experience of many farmers during 1915, but one instance may be quoted. A settler who came to Canada from the United States some years ago decided to add to his holdings by buying an adjoining quarter section near his home at Warner, at \$20.00 an acre, with terms spread over a period of years. He got the land into a good state of cultivation and last spring put the whole quarter section in wheat. When the crop was threshed he found that it only took half the wheat on the farm to pay the whole purchase price of it; in short a single year's crop paid the cost of the land, paid all the expenses of operation and left him a handsome surplus as profit. This settler had some adjoining land, and his whole wheat crop for the season amounted to over 18,000 bushels. He is now planning to obtain some sheep and invest his profits in live stock which will assure him a good living irrespective of what the season may happen to be.

Canada's financial position is excellent. All speculation has been eliminated, and trading is done on a cash basis, with restricted credit.

Detailed figures of Canada's trade for twelve months ending October 31 show how the war is forcing Canadian trade into new channels. One of the most extraordinary changes is in commerce with the United States. A couple of years ago Canada imported from the United States two or three hundred million dollars' worth of goods more than she exported. The balance of trade was all with the United States. The balance is rapidly disappearing, and the present outlook is that by the end of this year Canada will have exported to the United States more than she has imported.

The figures for the past four years are illuminating. They are as follows:

	Exports	Imports
1912	\$145,721,650	\$412,657,923
1913	179,056,796	442,341,840
1914	213,493,406	421,074,528
1915	314,118,774	346,569,924

Four years ago, in 1912, the balance of trade in favor of the United States was no less than two hundred and sixty-seven millions, and this year, the balance is reduced to only thirty-two millions. The figures are extraordinary and reflect the changed and new conditions in Canada. It looks as if for the first time in nearly half a century this year Canada will sell more to the United States than she will buy from the Americans.—Advertisement.

GOOD POULTRY ADVICE

Dry Quarters, Suitable Feed and Exercise Are Essential.

All Perches Should Be Built on Same Level—Permanganate of Potash Recommended for Roup and Colds—Mustard Also Good.

Dry quarters, plenty of feed and exercise are necessary for the getting of winter eggs.

The surplus milk will return a larger profit when fed to the hens than when fed to the hogs.

The dust bath is essential to good winter management of hens.

All perches in the poultry house should be built on a level. When built one above another, step-fashion, the hens will fight for the higher perches with the result that some of them will become injured or eggs will be broken in them.

For roup and colds, dissolve permanganate of potash in the drinking water until the water is of a deep wine color, and keep this before the sick fowls all the time. Ground mustard, fed in the wet mash, is also good. A teaspoonful to each ten or twelve hens is about the right quantity to feed. A good way to insure an even mixture is to dissolve the mustard in water and use the water to moisten the mash.

The droppings give an indication of the health of the fowls. In health, the droppings are of sufficient consistency to hold their shape. They are dark in color, tapering off into grayish white. If the droppings are soft and of a yellowish or brownish color, an excessive quantity of fat-forming foods in the ration is indicated. If, on the other hand, the droppings are watery, and dark, with streaks of mucus in them, it indicates that too much protein, as

A Mixed Flock of Fowls.

pecially animal protein, is being fed, and the meat food should be greatly reduced or omitted entirely for a time from the ration. A greenish watery diarrhea indicates unsanitary conditions, filthy water or food.

Feed for Winter Eggs.

To get winter eggs something must be fed to take the place of the insects that the hens pick up in summer. Skim milk is good. So is ground green bone—about an ounce to each hen three times a week—or commercial meat scraps. And don't forget grit and lime.

Keep Hens Hungry

In feeding it is a good idea to keep the hens slightly hungry during the day, and never fully satisfy their appetites until just before they go to roost at night.

Clean the Incubator.

If the incubator has been used be sure to give it a good cleaning and disinfecting before putting it into use, as this will clean it of all forms of disease that might have been left in it from the previous hatch, and in the end might save us a lot of trouble.

Supply Layers Green Food.

If your hens are laying strong, as they should be, keep up the daily supply of green food and see that they have plenty of crushed shells, gravel and sand.

Dampness Bad for Hogs.

Hogs take cold from exposure and often have sore throats. It is as bad for a pig to have wet feet as it is for a man.

Top Price for Horse.

A horse that is offered for sale will bring a better price if he is in good flesh and is sleek and glossy.

Give Supply of Charcoal.

Supply the birds with plenty of charcoal and they will always show vigor and bright red combs.

BALANCED RATION FOR HORSE

Condition of Animal Depends Largely on Treatment He Receives From His Caretaker.

A hard-working horse, when he first comes into the stable, should be given a medium forkful of well-cured mixed

Splendid Type for General Farm Work.

hay and should not be given grain until the hay is consumed. The food will then be digested while he is resting.

The proper food for a working horse to make a balanced ration is: Sound oats, four quarts; wheat bran, two quarts, and shelled corn, one quart. The grain feed may be reduced when the horse is not working. For old horses, crushed oats, mixed with wheat bran, makes an excellent ration. For horse at steady work, eight pounds of crushed oats and five pounds of mixed hay, three times daily, except when idle, with mixed feed on Sundays is the regular feed for horses at steady work in some stables.

The condition of the horse depends largely on the treatment the animal gets. A careful teamster, one who loves his team, will accomplish the maximum amount of work without overworking his team.

SANITATION OF IMPORTANCE

More Essential Than Rotation From Standpoint of Disease Control—Burn All Rubbish.

While it may not be possible in some cases to rotate garden crops owing to a lack of available ground, sanitation can always be practiced, and this from the standpoint of disease control is probably more important than rotation.

Practically all the diseases of garden plants live over from one season to the next on living or dead portions of the host plant.

These can be controlled only by the burning of all dead and waste plants. If this plan is followed systematically each year trouble with plant disease will be minimized.

Quick Returns From Hogs.

Hogs give quick returns on a small investment of capital.

SOME SIMPLE POTATO RULES

Prepare Roomy Seedbed So as to Give Plenty of Room for Development of the Tubers.

Here are some simple rules for getting the most from your potato crop. Plant potatoes only about three inches deep if the land is heavy or rains are frequent. In average soils plant four inches deep; in semiarid regions five inches, or even more. Prepare a roomy seedbed so as to give plenty of room for the tubers to develop. Never apply stable manure to land on which potatoes are to be planted within a year. Fresh manure seems to promote potato disease.

Opinions differ as to the best ways of seeding. Single eyes will usually return the largest yield of a given amount of seed potatoes used, but the best practical way is to cut a medium-sized potato into about three pieces, each of which has two or three good eyes. Plant one piece in each hill. Do not use large potatoes for seed, as too large a proportion of the crop will be unmarketable.

