GOVERNOR IN ALBUQUERQUE

Returned This Afternoon to Leave for El Paso Tomorrow

WITH IRRIGATION COMMITTEE

Superintendent for Schools of Taos Comes From Odessa, Texas.

Governor Curry returned this afternoon on belated Santa Fe train No. 2, from a flying trip to Albuquerque where he was summoned to an important conference. He will leave again tomorrow for Albuquerque and from there will go to El Paso, Texas, to meet the Senate Irrigation Committee. He will escort the committee to Las Cruces, Belen, Roswell and Carlsbad, returning to Santa Fe the latter part of next week. It is his plan then to go to Taos and Rio Arriba county.

Superintendent of Public Instruction. Superintendent of Public Instruction J. E. Clark announced today that H. B. Copeland of Odessa, Texas, has accepted the superintendency of the public schools at Taos. Mr. Copeland has a life certificate from Oklahoma which entitles him to a life certificate in New Mexico. He is a young man of family and comes highly recommended.

Wants Attendance Statistics. Superintendent of Public Instruction J. E. Clark sent out circulars today asking for a report within ten days of school attendance statistics and answers to the following questions: After how many half days absence in succession is a pupil dropped from the roll? What are your best devices for improving punctuality and attendance? How often do you hold teachers' meetings and what is your plan for those meetings?

The Roswell Meeting. A circular urging the attendance of county school superintendents at the annual meeting of the New Mexico Educational Association at Roswell in December, has been sent out by Superintendent of Public Instruction J. E. Clark as follows:

Gentlemen: No doubt, you are making definite plans to meet with the teachers at Roswell, December 28th to 30th, 1909. I am confident that we shall have an excellent program for all who are interested in education in the territory, and I am decidedly of the opinion that the conference of the county superintendents will add us very greatly in arriving at unanimity of action on matters of great importance in the administration of school affairs of the territory. I am anxious to have all institute workers and all county superintendents present in the institute section in order that we may discuss face to face many of the problems that are presented in the management of the institute. The discussion of the common school course of study in connection with the county superintendents program will certainly bring out many important points in connection with the grading of our schools. I am personally somewhat disappointed in the form in which the common school course of study is printed, but I am confident that a half hours discussion of the material will put us in a position to work out the contents of the outlines and the unsatisfactory form may be overlooked.

I note that Superintendent Stroup, the chairman of the county superintendent's section, has assigned to each county superintendent a place on the program, and I trust that every county superintendent will attend this meeting and have his ideas boiled down to a two or three minute talk on the subject assigned.

Each year there is a little strife among the county superintendents to secure the honor of taking to the association the largest per centage of teachers employed in the county. Very naturally those counties located nearest to Roswell will be able to enroll the largest number of teachers, but distance will be taken into consideration, therefore counties that are at a great distance from the place of meeting have equal advantage with those that are near.

MOTHER DIES BECAUSE OF SON'S DISGRACE.

Viviana Nuanes, mother of Procopio Nuanes, who confessed to criminal assault on Mrs. Majorbanks at Albuquerque, has died of a broken heart on account of her son's disgrace. The son was the pride of her heart and she had been unaware of that making the rounds of saloons in company with Lorenzo Pfeiffer convicted of the same crime, had dragged her boy to the depths of degradation. She came to Albuquerque from Winslow, Arizona, to see her boy and when she learned the truth returned home to die. She died Thursday morning and Nuanes was informed just as he left the witness stand in court at Albuquerque.

TAFT GETS DOWN TO ROUTINE

Return Early This Morning to White House From Connecticut

HOBBO ON PRESIDENT'S TRAIN

Creates a Scare and Excitement Among Porters While Executive Sleeps.

Washington, D. C., Nov. 13.—President Taft returning here this morning from Middletown, Conn., was at once driven to the White House.

Excitement on President's Train. Washington, Nov. 13.—A "hobo" seeking shelter from a ticket hunting conductor on board the "Federal Express" bound from Boston to Washington wandered into President Taft's private car, Mayflower, last night. He locked himself in the kitchen and created the greatest excitement of all the President's travels. He was discovered by Ed Letcher, one of the Presidential porters, who almost turned white when he saw the bewhiskered "Willie," crouched in a corner. He made a flying tackle for the hobo, yelled for help, and "Jimmie" Sloan of the secret service and another porter rushed to the rescue. The hobo expostulating violently was put off the train at Bridgeport into the waiting arms of the police. In the meantime, the President slept peacefully.

ARCHBISHOP GLENNON SCORES DIVORCES.

Also Denounces Socialism and the Apartment House in an Address at Kansas City.

Kansas City, Mo., Nov. 13.—In an address to 5,000 people in Convention hall here, Archbishop John J. Glennon of St. Louis declared that divorce, socialism and apartment houses were the great perils that beset the American nation.

"The modern city dweller has become something like the cliff dwellers in the pueblos of the west," said the Rev. Glennon. "The apartment house, whatever its advantage, is not and cannot become a home. A wife is admitted to them, possibly a parrot, but a wife and a parrot do not constitute a family no more than an apartment house constitutes a home."

Speaking of divorces the archbishop said that "every divorce granted and every divorce law written is a challenge to Almighty God—that men can make better laws than He."

"Divorce laws and divorce courts," he continued, "are an unmitigated evil, worse than the destroying angel that reared the death of their first born. For love is the first born of every household and the announcement that follows is the harbinger of national death and destruction."

IMMENSE DISTILLING PLANT DESTROYED.

Fire Causes Quarter Million Dollar Damage at Carthage, Near Cincinnati, Ohio.

Cincinnati, O., Nov. 13.—The immense plant of the Union Distilling Company, known as the Edgemont Springs Distillery at Carthage, was destroyed by fire this morning. The loss is \$250,000.

BOY BANDIT IS A SUICIDE

Attempted to Hold Up the State Bank at Endora, Kansas.

SHOT CASHIER IN THE JAW

Fifteen Year Old Accomplice Hails From Jacksonville, Florida.

Lawrence, Kans., Nov. 13.—A curious throng of people today viewed the body of Earl Bullock, the boy bandit, who committed suicide yesterday afternoon following the bold robbery of the state bank of Endora near here. Bullock shot himself when he saw he was about to be captured by the pursuing mob. The body was brought here this morning. William McKay, the 15 year old lad from Jacksonville, Florida, who was Bullock's companion, is in jail here, having been rushed from Endora to prevent a lynching. Fred Starr, cashier of the bank, who was shot in the jaw by Bullock, is resting easy this morning. He will recover.

CAIRO MOB HAS QUIETED DOWN

Chances Very Remote That Any One Will Be Indicted for Lynching.

NEGRO TAKEN TO KANKAKEE

Orders for Demobilization of the Fourth Regiment Will Be Issued.

Cairo, Ill., Nov. 13.—With Arthur Alexander, the negro, implicated in the murder of Annie Pelley, by the confession of the lynched negro, James, is safely out of town and confined in jail at Kankakee, far to the north, orders for the demobilization of the Fourth regiment which has occupied Cairo since yesterday morning are looked for at any time. There was no indication last night of any continuance of mob rioting. It is not likely that any official notice of the mob will be taken until the meeting of the regular grand jury in December, and under present conditions of public opinion the chances of obtaining indictments against any members of Thursday night's mob appear very remote.

