Albuquerque Weekly Citizen.

VOLUME 4.

ALBUQUERQUE, NEW MEXICO, SATURDAY, NOVEMBER 11, 1893.

NUMBER 1.

SHERMAN!

Old John is Ticked over the Republican Victory.

Freight Wreck on Santa Fe at Trinidad.

Ship Burned at Sea and Eleven Lives Lost.

WEST OVER THE FALLS.

Washington, Nov. 10.—John Sherman has returned to the city and is elated over the majority of the republicans in Ohio. He said that he regards the result as a protest of the unemployed against tariff changes. He thinks that no democratic congressman from Ohio dares to vote for the proposed tariff bill.

Receivers Appointed.

Denver, Nov. 10.—Judge Hallett, in the United States court this morning, appointed George K. Randolph, of Denver, and Cornelius Sweetland, of Providence, Rhode Island, as receivers of the Denver City Cable railway company. Each are to give a bond of \$50,000.

The company is in a bad financial strait and is unable to meet interest on principal on floating indebtedness of about \$80,000 now coming due. The receipts have fallen off forty per cent this year, and the road is not even paying operating expenses.

Demanding \$50,000.

Cleveland, Ohio, Nov. 10.—A man entered the Society Savings bank this afternoon and going into the treasurer's private office, demanded \$50,000, saying that unless it was handed over to him immediately he would blow up the institution with a bomb which he carried in his hand. Treasurer Herrick grappled with the man, who drew a revolver, shooting Herrick, and in the excitement which followed made his escape.

Siberian Prisoners.

Washington, Nov. 10.—The case of five Siberian prisoners who were picked up by Pacific American vessels and brought to San Francisco Wednesday night, involves a new point of international law as to whether they be surrendered to Russia. The question of whether the men should be treated as political prisoners will decide their fate.

Want to be Counted.

Chicago, Nov. 10.—Local prohibitionists have decided to put a candidate in the field in the forthcoming election for a mayor to fight the unpopular term of the murdered chief executive. The leaders do not expect to command a large vote, but simply desire to make their influence felt and to record their strength.

Week and Engineers Injured.

Trinidad, Nov. 10.—A freight wreck in the Santa Fe yards, which occurred at this place last night at eleven o'clock, demolished an engine and three coal cars. Engineer O'Day and a brakeman were badly scalded. The former may not recover. The track was cleared by noon.

Ocean Steamer Burned.

Quarantine, L. I., Nov. 10.—The steamer Seneca arrived this morning bringing Captain Hoffman and fifty-six of the crew of the steamer, City of Alexandria, which was burned near Havana on November 1st, and resulting in the loss of eleven lives and the vessel.

West Over the Falls.

Niagara Falls, Nov. 10.—Richard Hartigan, chief engineer of the city water works, fell over the water works building and was carried over the falls. The accident was not discovered until eighteen hours afterward. The body had not been found.

The Fighting Ground.

New York, Nov. 10.—It is stated this afternoon that \$5,000 has been received from Jacksonville for the expenses of Corbett and Mitchell. This assures the big fight to Jacksonville.

Treaty Concluded.

Berlin, Nov. 10.—The Russian delegates made concessions to the Russian and German commercial treaty, so that it was concluded to-day.

Rusk's Condition.

Milwaukee, Wis., Nov. 10.—Hon. Jerry Rusk's condition is unchanged.

Silver.

New York, Nov. 10.—Silver, 70. Lead, \$3.20.

A Bad Man.

Columbia, S. C., Nov. 10.—At the state fair grounds to-day W. T. Metzger, who was selling rice beer, was ordered by the governor to stop, but paid no attention to the

order. A large posse formed who accompanied the governor to the booth where Metzger was selling the beverage, and the latter was again ordered to desist. Metzger threatened to kill any one who attempted to prevent him selling. Governor Tillman finally retired, leaving Metzger to continue selling, which he did until his stock was exhausted. Metzger shot a judge here two years ago and is a dead shot and a bad man. Trouble is likely to follow.

Political Scheme.

New York, Nov. 10.—From advices received here from different parts of the country it is becoming evident that the political scheme which it is proposed to hatch at next week's convention of the Knights of Labor looking to the political amalgamation of every labor organization and union in the country under a supreme authority, which should have power to throw the labor vote to any national candidate who might be allied or pledged to the support of the interest of the wage-working element, will fail of success. The Federation of Labor is known to be antagonistic to the movement, and the reports received here seem to indicate that most of the prominent leaders of the Knights of Labor outside of Philadelphia are likewise disinclined to surrender their political rights to the control of any non-representative body.

English Interested in the Case.

New York, Nov. 10.—A London dispatch says: There is a good deal of interest manifested in legal circles which is reflected in the various law publications concerning the probable length of the legal proceedings in the case of the assassin of Mayor Harrison at Chicago, and the course of justice in this particular case will be watched closely in order that comparisons may be made with the swiftness of the English law. Were such a crime to have been committed in this country short shrift would have been given the criminal. A recent examination of the records of the trials for capital offenses in eight of the large cities of the country develops the fact that, with few exceptions, the murderers had expired their crimes within two months of their commission.

Near Fall League.

Chicago, Nov. 10.—After a recess of over two weeks the representatives of the various cities interested in the formation of a new western base ball league met informally to-day at the Grand Pacific hotel, and expect to have all arrangements completed within a few days. Since the last meeting numerous cities have pressed their applications for recognition of their respective teams, among them being Lincoln, Neb., Rockford, Ill., and St. Joseph, Mo. It is thought that the league will be composed of Kansas City, Sioux City, Detroit, Minneapolis, Toledo, Milwaukee, Indianapolis and Omaha. Denver is regarded as being too far away, although it has strong advocates. The conference is being held with closed doors.

Next World's Fair.

Chicago, Nov. 10.—American headquarters for the World's Fair which opens in Antwerp on the 1st of May next, were opened to-day in the Hartford building, opposite the Tribune building on Madison street, in charge of James P. Holland, who was chief assistant to Major Moses P. Handy in the department of publicity and promotion of the Columbian Exposition. A large number of the exhibits at the World's Fair, together with several of the attractions from the now celebrated Midway Plaisance, had been entered for transfer across the ocean to the Belgian show up to noon to-day.

Indians Who Sacked Palomas.

Deming, N. M., Nov. 10.—The Tomichi Indians who sacked Palomas, 600 on the custom house and guards at that place and stole guns, provisions and money, will be exterminated. A dispatch from the City of Mexico this morning says that the government will hunt them down immediately. They are Indians who survived the massacre in the engagement with Diaz troops last May, and are bitter against the government.

Victims of a Wreck.

Chicago, Nov. 10.—Lettie Bingham of Chicago and D. W. Snow, Sr., of Lynwood, died this morning from injuries received in the Rock Island wreck last Wednesday. These deaths make eight fatalities resulting from the collision.

Tariff Bill.

Washington, Nov. 10.—It is announced that the tariff bill is nearly ready for the public. The bill is based on tariff for revenue only.

Mr. Moore, the postmaster at Bradshaw, Va., after reading an advertisement of Chamberlain's Colic, Cholera and Diarrhoea remedy, concluded to try it in two cases for colic and three for diarrhoea with perfect satisfaction. I have handled and used a great deal of patent medicine but never tried any that gave as good results as this. For sale by T. H. Burgess & Son, druggists.

IRRIGATION!

Closing Proceedings of the Deming Convention.

Excellent Address to People of Arid Region.

Resolutions on Irrigation Adopted by the Convention.

GOOD WORK PERFORMED.

Deming, Nov. 9.—The afternoon of Wednesday wound up the Irrigation convention. Addresses were made by M. A. Downing of Santa Fe, ex-Governor Ross, Prof. E. M. Boggs of Arizona, Judge Emory of Kansas, and Prof. Selby of Deming. Gov. Prince was excused from speaking, he having to take the train east. Gov. Ross and M. A. Downing were added to the committee on resolutions. This committee reported as follows:

To the Citizens of the Southwest:

The southwestern Irrigation Convention, held at Deming, New Mexico, Nov. 7 and 8, 1893, respectfully submits to your thoughtful consideration the following statement of facts:

I. The question of the admission of the territories of Arizona and New Mexico, as states of the Union is one far removed from partisan politics and should hereafter be urged upon higher grounds, among which are the following:

First, the wholly inadequate means now available for the presentation of business enterprises, such as comprehensive irrigation projects, mining and metallurgical undertakings of wide scope and the numerous concomitant industries which together affect vitally the moral and social welfare of our people not less than our national progress.

