This Annual Report is brought to you for free and open access by the Law Journals at UNM Digital Repository. It has been accepted for inclusion in Annual Reports by an authorized administrator of UNM Digital Repository. For more information, please contact disc@unm.edu.
A six per cent net gain in paid subscriptions during the fiscal year was continuing indication that NRJ is timely, gaining well deserved recognition, and almost unlimited in potential. At a time when environmental concerns are a foremost topic of the day, NRJ enjoys a reputation as one of the top scholarly publications in the area.

"You're Not Getting Older, You're Getting Better"

Professor Joseph Sax of the University of Michigan School of Law, while leading an Environmental Law seminar at Ghost Ranch in August, 1971, devoted one session to listing essential books for attorneys practicing in the environmental law area. He said "NATURAL RESOURCES JOURNAL, published by the University of New Mexico Law School, is the best environmental publication in the law field."

Professor Irving J. Fox, Director of the Westwater Research Center of the University of British Columbia, wrote as follows: "Let me begin by commending you on the uniformly high quality of the articles included in the JOURNAL. I know you must have a difficult task in sifting from among the many manuscripts that are offered, but in my judgment, you can rest assured that your selections have been good ones. As a result, the JOURNAL has become well established as the leading one in the area of natural resources policy and institutions."

Dr. Edward A. Ackerman, Executive Officer of the Carnegie Institution of Washington, D.C., writes: "I am pleased to have this opportunity to tell you that I consider the JOURNAL a worthwhile production. You have maintained a high scholarly standard, a consistently oriented "relevant" point of view, and the technical editing has been excellent."

ASIL-UNM Regional Conference

A new undertaking for the JOURNAL was the co-sponsoring, along with the UNM School of Law, the American Society of International Law, and the World Peace Through Law Committee of the New Mexico State Bar, of a regional meeting of the ASIL on April 29, 1972.
Devoted to the topic "Pollution and Political Boundaries: U.S.-Mexican Environmental Problems", the papers presented at the conference will be published as a symposium in the October 1972 issue. Henry Rivera, editor for that issue, and his assisting editors and staff served as hosts and hostesses for the out-of-town panelists and honored guests, each being responsible on an individual basis for one particular guest. These gentlemen, other attendees, and registrants have sent such enthusiastic commendations to the ASIL on our conference being the best planned regional meeting that they had ever attended, with uniformly high quality of presentations, that the ASIL is now planning to hold a regional meeting next year in Mexico City.

Panelists and their topics which will be published in Volume 12, issue 4, were:

The October 1971 and January 1972 issues contained articles of...
varied general interest, with the July 1971 issue devoted to a symposium entitled "Environmental Policy: Theory, Concepts and Problems", and the April 1972 issue a symposium entitled "The Human Environment: Toward An International Solution." This symposium was scheduled to coincide with the UN Stockholm Conference on Environmental Problems. The July 1971 issue was the first issue of the JOURNAL to be completely sold out on a single copy basis in less than six months after date of publication. Negotiations are underway with Praeger Publishers to republish the content of the July 1971 issue, along with the content of the April 1972 issue, as a paperback book.

Notes and Comments published during the year included:

The Standing Problem--Sierra Club v. Hickel

The Need for a Noise Pollution Abatement Act

Applying the Fairness Doctrine to Environmental Issues--Friends of the Earth v. FCC

Subdivision Planning Through Water Regulation in New Mexico

Citizen Enforcement of the Refuse Act: Qui Tam Pro Domino Rege Quam Pro Se Ipso In Hoc Parte Sequitur Flops; Mandamus Next?

Outline of Plans For Next Year

The July 1972 and April 1973 issues will be of varied composition with articles from the following, among others:

Prof. Edgar S. Bagley
Kansas State Univ.

The Ground Water Depletion Allowance Under Federal Income Tax Law
Natural Resources Journal  
Annual Report 1971-72  
Page 6

Prof. Andrew Whinston  
Purdue University and  
Dr. Terry A. Ferrar  
Penn. State University

Taxation and Water Pollution Control

Determining Optimum Capacity  
for Low-Density Resource-Based Recreational Facilities

Airfield Noise Abatement in the Federal Republic of Germany

Proposed Changes in the Mining Law

Impacts of Reallocation of Responsibilities for Public School Financing on Property Taxation of Forest and Other Conservation Lands

Sierra Club v. Morton Decision (comment)

Sierra Club v. Morton Decision (comment)

Can Public Land Managers Be Allowed To Manage: Breaking the Impasse

The October 1972 issue, a symposium to be entitled "U.S.-Mexican Environmental Problems" was fully detailed under the heading "ASIL-UNM Regional Conference", on page 2.

Planned for January 1973 is a symposium "Providing an Information Basis for Both Public and Private Decision-Making in the Natural Resources Field," with Professor Irving Fox as co-editor. Scheduled authors and their contributions are:

Anthony H.J. Dorcye  
Univ. of British Columbia

Effluent Charge Systems and Regulations Combined With Cost-Sharing and/or Financial Penalties
Information Generation for Arriving at Suitable Water Levels

Sources and Content of Information Which Will Be Important To Water Resources Development in the Future

The Legal Aspects Involved in Natural Resource Decision-Making

Public Water Resources Project Planning

Theory Relevant to Providing Information for Resources Decision-Making

A July 1972 mail solicitation of about 4,000 potential subscribers, made from lists of persons now subscribing to land economics, mineral law, and water resources periodicals, is hoped to increase the number of new subscriptions for 1972-73 above the 6% of 1971-72.

Automated Billing

In March, 1972, the results of a study to automate the manual billing system were received from Mr. Louis R. Leuring, Director, Data Processing Center. The study had been requested to determine whether it might be financially feasible to go to computer billing, thus removing from the expanding number of demands on the secretary's time the annual typing of renewal notices and invoices. Estimated cost of setting up such a procedure was approximately $3,000, and estimated cost of annual updating and billing was approximately $650, based on 1,400 subscribers. The matter has been temporarily shelved.

Finances

Five issues were published and billed during the year, with the April 1971 issue coming out tardily this fiscal year. Total billed printing cost for the five issues was $14,555.25, plus reprints billed at $1,749.30. The Ten Year Index also was billed during this year. These circumstances combined to deplete most of the reserve which was on hand at the close of fiscal 1970-71. Four issues are budgeted for 1972-73 and there can be no deviation from this without an increase in the budget. Printing costs have dropped somewhat, with each issue now running closer to $3,000 than to $4,000, as they had run during the previous year.