LIVELY MEETING OF BOARD OF TRADE.

Union of Business Interests of City Chief Topic of Discussion of Members.

The proposed amalgamation of the Board of Trade and the Commercial Club was the chief topic of discussion at a lively meeting of the Board of Trade in the offices of the Santa Fe Water and Light Company last evening. Vice President John P. Wagner, president. The different officers made their customary monthly reports. L. O. Moore and E. C. Abbott were unanimously elected to membership. An amendment to the by-laws was offered and will be voted upon at the next regular meeting. It strikes out the word "non-residents" in the clause providing for honorary membership, thus making residents also eligible to such membership, the purpose being to elect such local clergymen as are proposed and desire to become members.

The committee to fight the expectation evil in the plaza and on the streets reported the drafting of an ordinance to be adopted by the city council, providing a fine or jail sentence for offenders. The committee was authorized to order tin signs to warn the public, in case the city council should fail to provide such signs after the passing of the ordinance.

Corresponding Secretary W. Frank Owen was authorized to draft a circular letter which would set forth an answer to the many inquiries he is receiving and answering about the city.

Dr. J. A. Rolls, Paul A. F. Walter and W. Frank Owen were appointed a committee to draft a model constitution and by-laws in which both commercial organizations might find a basis for agreement and amalgamation, this being the result of a lengthy discussion following upon a report of the committee on amalgamation that after discussion with a similar committee from the Commercial Club, it was found that a basis for agreement is feasible in every particular except on that of the civic activity of the proposed organization, upon which both bodies seem to be as far apart as ever. The committee asked to be discharged. The report was accepted and the committee discharged. The spirited discussion that followed included a frank criticism of county and city government, the matter of the collection of delinquent taxes and kindred subjects, and the duty of every good citizen to be interested in good government and the prosecution of graft, the only question being whether it was advisable for a commercial organization to undertake work that elsewhere is entirely in the hands of the lawfully constituted judicial authorities or good government leagues and vigilance committees. There is no doubt, that none of the members present, have given up the hope of creating by amalgamation one strong commercial body working for the interests of Santa Fe.

STRONG DRINK LEADS TO GALLOWS.

Brilliant Lawyer and Newspaperman Dragged Down By His Thirst for Whisky.

Salem, Ore., Nov. 13.—James A. Finch, a brilliant lawyer and journalist, was hanged yesterday for the murder of Ralph Fischer, also a lawyer. Finch owed his downfall to indulgence in strong drink for which he was disbarred from practice. Because Fischer refused to take part in reinstating him, Finch killed Fischer.

SNOWFALL AT LAS CRUCES

El Paso Reports That Drouth in West Texas is Broken

HEAVY RAIN IN TWO YEARS

Norther Blows at Same Time Between Marfa and Valentine.

El Paso, Nov. 13.—The drouth of several months duration has been broken by snow and rain. The heaviest rain in two years fell in western Texas last night and today rain is falling over a wide section accompanied by a "Norther." Snow is falling between Marfa and Valentine, Tex., and at Las Cruces, N. M.

Snow at Tucumcari.

El Paso, Tex., Nov. 13.—Snow is falling at Tucumcari, N. M., following a heavy rain last night. A heavy rain fell at Globe, Ariz.

SANTA FE SYSTEM HOTEL DE VARGAS.

Official Promise to Give Assistance in Making it a Success—Letter to Dr. John P. Wagner.

Dr. John P. Wagner, Santa Fe, N. M.,

Dear Sir: Mr. W. R. Brown, our district passenger agent, El Paso, Tex., has written me regarding the new resort hotel for Santa Fe, in which you are interested and actively promoting. I have also received a number of newspaper clippings on the subject.

That we will be glad to see successful outcome on the enterprise, goes without saying. A hotel such as is contemplated would greatly add to the attractiveness of Santa Fe as a health and pleasure resort by providing the comforts and conveniences demanded by that class of travel. Santa Fe possesses the essentials of climate and scenery as well as historical interest. Add to this, high class hotel accommodations and requirements are met. It is perhaps unnecessary to state that the Santa Fe passenger department would be glad to assist in making the enterprise a success my mentioning same in our publications best suited for that purpose, and in widely disseminating information in regard thereto at important points on the system as well as through our numerous agents located in the large eastern cities. I shall watch developments with much interest and sincerely hope that your expectations may be fully realized.

Yours truly,

J. M. CONNELL.

TOWN BUILT ON SCIENTIFIC PLANS.

Lawns and Shade and Fruit Trees Everywhere and Artistic Cottages for Workmen.

Spokane, Wash., Nov. 13.—Civil engineers, landscape architects, carpenters, masons and concrete workers are rebuilding the town of Othello, on the main line of the Chicago, Milwaukee & Puget Sound railway in Grant county, Wash., west of Spokane, upon plans approved by science and art. The R. S. King Company, which will establish a mammoth plant for the manufacture of slate products, has acquired all the holdings in the town at a cost exceeding \$1,000,000, and it is proposed to make to order a city with all the latest municipal improvements. The factory will cover about nine acres of ground and cost between \$5,000,000 and \$6,000,000. Inexpensive lands will be bought for employers' homes and there will be lawns and shade and fruit trees everywhere. The streets of macadam will be paved and there will be concrete sidewalks, city water works, electric lighting plant and other modern improvements. Othello is in the Big Bend wheat district, it has ample transportation facilities and the location is ideal.

HARRIMAN'S TOMB IS CLOSELY WATCHED.

Time Clock Has Been Installed to Make Sure That the Care Taker is on Guard.

Arden, N. Y., Nov. 13.—A time clock has been placed at the tomb of E. H. Harriman, on which the night watchman records each visit. The grave has been closely watched since the death of the railroad magnate and the time clock has been installed to make it certain that the watchman is on duty.

Blind Institute Opens With Nine Pupils.—The territorial blind institute at Alamogordo opened this week with nine pupils. Fifteen more pupils are to enter later.

ALL PARIS AT STEINHEIL TRIAL

Celebrities Thick as Huckleberries on a Pennsylvania Bush.

STATE MADE OUT NO CASE

France Thrilled by Court Room News the Past Week and More.

Paris, Nov. 13.—All Paris, is seething, clamored today at the doors of the Palace of Justice when the curtain rose on the final act of the legal drama which has thrilled France the last ten days, the trial for murder of beautiful Margarita Steinheil. Guilty or innocent, the impression is general that the state has not made out a case against her, and the public believes she will be acquitted. Among those in the court room today was Henri Rochefort, the veteran, free lance journalist, whose attempts to give the tragedy a political color, have gone far to excite popular interest in the case, several well known dramatists and play wrights and a dozen other celebrities. Rejane, the celebrated actress was forced to be content with standing room. M. Aubin made the closing argument for the defense this afternoon.

APPLICANTS FOR THE ROOSEVELT MEDAL.

Pioneer Residents of Washington, Parents of Eleven Children All Born in Same County.