Second, it is a fact well known to our citizens that vast sums of life capital are available for our needs whenever we can place upon a secure basis such investments as may legitimately be founded upon the public honor and good faith, supported by the assets which it has been demonstrated that we possess. The pecuniary resource is now beyond our reach simply by reason of our lack of power to fortify our contracts by legislative action as in the several states.

Third, the boundaries of the states and territories being established by natural or artificial lines not in any sense dependent upon the distribution of our water supplies and the southwest being in great measure interested in the adjustment of questions arising from the utilization of waters in the natural channels not lying wholly in one state or territory, it is absolutely essential that we should be able to litigate upon terms of strict equality with our neighbors on all sides. This is impossible under a territorial form of government, as we have not the rights of states to be heard in the United States courts.

Fourth, the arid lands within our borders belonging to the United States are now subject to sale and use, and more than this, the waters available for irrigation are subject to diversion without our control or consent, and thus the conditions which most nearly concern even our future existence as commonwealths are beyond our own control in a large degree. The admission of the territories as states will materially change all these hindrances to advancement, and we emphatically urge the placing of these vital considerations within the province of the citizens whose lives and fortunes are devoted to the upbuilding of the civic divisions we represent.

II. The International Irrigation Congress which met in Los Angeles, in September, 1893, has wisely proposed a plan of organization for each and all of the states and territories interested in these great questions, and we respectfully advise and strongly urge the citizens of the southwestern commonwealths represented in this present convention to cordially unite with the state committee to be appointed by the national executive committee of said International Congress, to supplement the work of these local commissions and of the southwestern convention by calling public meetings in each state and territory and by contribution of funds and effort toward the furtherance of the great common cause of irrigation.

III. It is the sense of this convention, that whatever views may be entertained by individuals or communities regarding the manner of bestowing national aid to the arid region, some plan must eventually be adopted by which practically all the proceeds of the sale of lands within the borders of each state in this vast tract may accrue to the benefit of said lands, and also that some provision must be made whereby the national waters of this region shall become equitably available for the irrigation of lands without power of control of large quantities of limited areas. In brief, we demand that the rights and needs of home makers shall be respected first of all and for all time to come.

The address was adopted.

The address from the same committee was read.

Resolved, That the southwestern Irrigation convention appoint an executive committee of nine members to be composed of three members from each of the commonwealths of Arizona, New Mexico and Texas, each delegation present at this meeting to name its own members of said executive committee.

This committee will be charged with the power and duty of advertising and perpetuating the objects of this convention, of circulating the address of this committee on resolutions adopted by this convention, and generally to take all needed steps to further the interests of the common people of the southwest, especially with reference to irrigation matters.

Resolved, That the members of our executive committee for Arizona, New Mexico and Texas respectively, shall constitute three independent sub-committees to co-operate with the commissions appointed under the auspices of the International Irrigation Congress, for the purpose of increasing interest and arranging for local conventions in each of the three commonwealths here represented.

Resolved, That the secretary of this

convention be instructed to communicate with the chairman of the national executive committee of the International Irrigation Congress, and to make all possible effort to secure the next meeting of said congress at Albuquerque, New Mexico.

Gov. Ross offered the following supplemental resolution of New Mexico members of the committee, and for the action of New Mexico delegates.

Resolved, That this convention recommends the congress of the United States, that in the act creating New Mexico a state, all unclaimed, non-mineral public lands included within the present territorial boundaries be ceded to such state; but upon the express condition that all reclaimable portions of said lands be brought under irrigation within reasonable time, at the expense of the state, and that such reclaimed lands be sold by the state to actual settlers only, in tracts of not more than eighty acres to one person with sufficient water right, and a price not exceeding what may be necessary to reimburse the state for its expenditure for such reclamation.

Upon motion the following were appointed a committee for the purpose of communicating with the officials of the International Irrigation Congress, with a view to holding the next meeting of that body in Albuquerque, New Mexico, and making preliminary arrangements therefor: E. S. Stover, H. B. Ferguson, of Bernadillo county; C. F. Eassey, of Santa Fe county; W. H. H. Lowery, of Dona Ana county; Harry Wigham, of Colfax county, and ex-officio, R. P. Barnes, of Silver City, secretary.

Judge Emory was thanked for his attendance and address.

A permanent executive committee was appointed as follows: For New Mexico, M. A. Downing, E. S. Stover and S. M. Ashenbrenner; for Arizona, William F. Blaine, of Yuma, Alex. C. Crispell, of Phoenix, and J. F. Fitzgerald, of Salt Lakeville; for Texas, Charles Longmire, of El Paso, J. H. McHenry, of San Antonio, and J. H. Sternowitz, of Austin.

A vote of thanks was extended to the Deming people.

There being no further business, the convention adjourned sine die.

School Census, Bernadillo County.

As shown by the books of the superintendent of schools, the school census as returned to his office this fall shows a total of 5,779 minors, unmarried, between the ages of 5 and 21 years, as follows:

No.	School District.	Children.
1	Bernadillo	432
2	Carmichael	273
3	Alameda	132
4	Rancho de Albuquerque	121
5	Los Bariles	171
6	Los Padillas	152
7	San Antonio	82
8	Los Griegos	113
9	El Rancho de Atrisco, East	181
10	Chili	129
11	Pajarito	164
12	and 26 City of Albuquerque	570
13	Albuquerque	511
14	San Isidro	64
15	San Isidro	84
16	San Isidro	119
17	San Isidro	84
18	Pena Blanca, South	106
19	Canon de James	104
20	Algodones	129
21	Nacimiento	64
22	La Ventana	93
23	Los Candelarios	138
24	La Madera	39
25	Wallace	39
26	Guadalupe	55
27	and 30 Gallup	236

37	Chili	138
38	Rancho de Atrisco, West	67
39	Mitchell	26
40	Bariles, South	16
41	Pena Blanca, North	54
Total		5,779

A Humorous Inspector.

Geo. H. Waterbury, a postoffice inspector, has been circulating through the territories stirring up some postmasters and postal clerks. While in Arizona he succeeded in having arrested a postal clerk for getting away with a registered package and a postmaster for not sending the government cash to the treasury with sufficient promptness. These successes were too much for the feeble mind of the inspector, and he came to the conclusion that the entire postal department of this section of country rested on his shoulders. He passed through Lordsburg with that idea strong in his mind. While here he noticed a letter being mailed on the train, and threatened to have the mailer arrested if he ever did so again. It happened that the person threatened knew his rights in this world and the inspector's bluster did not go. He went up into Bernadillo county and there found a postmaster who had handled a registered letter from which it was claimed some sixty dollars had been stolen. He ran a blazer on this poor postmaster, arrested him and took him to Albuquerque. He had no warrant, and even with one he had no more right to arrest him than any private citizen would. When the arrested postmaster got to Albuquerque he consulted a lawyer, who got after Inspector Waterbury suddenly, and it is said instructed him on some important points in the postal laws.—Lordsburg Liberal.

The Wish Granted.

You have often wished for something to take the place of pills. Now try a 25 cent package: Simmons Liver Regulator powder. Take it dry on the tongue or make it into a tea. It is pleasant to take and gives quick relief—two good recommendations.

Resolved, That the secretary of this

THE RAILROADS.

Brief Facts Concerning Track and Train.

Texas ticket scalpers are going out of business. The state law is too strict down there.

The winter time table over the narrow gauge will go into effect in about two weeks.

Engineer F. J. Garrett is at the Las Vegas hot springs to use the baths for rheumatism.

The Mexican Central is going to first principles, and will in future burn wood instead of coal.

The Santa Fe has inaugurated a weekly through tourist car line between Los Angeles and St. Louis.

Mollen, the train dispatcher whose error caused a Southern Pacific wreck and six deaths, is threatened with insanity.

The Chicago & Alton railway has declared a quarterly dividend of \$2 a share on all stock, payable in gold, Dec. 1.

A special train on the Baltimore & Ohio Southwestern made the run from St. Louis to Washington, Ind., 165 miles in 165 minutes.

Frank Thomas, machinist, is very low at the Las Vegas hospital, with pneumonia. He is carefully looked after by his brother machinist.

A change of time occurs on the narrow gauge line on Sunday next. The train will arrive at Santa Fe at 8:10 p. m. and depart at 9 a. m.

The new bridge of the Union Pacific at the crossing of the Canadian river will be built one and one-half miles farther down stream than the old bridge, on account of quicksands.

The Toledo, St. Louis and Kansas City railroad (the Clover Leaf) will probably soon be sold and the company reorganized. Holders of \$5,000,000 of the \$9,000,000 in mortgage bonds have given consent.

Thomas Oakes, president of the Northern Pacific, will soon resign. Efforts are being made in the Northwest to induce the government to consider the purchase and operation of the Northern Pacific.

