2000 Acres Placed On The Market

Rayado Colonization Co. Will Pull Off Land Sale In September; Expect Many Buyers.

A land sale of much importance to the growth and prosperity of the southern part of Colfax county opens on September 1 and will remain open until the 1st of October, whereas on some acres on the famous Rayado Ranch, eight miles south of the county line will be placed on the market.

In order to make a quick sale of the land, the land has been sub-divided into forty acre farms, and sizes of larger or smaller units. Forty units of 40 acres each have been secured and the balance of the tract, or 40 acres, is surveyed into larger or smaller units, as to each purchaser.

Two years ago, the Rayado Colonization company placed a tract of land on the market, part of which is now under cultivation, and adapt the tract of 40 acres on sale during the months of September. On that tract and 60 acres, fall wheat averaged 30 bushels per acre from the red plowing, and spring wheat, oats, corn, barley, and hay have shown considerable that the land was in the market.

Cimarron

Given Cold Shoulder

Cimarron was given the cold shoulder by the Grain to Ocean Highways association, in the publication of the map recently distributed, in that the association followed the Cannon River from the northern to the southern part of the state.

By more than one year ago the socialism gathered funds in Cimarron to place this city on the national highway, and build the Santa Fe trail past Pt. Unions to take route through the canyon and down the Rio Grande Valley. Both were abandoned and the route on the plains was attempted at the northern highway, eliminating the most picturesque corners on the entire state, namely, the Cimarron Caves in all the great desert and into Fort Philadephia.

Duck Season Opens On October 1

Hearings On Coal Rates September 4

By an order of the department of agriculture in Washington the old duck season in New Mexico has been changed. It will open October 1 and close January 1, in lieu of opening September 1 and closing December 1. It is supposed that this change was made by Washington officials upon the request of complaints from farmers who are concerned in the erosion of wild duck' heads during September.

The order affects New Mexico principally and will not meet with the hearty approval of sportsmen.

Farmers On E. P. & S. W. Can Burn Old Ties

Farmers along the E. P. & S. W. have now the privilege to take some old railroad ties and use them for fuel, but must not destroy the fences. This action of the railroad company cannot be valid in harmony following the complaint that the company has been burning old railroad ties when settlers in the state, especially those who live in the dry farmlands, have been burnt in enormous quantities in the woods.

U.S. Had Troubles of Her Own One Hundred Years Ago

In the light of present events in Europe it is interesting to recall the fact that residents of the Northern United States, including the President of the United States and the government and the government, have been having some similar worry that has not been solved in the past. On this date in the year 1813, war was declared.

The convention was the most interesting one in the history of the state.

Webster Sells 1800 Head 2-Tr. Steers

What is doubt the largest individual sale of beef in the state of Kansas ever has been realized in this section was negotiated this week between Geo. H. Webster, Jr., and Kansas partition.

The contract calls for the delivery of 1600 head of a year-old steers in October, at the price of 37 1/2 per head. The steers are now ranging on the Uxpan Ranch and are in excellent condition. They will gain much in weight at the next few weeks and thereby realize a handsome profit for Mr. Webster.

The town council met in regular session at the council chambers that Thursday evening.

Tax Muddle Grows

Acute With Appraisers

Phillips and Board of Equalization Clash Over Valuations In This County; Much Interest.

The valuation of coal lands in Colfax county formed an important subject of discussion before the state board of equalization at Santa Fe, Friday, and led to more interesting bills between Assistant District Attorney Phillips of Santa Fe, Chairman R. W. Clancy and Governor William C. McDonald of the board of equalizations.

Mr. Phillips argued that the assessment in Colfax county has been too high. Governor McDonald continues to impose blanket rates the result will be that the assessment in Colfax county will find it impossible to appraisers the county. Governor McDonald declared that he for the best things there has been a great injustice done in Colfax county.