Spokane, Wash., Nov. 13.—Friends of Frederick Steiner, a pioneer resident of Cle Elum, Kittitas county, Wash., believe he and his wife deserve a Roosevelt medal for raising a family of goodly proportion. They have eleven children, the youngest of which was born a few days ago. All the children were born in Kittitas county and ten of them claim Cle Elum as their birthplace. This is believed to be a record without a parallel in the state of Washington if not in the Pacific northwest, and, as the happy father remarks with just pride, "Where is there a town of the size and age of Cle Elum on this continent that can beat it?" Governor Marion E. Hay has been apprised of the newest addition to the Steiner family and their friends will bring the matter formally to the attention of Colonel Roosevelt on his return from Africa. Steiner does not g much on the medal proposition, but there is no gainsaying that he is the happiest man in this part of the United States.

EL PASO REPORTER HAS ANOTHER DREAM.

Washington Promptly Denies His Story of a Military Aviation Station in Arizona.

El Paso, Nov. 13.—A special from Washington says that the war department will establish an aviation station at Niggerhead Peak in Post canon, Huachuca forest, in Arizona. Ten biplanes, the report says, have been ordered for the government tests.

Caught Lying Again.

Washington, Nov. 13.—Secretary of War Dickinson said today that he never heard of the reported intention of the war department to establish an aviation experimental station in the Huachuca forest reserve. General Bell, chief of staff, characterized the report as "preposterous."

WILL PROBE SUGAR GRAFT

Secretary of the Treasury McVeagh Is in Earnest About it

WILL RENOVATE SERVICE

Report That Trust Owes \$30,000,000 in Duties is a Canard.

Washington, Nov. 13.—Secretary of the Treasury McVeagh has come out with a flat statement that not only will he probe to the bottom of the scandal growing out of the frauds committed in the New York custom house by the sugar trust and its agents but he proposes to renovate the entire service. It has developed also that the justice department is working in conjunction with the treasury department. The report that the sugar trust actually owes the government thirty millions instead of two millions of unpaid duties and which it paid under duress to treasury officials, is declared absurd.

A GREAT DAY FOR SPORTS

Football Reaches the Climax of the Season on Many Gridirons.

GREAT GAMES ARE SCHEDULED

Tenny, the Most Famous Race Horse of American Turf is Dead.

Chicago, Nov. 13.—This is football day. East and west, north and south, the canvas clad warriors are struggling for glory, their institution and a number of games mark the climax of the season's play. Yale and Princeton will fight for honors, and no matter who wins, that game will be a struggle every second until the referee's whistle blows. But Yale looks invincible this season. Harvard and Dartmouth also come together, Harvard undefeated, and Dartmouth with but one tie score, and that against Princeton, to mark the season's record of victories. Controversy as to relative merits of eastern and western football are given interest by games between Chicago and Cornell at Ithaca and Michigan and Pennsylvania at Philadelphia, but both Chicago and Michigan have met defeat this season in the middle west. Wisconsin and Minnesota probably will decide the championship of the western conference. Minnesota's brilliant victory over Chicago made that eleven the favorite but the northern team is weakened by the absence of Captain McGovern, the star quarterback. In Denver the Haskell Indians played the undefeated eleven of Denver University.

Death of Famous Race Horse.

New York, Nov. 13.—Tenny, one of the most famous race horses of the American turf is dead. He died yesterday in Kentucky, aged 23 years. It is an odd coincidence that the great "Swayback" died only a few weeks after his greatest rival Salvo, and at the same age. Salvo, the fastest race horse in the world, defeated Tenny by a head in two races, and their contests are classics of the turf. Songs and poems have been written about them. While possessing a marvelous speed Tenny had a surly temper and this sulking cost him one stake to Salvo.

LABOR LEADERS AGAINST LIQUOR.

Big Temperance Rally to Be Addressed By John Mitchell and Other Tomorrow at Toronto.

Toronto, Ontario, Nov. 13.—A temperance mass meeting will be held tomorrow under the auspices of the labor department of the Presbyterian church and to be addressed by delegates to the American Federation of Labor. President Gompers is said to favor the building of labor temples in each city so as to do away with the meeting of labor unions in saloons or rooms adjoining saloons or rooms adjoining saloons. Treasurer John Lennen of the Federation, John Mitchell and others will address the meeting. Mr. Lennen is understood to take the attitude that the use of liquor by workmen affects the rate of wages because it lowers the efficiency of the men.

SCHOOL MATE OF PRESIDENT TAFT DEAD.

Washington Correspondent of Chicago Tribune Joins Silent Majority at Age of 53.

Chicago, Ill., Nov. 13.—Raymond Patterson, Washington correspondent of the Tribune, and widely known under the pen name, "Raymond," died today. He was a school mate of President Taft and enjoyed the warm confidence of leaders in public life. He was 53 years of age.

GAMBLING PROVES DOWNFALL OF SUNDAY SCHOOL TEACHER.

Los Angeles, Cal., Nov. 13.—Robert Perry, a Sunday school worker confessed to Sheriff Hamill that he stole a motorcycle and seven horses and buggies to secure funds with which to gamble in a local saloon. Thus far Perry has been unable to obtain bail.

THE DAILY ROUND UP.

THE HOSIERY.

The socks I darn for thee, dear heart,
Mean quite a pile of work to me;
I count them over, every one apart,
Thy hosiery, thy hosiery.

Each sock a mate, two mates a pair,
To clothe thy feet in storm and cold;
I count each sock unto the end, and find
I've skipped a hole.

Oh, carelessness, this thy reproof,
See how it looms across my sole,
I grind my teeth and then in very truth

I darn that hole, sweetheart, I darn that hole!

M. Jacobson of Gallup on an open account for \$154.95.

A MEDLEY OF FUN AND INTERESTING SPECIALTIES.

Entertainment Given By the Woman's Aid Takes Place Next Week Friday.

The entertainment to be given by the Woman's Aid of the First Presbyterian church for the purpose of helping pay off the church debt will take place on Friday, November 19th. The entertainment will consist of the production of the play entitled "Scenes in a Union Depot." The entire production is replete with many comical and laughable situations and is one that cannot help but please. Many enjoyable and interesting specialties will be introduced, each of which is alone worth the price of admission. There will be a specialty by Mrs. W. D. Hayes and a number of local children that promises to bring down the house. Another specialty will be introduced by Miss Hannish, whose ability to sing is so well known to the people of Santa Fe. This number will be a real treat as Miss Hannish is to be assisted by a picked chorus. The chorus is being trained by Mrs. Carl Bishop who has had

CUTICURA REMEDIES**

"It gives me great pleasure to express my deep gratitude in appreciation of the incalculable benefit that the Cuticura Soap, Ointment and Pills have done for my little boy. He had an awful rash all over his body and the doctor said it was eczema. It was terrible and used to water awfully. Any place the water went it would form another sore and it would become crusted. A score or more physicians failed utterly and dismally in their efforts to remove the trouble. Then I was told to use the Cuticura Remedies. I got a cake of Cuticura Soap, a box of Cuticura Ointment and a bottle of Cuticura Resolvent, and before we had used half the Resolvent I could see a change in him. In about two months he was entirely well. When people see him now they ask, 'What did you get to cure your baby?' and all we can say is, 'It was the Cuticura Remedies.' So in us Cuticura will always have firm and warm friends. George F. Lambert, 139 West Centre St., Mahanoy City, Pa., September 26 and November 4, 1907."