The North Chicago street railway has commenced the use of compressed gas as a substitute for oil lamps. A plant has been built for the manufacture of the gas, and 200 cars have already been fitted up.

Several extra freight crews have been added to the Chicago division of the D. & R. G. this month on account of the increasing business. There is still a freight car famine along the line in Rio Arriba county.

Between Santa Fe and Espanola 480 feet of new bridges have just been completed. Several trains are engaged in hauling ties from the Santa Fe mountains for further improvement of the Santa Fe Southern bed.

It is estimated by Southern Pacific traffic officials that there will be at least seven thousand carloads of oranges shipped from the southern part of California this year. Last year's shipments amounted to about sixty-six hundred.

There is complaint in the operating departments of eastern roads that owing to the World's fair rush, repairs on locomotives and rolling stock have been neglected until there are now hundreds of engines and cars really unfit to meet the demands of winter.

Some eastern roads are substituting what is called a bull nose for the ordinary push bar on the pilot of a locomotive. The push bar sometimes breaks, while the bull nose does not, and the nose can be turned up and back on the pilot platform when not in use.

The total number of excursionists into Chicago by the Santa Fe road from May 1 to October 31, partially estimated, was 63,618. This is exclusive of commutation passengers from near by points which business amounted to some 25,000 passengers more. The great majority of these passengers came from Kansas.

The air brakes on railroads are being built with a view to their use on trains of 100 cars. The plant on each train is being built so that it can be used in such a way as to bring the speed down from eighty to thirty miles per hour within five seconds. Great power has to be used, and every part of the apparatus has to be perfect to stand the strain.

There are forty men and two train crews at work in the Ortiz stone quarries and along the Galisteo rebuilding the riprap work along the A. T. & S. F. where the slide did such great damage in August. This was the worst washout the Santa Fe company has experienced in years. It will require five months time, 10,000 car loads of stone and a cost of \$75,000 to repair the damage.

The Optic says: Herman Krenz left for Albuquerque to-day, where he goes to work in the A. & P. shops. He is a blacksmith by trade, and a good one, too, having worked for A. C. Schmidt a number of years. He has been a resident of Las Vegas for five years and seven months, and has made, in that time, many friends, who greatly regret that he has concluded to cast his lot in another community.

One of the striking changes in England during the last few years has been the great increase of traveling among the working classes. Time was when the third-class carriage held only a few passengers, but now eighty per cent. of all the receipts come from third-class fares, while a second-class ticket is seldom sold. The result is that on some roads the two classes have been consolidated, so that now one gets second-class accommodations for third-class fare. The English railway exhibits at Chicago showed the excellent cars provided for the lowest fare.

NEW MEXICO NEWS.

Interesting Items from all Parts of the Territory.

The cattle business is all right in this territory.

A fire at Pagosa destroyed the Latham house and Archuleta's store.

The trial of Messrs. Brown and Austin, at Eddy, has been postponed until April.

The Maxwell grant company shipped twenty-one cars of cattle east last Saturday.

The Range says Raton has the best public school building in the southwest and the finest schools.

Quite a number of prospectors are arriving at Baldy and Elizabethtown searching for the precious metals.

One acre of cabbage on the Maxwell farm this year yielded cabbages weighing from fifteen to thirty pounds per head.

The contract for the Catholic church, at Eddy, has been let to Witherspoon & Perkins and O'Brien & Broxton. It is to be of stone.

Harry Smith was awarded the contract for mining coal on the Maxwell grant to supply the town of Raton. The contract commences next February.

Rev. James A. McDaniel visited the mission school of Mrs. A. M. Grainger, at Las Cruces, and pronounced it the banner mission school of the territory.

The daughter of Mr. Wright died at Eddy, the close of last week. She had recovered from an attack of diphtheria, and died from some acute disease.

Green corn, for the table, green beans, ripe tomatoes, watermelons and cantaloupes, all home grown, are still in the Eddy market. Likewise chilies, cabbage, Irish and sweet potatoes, squashes and other vegetables.

Elmer Martinez tells the Optic that cattle stealing in his part of the country has become unbearable. Men are herding their cattle, as though they were sheep, and even then they are slaughtered by wholesale.

Fig trees, in a quiet way, bear a great deal of fruit during the year. They bear all summer and they bear until late in the fall. This is the month of November, and still fig trees are loaded with both ripe and green figs, at Las Cruces.

Don Antonio Fuentes, of Durango, Mexico, has obtained permission to give some bull fighting exhibitions at Las Cruces, and has fitted up an arena for that purpose. It is understood that he agrees that there shall be no bloodshed or brutality of any kind.

C. W. Greene, of Eddy, says he has 1,500 bushels of grain, enough to carry his stock another year, and 300 tons of alfalfa, some of which will be sold when winter prices can be had. This he considers a good showing for the second year of farming operations.

Some of the farmers on the south side of the San Juan have decided to take a ditch out of the river about two miles above Alamosa and one-half mile below Gobernador. Surveyor Hawkins has made three surveys on the proposed line and any one of these is thought to be practical. The ditch will be about twenty miles long, twelve feet wide and two and one-half feet deep.

What promises to be a very important discovery has been made by Dr. Cowan and others associated with him near Las Cruces. It is a large vein of what those who have seen it pronounce coal, and lies within ten miles of Las Cruces, on the plains east of town. A number of locations have been made, and a company for the development of it formed. The vein is said to be twenty-five feet thick.

The U. S. court of private land claims convenes at the federal building at Santa Fe, on Monday next. Among the more important cases expected to be heard at this session is the Santa Fe community grant and the famous Nolan grant case from Mora county. The latter is expected to bring a score or more of settlers here as witnesses who have been made parties to the suit under a late ruling by the court.

The Optic says: "Reddy" Welsh got tired of waiting for the slow arrangements for a fight within the ropes, and so stepped into Quinly & Benjamin's, last evening, and invited Harry Slater to come outside, that he might wipe out the earth with him. Slater at once answered. A ring of bystanders was formed, and they went at it, hammer and tongs. Welsh was not in it from the first. Slater knocked him down six times in succession, always waiting for Welsh to get up and come at him. The last time Welsh could not rise. He was very badly punished, while Slater did not show a scratch.

Cream Baking Powder.

The only Pure Cream of Tartar Powder.—No Ammonia; No Alum.

Used in Millions of Homes—40 Years the Standard.

Weekly Citizen

ALBUQUERQUE, NOV. 11, 1893.

Let the energies of our people be devoted to the upbuilding of our home interests.

The silver forces of Colorado and Nebraska have already commenced organizing for the next national campaign.

It's the man who never made a success of anything in his life who is dead sure how some other man might be successful.

Look in advertising as in all other things, is pluck. When sales are slow push the advertising and "click" follows.

This editor of the Phoenix, Arizona, Gazette is in luck. He is in jail for contempt of court, and the bill collector can't reach him.

Mason Powell, of the geological survey, in Washington, lately examined a "petrified woman" and found that it was made of Portland cement.

Those who think the silver question has been retired by the repeal of the Sherman law deceive themselves. It will be one of the great issues of the next presidential campaign.

This people of the southwest are watching with interest the gallant fight being made by the Phoenix Gazette against a corrupt ring in Arizona.

This silver fight has been declared off, but this armistice will bring no rest to those who distribute patronage. The scramble for office will now be vigorous.

This Raton reporter says it will in the near future report its reasons why the United States senate should be abolished. In the meantime the country is requested to hold its breath.

Even some of the most conservative senators now agree that a revision of the rules of that body is necessary, and a motion for an inquiry and report upon the subject has been adopted.

Joe McCreary has charge of the Santa Fe Sun during the absence of Mr. Crist in Chicago. Joe has found two gold mines on Baldy mountain and is whispering things up at a lively rate.

Lump DeSnaves is to be commended for his true British pluck. Undaunted by his past experiences he proposes to build a factor vessel that may be the best yet owned and have a new try in 1895 for the American cup.

Senator Voorhees will have the honor of having the repeal bill known as the "Voorhees bill." This and the appointment of his brother-in-law to a fat office are about all he will get out of his humiliating contest.

The consistent friend of American liberty and universal advancement is the republican party, and it is the record of republicans that has lent glory and lustre to the country's history since the day when that party was first organized upon American soil.

It is said that the father of Eugene Patrick Prandergast, who murdered Carter Harrison, was formerly employed by the Atchison, Topeka & Santa Fe at Topeka, as a section hand. The elder Prandergast was an anarchist and a crank, and his sole ambition was to educate his son to the same theories.

This postoffice department costs a large amount of money to run, the estimates for next year being over \$300,000,000, an increase of \$6,000,000 over the present year. The department comes near paying for itself, however, and, taken altogether, is, perhaps, the most satisfactory department of the government.

