## Patent Overview

Explain Difference: Intellectual property: Copyright, trademark, tradeNAME, secret

### Define

Patent is a way to protect an idea. Need not be tangible.

“the right to exclude others from making, using, offering for sale, or selling” the invention in the United States or “importing” the invention into the United States. What is granted is not the right to make, use, offer for sale, sell or import, but the right to exclude others from making, using, offering for sale, selling or importing the invention.

A patent for an invention is the grant of a property right to the inventor, issued by the Patent and Trademark Office. The term of a new patent is 20 years from the date on which the application for the patent was filed in the United States or, in special cases, from the date an earlier related application was filed, subject to the payment of maintenance fees.

70% of patent lit not published elsewhere.

Patentability search

Three kinds: utility, (including chemical), plant, design.