IF WOMEN ONLY KNEW

What a Heap of Happiness it Would Bring to Santa Fe Homes.

Hard to do housework with an aching back.

Brings you hours of misery at leisure or at work.

If women only knew the cause—that Backache pains come from sick kidneys.

"Would save much needless woe. Doan's Kidney Pills cure sick kidneys."

Santa Fe people endorse this:

Miss Adela Arias, 166 Griffin street, Santa Fe, N. M., says: "There is no praise too strong for me to give Doan's Kidney Pills. The splendid results I obtained from their use several years ago have been lasting and for that reason, my confidence in them has been increased. I suffered from a dull heavy ache in the small of my back and I was subject to headaches and dizzy spells. I always felt tired, had no ambition and was in very poor health when I procured Doan's Kidney Pills at Stripling, Burrows & Co.'s drug store. It did not take them long to cure me and from that day to this I have been free from kidney complaint. I willingly confirm the public statement I gave in January, 1907, telling of my experience with Doan's Kidney Pills."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

BIDS CALLED FOR.

Sealed proposals will be received separately by the Board of County Commissioners of Santa Fe county, Santa Fe, N. M., up to 4 p. m. Dec. 10th, 1909, for (7) seven fire proof vault doors. Also court house furniture. Specifications and schedules will be furnished the prospective bidders by I. H. & W. M. Rapp Co. architects. All bids to be addressed to Geo. W. Armijo, Probate Clerk, Santa Fe, N. M. The board reserves the right to reject any or all bids.

I. SPARKS,

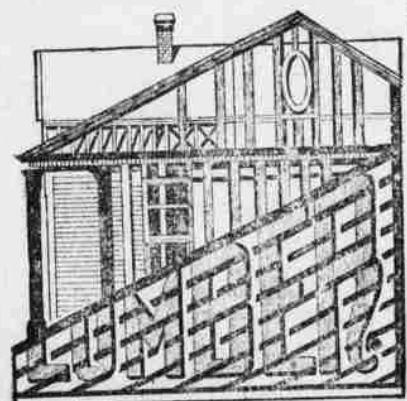

Chairman Board of County Commissioners.

PRESIDENT TAFT'S FORTHCOMING MESSAGE.

It Will Proclaim Adherence to the Roosevelt Policies and Urge Postal Savings Bank.

Washington, Nov. 13.—The keynote of President Taft's message to the coming session of Congress will be this statement:

"This administration was elected on a platform that we proposed to carry out the policies of Theodore Roosevelt and we propose to keep that promise."

"Roosevelt's chief policy," he has said, "was the determination to make the great corporations of the country obey the law, and those corporations included the railroads and the great corporations that do a large industrial business, and that have shown a tendency to monopolize that business and suppress competition."

Taft will recommend a court of five members in order that when the interstate commerce commission shall decide a rate is unreasonable, a reasonable rate may be made at once, with no appeal on the part of the railroads except to the supreme court. He will point out that the five judges, having no other business before them, can not only expedite litigation, but naturally will become rate experts.

Check on Stock Watering.

There will be also a recommendation of a tribunal that will pass on how many bonds and how many shares of stock every interstate railroad may issue, to prevent the watering of stock. At one time the President said: "This is important, because when you water stock you only do it to deceive people, and get them to pay more than the stock is worth."

To further expedite the work of making railroads obey the law, the President will recommend a reorganization of the bureau of corporations, the interstate commerce commission and the department of justice.

Exempt Labor From Trust Law.

The President will recommend an amendment to the anti-trust law that he thinks will make it effective. The present terms are so broad that in his mind it is not enforceable, as it makes no distinction between a reasonable and an unreasonable restraint of trade—a difference that is recognized by the common law. He will recommend that the law be amended to narrow and confine it to combinations and conspiracies to suppress competition and establish monopolies, and to leave out the denunciations of general restraints of trade. He will not recommend that labor unions be specifically exempted from the operation of the law, but the effect of the amendments, he admits, will be to put labor outside the law. Under the present statute it has been decided by the supreme court that boycotts are a violation of the Sherman act.

Postal Savings Banks Will Be Urged. President Taft will recommend continuance and extension of the conservation of national resources and reclamation of arid lands. He will say that these subjects include also retention of control over the water power sites by the government, so that it may regulate rates charged for the power furnished, and retention of control of coal, oil and phosphate lands that the government may prevent the use of those lands by monopolies.

Waterways Extension.

On the subject of waterways the message will recommend continuance and extension of harbor work, such as the San Pedro harbor, on the California coast, but his recommendation for work on the inland waterways will be most conservative. The President saw a lot on his trip down the Mississippi river, but his conclusions did not encourage the inland waterways boomers, who went to great expense to show the river to him.

The President will not make any recommendation for monetary legislation, leaving that to the next Congress.

A commission government for Alaska will be recommended.

The President will recommend a

ship subsidy in the form of payment by the government for the carrying of mail.

Control of corporations will be the main issue in the message, and the President believes that his administration already has made a good start in the corporation tax passed at the extra session.

Taft has expressed himself as in favor of a central bank to handle the finances of the country, but the details of the plan have not been worked out and there is no likelihood that it will be a part of the message to the December session.

JURY COMMENDS PFEIFFER TO MERCY OF COURT.

Found Guilty of a Fiendish Crime—Leopoldo Torres Pleads Insanity as Excuse for Murder—Espiridon Lucero on Trial for Assault.

Albuquerque, N. M., Nov. 12.—After being out for one hour and a half yesterday afternoon, the jury in the case of the Territory versus Florencio Pfeiffer, charged with making an assault upon Mrs. Majoribanks on June 24 last, returned a verdict finding the defendant guilty as charged in the indictment and recommending him to the mercy of the court. The verdict was returned at 4:10 p. m. The large court room was filled with spectators, anxious to hear the result of the deliberations of the jury. The prisoner was arraigned before the court when the jury reported that it had decided upon a verdict and heard the result with apparent composure. Mr. and Mrs. Majoribanks were also in the court room when the jury reported, but beyond appearing relieved that the trying ordeal was over, did not indicate their thoughts regarding the verdict. Pfeiffer was escorted back to the county jail, where he will be confined until tried on the other three indictments returned against him incident to the indictment of assault, the remaining three charges being robbery, attempt to rob and impersonating an officer. It may be possible now however, that Pfeiffer will plead guilty to the minor indictments. Sentence will be imposed upon Pfeiffer by the court at the end of the present term. The penalty attached to rape, the crime for which Pfeiffer was convicted yesterday, is from five to twenty years in the territorial penitentiary. The other violations of the law charged against him carry penalties from three to five years each.