According to the report made to Secretary Lamont, the general appropriations for armament and equipping the militia of the United States are quite inadequate. If this is the case, steps should be taken to increase the appropriations. It is not safe to wait in such cases until we have need for the militia before arming them.

Guy, Pennycuik, of Oregon, like those who believed no good could come out of Nazareth, takes no stock in Grover Cleveland. In his characteristic wild and woolly way the governor takes occasion in his Thanksgiving day proclamation, to criticize the work of the president and congress. He is a trifle late in his efforts, however.

This latest development of the insurance business is interesting. You can buy suspenders which entitle your next of kin to \$500 if you are killed while wearing them, and there are also hats which entitle your heirs to a similar amount if you are found dead with one on your head. If the hat is found by your side both the life and the insurance are "off."

Unless all signs fail the bicycle is destined to play no unimportant part in the next great conflicts which will take place when next the issue is joined between civilized nations. In the recent maneuvers of the German armies around Metz the tests made of the bicycle were so eminently satisfactory that it is probable that they will be formally adopted as an auxiliary to the regular army, as has already been done in other European armies.

This passage by the senate of the unconditional repeal bill is a severe blow set to the cause of silver, but the pessimistic view which accepts the defeat as irrevocable is not well founded. There is no reason to believe that a majority, or even a large percentage, of the people of the United States are in favor of the demonetization of silver. On the contrary, if that issue were presented to them at the polls today, it is certain that an overwhelming majority would declare for a double standard and the free coinage of silver.

There is now a great railway system in the course of construction which will girdle the Holy Land from one end to the other. A French company has secured a concession for a line from Beyrouth to Damascus and has already commenced work on a narrow gauge road. An English syndicate is now building a railway from Haifa to Damascus which will be

about 140 miles long, starting from Haifa, finding its way along the northern base of the range of Lebanon to the plain of Escham, through the valley east of Nazareth, leaving Mount Tabor, it will cross the river Jordan on a trestle and then to the point known as Majma, where the Jordan joins the greater river. At this point the road will branch to the south, through the Jordan valley, and almost without a curve along the famous wheat region, till it reaches the plain of Hama, thence to the southern gate of Damascus.

It is alarming to note the increase of cranks throughout the United States. Every day the numbers and accomplished misdoings of people of this class are reported by telegraph. The condition of affairs in this country, at the present, is enough to cause crankiness. With pauperism, crime and immorality on the increase as they have been during the past few months through causes that a wise and just administration at Washington might have prevented, it is not wonder that the army of cranks is daily being recruited. It will next be in order for the government to build a wall around some large section of country in the state of Kansas would be about the proper size. A great national insane asylum.

The Phoenix Republican says: "Apparently only the criminal and mass form of the president, backs the way between New Mexico and statehood. The bill admitting the territory has been favorably reported to the house and there seems little doubt that it will be passed by that branch. Jackson's wisdom and even President Cleveland may have been so pleased that he has forgotten his own remarks on the subject of 'ragged' senators." Any day New Mexico seems much nearer statehood than Arizona does, thanks to the energy of our delegates, Mr. Johnson.

The political campaign just closed in Iowa was a warm one. The number of special addresses delivered under the direction of the republican central committee has exceeded one thousand, while Frank Jackson, the republican nominee for governor, has spoken in no less than fifty-one counties. Both sides are confident, although at some points the betting seems to favor a victory for the democratic state ticket.

The Chicago Inter Ocean says that the newspaper dispatches have given a very incomplete idea of the extent of the burning of property has been adopted by the legislature as a means of compelling farmers to hold their crop till a higher price is reached, and where the charge of destruction has been enormous.

This month of December, and January will make busy times for Postmaster General Russell. During these months the commission of about 800 presidential postmasters will expire, and it is expected that all or nearly all of the vacancies will be filled as soon as created. These, with the resignations and deaths, will probably swell the number to a thousand or more.

It is estimated that the richest of civilized peoples is the English, with \$1,200 per capita. In France the average is \$1,025, while in the United States \$1,025, while by the sale of their lands to the United States government some of the Indian tribes are worth from \$5,000 to \$10,000 per capita, man, woman and child.

The New Orleans Times Democrat is growing alarmed at the influx of tramps from the west and enters upon a discussion of the best way of getting rid of them. The most effective way of abating the tramp nuisance would be to stop money-making with the tariff and give prosperity a chance to get under way again.

The campaign in Ohio is of national interest, and the result of the election there to-morrow will be watched closely. Gov. McKinley closed his campaign of the day in Cincinnati on Saturday evening. The republicans claim the state by a large majority.

We trust the good times promised us by the monetarists on the repeal of the silver purchase act will not be hatched. We want them to come right in, and neither stop to knock, nor feel around for the latch string.

CANADA claims to have the richest gold mine in the world at Bruce Mines north of Lake Huron. There will, however, be no new California rush to that region, for capitalists have already gobbled up all the land in the vicinity.

THE CLIMATE. The climate of this portion of sunny New Mexico is undervalued by a few citizens who assert that they cannot see how "people can live on climate." It is very true that they cannot do so without some potatoes and hash on the side, but it remains a fact that our climate is the greatest "resource" of which we can boast, and is attracting and will continue to attract more people and capital here than our mineral, agricultural or other material resources. Cereals, pumpkins and luxuriant hay can be produced in many portions of the Union, and there are many have tried it and failed. You can't loaf around street corners, saloons, smoke cigars, tell foul stories or sponge on some one else without a failure in life. You must learn a trade or get into some honest business; if you don't you will be a chronic loafer, despised by all, producing nothing, simply making yourself a burden to your parents or state. There is no place in the world for loafers.

A Land-Hill. The term, landhill, usually connotes intelligence of disaster, whereby many are killed, but this time it is used to indicate the enormous sale of Dr. Miles' Restorative Nervine, a remedy that is daily saving the lives of thousands who are suffering from nervous disorders. It cures palpitation, nervous prostration, indigestion, backache, spinal disease, hysteria, ill effect of spirits, confusion of mind, etc., and builds up the body surprisingly. Brown & Maybury, Cortland, N. Y., says one patient used Nervine and gained fifteen pounds of flesh. Sold by T. H. Burgess & Son, the druggists, on a guarantee. Get a book free.

NEW MEXICO NEWS.

Interesting Items from all Parts of the Territory.

The school of mines is filling up with students at Socorro.

The troops at Fort Marcy were paid off yesterday by Major Towser.

The use of a fine piano has been donated to the Silver City public schools.

The coyotes are killing a great many sheep in the vicinity of Clayton.

New Mexico's gold output for 1893 will in all likelihood exceed the silver output.

District court convened at Elly on Nov. 12, with a full criminal and civil docket.

The mining claim company has commenced work on their coal beds near Raton.

Nearly 20,000 pounds of apples have been taken out of San Juan county within a month.

A widow's original pension has been granted to Vincenta L. De Chavez of Santa Fe.

District court of evidence in Socorro county on December 10th, with a large civil docket.

A new postoffice has been established at Hinton, Rio Arriba county, James T. Hagan, postmaster.

It is predicted that the influx of health seekers to New Mexico this winter will be unprecedented.

House thieves and other thieves are becoming too numerous for comfort in the vicinity of Kingston.

The contract between the Clayton water works company and the railroad company has been finally signed.

A representative of a Mexican literary company was in San Marcos last week arranging a book agency.

The people of San Juan county want a military fort established on the north line of the Navajo reservation.

A fire at Fort Bayard Thursday night destroyed two of the large stables and nearly two hundred tons of hay.

Every town in New Mexico, except San Francisco, has appointed delegates to the coming irrigation convention.

Charles Curtis, of Kingston, saw ten black tail deer in one herd last week, between the Rio San and the Animas.

Down at White Oaks, hunting parties go a distance of fifteen miles to a little pond called Red Lake, in quest of ducks.

Col. Joe K. Sheridan represented the newspaper men of Grant county at the closing exercises of the Columbian exposition.

The advertiser is informed that the Socorro National bank will probably resume business some time during this week.

Prof. W. George Waring started from Silver City, for Lampasas, Sonora, where he will begin operations on the "Mina Grande."

At the examination for teachers' certificates which took place in Silver City, twelve young ladies stood the difficult examination.

It is predicted in mining circles that Anzette, the new gold camp in Socorro county, New Mexico, is likely to develop into a second Cripple Creek.

A golden eagle was shot by Ed Dickinson near Silver City. He is a magnificent specimen and measures seven feet six inches from tip to tip of his wings.

Mr. Bernier of El Paso, was in San Marcos last week in the interest of the dam and irrigating ditch company. He is securing options, right of way, etc.