IMPORTANT THAT PUBLIC SHOULD

KNOW ABOUT GREAT
KIDNEY REMEDY

The testimonial I am to give you comes unolicited. I have been suffering from lumbago for ten years and at times was unable to stand erect. A Mr. Deas of this city, saw me in my condition (bent over) and inquired the cause. I told him that I had the lumbago. He replied, "If you get what I tell you to, you need not have it." I said I would take anything for ease. He said, "You get two bottles of Dr. Kilmer's Swamp-Root and take it, and if it does not fix you O. K. I will pay for the medicine myself." I did so and am a well man. For five months I have been as well as could be. Before I took your Swamp-Root was in constant pain day and night. This may look like advertising, but it seems to me most important that the public should be made familiar with this treatment as it is the only one I know which is an absolute cure. I owe a great deal to Dr. Kilmer's Swamp-Root, and am anxious that others situated as I was should know and take advantage of it. Hoping that this testimonial may be of benefit to some one, I am,

Now that John Massfield has come to be the poetic interpreter of life at sea to his generation of Britons, it is interesting to see an American poet, Lincoln Colcord, rising to be the same for his countrymen. Beginning his career on a vessel navigating Cape Horn, he comes of five generations of seagoing Maine folk. His boyhood was spent on a ship sailing the seven seas, so that now, when he comes to write a poem on "The Vision of War," or when he discusses, before clubs of literary and civic-spirited men, "Some of the Fallacies of American Democracy," it is not a product of the urban graded school which never has been out of sight of land who is speaking. Rather is it a man who has "seen the world," as that phrase is most accurately though not popularly used.—Christian Science Monitor.

Women Once Invalids

Now in Good Health Through Use of Lydia E. Pinkham's Vegetable Compound. Say it is Household Necessity. Doctor Called it a Miracle.

All women ought to know the wonderful effects of taking Lydia E. Pinkham's Vegetable Compound even on those who seem hopelessly ill. Here are three actual cases:

Harrisburg, Penn.—"When I was single I suffered a great deal from female weakness because my work compelled me to stand all day. I took Lydia E. Pinkham's Vegetable Compound for that and was made stronger by its use. After I was married I took the Compound again for a female trouble and after three months I passed what the doctor called a growth. He said it was a miracle that it came away as one generally goes under the knife to have them removed. I never want to be without your Compound in the house."—Mrs. FRANK KNORR, 1042 Fulton St., Harrisburg, Penn.

Hardly Able to Move.

Albert Lea, Minn.—"For about a year I had sharp pains across my back and hips and was hardly able to move around the house. My head would ache and I was dizzy and had no appetite. After taking Lydia E. Pinkham's Vegetable Compound and Liver Pills, I am feeling stronger than for years. I have a little boy eight months old and am doing my work all alone. I would not be without your remedies in the house as there are none like them."—Mrs. F. E. YOST, 611 Water St., Albert Lea, Minn.

Three Doctors Gave Her Up.

Pittsburg, Penn.—"Your medicine has helped me wonderfully. When I was a girl 18 years old I was always sickly and delicate and suffered from irregularities. Three doctors gave me up and said I would go into consumption. I took Lydia E. Pinkham's Vegetable Compound and with the third bottle began to feel better. I soon became regular and I got strong and shortly after I was married. Now I have two nice stout healthy children and am able to work hard every day."—Mrs. CLEMENTINA DUEBING, 34 Gardner St., Troy Hill, Pittsburg, Penn.

All women are invited to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special advice.—It will be confidential.

VILLA TRAPPED ON HEARST RANCH

CAMPAIGN'S SUCCESS NOW DEPENDS ON LOYALTY OF CARRANZA MEN IN FINAL DASH.

BANDIT RAIDS COLONIES

PENNED OUTLAW MUST CUT HIS WAY OUT THROUGH LINES OF TRAINED FIGHTERS.

Western Newspaper Union News Service.

El Paso, Tex., March 21.—Pancho Villa has been driven into a trap by the rapid advance of the American troops, according to the information received Sunday in wireless dispatches from the front and in telegraphic messages to Gen. Gabriel Galvira, Carranza commander at Juarez.

Everything seems now to depend on the ability of the Carranza garrisons to hold their end of the net. On three sides the bandit chief is hemmed in by strong Carranza columns, while on the fourth the American soldiers are driving forward with amazing speed.

Villa was in the Babicora lake region, on the ranch of Mrs. Phoebe Hearst, which he has ravaged several times in the past. Babicora is about fifty-five miles south of Galena, where one section of the American expeditionary force has arrived and is pushing forward at the rate of thirty-three miles a day. A few miles west of the bandit's position is Namiquipa, which is held by a powerful Carranza garrison. On the west are the frowning barriers of the Sierra Madre mountains, barring the way to Sonora. Gen. Gutierrez, Carranza's field chief, declares that he holds all the passes to Sonora. To the South Villa's way is blocked by the Carranza garrison from Madera, a town of considerable importance. It is headquarters of The Madera Company, Ltd., an American concern with vast lumber, mining and railroad interests. On account of the importance of this town, an exceptionally heavy Carranza force is said to hold it.

The whole situation seems to hang on the Carranzistas. If they remain loyal to the first chief, which up to the present they have shown every indication of doing, Villa appears trapped. It is, of course, realized that he is on ground of his own choosing and in a country admirably suited for guerilla warfare and surprise attacks.

While Carranza leaders and United States authorities have avoided any friction there is one serious question which may arise at any time to threaten the entire situation: As the lines of communication of the American force lengthen, the problem of bringing up supplies becomes increasingly more pressing. It is expected here that Washington sooner or later will request permission of Gen. Carranza to use the Mexican railroads if such a request has not already been made. To grant that might be a step which would be misconstrued by many Mexicans. On the other hand a refusal would scarcely harmonize with the professed desire of the Carranza government to co-operate in every way with the American authorities. The arrival of this crisis is being anxiously awaited, on both sides.

With the American Army (via wireless to Columbus, N. M.), March 20.—After marching more than 110 miles into Mexico in 42 hours, the American punitive expedition received information apparently locating Pancho Villa, the object of the chase.

CZAR LOSES AT LAKE NAROCZ.

Report 9,270 Dead on Field—Nine Killed and Thirty-one Injured in Air Raid on England.

London, March 21.—With the slackening of the fighting around Verdun, the Russians have started a big offensive movement against the Germans on the eastern front. Raids by German seaplanes on the east coast of England in which nine persons were killed and thirty-one injured, and by French airmen on Metz and other German towns, the sinking of a French torpedo destroyer by a submarine in the Adriatic, and the reported torpedoing of an Austrian hospital ship by an entente underwater boat are recorded in official and unofficial communications.

Berlin chronicles an attack of great violence by the Russians around Driviaty lake and Lake Narocz, but says the Russians were repulsed with great losses, 9,270 Russian dead having been counted in the Lake Narocz region.

Saturday the Germans in the Vaux-Damloup sector, northeast of Verdun, began another spirited attack against the French, but were driven back.

DECREASE IN STOCKS

GRAINS ON NEW MEXICO FARMS SMALLER THAN YEAR AGO.

Department of Agriculture Figures Show Stocks on Hand March 1 and Prevailing Prices.

Western Newspaper Union News Service.

Santa Fe.—A summary of the March crop report for the state of New Mexico, as compiled by the Bureau of Crop Estimates and transmitted through the Weather Bureau, United States Department of Agriculture, Washington, is as follows:

Wheat on farms: Estimated stocks on farms March 1 of this year 323,000 bushels, compared with 386,000 a year ago and 183,000 two years ago. Prices on March 1 to producers, \$1.08 per bushel, compared with \$1.12 a year ago and 92 cents two years ago.

Corn on farms: Estimated stocks on farms March 1 this year, 652,000 bushels, compared with 773,000 a year ago and 283,000 two years ago. Price March 1 to producers, 91 cents per bushel, compared with \$1 a year ago and 77 cents two years ago.

