Recommended Citation

This Other is brought to you for free and open access by the HSC Institutional and Academic Materials at UNM Digital Repository. It has been accepted for inclusion in HSC Covid 19 Briefings by an authorized administrator of UNM Digital Repository. For more information, please contact amywinter@unm.edu, lsloane@salud.unm.edu, sarahrk@unm.edu.
FACTS

▪ First issue went out on April 5, 2020.
▪ Was a daily briefing (except for Saturday) until May 22 when it decreased to three times a week.
▪ A total of 68 people have contributed their efforts to the briefing on top of their already busy schedules.
▪ Over 1,000 people are directly receiving the briefing.
UNM Global Health COVID-19 Briefings reaching 116 Countries and 445 different institutions

With his research team, he created an automated system to scan the news and scientific literature for information relevant to the medical and governmental response to COVID-19. Together with a large team of faculty, students, staff, and others he creates & manages workflows, triages 500-700 articles/day, 7-days/week, writes content and serves as the editor and manager of the effort.
Dr. Lambert's Research team

- Anastasiya Nestsiarovich, MD, PhD
- Nicholas Lauve, BSc
- Praveen Kumar, MS

- This team has built and maintained the system from the beginning, continuously dedicating days, nights, and weekends to the effort.
Administrative

Shawn joined the team after the first issue, and has been instrumental in providing administrative support. She manages training, projects, communication, and follows through on the bits & bobs that allow each briefing to be sent out.

Lori’s vision to include the briefings in the HSC library repository has given world-wide access to the briefings. Her tireless efforts on curating, editing & uploading the briefing have been a great contribution.
Our faculty contributes to the briefing by submitting & curating articles, editing the briefing and supporting the team with suggestions for improvement and encouragement!

Tudor I. Oprea, MD

Andrew Rowland, PhD
Ingrid Hendrix, as one of UNM’s librarians, is able to contribute many relevant articles that she triages through the libraries’ serial subscriptions.

Mari Anixter, Communications Director for the NMDOH, contributes by submitting relevant articles, assisting with the editing process and monitoring NM news through her own briefing to the NM Government.
Working our night shift, they curate many scientific articles, increasing the amount of relevant content each day.
Medical & Graduate Students

Our medical & graduate students spent many hours each week, triaging, curating and editing the articles for the briefing. We couldn’t have done a daily brief without their passion, enthusiasm and dedication to this project!

Accumulative topic-specific documents

These documents were created to provide time-saving, convenient sources for those who were interested in specific topics. These teams comprised of the medical students are responsible for the daily upkeep of these documents.

Therapeutics
- Melissa Cosse
- Stephen Esguerra
- Fiona Nguyen
- Avanika Mahajan
- John Powell

Practice Guidelines
- LynnMarie Jarratt
- Jennifer Thompson
- Susie Pham

Testing
- Jenny Situ
- Ryen Ormesher
- Lauren Epler

Reopening
- Alyse Raboff
- Tim Campbell
- Hannah Dowdy-Sue
- Sam Paltrow
A team of students and faculty are preparing a publication for peer-review on the process of creating and maintaining the briefing, and its impacts.

We thank all who have contributed to, supported, and encouraged our efforts!