Wells, Fargo & Co. shipped through their office in Silver City, during the month of October gold bullion valued at \$7,000, silver bullion \$39,432.35.

L. C. Parker left Silver City for San Francisco last week, where he will meet his family, who are due to arrive in that city from Auckland, New Zealand.

Mrs. M. C. Logan, of Mogollon, who went to the World's Fair some time ago with her husband, is reported dangerously ill in Chicago with typhoid fever.

Willow Springs ranch, located in the northern extremity of Raton, formerly a stage station on the old Santa Fe trail, has been leveled to the ground. A new building will be erected on the site.

The question of irrigation concerns everybody in New Mexico. It is of great importance, for upon it will depend, in a large measure, the well being and prosperity of our territory.

The territorial World's Fair commissioners held a session at Santa Fe yesterday. There were present, ex-Gov. L. Bradford Prince and Dr. Sloan, of Santa Fe; M. Salazar, of Las Vegas, and E. V. Chavez, of Socorro county.

The territorial secretary's office is preparing a history of New Mexico's official seal for Bailey, Banks & Biddle, of Philadelphia, a jewelry firm which is compiling several volumes upon the heraldry of America for publication.

At the preliminary hearing before a justice of the peace at Silver Creek, Grant county, Thomas J. Woods, murderer of William Grudings, was found guilty of murder in the first degree and committed to the Socorro county jail without bail.

Miss Kate Thompson, who was the democratic candidate for county superintendent of Grant county last fall, has returned to Silver City from her home in San Antonio, Texas. She has just completed a seven months course in a business college.

It seems to be about a settled fact that a forty-two member will soon be in course of construction at Fairview. Not only this but the prospects are favorable that Colorado will at a time far distant have a copper mine plant.

The Springer Stockman says: L. B. Harris, capitalist and banker from Lynndale, Vt., is in New Mexico representing about \$130,000 against the defunct S. M. Polson banks at Albuquerque. Mr. Harris was in Springer during the week looking up Polson property in Colfax.

County Assessor Katon says that the assessed valuation of property in Socorro county has fallen from about \$3,300,000

in 1892 to \$2,000,000 in 1893, on account of the \$200 exemption law passed by the last legislature, and the falling off in value and numbers of the stock industry.

The ancient walls of the interior of the government palace, which were cut to improve the new rooms to be occupied by Secretary Miller, are said to have been just fifty-four inches thick. They are of adobe, as hard as iron almost, and are fully 200 years old.

In October a ditch company was organized at Amargosa known as the Kutz Land and Improvement company. They propose to take water from the Nevada river in Colorado for the purpose of irrigating the Amargosa valley in Rio Arriba county.

There is a project afoot to equip \$2,000 in scrip to be used in building two town halls, one at Artes and one in Farmington.

RAILROAD NOTES. Carpenters are putting in new track scales opposite the laundry.

T. R. Grabel, general superintendent of the Atlantic and Pacific road, is visiting in Los Angeles.

George J. Gould is still negotiating about the Western loan, and it is expected that the loan will be completed.

Freightmaster Jesse M. Robinson, of the Atlantic & Pacific, returned last night from a trip to Williams, Arizona.

A carload of persons passed east to Chicago, from the coast. This is the largest shipment of persons passing in one lot.

One of the Press of Arizona railroad company's engines is in the shops for repairs. It is to go to Birmingham, West Va., for a small run.

The Southern Pacific has shipped 5400 carloads of green feed east for the season ending October 31. For the same period last year the shipments were 3600 carloads.

It was at one time the road which carried the most freight that made the most money, but in Texas, at present, the road which carries the most freight loses the most money.

The estimated gross earnings of the entire system of the Rock Island road for the month of October, 1893, was \$2,147,295, an increase of \$225,054 as compared with the estimated earnings of October, 1892.

The coming and going of the herds of so-called "munchers" or "dead-end" freight trains, passengers has become a most serious question to the railroad of death. The free horse is being ridden to death.

C. C. Chennett claims to be the oldest sleeping car conductor in point of service, when the Pullman company has in its employ. For twenty years he has been running between Washington and New Orleans.

The Santa Fe, the greatest railroad in the world, having 3,439 miles of track, and the only road having its own tracks between Chicago, St. Louis and California, has gotten out a new time table for November, embracing the running of every train on its entire system.

The Missouri Pacific now has a through St. Louis San Francisco sleeping car service, running a sleeper daily from St. Louis to Texas, and from there to California, and from California to El Paso, on the Texas & Pacific, and El Paso to San Francisco on the Southern Pacific.

The Southern Pacific officials received word that there are 3000 more unemployed workmen on their way east from California via that line. They are in squads of from 100 to 500 men, and have possession of the freight trains upon which they are riding.

Wells, Fargo & Co. have placed on the run between Chicago and San Francisco fourteen double combination safes. These safes are a recent invention, and when once locked by the agent at the starting point, cannot be opened except by two men, the messenger and the agent at the terminal point.

President Blake of the Nevada Southern road has received advice that the nitrate beds which will become accessible upon the construction of his road to the Nevada State line, are more extensive than at first reported. The nitrate in sight is estimated at 1,000,000 tons. He says that when the road is completed to the State line the nitrates can be hauled and loaded upon the cars for \$19 a ton.

The work of construction on the Cripple Creek and Florence road, south to Florence, will be pushed to rapid completion. Meanwhile the Colorado Midland Terminal road from Doyle on the north will begin with a large force. The race between the two roads to reach the gold camp first will be exciting. Thousands of tons of pay ore lie dumped awaiting transportation to smelters and mills. The facilities offered by the two roads will make Cripple a most interesting camp.

The Wedding There. In Switzerland the orange and myrtle blossoms, those graceful symbols at weddings, find their substitute in grain, ears of wheat. On the day of her marriage the bride receives a whole graye cheese, which is religiously preserved in the family. As time goes on various marks and notices are cut into it which serve to record the births, marriages, deaths, etc., occurring in the household and among the relatives. Anyhow it may always serve as a provision for a rainy day.

Immense. That's What They All Say. It is customary in these latter days to express our perfect satisfaction with a thing by saying "it's immense!" It is expressive that nothing can be added. "Gee, I like Philadelphia, Pa.," says "My wife has been taking your new cure for the heart, and says it's immense!" She has not been troubled with pain or smothering spells since using it. "Joe, Le. Roberts, Nottingham, Pa.," says he is 75 years old, and has suffered from heart disease for over 40 years. Was treated without avail by prominent New York physicians; grew constantly worse; took Dr. Miles' Heart Cure and was completely cured. Sold by T. H. Burgess & Son, on a guarantee.

ARIZONA.

News from All Portions of the Neighboring Territory.

A new business block will shortly be erected in Williams.

The property of Martin Maier at Prescott is attached by creditors.

The grand jury at Flagstaff returned twenty-six true bills of indictment.

A mining expert is in Phoenix to investigate the mining outlook for Mackay & Flood.

The public schools of Phoenix gave the children a vacation so they could attend the circus.

A Russian Vagabond, David Goldovnik, is in Arizona investigating the Salt river irrigation system.

It is believed by some of Martin Maier's friends at Prescott, that he has gone to the Sandwich Islands.

Yavapai county received the greatest number of awards of any county in the territory on her mineral exhibit in Chicago.

The incoming passengers that ride over the Maricopa & Phoenix railway now outnumber those outward bound at least four to one.

The M. E. church at Williams presents a fine appearance. During the last week the painters were busily engaged in decorating the edifice.

Alexander Collings, a trusted employee of the Saginaw lumber company, was in custody at Davisport, by a large number of falling upon him.

Ex-Superintendent McInerney, charged with grand larceny in appropriating goods belonging to the asylum, was found guilty by a jury at Yuma.

A Grand Commodity K. T. will be formed during the session of the Masonic Grand Lodge in Phoenix, which convenes on the 14th of the present month.

F. R. Nellis is rapidly pushing the work of laying the street names, and before another week mail have passed all parts of Williams will be supplied with water.

Seven young ladies have united with the Baptist church of Tempe as a result of the series of meetings now being held. The meetings continue every evening and are growing in interest.

A Phoenix assayer reports that there has never been with activity shown in mining circles as now, if the number of assays and the quality of ore is a criterion. Gold samples predominate.

Henry Blevins, while riding a wild cow on steep ground in the Sierra Ancha mountains the other day, got his thumb caught in a loop of the lariat, which cut it off as clean as though amputated by a surgeon's knife.

The Vigilant, a new gold strike on San Juan Hill, Mohave county, is improving with every foot of development done on it. Specimens of ore filled with gold were exhibited in Kingman last week from the ledge.