Corn of merchantable quality: The percentage of the 1915 crop which was of merchantable quality is estimated at 85 per cent, compared with 88 per cent of the 1914 crop and 75 per cent of the 1913 crop.

Oats on farms: Estimated stocks on farms March 1 this year, 518,000 bushels, compared with 494,000 a year ago and 300,000 two years ago. Price March 1 to producers, 55 cents per bushel, compared with 60 cents a year ago and 34 cents two years ago.

Barley on farms: Estimated stocks on farms March 1 this year, 40,000 bushels, compared with 51,000 a year ago and 19,000 two years ago. Price March 1 to producers, 56 cents per bushel, compared with 78 cents a year ago and 75 cents two years ago.

El Paso Chosen by Cattlemen.

Albuquerque.—Abner Wilson of Clifton, Ariz., was chosen president, and William Ammonett of El Paso, secretary, at the final session of the Panhandle & Southwestern Stockmen's Association. El Paso was chosen for the 1917 convention. Other officers chosen were: First vice president, Thomas Love, El Paso; second vice president, Thomas F. Moody of the Panhandle section; treasurer, John Wyatt, El Paso. The president-elect appointed J. F. Primm, El Paso; R. L. Johnson, Wilcox, Ariz.; Brite Bralley, Las Vegas, N. M.; and A. V. McQuiddy, Canadian, Tex., members of the executive committee. Eight thousand dollars was raised to pay off the association's deficit of \$2,000 and provide a surplus for its activities.

Villa Victim Was Government Agent.

Albuquerque.—Charles DeWitt Miller, one of the victims of the Villa raid on Columbus, N. M., whose charred body was found in the ruins of the Commercial hotel, was formerly territorial engineer of New Mexico and is prominently connected throughout the state. For several years past he has lived in Tularosa and has been connected with the United States land office. It is supposed that he was in Columbus on business for the land office at the time that he came to his death.

Judge Dye Passes Away.

Santa Fe.—News has been received of the death in Roswell of Judge James M. Dye, one of the best-known attorneys in the state and a candidate for the Democratic nomination for the Supreme Bench at the last election. Death was due to asthma of long standing. Judge Dye was 62 years of age.

Prairie Fire Wipes Out Homes.

Albuquerque, N. M.—Prairie fires north of Nara Visa, Quay county, and between Melrose and Clovis, Curry county, destroyed thousands of acres of fine range, many stacks of winter feed put up by ranches and a number of small ranchers' and homesteaders' homes. Many homesteaders suffered heavy losses. To fight the larger fire a special train with aid from Dalhart, Tex., was rushed to Nara Visa. This fire burned for a distance of over forty miles.

Charges of Perjury Quashed.

Clayton.—The indictments against Judge O. T. Toombs and Carl Eklund, charging subordination or perjury in connection with the testimony of Benjamin J. Harlan in the case against Robert T. Manaker, deposed sheriff of Union county, have been quashed.

Dragged to Death.

Roy.—Jose Herrara, a resident of Mosquero, who has recently been in the employ of Isidro Montoya, was thrown from a buggy by a runaway team and dragged to death under the buggy.

Weeks Talks About Our Navy
and National Defense.

Incidents on Military, Commercial, Financial and Industrial Preparedness
—Let Us Be Ready for Peace as Well as War.

By JAMES B. MORROW,
in the Philadelphia Record.

NONE of the Weekses, says John Wingate, the senator and the Massachusetts candidate for president—telling as they all did among the granite bunks of New Hampshire—was ever noted for his accumulation of cash or property.

They were farmers mostly, beginning with Leonard Weeks, who, emigrating from England in 1656, became the head and source of the family. Agriculture sternly practiced among the embedded rocks and irremovable boulders taught them to be resourceful and to keep at least one eye open to opportunity.

So William D., the father of the senator, was a probate judge, and once essayed to be a manufacturer. With the co-operation of neighbors, likewise alert and adventurous, he started a factory at Lancaster for making starch from potatoes.

"I will never forget the look on my father's face," Captain Weeks told me, "when, on a Sunday morning, just as we were leaving church, we saw men and boys running down the street and heard them crying: 'The starch factory is burning.'"

Captain John Wingate Weeks.

"There was no insurance—the policy had lapsed—and the fire swept away all of my father's means and put a burdensome mortgage on his farm, two and a half miles in the country."

If there had been a navy of a respectable size in 1881 John Wingate Weeks would now be a captain instead of a senator. Nor would he ever have become a banker and thus have set at naught all the traditions of the Weeks family for self-respecting, capable and wholesome poverty.

And yet a psychological analysis of inherited traits might show that the senator comes naturally by his talents for public affairs and finance. Any inquiry into his personality must include the Wingates, the chief of whom, John, an Englishman, emigrated to New Hampshire in 1660.

The Weekses and the Wingates intermarried during the second American generation—the Weekses to continue as farmers, with an excursion into potato starch, as has been recorded, but the Wingates to become soldiers, preachers and statesmen. Paine Wingate, for example, the great-grandson of John, was a member of the Continental congress and later a senator from New Hampshire.

A Big Man Physically.

John Wingate Weeks of Massachusetts, in his name, therefore, goes back to the middle of the seventeenth century. Perhaps his gifts are equally as ancient. Wherever they originated, he has made good use of them. He is well-to-do—but has less money, perhaps, than is often represented—and Republicans in Massachusetts have notified the country that he is their candidate for president. If he is nominated at Chicago in June, the main reason will have been that he is a business man. His candidacy, then, will be something entirely new in national politics.

In his measurements, Captain Weeks is a large man. A reasonable guess at his weight would be 250 pounds. His stature, perhaps, is five feet and eleven inches. His eyes are gray and his manner is frank and hearty. While at the naval academy he could slowly raise a 112-pound dumbbell above his head with his right hand. Then, kneeling with one leg, he could slowly raise an 87-pound dumbbell with his left hand. More than that he could lower his hands to his shoulders and slowly and simultaneously put both dumbbells above his head the second time.

THE PERFECT GARDEN

One of the world's greatest artists
Michel Angelo, said perfection is
made up of trifles. The rules of art,
so far as rules apply, bear the same
relation to every earthly activity,
whether it be sculpture or gardens.
Therefore, the perfect garden is one
where the planter has given, at some
time, attention to each little matter of
detail to see that it harmonizes with
the garden as a whole. It may not be
possible to deal with all at once, yet
in time the grand total may be cov-
ered and the sum of the little things
will constitute perfection. In order to
keep a garden up to a high standard
it is not necessary to make many or
marked changes at once, but deal with
each little problem as it arises. If a
plant dies, put in another at once. Do
not wait for a bigger job with sev-
eral. Keep substitute plants always
ready.

There is more Catarrh in this section of
the country than all other diseases put
together, and until the last few years
was supposed to be incurable. For a
great many years doctors pronounced it a
local disease and prescribed local reme-
dies, and by constantly failing to cure
with local treatment, pronounced it incur-
able. Science has proven Catarrh to be a
constitutional disease, and therefore re-
quires constitutional treatment. Hall's

FACE THE FACTS

(Continued from page five)

"Lick 'em and lick 'em good," the prudential committee said. "We'll back you up if you do."

"The third day, Captain Weeks told me, 'a big, red-faced boy took his pen in hand and laboriously began to write a letter that is, he was seemingly engaged in writing a letter; as a matter of fact, he was showing off before the school and experimenting with the new teacher. When

ordered to put his pen and paper away he smiled around the room at the pupils, who had stopped working, and then resumed his writing."