The case went to the jury at 2:40 yesterday afternoon, following the closing arguments of District Attorney Klock for the territory and Attorney John A. White for the defendant, both of which occupied an hour and a half each.

The assault for which Pfeiffer was convicted yesterday was one of the most brutal in the history of crime in Bernalillo county. According to the testimony introduced in behalf of the territory during the trial, Pfeiffer, together with Procopio Nuanes, intercepted Mr. and Mrs. Majoribanks as they were walking into the city from the lower Santa Fe yards on the night of June 24. Impersonating an officer, Pfeiffer commanded Majoribanks to climb into a box car, explaining that he would keep him there until he took his wife to jail. Majoribanks was locked in the car and Mrs. Majoribanks was dragged away to the sandhills by Pfeiffer and Nuanes, over ditches and through fields until they reached an abandoned powder house in the sandhills, where the fiendish assault took place. Pfeiffer was captured the day after the assault, but denied at that time and denied under oath during the present trial, that he had any connection whatever with the crime. Nuanes was captured three days after Pfeiffer's arrest. He was put through the "third degree," with the result that he "peached" on his pal and friend and swore to confession admitting his own guilt and implicating Pfeiffer. Nuanes was arraigned in court Wednesday and pleaded guilty to the four indictments returned against him by the grand jury, charging complicity in the crime. Nuanes also was one of the chief witnesses for the prosecution. Efforts to prove an alibi for Pfeiffer in the face of the strong testimony given by Nuanes were unsuccessful.

Insanity Plea for Torres.

That Leopoldo Torres was insane on April 5, 1908, when he killed Tom Benefield, a colored man, with a stove door in the city jail, and that he is still insane and should be sent to the asylum will be the plea entered in the case of the Territory versus Leopoldo Torres, when that case is called for trial early next week. Torres and Benefield occupied the same cell in the city jail at the time of the killing. Torres attacked the negro with an iron door which he had picked up from the stove in the jail and fractured Benefield's skull. The affair occurred during the night and there were no witnesses. Benefield was dead when the jailer went to the jail with breakfast for the prisoners the next morning. Manuel U. Vigil has been appointed as attorney for Torres and will advance the insanity plea. Attorney Vigil yesterday afternoon filed a poverty plea for Torres in the district court, stating that the defendant is unable to bear the expenses incident to the examination for his sanity. It is likely that Torres will be examined next Monday, when his case is taken up by the court.

Assault Case on Trial.

The case of the Territory versus Espiridon Lucero, charging assault and battery was taken up in the dis-

trict court at 4:30 o'clock yesterday afternoon, following the completion of the Pfeiffer case. It is alleged that Lucero made an attack upon an Alameda man last spring, badly damaging his face and other parts of his body. District Attorney Klock is prosecuting the case for the territory and Attorney W. C. Heacock is defending Lucero.

OCTOBER WAS DRY

AND SUNNY.

Fe, N. M., Nov. 13.—October, 1909, was Fe, N. M., Nov. 12.—October, 1909, was practically normal in temperature, largely given to sunshine and comparatively dry. The temperature of the territory as a whole averaged considerably higher than October, 1908, but was slightly lower than the month in 1907. Three periods of comparatively high temperature occurred, the 1st to 3rd, 13th to 16th and 26th to 29th; also two periods of cool weather, the 8th to 12th and 22d to 24th, while the month closed with cool weather. The 1st was generally the warmest day of the month, and the 9th was the coldest. Killing frost extended into the southern counties on the 8th and 9th, although a few far southern stations did not receive killing frost until the last decade of the month, the dates varying from the 22d to the 27th, and a few of the southern stations escaped without frost. Vegetation was so far advanced that no harm resulted from frost.

Two well defined shower periods occurred, the 1st to 8th and the 17th to 18th. The resulting average for the territory was not large, due to the fact that the showers were largely in character and parts of the territory received little or no precipitation. As a rule, the amounts west of the Rio Grande and in the extreme south and southeast were small, while the northeast district, and a strip of country extending thence southwestward to the Capital and Sacramento mountains received the largest amounts. A pronounced southwest-northwest trend is apparent in the passage of the showers. In the northern counties scattered thunderstorms occurred from the 3d to the 6th, and again in a few localities on the 17th and 18th.

Snow occurred in small amounts at the higher northern stations on the 7th to 9th, and again on the 17th and 18th, reaching a maximum fall of 8 to 14 inches over the peaks of the Sangre de Cristo range. It had practically all disappeared before the close of the month.

The amount of sunshine was large, especially in the south and the west counties. Winds were light, as a rule, and no severe storms occurred.

Temperature.

The mean temperature for the territory, determined from the records of 67 stations, having a mean altitude of 5,000 feet, was 54.1 degrees, or 0.4 degrees above the normal, and 2.3 degrees above the mean of October, 1908. The highest local monthly mean was 65.1 degrees at Gage, and the highest recorded was 93 degrees at Carlsbad on the 16th; the lowest local monthly mean was 40.4 at Hopewell, while the lowest recorded was minus 5 degrees at Elizabethtown on the 9th. The greatest local range in temperature for the month was 76 degrees at Elizabethtown, and the least 48 degrees at Hayden; the greatest daily range was 68 degrees at Manulito on the 28th. The means for the districts were as follows: No. 7 (northwest) 53.9 degrees; No. 8 (Rio Grande and Pecos) 53.6 degrees; No. 9 (western) 55.9 degrees.

Precipitation.

The average precipitation for the territory, as determined from the records of 129 stations, was 0.81 inch, or 0.30 inch below the normal, and 0.38 inch above the precipitation in October, 1908. The greatest amount was 3.09 inches at Campana, while no precipitation occurred at Albuquerque, Blackrock, Cambray, Gage, Mannelito and Pratt, and but a trace at nine other points. The greatest amount that was recorded in any 24 consecutive hours was 2.01 inches at Campana on the 18th. The average snowfall, (which occurred at the higher northern stations) was 0.8 inch. Precipitation occurred on an average of 3 days; while 22 days were clear, 6 partly cloudy and 3 cloudy. The prevailing direction of the wind was from the west, although nearly as many stations reported the southwest direction. The average precipitation of the several districts was as follows: No. 7 (northeast) 1.52 inches; No. 8 (Rio Grande and Pecos) 0.63 inch; No. 9 (western) 0.20 inch.

FRANKNESS IN POLITICS.

Frankness is not a virtue in politics that is practiced very much, although it is very often affected. But here comes the Hon. William Mitchell Lewis, a millionaire and manager of Senator LaFollette, and announces himself as a candidate for governor and tells frankly why he is a candidate. He says that he is not being urged by his friends to run, there is no Macedonian cry from the voters for his candidacy and no party is yearning incessantly for his leadership. He is acting on his own notion and motion and this is the way he expresses it:

"I am a candidate for governor of Wisconsin for two distinct reasons:

"First, because I believe that the state needed a straight from the shoulder business administration, and a governor who is not afraid of anything or anybody, who believes in an absolutely square deal and who has the nerve to see that the people get it.

"Second, because of the honor that accrues to the man who is chief executive of such a prosperous, promising commonwealth.