A dispatch from San Bernardino, Cal., announces the marriage of Judge N. P. Karp, who is 80 years of age, to a widow thirty years his junior. Judge Karp is the father of the celebrated J. Karp boys who figured in numerous killings in Col. county, during Tombstone's palmy days.

J. B. Tucker, formerly of Phoenix, says the racketeer, but now a practicing lawyer of Bisbee, has been arrested on a charge of violating the Edmunds act. Tucker has an estimable wife and five children living in Phoenix, and he is charged with deserting his wife and living with a Phoenix prostitute in Bisbee.

There has been, for a long time, undercurrent complaint that a well known music teacher and professor took undue liberties with his female pupils, says the Prescott Courier. The matter culminated last Saturday in an irate citizen, the father of a 12-year-old girl, choking the professor in the Prescott post-office building.

The St. Johns Herald says: We are informed that some horse rustlers rounded up about forty head of Navajo ponies and started south with them. The Indians soon discovered their loss, took their trail and were pressing the rustlers so closely they had to abandon their stolen property this side of Holbrook to make good their escape.

A sample lot of coal has been received at Tucson from the Sonora coal fields. It is pronounced equal to the Pennsylvania product. The Star says: The Colorado river will not be utilized largely as a means of transporting coal to Yuma, from which point shipments may be made over the Southern Pacific to all important points. The syndicate contemplates the construction of a railroad from the fields to the river.

Meeting of School Board. The board of education held a meeting last night, all members being present except W. W. McClellan, president.

A petition from residents of the southern suburbs of the city, asking to be annexed in order to relieve the burden of the city schools, was referred to a committee.

A petition from patrons of the Third ward school asking that something be done to abate the closet nuisance on the school grounds was referred to the building committee.

A communication from Treasurer McLean stated that certain warrants had been lost and recommended that a list of them be published. The clerk was instructed by the board to have published a list of the missing warrants.

Deputy Assessor H. S. Knight explained to the board the bill of Mr. Baker for school tax collection. It is a question as to whether the board of education or the city should pay this bill, or whether it should be paid at all.

The board ordered desks to complete the seating of the school house. They

also ordered a set of maps and a reading chart for each ward school house.

The finance committee reported that they had been unsuccessful in securing a loan at any of the banks for meeting the expenses of the schools of the city, but hoped to be able to obtain such loan from some other source at an early day.

GOOD READING FOR 1894

A New combination by which to Obtain all that is Best for your Library Table.

Current Literature is the popular monthly magazine of contemporary record. Beginning with the January, 1894, number, it will be increased in size. This will make it the largest and most complete magazine printed in any language.

It is devoted exclusively to the literature and topics of the day. Each number contains from 30 to 40 departments, full to the brim of the best attainable reading. No magazine has ever received the field of every member of the family is interested in it. It should be in every home.

By special arrangement we can make new readers this special offer which will hold good until February 1, 1894. For \$7.50 we will mail you the field of every member of the family is interested in it. It should be in every home.

The regular subscription price of these two publications together is \$9.00, the reader being enabled by this combination to save \$1.50 upon the price of each separately.

Subscriptions may begin at any time before February 1st, 1894. Sample copies of the magazines 10 cents each. None free.

In addition to the above liberal offer, to all who send in \$7.50 subscription for the DAILY CITIZEN and Current Literature for one year, at any time before November 20th, we will throw in, free of charge, an elegantly bound, handsomely printed and illustrated book, "The Life and Works of James O. Hume." The regular selling price of this volume is \$2.00. This is an extraordinary offer, these taking advantage of it getting \$12.00 in value for only \$7.50. 50 cents below the price asked for the DAILY CITIZEN alone two months.

Address all communications to THE DAILY CITIZEN, Albuquerque, New Mexico.

COWBOY HORSE JEWELRY.

The Very Finest Cheyenne Goods Now on the European Market.

All over North America, for many years, Cheyenne saddles have been famous, and every gentleman outside of our country and the Northwest mounted police of Canada, has either had his horse tricked out with Cheyenne leather or has wished he had. The fancy work on saddles, holsters, and stirrup leathers that once made Mexican saddlery famous and expensive, long ago was copied by Cheyenne makers, who kept up the fame and beauty of the American horse trappings, but made them so cheap as to be within the means of most horsemen. In the old days when Western cattle ranged all over the plains and the cowboy was in his glory, that queer citizen would rather have a Cheyenne saddle than a best gilt, in fact, to be without a Cheyenne saddle and a first-class revolver was to be no better than the sheep-herders of that era.

When a reporter of the New York Sun found himself in Cheyenne the other day the first place he looked for were the saddle makers' shops. He was surprised to find only one showy, first-class shop of this kind, and, instead of there being a crowd in front of it, of people from everywhere between Hudson's bay and Central America, there was no sign of more business than was going on at the druggists', nearby, or the stationers', over the way. In one way only did the reporter find his horse rewarded: the goods displayed in the window were beautiful and extraordinary. There were the glorious heavy hand stamped saddles; there were the huge cumbersome, tapaderos; there were the lariats or "ropes," the magnificent bits that looked like Moorish art outside, and there were the "mule skinner" and fanciful spurs, and, in short, the window formed a museum of things that a cowboy would have pawned his soul to own. The metal work was all such as a cavalryman once declared it "the most horse jewelry in creation."

In the store went the reporter, and at his work went he. He found that the old trade that covered America was dead and gone, or rather had languished so long ago, that the period of mourning for it had gone by. Englishmen and Germans now buy the fanciest and best trappings to send abroad to their homes. Hand-stamped saddles cost from \$85 to \$115, but \$35 buys as good a one as a modest man who knows a good thing will care to use. Cow-girl saddles were in view—several of them—with rigging for side seats and with stirrups made in slipper shapes. It is not that there are really half a dozen cow-girls in the world or half a dozen women like the Colorado cattle queen or the lady horse breeder of Wyoming, but there are Western girls who fond fathers and brothers and still fonder lovers, hence the manufacture of magnificent side saddles all decked with hand-stamped patterns and looking as pretty as the richest Bedouin ever dreamed of horse gear being made. There is still a good trade in cow-boy outfits that are ordered from Montana, the Dakotas, Wyoming, Colorado and Texas, and similar goods go to the horse ranches of Nevada, Idaho and Oregon. Moreover, as long as men ride horses there will be a trade in fancy outfits for them.

The Young Girl's Remedy. A young woman of Paris was found locked up in a police station on her wedding morning by the man who came up from the provinces to marry her. She had stolen the trousseau of a wealthy young woman which had been sent to her to have the initials embroidered in it.

Miles' Nerve & Liver Pills. Act on a new principle—regulating the liver, stomach and bowels through the nerves. A new discovery Dr. Miles' Pills speedily cure biliousness, bad taste, torpid liver, piles, constipation. Unexcelled for men, women, children, small, old, mild, earnest! 50 doses 35 cents. Samples free at T. H. Burgess & Son.

Insurance companies have demanded an inquiry into the death of W. H. Colard, who fell from the window of an Indianapolis hotel.

GIFTS TO LADY TEACHERS.

Two Costly and Beautiful Gold Watches and Chains to be

Given by The Citizen to Two of the Most Popular Lady Teachers

IN NEW MEXICO AND ARIZONA.

THE CITIZEN offers two beautiful Gold Watches and Chains to the two most popular lady teachers in New Mexico and Arizona.

First—A Gold Watch and Chain, beautifully encrusted with diamonds, costing \$125. This Watch and Chain is on exhibition at M. C. Nettleton's, this city, where the teachers and their friends are invited to call and see it.

Second—A Gold Watch and Chain, one of the prettiest in the city, costing

Weekly Citizen

Filed for record.

The United States to Christine Griego, patent to 160 acres in north half of section 2, township 14, north range, 4th west.

W. P. Wilson to F. L. Albright, release to lots 7 and 8, block 38, New Mexico Town company.

W. S. Strickler, trustee, release to Elizabeth Lott and husband, lot 2, block 1, Belvedere addition.

Died on Arrival.

Chas. P. Wiggins, aged 28 years, with his wife and mother arrived from this morning from Topeka, and was driven to the San Felipe. In less than twenty minutes Mr. Wiggins expired, the change on the train, mountains being a severe trial from which he did not rally. The remains were taken to the funeral home and will be shipped to Topeka at eight o'clock, his body being on the same train. Deceased and those with him, were en route to Texas and his physician who is en route, has been telegraphed to meet the widow at La Junta.

District Court.

Territory vs. Ross, Rayner and Ingram. Evidence shown that men were attempting to steal a ride on the Atlantic & Pacific. The court sentenced defendants to six months. Sentence suspended during good behavior.