"I took him by the collar, dragged him out of his seat and gave him a thorough whipping. He turned out to be the son of the chairman of the prudential committee. The old man never spoke to me again, not even when I met him in the road, he riding in a buggy and I walking to or from my work."

Went to Sea for Two Years.

On his graduation at the Annapolis Naval Academy, young John Wingate Weeks went to sea for a cruise of two years. Seventy men were in his class, but there was room for only 10 of them in the navy. The navy itself consisted of but five steam vessels classed as first-rates, and they were obsolete and unfit for active duty. George Barnett, his room-mate, went into the Marine Corps and is now a major general and the commandant of that branch of the naval service.

In Florida, where he had been engaged as a surveyor on a railroad, the late Midshipman Weeks learned that an old firm in Boston was going out of business. One of the partners had died and another had become blind. Henry Hornblower, a son of one of the partners, and the youthful Mr. Weeks bought the business, the latter borrowing the money with which to begin his career as a banker and broker.

Hornblower acted for the firm on the floor of the Boston Stock Exchange. Weeks kept the books and waited on the customers as they appeared. In a few years the two young men had offices all over New England and in cities as far away as Chicago.

"I got my first valuable business idea from a famous New England dressmaker," Captain Weeks said to the writer of this article. "A friend who came to spend the night at our house was talking to Mrs. Weeks while I was reading a newspaper. I heard her say that she had bought a dress in Boston, and that soon after, on returning to the store, the proprietor, noticing her at the counter, asked if she had purchased the dress she was wearing at his establishment. On learning that she had, he said:

"It is not right. Please give your name and address to the clerk and we shall correct the matter at once."

A Story of Great Value.
"But," the woman replied, "the dress is satisfactory to me. Whatever is wrong is so small that it is not worth mentioning."

"Small to you, madam," the man answered, "but very large to us."

"And do you know," the woman told Mrs. Weeks, "the dress was not only taken back, but it was kept and I was given a new one."

"I repeated the story to my partner next day," Captain Weeks said, "and from that time onward we tried to

please our customers before we thought of ourselves and the probable profits we could make in our transactions."

Three years ago, following at once his election to the upper House of Congress, Captain Weeks sold out to his partners and disposed of every interest that might be thought, even indirectly, to influence his judgment as a lawmaker. It is said in New England that he has always been very careful about his reputation as a business man. An anecdote told of him in State street, the Wall street of Boston, shows how his sensitiveness to public opinion on one occasion proved highly profitable to his partner and himself.

A run on a bank in which Captain Weeks was a director, though he owned but \$900 of the stock, threatened, so he feared, to injure his standing in the community. He spent a day and a night at the bank, pledged two-thirds of all the property he and his partner owned for the payment of the bank's debts and put through a re-habilitating plan under which the shareholders were assessed 50 per cent. on their holdings. The bank was saved, but some of the frightened shareholders sold out. Their interests were promptly bought by Captain Weeks. The bank prospered

EPITOME DE LA SEMANA

Una breve relación de acontecimientos en curso en este país y en el extranjero.

Western Newspaper Union News Service.
ACERCA DE LA INVASION DE MEXICO TRAS VILLA.

Sigue su curso regular y rápido la determinación del gobierno de los Estados Unidos relativamente al castigo que se quiere infligir al bandido Villa y sus amigos. Desde el momento en que el jefe criminal atacó la población americana de Columbus en donde cometió toda clase de robos y crímenes, con unos diez y seis asesinatos de gente pacífica, digna e inocente, la preparación militar de castigo capital ha andado de buena manera. El General Funston está encargado de la misión de coger a Villa, y no parece haber duda alguna de que los Americanos le traigan muerto y exterminen a sus despreciables bandidos. Se reporta que las fuerzas de Carranza, que tienen el mismo interés que este país en la exterminación absoluta de tal mala simiente, están cooperando con los Americanos. Hasta el 17 de marzo reina en los centros oficiales militares un impenetrable secreto en cuanto a los movimientos de las tropas americanas al otro lado de la frontera. Del General Pershing, en comando de la vanguardia, no se sabe en Washington nada de la disposición ni la dirección de sus movimientos. Se sabe, sin embargo, que los regimientos de caballería siete y diez, se acercan del territorio de Villa en la región de Casas Grandes. Por algunos días se temía que Villa atacase a las colonias de Mormones en Dublan y Morales, mas pasó el bandido sin molestar a esos Americanos. La expedición está entrando en México en las condiciones de tiempo más favorables. Según Daniel Hurst, hijo del obispo mormon, Villa no tendría fuerza superior a 400 bandidos, y según el cónsul de Carranza en El Paso, no se necesitarán millares de soldados para cazar a Villa, pues él no tendría la intención de resistir en fuerza sino licenciar a sus soldados y quedarse con solo unos de sus mejores amigos en el centro de las montañas de Sierra Madre. Pronto se sabrá algo más positivo.

Acercas de la Guerra.

Los Alemanes sufrieron pérdidas enormes en su tentativa de capturar la colina del "Hombre Muerto" cerca de Verdun.

La artillería de ambos lados es muy violenta sobre toda la frente occidental y especialmente alrededor de Douaumont.

El vapor holandés Tubantia fué hundido ó sea por un submarino ó por una mina, con 387 pasajeros a bordo Los Estados Unidos investigarán.

Los Italianos continúan sus fuertes ataques contra los Austriacos en la frente del Isonzo. Ambos lados anuncian buen éxito en diferentes puntos de la frente italiana.

Las tropas rusas en Persia están cazando a los turcos delante de ellos como si fueran conejos y pronto los Rusos podrán aliviar la presión sobre los Ingleses en Kut-el-Amara. El ejército del Zar está dentro de cincuenta millas del camino que los colocará atrás de las fuerzas turcas, que entonces serán separadas de su base.

General.

Un cheque de \$43,538,131, uno de los mayores que se pagaron jamás en los Estados Unidos, pasó por el banco de liquidación de Nueva York.

El funeral de Henry Gansaway Davis, ex-senador de los Estados Unidos, que falleció en su casa en Washington, tuvo lugar en Elkins, W. Va.

El cuerpo de un Méjicano encontrado cerca de la frontera en Columbus, N. M., fué identificado bajo el nombre de J. Pereyra, que era el representante personal del consulado mejicano en El Paso.

Washington.

El senado pasó un proyecto de ley para apropiarse la suma de \$2,606,000 con el fin de equipar el arsenal de Puget Sound para la construcción de buques de guerra.

El senado adoptó una resolución que tendrá por objeto elevar el ejército móvil a su entera fuerza inmediatamente, medida que ya había sido adoptada por la cámara.

La cámara pasó, por 346 contra 14, un proyecto para abrogar una cláusula de la ley de arancel que pondría en la lista de artículos sin derechos de entrada el azúcar a partir del 1° de mayo.

El senador Shafroth era el principal orador en el senado el jueves p. pasado contra el proyecto de Myers, que tiende al arrendamiento de tierras públicas para sitios de plantales de fuerza hidráulica.

WELL-LIKED DAINTIES

CONFECTIONS THAT ARE LIGHT AND TOOTHsome.

Excellent for the Breakfast or Lunch-
on Table—Sweet French Buns
Or: of the Best—Good Recipe
for Dinner Rolls.

