According to Secretary Beale, the Sioux City & Northern is in financial straits. A receiver will be asked for.

Hundreds of curious persons visited the Cincinnati jail to get a glimpse of Joe Hardin, the Centralia train robber.

Harley Johns and Slim Reynolds were sentenced to two years in prison at Jackson, Mo., for attempting to wreck a train.

Feeling against Brotherhood Chief Arthur is so strong that he may be retired as head of the engineers' organization.

H. S. Lutz, formerly agent at the Las Vegas hot springs station, has taken charge as agent of the Santa Fe station.

Any employee on a Santa Fe passenger train found smoking while on duty, either at stations or on trains, will be promptly discharged.

The latest suggestion for electricity is the prevention of train robberies by making express cars burglar proof by so charging the safe that any man touching it will be electrified. Supt. Young, of the Chattanooga Electric railway, is the inventor.

Recent train robberies in the west have caused so much uneasiness among express companies having headquarters in Omaha that a general movement has been inaugurated toward having safe put on all trains that cannot be opened by burglars.

W. W. Webb, a well-known ticket broker, was arrested at Topeka by W. J. Black, assistant general passenger agent of the Santa Fe railroad. He was released on a bond for \$3,000, signed by his wife, who is quite wealthy.

"The Santa Fe general freight office," said an officer of the road, "is conducted on the civil service rule as far as possible. We have men with us now getting from \$75 a month up, who only a few years ago started in as office boys at \$15 a month. The road feels that it pays to adopt this plan, for it gives them some-

thing to look forward to. It is only where the clerk is not qualified to fill a higher position that any deviation from this rule is made."

The Santa Fe is in correspondence with the various roads comprising the western passenger association, endeavoring to secure cheap rates to California this winter.

What is proposed is a \$60.00 rate from the Missouri river, and an \$80 rate from Chicago. The chances for an immediate acceptance of these rates by the association are very meagre, but the leading western lines would like to have them in effect by the 10th of October, when the irrigation congress is held at Los Angeles.

In Kentucky it is held that where a passenger is permitted, at his own solicitation, to travel on a freight train, he takes upon himself the additional risks, if any, in excess of the risks incident to a passage on the same road in a passenger train, but he assumes no greater risk as to the condition of the track for the safety of trains moving on it.

There are twenty-one men employed at the railroad stone quarry in the lower end of Silver City. Two thousand carloads of rock will be quarried for the ballast and repairs on the railroad track where it has been damaged by floods.

The Atlantic & Pacific trains continue to come in a trifle of schedule. This might be expected for a day or two after the repairs were finished.