Attorney Childers asked that the cases of the city of Albuquerque vs. the gas company and the water works company be heard on Monday. City attorney agreed to same.

Territory vs. F. Ryan, Chas. Rogers, W. Sullivan, assault with deadly weapon. Sentence one year each.

A fee of \$100 was asked for by S. Burke, but as attorney in the case, J. Hawley vs. Hawley. Sent for divorce.

W. B. Childers is being heard on a motion for a rehearing in the case of D. E. Phillips vs. Electric Light.

En Banc.

Mr. John Rice Chandler, executive general of the United States to Guatemala, Central America, together with his wife, have taken up their residence in this city for the winter, bringing the benefit of our health giving climate. Mr. Chandler, whose official head was designated by Governor the Great, talks very entertainingly of his life and observations in the land of the tropics. Owing to the enervating influence of the climate there, he says the natives have hardly energy enough to wake up three times a day to eat something, and on account of this prevailing laziness of the inhabitants the country presents a very inviting field for energetic and enterprising Americans.

Those who range there with a little money, it is a poor country for a man entirely without means. Cattle raising, the principal industry, is highly profitable, but little engaged in by Americans. There are fortunes to be made by American young men who go there and engage in that industry, thinks Mr. Chandler. It requires five years for a newly started coffee plantation to become profitably productive, but at the expiration of that time the annual income from it will soon place its owner among the nabobs of the land.

Notes from the University.

Miss Josie Parsons was put in charge of the new branches of study, book-keeping, stenography and typewriting, on Wednesday, and began the work of organization and teaching. She has a class of about twenty-five. It is quite a valuable addition to the school.

Six new students were added to the roll for the week. Mr. J. L. J. from Washington and the University, being the only one from out of town. The junior class was organized on Monday last with a membership of 14 as a class society. They will hold their meetings on the first Wednesday of every month. Roy Stamm is president.

The Castelar Literary Society will hold its next regular meeting on Friday, the 10th, at the University, the subject of the debate for the occasion is, "Resolved, That, Julius Caesar was a greater general than Napoleon." It is expected that Miss Gaine will lead the affirmative.

The University football team will play a game at the Indian school, with the Indian school team, this afternoon. It is expected to be exciting and the boys would like to see a large attendance from the city.

Public School Items.

Still they come, and now there are over 600 pupils in school.

The primary grades were so crowded that the board put in three new teachers on Nov. 1. Miss Keepers in ward 2, Miss Elder in 3, and Miss Anderson in 4.

Mr. McLaughlin, chairman of the supply committee, has made necessary purchases of clocks, tables, etc., for the new teachers.

Every room in the four new buildings is now in use, the superintendent finding it necessary to occupy a part of a recitation room for his office. Hurry up the new high school.

Miss Maude Cleveland, formerly of Silver City, entered the high school this week. Samuel Stevens was also admitted.

The teachers' meeting this week was attended by the new teachers who swell our force now, in number, to 17. Mrs. McDonald gave an interesting talk on Dr. Klemm's account of the European schools, especially of the excellent schools of Germany.

Dr. John Rice Chandler, of New York, a gentleman who has traveled the world around, called upon the superintendent at his office one day this week.

The irrigation congress pre-empted the Denver Republican has started a scheme to have the next international irrigation congress at Denver. The New Mexican has nothing to say against such patriotism, but wishes to serve notice that the next meeting of this important body is pre-empted for Albuquerque in this

SAPPHIRE CAPTURED.

Three Men Arrested at Trinidad for Rape Robbery.

Last night through a little tip and by the clever work of officers three safe-blowers were captured and placed in the county jail.

Soon after reporting for duty Officer Bowden received the tip and immediately posted Constable Lewis and Officer Brantlett and telephoned Marshal Vaughn who was at supper.

All the force began shadowing suspicious looking characters, and it was not long before Lewis and Brantlett located the place that was to be gone through.

Between 7:30 and 8 o'clock the three safe-blowers went to the back end of Bowen & Love's feed store, just north of the Union Pacific track on Commercial street, and began to chisel out a place through which they could get their hand and open the door. They had just commenced when an engine in the yards came up and the head light revealed them so plainly that they jumped down and started to run, but had just gone a few yards when they were nabbed by Lewis & Brantlett, who were secreting themselves behind some cars. The men were taken up to the station and searched, and the following safe-blower's tools were found on them: One common chisel, a brace and bit, six drills, one drifting chisel, two punches, one drifting tool and a nine pound mechanic's hammer.

The parties were taken on up to the county jail and locked up. They gave their names as Dave Hammon, K. W. Davis and Frank Lewis. Advertiser.

[From the Daily, November 6.]

F. W. Clancy filed papers of attorney today, for Lewis and S. M. Folsom, in the clerk's office.

In this city, Nov. 4, by the Rev. W. L. Githens, Catalina Apostola and Josefa Lavato, were married.

John R. Duran was sworn in as justice of the peace for old town this morning, vice Leno, deceased, by a decree of the district court.

June Hunt, one of the enterprising business men of Batons, is in the city, and may become identified with a mining enterprise in this vicinity.

One of the McKinley dry washers was loaded and ready for shipment yesterday to Cerrillos where it will be tested at San Pedro and later on in Colorado.

It is rumored that there are to be five weddings in the very near future. These handsome brunettes and two blondes are to be brides, all before the holidays.

Mrs. Graham has returned from California and is now ready to resume business at the old place, north Third street, and will be pleased to see all who may call.

Mrs. E. B. Ball and son, of Richmond, Va., are at the San Felipe, awaiting the arrival of a son from Texas, the latter being an invalid. It is likely Mrs. Ball and her two sons will remain here some time.

Clayton Lemon was appointed administrator of the estate of Fannie B. Lemon, deceased. The inventory filed shows a valuation of \$1,300.58, which includes bareland property, and 71 feet of lots 1, 2, 3, 4 in block K, Atlantic & Pacific addition.

Mrs. Della Zottmann, wife of Otto F. Zottmann, traveling salesman for the Clark-Whitson-Letch Music company, died Sunday morning at 2:45 of peritonitis, aged 28 years. The funeral took place this morning at 9 o'clock at the church of the Immaculate Conception.

Mrs. J. E. DeRosier, wife of the station agent at Holbrook, was registered at the San Felipe, together with her friend Mrs. Connor. Hon. Levi Hughes drove the ladies out yesterday, and they returned to Holbrook this morning thoroughly pleased with a day in the metropolis.

Dr. Easterday and wife, after an absence of two weeks, returned last evening. They have been to Nakomis, Illinois, where the doctor's father resides, and the trip was occasioned by the serious illness of the old gentleman, who is not in immediate danger, but who cannot live long, his chances for recovery being slight.

Mrs. Michael Ryan, wife of the depot master, died on Saturday evening, leaving a baby girl who had just entered this world. The sudden death of Mrs. Ryan was a severe shock to the husband and friends. The funeral took place this morning from the church of the Immaculate Conception, and the interment took place at Santa Barbara.

Rev. A. E. Osborn, while holding services at Gallup yesterday, received a telegram announcing the serious illness of his brother in Brooklyn, New York. He came in on the early morning train and will be detained here until Tuesday morning on account of business matters. He expects to leave on the mid-journey to Brooklyn on the 6 o'clock train to-morrow morning.

Alex. Bowie, secretary and treasurer of the Caledonian Mining company at Gallup, came down last Friday and after transacting business here paid a visit to Bernalillo. He was a passenger for Gallup on the late train last evening. Referring to the University, Mr. Bowie expressed himself as being highly pleased with the manner in which Prof. Ramsey conducts that institution.

Col. Frank Peres of Jemez Springs, left for his home yesterday, accompanied by his daughter and Miss Edna Miller. The latter young lady will teach a school this winter in a district about ten miles east of the Springs. Col. Peres informed that the University had received notice from Delegate Joseph that he was appointed postmaster at Archuleta, to fill the place caused by the removal of J. B. Black.

About the Albuquerque.

For many weeks the question has been asked, "will the Albuquerque be built?" The Fort Worth Gazette says it cannot state officially that it will, but from the outlook only a few months will pass until

there will be such a rowl as the Fort Worth and Albuquerque. A Brownwood merchant in speaking of the matter said:

"I have it from an authentic source that the Rock Island is making an effort to buy the Fort Worth & Rio Grande that it may reach the cattle country for which it is striving. I am of the opinion that if the Rock Island does really want the Rio Grande she will get it; but if for unforeseen reason, she fails, she will consolidate with the people of Fort Worth and build a road through the country which it wants to reach. The Rock Island and the merchants of Fort Worth want to reach the same country, and, as I said, if the Rock Island should not get the Rio Grande she will consolidate with the people of Fort Worth and build the much desired Albuquerque."