Sweet French Buns.—One cake yeast, one cupful milk, scalded and cooled, one-quarter cupful lukewarm water, one tablespoonful sugar, four cupfuls sifted flour, one-quarter cupful sugar, three tablespoonfuls butter, one egg, one-half teaspoonful lemon extract, one teaspoonful salt.

Dissolve yeast and one tablespoonful sugar in the lukewarm liquid. Add enough flour to make an ordinary sponge—about one and one-half cupfuls. Beat until perfectly smooth. Cover and set aside in a warm place to rise for fifty minutes, or until light. Add sugar and butter creamed, egg beaten, lemon extract and about two and one-half cupfuls of flour, or enough to make a moderately soft dough, and the salt with the last of the flour. Knead until smooth and elastic. Place in greased bowl, cover and set aside in a warm place to rise until double in bulk—about one hour. Turn out on board and shape as clover-leaf rolls, or any fancy twist. Let rise until light, about one hour. Bake in hot oven fifteen minutes.

Oatmeal Muffins.—One cake yeast, one-quarter cupful lukewarm water, three tablespoonfuls sugar, two tablespoonfuls butter, one cupful hot milk, one cupful rolled oats, one-half cupful whole wheat flour, one-half cupful sifted white flour, one teaspoonful salt.

Boil oats and butter in milk one minute. Let stand until lukewarm. Dissolve yeast and sugar in lukewarm water, and combine the two mixtures. Add flour and salt, and beat well. The batter should be thick enough to drop heavily from the spoon. Cover and let rise until light, about one hour, in a moderately warm place. Fill greased muffin pans two-thirds full. Let rise about forty minutes, bake twenty-five minutes in a moderately hot oven.

Dinner Rolls.—One cake yeast, one cupful milk, scalded and cooled, one tablespoonful sugar, three cupfuls sifted flour, white of one egg, two tablespoonfuls lard or butter, melted, one-half teaspoonful salt.

Dissolve yeast and sugar in lukewarm milk. Add one and one-half cupfuls flour and beat until smooth, then add white of egg, well beaten, lard or butter, remainder of flour, or enough to make a moderately firm dough, and the salt. Knead lightly, using as little flour in kneading as possible. Place in well-greased bowl. Cover and set to rise in a warm place, free from draft, until double in bulk—about two hours. Mold into rolls the size of walnuts. Place in well-greased pans, protect from draft, and let rise one-half hour, or until light. Glaze with white of egg, diluted with water. Bake ten minutes in a hot oven.

English Bath Buns.—Two cakes yeast, one-half cupful milk, scalded and cooled, one tablespoonful sugar, one-half cupful butter, melted, four eggs, four cupfuls sifted flour, one-half teaspoonful salt, five tablespoonfuls sugar, one cupful almonds, chopped.

Dissolve yeast and one tablespoonful sugar in lukewarm milk. Add butter, eggs unbeaten, flour gradually, and the salt, beating thoroughly. This mixture should be thick, but not stiff enough to handle. Cover and let rise in warm place one and one-half hours, or until light. Sprinkle balance of sugar and almonds over top, mix very lightly and drop into well-greased muffin pans. Cover and let rise until light, which should be in about one-half hour. Bake fifteen to twenty minutes in a moderately hot oven.

Icing That Will Keep Soft.

Add a pinch of baking powder to the whites of the eggs that you are going to use in your white frosting for cakes. Do this before beating them. Then pour the boiling hot sirup over the beaten whites in the usual way and your icing will not get hard.

Sauce for Cutlets and Croquettes.

Two and a half tablespoonfuls of butter, one-fourth cupful cornstarch or one-half cupful of flour, one cupful milk, one-fourth teaspoonful salt, few grains of pepper.

Almond Cookies.

Yolks of six eggs, one and one-half cupfuls of sugar, three-quarters of a cupful of butter, one cupful of almonds chopped; one tablespoonful of cinnamon, three cupfuls of flour. Beat well, drop small spoonfuls on a well-greased pan and bake lightly.

Foamy Pudding Sauce.

Have one cupful of milk boiling, beat two eggs and one cupful sugar until light, stir into boiling milk and set in steam of teakettle 15 or 20 minutes.

U.S. REPLY TO CARRANZA

LANSING DISAVOWS ANY INTENTION BY UNITED STATES TO INTERVENE IN MEXICO.

Western Newspaper Union News Service.

Washington, March 15.—Secretary Lansing, following the publication of the reply to Gen. Carranza, gave out the following statement of assurance to the Mexican people:

"In order to remove any apprehension that may exist, either in the United States or Mexico, the President has authorized me to give in his name the public assurance that the military operations in contemplation by this government will be strictly confined to the object already announced, and that in no circumstances will they be suffered to trench in any degree upon the sovereignty of Mexico or develop into intervention of any kind in the international affairs of the sister republic.

"On the contrary, what now is being done is deliberately intended to preclude the possibility of intervention."

United States Concedes Right.

Following is the answer of the United States to the Carranza note suggesting a reciprocity agreement in the matter of troops from each government crossing the boundary line in pursuit of bandits, sent to Carranza through Consul Stillman at Guadalajara:

"You are instructed to reply as follows to Secretary Acuna's note of March 10:

"The government of the United States has received the courteous note of Señor Acuna, and has read with satisfaction his suggestion for reciprocal privileges to the American and Mexican authorities in the pursuit and apprehension of outlaws who infect their respective territory along the international boundary, and who are a menace to the lives and property of residents in that region.

"The government of the United States, in view of affairs which have existed for some time along the international boundary, and earnestly desiring to cooperate with the de facto government of Mexico to suppress this state of lawlessness of which the recent attack on Columbus, N. M., is a deplorable example, and to insure peace and order in the regions contiguous to the boundary between the two republics, readily grants permission for military forces of the de facto government of Mexico to cross the international boundary in pursuit of lawless bands of armed men who have entered Mexico from the United States, committed outrages on Mexican soil and fled into the United States, on the understanding that the de facto government of Mexico grants the reciprocal privilege that the military forces of the United States may pursue across the international boundary into Mexican territory lawless bands of armed men who have entered the United States from Mexico, committed outrages on American soil and fled into Mexico.

"The government of the United States understands that in view of its idea of the reciprocal arrangement proposed by the de facto government the arm is now complete and in force and the reciprocal privilege thereunder may accordingly be exercised by either government without further interchange of views.

"It is a matter of great satisfaction to the government of the United States that the de facto government has been so friendly in the matter of cooperation with the United States to apprehend and punish the bands of outlaws who seek refuge beyond the international boundaries in the erroneous belief that constituted authorities will resent any pursuit across the boundary by the forces of the government whose citizens have suffered by the crimes of the fugitives.

"With the same spirit of cordial friendship the government of the United States will exercise the privilege granted by the de facto government of Mexico in the hope and confident expectation that by their mutual efforts lawlessness will be eradicated and peace and order maintained in the territories of the United States and Mexico contiguous to the international boundary.

URGES SPEED ON LEGISLATION.

Senate Warned Villa May Unite Mexico Against Punitive Army.

Washington, March 14.—Danger of grave complications growing out of the sending of American troops into Mexico to hunt down Villa and his bandits was urged in the Senate by Senator Chamberlain, chairman of the military committee, and Senator Borah, Republican, in advocating laying aside temporarily all other legislation in order to dispose promptly of preparedness measures. Their statements precipitated a general discussion in which Senators Vardaman and Simmons deprecated suggestions that the United States was not prepared to deal with any situation that might arise in its relations with Mexico.