"Furthermore, I am a candidate for governor purely on my own volition. No delegations of American friends have called upon me and urgently solicited me to permit my name to go before the people, nor have I been picked out, or chosen, or even suggested, by any person or combinations of persons who care more for their interests than they do for the state they live in.

"My candidacy is in no sense a case of the office seeking the man, but the deliberate seeking of the office by the man who does so because of his inherent right as an American citizen and because he sincerely believes he is qualified by long years of business experience to fill the office as the people want it filled."

To this the Arizona Republican adds the following, and what it says of conditions in Arizona, is of course, true in New Mexico and elsewhere:

"Being a millionaire in the superlative degree, and having gained considerable practical experience in politics as the financial backer of Senator LaFollette, it is to be expected that Mr. Lewis' proclamation of his ambitions will have the careful consideration of the Wisconsin people. That, however, is a matter between him and them. The thing that is worthy of note by the general public is that there is at least one politician in this country who is honest enough to say that he wants the office. It is refreshing to see such a departure from the beaten path. We of Arizona, like our fellow citizens everywhere else, are only too familiar with the hackneyed form of the average candidate's announcement. Be he a seeker of the office of delegate to Congress, or of the lowly office of constable, it is all the same—he tries to make it appear that an insistent electorate would give him no peace until he consented to become a candidate. Of course, this time-worn process fools nobody. It is only about once in a month of blue moons that a man has to be dragged forth from his retirement and forced to run for office. And if the average candidate were to wait for a call from the people his peace and quietude would never be disturbed.

"Men get offices, like they get the other desirable things of life—by hustling for them. As a reward for his candor and as a lesson to all liars, Mr. Lewis ought to be elected governor of Wisconsin."

SECRETARY BALLINGER'S ANNUAL REPORT.

The first annual report of Secretary of the Interior Ballinger is of more than ordinary interest to the west and especially to New Mexico where Secretary Ballinger made a much more agreeable impression than had been anticipated before his recent visit. Says a Washington dispatch:

"Although Secretary of the Interior Ballinger is still working on his forthcoming report to Congress, which will be the first that he has made since he entered the cabinet, it is possible to outline some of the more important features of that portion of the report dealing with the disposition of water-power sites and coal lands. These are the questions around which has raged the Pinchot-Ballinger controversy that has so disturbed President Taft's official family.

"From present indications, the policy of conservation of the country's natural resources will be one of the big problems before Congress at the coming session, and Ballinger has

some important recommendations to make on this subject.

"He will take the ground in his report that it is for Congress to decide upon the proper methods of conserving these resources. He will emphasize the statement that withdrawals of public lands made during the eight months of this administration were ordered simply as a temporary measure to prevent monopoly until Congress could have time to act. He will give a detailed list of power sites that have been withdrawn by his order, making a total much greater, he will declare, than those withdrawn by his predecessor in the last days of the Roosevelt administration. He will call attention to the desirability of preventing the monopolization of these sites and will pass up to Congress further responsibility in the matter.

"A national policy of dealing with the coal deposits of the west so as to allow the consolidation of several claims and permit the development of coal land by corporations excluded under the present laws will be another recommendation by Ballinger. It is understood. Conservation by law, and not executive action, will be the keynote of Secretary Ballinger's report, which will deal exhaustively with the legal principles underlying his action since he has been the guardian of the public lands, and in a sense will be a defense of his attitude, which has aroused so much criticism from the Roosevelt followers.

"Ballinger will argue that the executive branch of the government has no right to withhold land from settlement in the absence of specific authorization from Congress."

INDUSTRIAL TRAINING.

The Federation of Labor in session at Toronto, Canada, is taking a strong stand in favor of industrial or manual training of pupils at public expense. It is the only logical position for the labor unions to take for they are responsible for the destruction of the apprentice system. But it is also a logical standpoint for the employer of labor, in fact, for every tax payer. Public education must adapt itself to the industrial needs of the community. Otherwise, it is more or less a failure no matter how much or how perfectly Latin and Greek, Music and Drawing, Algebra and Psychology are taught. The aim of education after all is not altogether culture but to enable men and women to be useful members of the community, to enable them to make the best kind of a living. In Santa Fe, Superintendent J. A. Wood has urged, ever since he came here from Las Vegas years ago, the installation of manual training, but lack of room and financial limitations, have thus far prevented the board of education from adopting his suggestions, although to an outsider it seems that at times educational frills were introduced that are less needful or useful than manual training, and the suspicion has been voiced in public repeatedly that such frills were adopted to make place merely for this or that particular person. However, that may be, the day should not be far distant when manual training will be an accomplished fact in this community. The long promised but not yet built Fourth Ward school building might be devoted to manual training altogether, and thus room be provided for a branch of public school work that is the leading feature of modern, practical educational methods.

A DAYLIGHT TRAIN.

The southern Rio Grande Valley will tomorrow see the fulfillment of its wish of many years standing, the running of a daylight train both ways by the Santa Fe from Albuquerque to El Paso. It is a curious fact that while along that line are located the most fertile portions of New Mexico and some of its best towns, yet, very few people have ever seen that section for thus far trains passed through it only at night. However, the Santa Fe will tomorrow begin a double train service, the additional train to traverse the valley in daylight and the New Mexican believes that in consequence there will be increased knowledge of the beauty and resourcefulness of the lower Rio Grande valley, more immigration, greater prosperity and in consequence larger returns to the railroad company. Of late years, the Santa Fe system is doing good work in bringing the Territory and its resources to the front and the installation of a daylight service at the request of the region directly affected is but one instance where the company has accommodated itself to public sentiment and the needs of a particular locality.

GET TOGETHER.

It is to be regretted that no tangible result has come as yet from the "Get Together" movement in the Board of Trade and the Commercial Club. Mutual discussions, however, have determined definitely that both organizations occupy the same ground in everything but one particular. It is on this one point that no agreement could be reached, and that probably, more on account of past history and prejudices, than actual difference of opinion. The members of the Commercial Club feel that they can not retreat from the advanced ground they have thus far taken in fighting so-called "graft." The conservative members of the Board of Trade believe that the business and property interests of Santa Fe can not be united in any organization that makes warfare upon specific officials and apparently usurps the functions of the judicial machinery provided by law.

Tet, this apparent difference of opinion in the two bodies is only surface deep. There is nothing in the constitution and by-laws of the Board of Trade to prevent its members upon majority vote taking up just such causes as the Commercial Club; its members individually are no doubt just as much opposed to public and private graft as the members of the Commercial Club, but thus far the majority have simply deemed it inexpedient to assume the functions of a good government club. On the other hand, there is nothing in the constitution and by-laws of the Commercial Club that would compel the majority of its members to commit the club in any attack upon any individual or officeholder. It is therefore mere tendencies in each of the two organizations that must be considered and these tendencies are of such intangible shape that either body may change them by majority vote at any meeting. When that is once understood clearly, then it is only the pride of the Commercial Club in the work which it has done and which pride has been strengthened because of the counterattacks upon the organization, and the traditions of the Board of Trade, which stand in the way of amalgamation. Division for those reasons, however, is too trivial, too childish, to keep the business, official and property interests from getting together for the growth and welfare of Santa Fe.