"We have been increasing our assessments every year," contended Mr. Phillips, "and I believe that we are now assessed at full value. As a result of this, there has been an increase in the price of coal lands in the state."

The governor then asked the valuation of the Rocky Moun-

tain and Pacific railway, tared in, in 1913, and the defendant was asked for all the discussions on the subject. The governor put in some questions that the company actually valued the lands at.

"In regard to coal lands I hope you will present the owners who own the coal rights and not the owners of the property. We have to you that you will make sufficient Investigation of this matter in the case of these lands," said Mr. Phillips.

Mr. Clancy asked Mr. Phillips a question which caused many in the room to smile. He said: "Don't you know that the owners of undeveloped coal lands have been the owners of large land holdings"

Mr. Phillips said that such a statement was made with great error.

"Well," returned Mr. Clancy, "Mr. Phillips is a good judge of coal lands and this is accurate."
ONE OF GERMANY'S GREAT BATTLESHIPS

Two German battleships were completed under the name of the Kaiser, and were launched this morning in the Prussian dockyard at Kiel. They are the first two of 18 large vessels which are being placed in German fleets, the largest of which is a battleship of 100,000 tons. The Kaiser is the first German battleship to be launched in 10 years, and is the first German battleship ever to be launched in Kiel. Other German battleships are being built in other cities, but none of them are as large as the Kaiser. The Kaiser is the largest battleship in the world, and is expected to be the most powerful battleship ever built. It is expected to be commissioned in 1917 and will be put into service as soon as possible.

WAR DOLLAR BAY

Kaiser ignores Jap ultimatium

WASHINGTON, D.C. — President Wilson ignored the ultimatum of the Japanese government yesterday, and the United States declared war against Japan. The President told a small group of friends that he had received the ultimatum, but had decided not to take any action. He said that he believed the United States could not possibly win the war without the help of Great Britain, and that it was better to avoid a war with Japan.

CHINA PORT BLOCKADED

ENGLISH, FRENCH, JAPANESE AND RUSSIAN SHIPS ATTACK GERMAN-FIATNDED SHIP

The Port of Kiaochow was blockaded by the English, French, Japanese and Russian fleets, and the German ships were sunk or captured. The British and French ships were able to sink the German ships with ease, but the Japanese and Russian ships had a more difficult time. The Japanese ships were able to sink one of the German ships, but the Russian ships were unable to sink any of the German ships. The German ships were not able to block the port, and the blockade continued.

WAR VICTORY DISCHARGE

GERMANY TO TAKE KONINSSBURG

Germany is taking possession of Koninssburg, a town in the province of Prussia, and which is located on the Russian frontier. The town has been occupied by the German army, and is expected to be taken by the end of the month. The town is important as a supply center, and is expected to be a valuable asset to the German army.

WAR DAY BY DAY

FRENCH ADMIT MANY REVERSES

A French general has announced that the French army has suffered many reverses in recent days. The general said that the French army has been forced to retreat from several positions, and that the French soldiers have been severely punished by the enemy. The general said that the French army is in a state of despair, and that the French soldiers are in a state of panic.

PRIZE OFFER DEFEAT OF GERMANS AFTER CONFLICT IS STARTED FROM NEW BASE

In the new base, where the French have established a new base, the French army has been forced to retreat from several positions. The French soldiers have been severely punished by the enemy, and the French army is in a state of despair.

TO TAKE KONINSSBURG

Germany is taking possession of Koninssburg, a town in the province of Prussia, and which is located on the Russian frontier. The town has been occupied by the German army, and is expected to be taken by the end of the month. The town is important as a supply center, and is expected to be a valuable asset to the German army.

HORD OF RUSIA ANNUNCIATE GERMAN EASTERN ARMY IS ADVANCE IN PRUSSIA

The Russian forces have announced that they have advanced into Prussia, and that the German army is in a state of panic. The Russian forces have captured several German towns, and have forced the German army to retreat from several positions. The Russian forces are expected to continue their advance into Prussia, and to capture more German towns.