While the Senate debate was in progress, Speaker Clark and Majority Leader Kitchin were reporting to their colleagues of the House on a conference with President Wilson, who urged them to speed up the legislative program with a view to action on all important measures in time for adjournment in June.

How "Clean Up and Paint Up" Started

THREE years have made the movement successful in hundreds of cities and towns. Every farmer should apply the idea to his premises. How it improves rental property.

The upper picture shows a vacant lot in a southern town before a Clean Up and Paint Up campaign. It was rid of all the trash by negro children in the neighborhood. Then they planted a vegetable and flower garden on the plot and had fine success with the enterprise. Can't we do something equally good with some of the vacant lot eyesores in this town? The lower picture shows what can be done with a ragged, good-for-nothing side yard. It took a great deal of persuasion to wake up the owners and tenants of the property, but once aroused they made up for lost time—as the neat garden indicates. This is a lesson for us.

CLEAN UP and PAINT UP has become a nation-wide slogan in the interests of homes and towns beautiful since Allen W. Clark, a St. Louis publisher, organized the National "Clean Up and Paint Up" campaign bureau in May, 1912. Mr. Clark, for many years identified with the American paint trade, sought to arouse and organize into a single national movement the "clean up" spirit which exists each spring in every normal man and woman and nearly every thriving community.

The first year something like 1,000 towns and cities conducted local clean up and paint up campaigns based on plans suggested by the national bureau. This number has increased each year until in 1915 approximately 5,000 local campaigns were organized. Each of these took the form of a real civic movement.

Where Everybody Helps.

City and town officials, woman's club leaders, boards of trade, health officials, fire insurance and fire prevention leaders, school children, boy scouts and the local paint men all co-operated in the interests of a more beautiful, more sanitary and more homelike home town. Individual property values were increased, loss through disease and fire waste was lessened, and the importance of clean lines, thrift and civic pride in any movement for homes and towns beautiful was convincingly pointed out everywhere.

The weakness of the old-time "clean up day or week" orgy of the "annual bath" order is eliminated from these campaigns. Permanent results and ultimately a year-round effort are sought.

Clean Up the Farm Too.

With the idea of making the farm home more attractive and more healthful a farm clean up day has been suggested. Why not this idea long ago? Cities, towns and villages have had their clean up days, and because of them and similar influences beauty

has been brought in and disease driven out.

The creator gave to the country a peculiar charm. Beauty—beauty of blade and blossom, of hill and hollow, of daydawn and sunset—comes as the birthright of every person who is country born. In the springtime nature writes in pink her orchard proclamation of plenty, and in late summer and fall time fills the fields with grains of gold. Sometimes civilization has cluttered, but never has nature. Whatever there is of ugliness in the great out of doors is man made.

Means Better Health.

Beauty is a part of the farmer's unearned increment. Health, too, should be for him and his—health and happiness, best of ancient blessings so often wished for friends. Because we "absorb environments," a farm clean up day may result in better living, higher thinking—yes, and better health. It may also play no small part in the solution of a big problem, that of keeping on the farms of the nation a large number of agriculturally trained and efficient men and women. Such as these will find in their work not only a living, but a life. They will share in the spirit of joy in the excellence of production.

There is much work for a farm clean up day. It may be that there are disease breeding places that need attention. The appearance of the barn yard—often such as to suggest that various old vehicles and farm implements had taken fright and backed into the corners—might be changed for the better. Maybe there is a compost heap—rich in nitrogen, phosphorus and potassium and valuable as a fertilizer if spread over the fields, but in its present place an incubator for insects and dangerous as a possible source of fever.

Flowers and New Paint.

If mother is fond of flowers, and usually she is, the farm clean up day might mean a new flower bed or perhaps a fence fixed so as to protect an old one. There may be a gate that too

long has sagged and creaked or that needs painting, and it so the R. F. D. mail box is sure to need brightening up. Whitewash on poultry or other buildings will work wonders. Before the day's work is done, prompted by a new pride in the place, it may be that the farmer will display the farm name near the main entrance to the place. States, counties, communities, churches, schools or farmers' clubs may proclaim farm clean up days, but best of all each individual farmer may have his own.

Don't Neglect to Paint.

It is apparent to even the casual observer that many property owners let their rented houses, or houses for rent, go too long without painting. This neglect makes the houses look unsightly but also hastens the day of decay. A little paint is a good investment from every viewpoint. It preserves the wood and it keeps the houses rented. The writer visited an Illinois town last spring and after a careful observation found not a single house which was not well and fairly recently painted. There had just been a clean up and paint up campaign. The impression left was one of a thriving town where a man would like to live and bring up a family. The yards were well kept, with lawns, flower beds and shrubbery, and each householder seemed to vie with his neighbor in making his place look attractive.

New Sterilizing Agent.

German scientists have found that glycerin is a valuable sterilizing agent. Various deadly germs, when heated in it to a temperature of 248 degrees Fahrenheit, were completely killed in one minute. This process is particularly valuable for sterilizing surgical instruments, for the reason that the metal is not attacked nor is the temper affected. Rubber tubes can be sterilized in it, and, instead of being injured, the elasticity of those which have become brittle is restored by the treatment.

CROPS FOR A DRY FARM

Kafirs Can Be Recommended as a Staple Feed.

Three-Year Feeding Test Made by Kansas Agricultural College With Both Dairy and Beef Cattle—Sorghum Yields Well.

(By H. M. COTTRILL.)

The permanent prosperity of a large part of the southwest is dependent upon the intelligent raising and feeding of the kafir—kafir, milo and feterita. There have been only two failures of kafir in 25 years in Kansas and only one in 20 years in Oklahoma. The failure in 1913 was due chiefly to the use of degenerate seed and too thick planting. Many of the farmers who planted well-bred seed not too thickly secured good yields of grain, while their neighbors raised fodder only.

Kafir can be recommended as the staple feed for districts having an annual rainfall of 24 inches. Feterita has not been tested long enough to determine positively where it will be profitable as a main crop. The indications are that it is adapted to sections having less than an average of 16 inches of rainfall a year.

The Kansas Agricultural college, by a three-year feeding test with both beef and dairy cattle, demonstrated that, pound for pound, silage made from corn, from kafir and from sorghum have equal feeding values, provided each is cut at the proper stage of maturity, and that the choice of which of these crops should be planted for silage depends on which will probably produce the greatest tonnage per acre. Over a large part of the southwest, kafir will produce a heavier yield than corn. Sorghum will yield more than kafir.

In planting kafir, the black hulled white is the best variety to plant. The dwarf milo should be planted on the plains. No distinct varieties of feterita have been developed, but there are many white seeded sorghums sold for feterita, and these should be avoided.

Dwarf kafir has been grown by several of the plains experiment stations the past two or three years, and the results of both milo and feterita as the staple feed grain for districts in the southwest having less than 24 inches of rainfall yearly. Dwarf kafir is as early as either milo or feterita. On this account it requires moisture for thirty days shorter season than the standard kafir. Its seeds grow upright, so that it is easily harvested by machinery. It is low in height, requiring a minimum of moisture for growing stalk. The stalk is thick and short-jointed, withstanding heavy winds well. It shatters little, allowing at least three months' time in which to harvest it after the heads have ripened.