It is the commonplace things that are essential to happiness says a recent writer, and he illustrates this point by saying that if the sun would rise only once each year, or once each ten years, what a great event it would be; how the roof tops and mountain peaks would be thronged with an eager multitude watching breathlessly for the orb of day to appear. He demonstrates that the dandelion is a far more beautiful and perfect flower than the rose and the lily, more wonderful than the palm and the oak. Every one is rich therefore, because he possesses the great though commonplace things of life, while those things which men have learned to call wealth because they are scarcer, are absolutely unessential and less beautiful than those things which the poorest may possess and enjoy. It is not a new philosophy but a very satisfying one, making for the serenity that goes with true happiness.

Tucumcari by a decisive vote has decided to bond itself for \$75,000 to install a modern sewerage system. Practically every progressive town discounts the future in making improvements that are essential to growth and health. If done at the start, an improvement like a sewer system, costs the tax payer much less than it will later when a city is built up and covers a much larger area. Tucumcari is only a few years old and is about one half the size of Santa Fe, but already its assessment roll shows a greater total than that of Santa Fe and there is every indication that in a few years more, Tucumcari, will be a much larger city than Santa Fe. In fact, the census may show that Tucumcari is one of the towns that has outgrown Santa Fe because Santa Fe refused to expand its city limits when it had the opportunity.

It is deplorable that the income of the public schools of Santa Fe thus far this year has been less than it has been for several years. For the month just past, the board for the first time in several terms was unable to meet fully its obligations to pay the teachers and interest charges. There is no real excuse for such condition. If the \$50,000 in taxes that are delinquent annually were collected as they should be, the schools would not need to suffer and could keep pace with the growth of the town. Again the New Mexican reiterates the trite saying that the man who does not pay the taxes justly due on his property is as much a grafter as the man who would steal a corresponding amount out of the public treasury.

Las Vegas is in earnest in enforcing quarantine regulations. Alessandro Montoya and Francisco Gonzales were arrested for entering the quarantined house of Manuel Romero where a child lies ill with scarlet fever. Justice of the Peace Trinidad Sena sentenced the first named to ten days in jail for the offense. This gives the lie to the accusation often heard that the native-born people will not be compelled to observe quarantine on account of political reasons. It is wonderful what town authorities may and will do when aroused as to the necessities of quarantine and sanitation.

Last publication Nov. 11, 1909.
Santa Fe, N. M., Oct. 1st, 1909.
Notice is hereby given that on the 2nd day of Sept., 1909, in accordance with Section 26, Irrigation Law of 1907, Ernest H. Fisher of Cimarron, county of Colfax, Territory of New Mexico, made application to the Territorial Engineer of New Mexico for a permit to appropriate from the public waters of the Territory of New Mexico.

Such appropriation is to be made from Pecos river and Mora creek at points on Pecos S. 12 S. W. 1-4. Sec. 15 T. 18 N., R. 12 E.; on Mora N. 1-2 of N. W. 1-4, Sec. 22, T. 18 N., R. 12 E. by means of diversion, and 150 cubic ft. per sec. is to be conveyed to N. 15 deg. 20 min. W. 1975 ft. from cor. to Secs. 32 and 33, T. 17 N., R. 12 E., and Secs. 4 and 5, T. 16 N., R. 12 E. by means of pipeline and there used for power.

All persons who may oppose the granting of the above application must file their objections, substantiated by affidavits (properly backed), with the territorial engineer on or before four weeks from date of last publication hereof.

VERNON L. SULLIVAN, Territorial Engineer.

A clergyman writes: "Preventics, those little Candy Cold Cure Tablets are working wonders in my parish." Preventics surely will check a cold, or the Grippe, in a very few hours. And Preventics are so safe and harmless. No Quinine, nothing harsh nor sickening. Fine for feverish, restless children. Box of 48 at 25c. Sold by Stripling-Burrows Co.

It is an admitted fact that real estate, financial men and merchants all say that quickest and best results are obtained by advertising in the New Mexican.

The Enavant Club will hold the regu-
lar bi-monthly meeting at the rooms
No. 105 Washington avenue, Monday
afternoon at 3 o'clock. The second
week's program of the Bay View
Course, will be reviewed, with Miss
Sloan, leader, followed by Current
Events and a business session.

The Methodist parsonage was the
scene of a very merry gathering last
Monday evening when Rev. and Mrs.
Lucas entertained the Epworth
League and all the young people of
the church. After a short business
session of the league, a unique pro-
gram was carried out, creating much
merriment. Dainty refreshments were
served. The guests loth to depart,
were pleased that this was the first
of a series of such entertainments.

On October twenty-ninth the
Fifteen Club spent a pleasant after-
noon with Mrs. Jaffa. The principal
number on the program was "An Es-
timate of P. Morian Crawford" read
by Mrs. Weltmer. This was followed
by a continuation of the readings from
Locke's novel "Septimus" by Mrs.
Boyle, and Current Events. On No-
vember the 12th the club met with
Mrs. Marsh. Mrs. Wood read a charm-
ing original story "The Uninvited
Guest" followed by a quaint legend
translated from the French of the
12th century, entitled "My Lady's
Tumbler," by Mrs. Harroun. A dis-
cussion of Current Events followed,
which, by long established custom,
concludes each afternoon's program.
The next meeting will be at the resi-
dence of Mrs. Thomas.

In Honor of Mrs. Spiess.

"Mrs. Charles A. Spiess of Las Ve-
gas, was the guest of honor at a most
delightful whist party given yester-
day afternoon by Mrs. M. R. Mendle-
son at her home on South Fourth
street. Large yellow chrysanthemums
were used for decorating and dainty
Japanese place cards of yellow were
most effectively used. A prize was
awarded to one at each table making
the highest score and ran as follows:
Mrs. A. R. Streicher, Japanese vase;
Mrs. Chas. Sandusky, a beautiful pic-
ture; Mrs. D. G. Dwyer, a dainty hang-
ing flower vase; and Mrs. J. Van Houten,
a beautiful potted plant. Mrs.
Spiess was presented with a handsome
guest prize. Among those present
were Mrs. Spiess, Mrs. A. C. Price,
Mrs. E. E. Studley, Mrs. B. Sherrod,
Mrs. J. J. Shuler, Mrs. W. Kegel, Mrs.
M. M. Dawson, Mrs. A. R. Streicher,
Mrs. Chas. Sandusky, Mrs. G. J. Pace,
Mrs. Clara Schroeder, Mrs. A. L.
Hobbs, Mrs. D. B. Dyer, Mrs. J. Van
Houten, Mrs. E. J. Dedman and Mrs.
W. A. Chapman. * * * "Mrs.
E. E. Studley was the charming hos-
tess at a morning bridge and
luncheon given Saturday morning in
honor of Mrs. Charles Spiess of Las
Vegas. The color scheme was carried
throughout in violet, a touch of the
dainty color here and there being
found throughout the rooms. Dainty

Which are You Paying For?

The Big Load or the Little Load.