Sept. has been a month of toil for farmers across the country. A

The Poultry Industry

By HAROLD PENNIGTON

At the national convention of the National Poultry Improvement Council in Atlantic City, the poultry industry has reaffirmed its position as the backbone of American agriculture. The industry has made tremendous strides in recent years, with a total value of production reaching $10 billion in 1939.

Estimates that chicken meat production has doubled since 1930, reaching an estimated 4.5 billion pounds this year. This is a result of increased efficiency in production and the development of new varieties of chicken that are more resistant to disease.

A building boom is in progress throughout the country as more and more farmers purchase new equipment to increase their output. A new trend is the use of automatic feeding and watering systems, which save time and labor.

WILL MAKE GOOD

There is a growing interest in the realization of the great truth, that success in business life is not to be measured solely by the amount of money a man may legitimately accumulate, but rather by the extent of the good which he has done for the common good.

This truth is recognized by the Republican party in its platform. It has always recognized the principle that a man's wealth is not only measured by the amount of money he has, but also by the extent of the good which he has done for the common good. This principle is embodied in the platform of the Republican party, which states that "The Republican party is the party of the common man, the party of the working man, the party of the middle class. It is the party of the man who lives modestly, who works hard, who saves, who invests, and who pays his share of the cost of government."
Butter Wrappers

Let us print your butter wrappers. These wrappers are made of vegetable parchment paper and are the only kind that should be used around butter. They are recommended by the U. S. government and are absolutely sanitary.

Printed butter wrappers give your product a much neater appearance and a greater demand.

Mail orders promptly attended to.

New Mexico To Become Great Dairy State

That New Mexico is to become one of the chief dairy farming states in the union is the confident prediction of President Ralph C. Lilly of the state's fair commission. The state fair commission has been pushing the organization of the New Mexico dairymen's association. A necessary step has been employed whose entire dairy is confined to organization work and the encouragement of co-operation in the expense of bringing up the dairy breeds of the various farming districts.

Big Supply Of Timber On Hand According to Report

According to statistics just issued by the United States forest service there is in the national forests of Arizona an aggregation of 1,918 billion of merchantable sap logs and in New Mexico 15 billion feet. On this basis it is estimated that the annual production of merchantable forest logs is sufficient to meet the demands of the state.

BLUE DARTER A TERROR TO CHICKS AND PROTECTORS

Mary Wiggins May Be Lad At Head of This Season Appealing Bird Has Great Race of Mules

When the "Blue Darter" makes its nesting place, it is only seldom that any shade of the "Blue Darter," which is a small but very noisy bird, is found. In the United States, that part of the blue jay that has been described to this day is a new record.

FIRST STORY OF TRIUMPHAL ENTRY OF GERMANSHIP FROM BRUSSELS

[By Cable to the Chicago Tribune]

The German ship "Imperial" left London for America on Thursday without firing a shot. The ship arrived in New York yesterday, and was received with great enthusiasm by the German community. The German people were overjoyed at the welcome given to the ship, and the German government was pleased with the reception.

The ship was accompanied by a fleet of merchant vessels, which also arrived in New York yesterday. The German government has decided to send a fleet of merchant vessels to the United States to assist in the evacuation of the German people from Europe.

Buried Treasure

Aladdin's lamp was the beloved key to uncol treasure buried underground.

In its case, a single oil, could summon gold, and have access to the hidden wealth of kings.

You, too, have buried treasures at your command, and Electricity, more powerful than mythical genii, to do your bidding.

Instead of rubbing a lamp, take out your telephone receiver and immediately a wealth of treasure is at your service.

A gray spark flashes over the wires overhead and underground and carries the sound of your voice wherever you wish.

Over three and a half million dollars lie buried under the streets of this mountain region in cables, wires and conduits, ready for your use every minute of the day and night.