The best yields of kafir, milo and feterita are produced from choice home-grown seed. Where this cannot be secured, seed should be obtained from as near home as possible.

Dry-Picked Fowls Favored.

Dry-picked fowls are more favored in city markets than scalded ones. Scalding tends to make the meat hard, and also forces considerable dirt into the pores of the skin, making it less attractive to the purchaser. An effective home remedy that is easy to remember and also to apply, is to rub a piece of blue ointment about the size of a pea into the skin just below the vent.

Construction of Dairy Barn.

The construction of the dairy barn may be less important in keeping down the bacterial count of the milk than careful methods in handling milk.

Look After Capons.

Now is the time to be looking after those capons and getting them in good shape to bear well the suffering that must come a little later.

Supply Grit.

During the winter months, or while fowls are confined, supply them with suitable grit, charcoal and green stuff in addition to the regular grains.

Working With Dung Fork.

A man with a dung fork must work pretty carefully to do as good a job as a manure spreader. Can he do, though? do you do it?

Inexpensive Corn Huskers.

Hogs are the best huskers. And they do not charge for their work, and they even scatter the manure for nothing.

Caring for the Boar.

Be careful that the boar cleans up all the grain fed him. And give him a chance to stretch his limbs all he wants to.

GUARD YOUR FAMILY

PERUNA protects the family against coughs, colds, catarrh, bronchitis, catarrh of the stomach, liver and kidneys. It is just as sure to relieve a case of catarrh of the bowels as it is a case of catarrh of the head.

Anyone suffering from catarrh, severe or mild, acute or chronic, in any organ or part of the human body, should at once get a bottle of PERUNA.

As soon as the value of PERUNA is fully appreciated in every household, both as a preventive and a relief from catarrhal affections, tens of thousands of lives will be saved and hundreds of thousands of chronic lingering cases will be prevented. PERUNA, indeed, is a household safeguard.

A course of PERUNA never fails to bring relief in such cases, since there is no remedy like it, as thousands of people have testified. PERUNA Tablets are now available in convenient form. Easy to take.

MOTHER! LOOK AT CHILD'S TONGUE

If cross, feverish, constipated,
give "California Syrup
of Figs."

A laxative today saves a sick child tomorrow. Children simply will not take the time from play to empty their bowels, which become clogged up with waste, liver gets sluggish; stomach sour.

Look at the tongue, mother! If coated, or your child is listless, cross, feverish, breath bad, restless, doesn't eat heartily, full of cold or has sore throat or any other children's ailment, give a teaspoonful of "California Syrup of Figs," then don't worry, because it is perfectly harmless, and in a few hours all this constipation, sour bile and fermenting waste will gently move out of the bowels, and you have a well, playful child again. A thorough "inside cleansing" is oftentimes all that is necessary. It should be the first treatment given in any sickness.

Beware of counterfeit fig syrups. Ask at the store for a 50-cent bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly printed on the bottle. Adv.

Valuable Exploration.

Capt. Joseph E. Bernier, polar explorer in the service of the Canadian government for a number of years, recently returned from a cruise of more than 4,000 miles through the Arctic archipelago, during which he placed many new islands, bays and promontories on the map. During his exploration work he has charted over 500,000 square miles of islands in the far North, and has discovered many records of Arctic expeditions. He has been commissioned to establish a force of the mounted police in Hudson bay and to take possession of the Arctic archipelago between the region of 141 degrees west of 60 degrees west and all the adjacent islands as far as 90 degrees north latitude. Captain Bernier's great ambition is to journey to the North pole, an undertaking which he believes he can accomplish with no great difficulty when the opportune time arrives.

Logical.

"Here was a great commotion in a crowded car. A young lady had fainted and was gently carried out by a gentleman near her.

"I guess the heat of the car affected her, poor thing," remarked a little matron of sixty summers.

"Madam," answered the hardened cynic, "as that handsome young man was standing right behind her, I don't think the heat had anything to do with it."—Penny-Saturday Punch Bowl.

MORE THAN EVER Increased Capacity for Work Since Leaving Off Coffee.

Many former coffee drinkers who have mental work to perform day after day, have found a better capacity and greater endurance by using Postum instead of coffee. An Illinois woman writes:

"I had drank coffee for about twenty years, and finally had what the doctor called 'coffee heart.' I was nervous and extremely dependent; had little mental or physical strength left; had kidney trouble and constipation.

"The first noticeable benefit which followed the change from coffee to Postum was the improved action of the kidneys and bowels. In two weeks my heart action was greatly improved and my nerves steadier.

"Then I became less dependent, and the desire to be active again showed proof of renewed physical and mental strength.

"I formerly did mental work and had to give it up on account of coffee, but since using Postum I am doing hard mental labor with less fatigue." Name given by Postum Co., Battle Creek, Mich.

Postum comes in two forms: Postum Cereal—the original form—must be well boiled, 15c and 25c packages.

Instant Postum—a soluble powder—dissolves quickly in a cup of hot water, and, with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.

Both forms are equally delicious and cost about the same per cup.

"There's a Reason" for Postum.

ALMOST ESCAPES ON VILLA'S HORSE

Woman Ready to Mount When
She Is Caught.

HEARS HUSBAND IS SLAIN

Mrs. Wright Says Mexican Rebel Chief
Expected Help of Germany and
Japan in Trouble With the
United States.

El Paso, Tex.—Mrs. Maud Hawk Wright, the American woman who rode nine days with the Villa troops preceding the raid on Columbus, N. M., learned that her baby, which had been taken from her and given to a Mexican family, was safe at Pearson, Mex., and that her husband had been murdered by the soldiers a short distance from their home. Mrs. Wright arrived in El Paso with Mrs. H. J. Slocum, wife of the 13th cavalry commander.

"I want to go to my baby," Mrs. Wright said. "It would only take me three days to walk to Pearson."

She was informed that the child probably would be brought to Juarez on the train which is to bring the Mormon colonists.

Stoical, She Tells Story.

Dry-eyed and stoical after the terrible experience in which she had suffered hunger, thirst, exposure, facing almost inevitable death, in addition to the sorrow and worry over the loss of her husband and child, Mrs. Wright told her story to a representative of the Associated Press as though it were commonplace. She had suffered so much she apparently had lost all sense of fear. Because she suffered in silence, never complaining, and holding herself aloof from the horde of soldiers, fugitives, derelicts and vagabonds on the border, she was called "La Reyna," queen of the Villistas, by the troops. Villa had told one of the officers that he preferred to have her die of exhaustion rather than to kill her outright—and because she proved to be able to withstand hardships better than his own men he promised he would release her after he had sacked Columbus. He also agreed to give her \$100 gold and a permit to travel unmolested through any part of Villa territory.

Villa Expected German Aid.

"Villa only talked to me twice," Mrs. Wright said. "I avoided talking with him because he would have thought I admired him and would have forced me to accompany him. He told his officers how he would wipe out the town of Columbus and when the United States tried to invade the Mexican territory Germany and Japan would step in to intervene. Villa believed this firmly. I have overheard him make such remarks from time to time. Whether agents of these two countries are making him believe this or whether it is an idea which came to him I do not know. But he is convinced that he will be assisted in the fight he has started.

"How I wanted to escape to tell the people of Columbus about the attack! But I was watched all the time. The first night I was allowed to sleep in an abandoned adobe hut which was prepared for me. About thirty saddles were piled in front of the door. The guards slept with their heads to the door, and their feet to a fire just beyond.