If you have an ordinary heater you are buying the big load of soft coal
where the small load would be sufficient fuel to produce the same
amount of heat in the

WILSON HEATER.

The celebrated Hot Blast Down-Draft in the Wilson produces perfect
combustion and the burnable fumes which escape in other heaters are
consumed in the Wilson, so that every shovelful of coal in
the Wilson Heater will produce 40 per cent more heat than
the same amount of coal in other heaters.

No one likes to waste money—why throw away 40 per
cent on every dollar you spend for fuel.

DOING A BIG WORK
IN A BIG WAY.Over One Hundred Men Are Employed
on the Arroyo Hondo Dam
Construction.

A visit to the proposed Arroyo Hondo dam, six miles south of Santa Fe, is worth while. It is a scene of great activity and Contractor Sten Lund is doing a big work in a big way. In fact, a glance from the brink of the canon in which the dam is being placed, gives the impression that the work undertaken is stupendous. Over one hundred men are now employed and the camp itself is worthy of study for all the men are housed and fed right on the ground. There are big mess and commissary tents, big bunk tents, while another large tent serves as stable for forty or more horses used in hauling. There are individual cabins for the officers and bosses. One is impressed with the neatness, cleanliness and sanitary conditions of the camp. The food served in the large mess tent from a well equipped kitchen is above the average dished out in construction camps. The commissary tent is well stocked and there are mountains of alfalfa and feed for the live stock. Work is completed on the great stone crusher, a mile and a quarter above the camp, as well as on the hoppers, grinders and the automatic tramway on which the cars will descend to pour their contents into the structure which when completed will form the dam. Excavations are being made to bed rock and a diamond drill works day and night testing the entire ground to which the dam will be tied and upon which it will rest. Sten Lund, the contractor, though a young man, has had a large experience in construction work, an experience extending as far south as Argentine Republic, where he had charge of a camp of 12,000 men building one of the largest dams in the world. He is a live wire, a hustler and the moment one looks at the preliminary work already done at the Arroyo Hondo, one is convinced that the work will be completed and that it will be well done.

The hoppers will have a capacity of 650 cubic yards a day, and it will not take long, therefore, before the Arroyo Hondo is dammed and that a large lake will fill the natural reservoir site. Its completion will mean much to Santa Fe and its business interests. Even the construction work itself means the expenditure of almost \$10,000 each month among local business houses.

IRRIGATION STATISTICS
IN COMING CENSUS.

Director Durand Adopts the Suggestion of Colonel R. E. Twitchell and Senator Hooker.

Spokane, Wash., Nov. 13.—Census Director Durand has advised Arthur Hooker of Spokane, secretary of the 18th national irrigation congress that the bureau's agricultural schedules will call for the acreage and yield of the various crops that are under irrigation and the total irrigated area in the United States. However, it has not been authorized to go so far as to take in the enumeration of the people engaged in and depending upon irrigation.

Fresh and pretty, funny and tuneful, snappy and dashing the new music play "The Girl Question" which will be presented at the Elks theater on November 16th, is beyond all question the best of the series of La Salle Theater productions, including "The Time, The Place and the Girl." "The Empire, and a half dozen other record breaking successes.

Although the Girl Question has been running in Chicago since the 17th of August, it is still playing to capacity, while the company which will be seen here has a cast which is in every way its equal and in several instances its superior.

The characters in "The Girl Question" are every day men and women who are pictured with such fidelity to life, who are so natural and so human that they create an instant sympathy with an audience which makes them appreciative and absorbingly interested from the rise to the fall of the curtain.

Like "The Time, The Place and the Girl," the book and lyrics for "The Girl Question" were written by Frank Adams and Will Kough, and the music by Joseph E. Howard. The jokes are keenly witty and original, the situations funny, and though at moments there is a dramatic situation or a tenderly pathetic line, which generally seem incongruous or bordering on the melodramatic in a musical comedy, they are introduced here with a tact and deftness which only heightens their enjoyment, as a contrast to the fun of a moment before. Another merit of the play is that it is absolutely clean. There is not a suggestive line or scene in the play, and "The Girl Question" is a question of girls, its rating must be A. No. 1, for no prettier more youthful or merrier chorus was ever assembled. The show girls are regally beautiful, yet have no lack of animation, while the little brothers are childishly eager and happy in their delightful dances. Ned Wayburn staged the production.

rigation for a livelihood, the capital invested in plants and the private companies engaged in each state. He added that there is an increasing public demand for statistics and other information relative to water power, and that the bureau expects to develop data along this line in connection with its census of manufactures. Officers and members of the irrigation congress believe that a compilation of the data requested would be of importance, and it may be that another plan will be worked out in 1910, when the sessions will take place at Pueblo, Colorado.

A Religious Author's Statement.

Rev. Joseph H. Fesperman, Salisbury, N. C., who is the author of several books writes: "For several years I was afflicted with kidney trouble and last winter I was suddenly stricken with a severe pain in my kidneys and was confined to bed eight days unable to get up without assistance. My urine contained a thick white sediment and I passed some frequently day and night. I commenced taking Foley's Kidney Remedy, and the pain gradually abated and finally ceased and my urine became normal. I cheerfully recommend Foley's Kidney Remedy." Sold by all druggists.

IMPORTANT FEDERAL DECISION IN IDAHO.

Homesteader Cannot Sell Timber From His Claim and Then Relinquish.

Spokane, Wash., Nov. 13.—Lumber mill and mine operators in Spokane look upon the decision of the federal court for northern Idaho in its new ruling on mine timber as the most far-reaching that has been handed down in years. The court found the Bunker Hill and Sullivan Mining Company guilty of wilful trespass and gave judgment to the government for \$3,398. W. M. Messenger, a homestead entryman of Kellogg, Idaho, sold that amount of timber from his claim and then relinquished. The court ruled that the homesteader cannot hide behind the statute of 1878 and remove timber off the land, even after a mining claim has been located on land subsequent to homestead filing. It was held that while the law in question permitted the removal of timber from mining land for mining purposes it cannot be construed to cover the removal of timber from land taken as a homestead. There are scores of similar cases in Idaho and other states in the northwest.

The characters in "The Girl Question" are every day men and women who are pictured with such fidelity to life, who are so natural and so human that they create an instant sympathy with an audience which makes them appreciative and absorbingly interested from the rise to the fall of the curtain.

Like "The Time, The Place and the Girl," the book and lyrics for "The Girl Question" were written by Frank Adams and Will Kough, and the music by Joseph E. Howard. The jokes are keenly witty and original, the situations funny, and though at moments there is a dramatic situation or a tenderly pathetic line, which generally seem incongruous or bordering on the melodramatic in a musical comedy, they are introduced here with a tact and deftness which only heightens their enjoyment, as a contrast to the fun of a moment before. Another merit of the play is that it is absolutely clean. There is not a suggestive line or scene in the play, and "The Girl Question" is a question of girls, its rating must be A. No. 1, for no prettier more youthful or merrier chorus was ever assembled. The show girls are regally beautiful, yet have no lack of animation, while the little brothers are childishly eager and happy in their delightful dances. Ned Wayburn staged the production.

PENITENTIARY AIDS.
