## Keep Current with Information in your Field with Browzine

by Robyn Gleasner on February 6th, 2023 | [0 Comments](#)

Keeping current with information in your field can be a challenge. Browzine is a platform that allows you to browse, read, and monitor journals that you are interested in all in one place.

If you prefer to receive notifications regarding new articles within a publication, Browzine is now offering an email service. If new articles have been published in any of the journals you have saved in the My Bookshelf feature within Browzine, you will receive an email on Monday mornings showing which journals have new articles along with the links to access them.

To manage email notifications from Browzine, simply update your [email subscription preferences](#).

For more information about Browzine and email notifications, please see the [LibKey Information Guide](#) or contact [Robyn Gleasner](#).