Tries to Flee on Villa's Horse.

"I lay down, but not to sleep. About midnight, I heard the snoring of the Mexican guards. I peered through the opening of the saddles and spied Villa's charger, a splendid steed, about fifty feet from the hut. One by one I removed the saddles and stepped over the sleeping forms until I reached the horse.

"The horse was tangled in his rope. I began to untangle the horse and then one of the Mexicans turned over. He saw something was wrong. I stood behind the horse. But the horse refused to stand still and it kept me busy keeping behind the animal. Finally the guard came out to where the horse was.

"What are you doing here?" I asked. "What are you doing here?" he asked.

"Untangling this horse," I replied. Then he finished the task I started. I longed for a hatpin, a dagger, a pen knife, anything to kill the man. I could have shot him had I had a gun. But if I could have killed him I could have escaped, since none of the other horses could have overtaken me.

"I returned to the hut. From then on I was watched constantly. For three days and nights we were without fire in the frost-covered mountain country of northern Chihuahua. For thirty hours we were without water. But the soldiers often did without rather than see my canteen empty.

"When we neared Columbus Major Nicholas Hernandez, one of the meanest men I have ever known, said I

was to be given a rifle to kill the 'gringos' in Columbus. I told him I would shoot him first.

"I believe you would," he said.

Mrs. Wright was guarded outside of Columbus, about 500 yards, while the attack was made on the city. She asked to be released, but her guard said he must have Villa's consent. When the troops retreated she started toward Columbus. Villa, one of the last of the fleeing raiders, stopped beating his horse and men with his sword upon seeing her.

"Do you want to go home?" he asked.

"Do you mean to Mexico?" she asked.

"No, to the United States."

"Yes."

"Go," he said.

"May I take my mare and saddle?" she asked.

"Yes," he answered, and rode on.

Mrs. Wright then rode into Columbus.

REGAINING PLACE AS IDOL OF PEONS

Villa's Audacity Wins Him Sym-
pathy Among the Ignorant
Mexicans.

Villa's audacity in making such a bold attack on American soil and his escape from the small mounted forces that pursued him from Columbus has done much toward placing him back on his pedestal as the popular idol of the peons and ignorant Mexicans.

The American invasion has given him the argument that Carranza is in league with the "gringos" and the declaration that plans are on foot to place the states of Chihuahua and Sonora under American rule, after the example of Texas and California.

In all public statements since the Columbus massacre, Carranza has carefully avoided reference to the American invasion, of which he has received both personal and official information.

In El Paso, it is taken for granted that the "gringo hate" so carefully cultivated in Mexico for the last sixty years, is now so strong that Carranza would lose all prestige if he recognized an invasion by the despised men of the North, whether that invasion was under the name of "punitive expedition" or any other innocent appearing phrase.

It is believed the general plan of invasion of Mexico under consideration by the American forces is laid along three avenues of entrance. According to this theory, one United States column will enter Mexico through Juarez another from Douglas, Ariz., and a third will start from the blackened ruins of Columbus.

The theory is based on the belief that the war department has decided to take measures by which it hopes to throw a line of forces midway east and west across the state of Chihuahua, thereby cutting Villa off from further recruiting his forces in the central part of the republic.

With this line on the south the Douglas column on the west and the Juarez column on the east, it is believed Villa will be cornered in a "U," the tips of which will touch the international border line.

Then by the closing of this cordon and the starting of the third expeditionary force on a straight sweep south from Columbus, it is believed that the bandit chieftain and his forces will be surrounded and forced into a decisive battle, instead of an endless period of guerrilla warfare in the hills.

The cordon would further have the effect of starving out Villa and his followers and isolating them from all communications with potential assistance in other parts of the republic.

The success of the plan is admitted to depend largely upon the ability of the American forces to overcome the ever spreading Carranza opposition which is now being considered one of the strongest factors in the campaign.

With the pitifully small forces available at present, it is believed the American forces will experience great difficulty in covering the 30,000 or more square miles in the prescribed area of the "U," and at the same time protecting their lines of communication, both from the onslaughts of the entrapped bandits and the hostile disposition of the Carranzistas.

The last is a negligible quantity by no means. Mexicans are Mexicans first and Carranzistas second. As Carranzistas they hate Villa, but as Mexicans they solidly hate Americans.

AMERICAN NEWSPAPERS BARRED FROM MEXICO

Brownsville, Tex.—An official decree barring all American newspapers from Matamoros, the Mexican town across the Rio Grande from Brownsville, was issued by the military authorities there today. No reason was given. The action came as a surprise here and two arrests of newspaper carriers resulted.

Effects of Dress.
"Some say the garb often affects the character. The woman in white inclines to play the ingenue."
"I suspect there is something in it. Queen Elizabeth always wore a ruff."
"Well?"
"And had the reputation of being something of a roughneck."

Its Meaning.
"Is there anything in that cipher?"
"Well, it probably was not devised merely for naught."

Generous M.E.s.
"I hear the divorce allowed each to have the child half the time."
"Yes—he wants it days."—Judge.

Efficiency built the Panama Canal, after inefficiency failed. The efficiency of the Panama Canal doubled the effectiveness of the U. S. Navy without adding a ship to it. It took over 8,000 miles out of the trip from New York to San Francisco and changed the highway between London and Australia from Suez to Panama.

Efficiency insures against lost motion—it produces the utmost service out of equipment and yields the finest product, at the least cost.

Certain-teed

Roofing
is an efficiency product

Every advantage that men, money and machinery can offer is used to increase the production, maintain the quality and lower the cost. Each of the General's enormous mills is advantageously located to serve the ends of efficient manufacture and quick distribution. Each is equipped with the most up-to-date machinery. Raw materials are purchased in enormous quantities and far ahead of the needs of manufacturing, thus guarding against increased cost due to idle machinery. This also insures favorable buying, and the pick of the market.

Expert chemists at each mill are employed to select and blend the asphalt, and every roll of CERTAIN-TEED is made under their watchful care.

CERTAIN-TEED resists the drying-out process so destructive to ordinary roofing, because the felt is thoroughly saturated with a blend of soft asphalt, prepared under the formula of the General's board of expert chemists. It is then coated with a blend of harder asphalt, which keeps the inner saturation soft. This makes a roofing more pliable, and more impervious to the elements than the harder, drier kind.

CERTAIN-TEED is made in rolls, also in slate-surfaced shingles. There is a type of CERTAIN-TEED for every kind of building, with flat or pitched roofs, from the largest sky-scraper to the smallest residence or out-building.

CERTAIN-TEED is guaranteed for 5, 10 or 15 years, according to ply (1, 2 or 3). Experience proves that it lasts longer.

They're Here! New Styles For Men and Young Men!

Fresh from the famous daylight Kirschbaum tailoring shops at the Sign of the Cherry Tree in Philadelphia, they have come---

Kirschbaum Clothes

For Spring and Summer, 1916

Lapels are narrower---waistlines a trifle higher---buttons closer placed---all the new ideas in fashion as designed by these celebrated clothesmakers for the most exclusive Fifth Avenue stores of metropolitan New York.

Styles for every age and every taste---from the young high school brigade to the community's most dignified citizens.

And here is one point to remember: The Kirschbaum label stands foremost in the clothing world today as the one unqualified surety and guarantee of all-wool fabrics.