LEARNING THINGS.

Filed at the Dinner Table, and the drummer got hold.

The drummer was looking so sad that it attracted the attention of the hotel clerk.

"What's the matter?" asked the functionary. "Lost a friend or your job?"

"No, worse," responded the drummer. "Lost two friends" queried the sympathetic clerk.

"No, just thinking of a man I met out here in Adria last night."

"What did he do? Beat you at poker?"

"No, asked me a question and I answered it by asking another."

"Give me the particulars."

"Well, it was this way," and the drummer showed by his looks how badly he felt to bring it all up again.

"We were at supper, and I had been pretty smart and the man had been very quiet."

"Did you ever notice," he said, as innocent and as kindly as a school teacher, "that over in Wisconsin the people shake the pepper-box, this way, while those in Indiana hold it fast and pat it on the bottom, this way?"

"I had noticed it, and told him so."

"I'm from Indiana," he said, knocking some pepper on his potatoes.

"Yes," said I, "it shows on you."

"Do you know," said he seriously, "why they do it differently?"

"No," said I, "why do they?"

"To get the pepper out," said he earnestly, and then the gang at the table gave me the laugh in eighteen places and the man asked me how much salary I got for learning things."

Attachments Filed.

The Lyndonville National bank, of Lyndonville, Vt., through the attorney, Mr. McMillen, filed in the district court attachments, some days ago, against S. M. and H. E. Folsom to satisfy a claim of \$7500. The properties attached are stock in the Cimarron and Red River Cattle companies.

On Saturday W. B. Childers, attorney for the Albuquerque National bank, filed an attachment on various properties of H. E. and S. M. Folsom to satisfy certain claims.

The statutes require a bond in double the value of property assigned, to be filed and approved by the district court. This the assignees, in the assignments made by Folsom, failed to file, and it is claimed therefore that the assignment is impetuous.

Probate Court.

The last will and testament of Cassius Montano de Sanchez, late Mariano Martinez were presented for probate.

The following wills were admitted to probate: The last will and testament of O. Patten, deceased. Testators Duran de Anaya, Jose Duran de Anaya, and Domingo Garcia.

T. E. Kellhofer, administrator of the estate of Thos. J. Cummings, deceased, filed report, and asks to be discharged. Granted.

F. W. Clancy was appointed administrator of the estate of J. A. Dunn, deceased.

Cruelty Wherever Found.

The Society for the Prevention of Cruelty to Animals does not hesitate to stop, through its agents, in the streets of Philadelphia United States mail wagons when they are being driven by sick or maimed horses, and to take the animals away, whether the United States mail suffers detention or not. At least this is the story told by the local press. The agents protest that the law against inhumanity shall not be ignored through the greed of contractors, even if the wagons are conveying the mails.

Bricks Boiled in Fat.

It is stated that ordinary bricks boiled in fat for about two hours, or until they are saturated with it, are increased about 30 per cent in weight, and are much harder than common ones, and unaffected by frost and acids as well as perfectly waterproof. They form an excellent flooring for workshops or storehouses, particularly in chemical establishments.

Resolution of the city attorney regarding police protection as regards tramps was tabled.

Communication from C. N. Sterry, attorney of the Atlantic & Pacific, relative to tramps and city protection by additional police, part to be paid by railroad, was referred to the police committee, with instructions to report at next meeting.

Report of G. McGowan referred to sewer committee.

Report of Marshal Dodd referred to police committee.

City clerk's report was filed.

Police judges report referred to police committee.

There was considerable talk about the placing of additional electric street lights. Childers and Henselien wanted one at Third and Tijeras, Korber and Grande at Broadway and Washington (Tijeras), Pratt asked a favor for the Second ward, by having one at Broadway and Iron. All propositions were by a vote lost. Mr. Medler said those taken off were so ordered because of lack of funds and he was opposed to the erection of any new ones now.

There was a lively discussion over the matter of the engineer's work in appor-

tioning property from the city to F. Trotter, though Henselien reported this action and that the deed was ready for a certain amount of land on Tijeras road, but that it lacked the necessary signatures. After considerable discussion, Mr. Childers' motion prevailed, which instructed the street committee to employ a competent engineer "who knew north from south," which Korber thought Mr. Pearce did not know. Mr. Korber even got so warm over it that the gentleman took occasion to say that Mr. Henselien prevaricated. He was called down by the chair.

The bill of the Water company for \$3,250 for hydrants, was missing, and it was explained by Korber that it, the bill, had fallen into Mr. Schwartz' possession, as a member of the sewer committee.

Children demanded immediate payment, on motion, but withdrew when a motion was offered that the Water committee be instructed to meet at next meeting upon this bill.

Certain bills of police committee were reported lost, but the clerk explained that they had been left for Korber, who it seemed was away and had not yet seen them.

The bond of D. Denham, in the sum of \$2,000, with Jacobo Yrizarri and J. R. Armijo as sureties, was accepted. Mr. Denham is to look after city plumbing under this bond.

On motion of Henselien, council adjourned.

THE VOTE.

The following is the vote cast in the City Council contest up to Friday evening Nov. 3. The votes cast will be counted every Friday evening during the contest and published in the Saturday issues of the Citizen.

Miss Marie Bowie, Gallup, 2200

Miss Ernestine, Albuquerque, 1400

OFFICE—No. 113 WEST GOLD AVENUE.
Address: THOMAS, BURGESS, Proprietor.
ALBUQUERQUE, N. M., NOV 11, 1903.

VICTORY!

The republicans have won a glorious victory. It resulted from their own efforts, and will be lasting in its effects. Now, for a pull-out, get out of the state of New Mexico. We want to vote for McKinley in 1908.

[From the Daily, November 8.]
Dan T. Jones, a health seeker from Kansas City, near St. Paul, arrived last night.

Sheriff Armitage is getting ready to collect the next annual tax, and is posting notices to that effect.

Mrs. Nestor Armitage, of Las Cruces, arrived on last night's train. She took a drive about the city this morning in company with Mr. J. R. Armitage.

Don Rankin and family returned last night from Chicago, where they spent six weeks pleasantly at the great fair.

Last evening Rev. Monahan, in his sermon, Mr. George A. Brown, of Fort Apache, Arizona, and Miss Maud Albert of Houston, O., were present.

The democratic caucus a little election extra this afternoon. The election is not much worried over the result. He knew it would happen when he did not get the appointment for governor.

For three years City A. H. Meyers of the House has sold the most beer during the annual territorial fair, and each year has earned off the Southwestern brewery medal for the largest sales.

This morning at 4 o'clock at the church of the Immaculate Conception, Alfredo Otero and Miss Catalina Armitage were married. After the ceremony the happy couple left on the eastern train for a wedding tour in the east.

Otto Berger remarked that so far democratic rule had cheated him out of \$40,000, there being that much difference in the price of wool which he has to dispose of this fall to what he received for the same under a republican administration.

H. L. Gilpin Brown, an invalid from Livermore, Colorado, accompanied by his wife, brother-in-law and nurse came in last night, and will remain this winter. It is hoped that our mild and beautiful climate will restore him to health.

Felix Baca received a dispatch from Trinidad this morning, giving the cheering news that the democratic ring was hopelessly defeated at the election yesterday. This is the first time in twenty years that the democrats have been defeated at Trinidad.

B. C. Robertson, the gold avenue grocer, has had constructed on the Lampeter ranch on the mesa, a 600-gg incubator. It is heated according to the original plan of Dr. A. F. Ames and requires but little attention in its operation. The machine will be "out" in a few days.

Patronize the Beer

The people of the city should patronize those people who live and spend their money here, and who are interested in the upbuilding of the community, in preference to those who do but little of the former and whose presence here is in no way a benefit to the city. Why people will patronize Chinese laundries and restaurants when there are worthy citizens engaged in the same lines of business, whom they might give their business, is beyond understanding. It is good policy to help those who help you and the town in which your interests are centered.

How H. R. Whiting's Report

Hon. H. R. Whiting, of Albuquerque, superintendent of schools for Bernalillo county, is entitled to the distinction of presenting to the territorial superintendent of public instruction the most complete report yet received. It is full of statistical information, systematically arranged, relative to the public schools of Bernalillo county, and which show at a glance the splendid progress the cause of education has made therein under Mr. Whiting's faithful supervision. In addition to the ordinary report there are a number of suggestions and recommendations which will aid materially the territorial superintendent of public instruction in making up his annual report—New Mexican.

Mad as a Hatter

The San Mateo Rev. gives the following particulars of the suicide of Mrs. Doris M. Mealy, which took place at Rincon last week.

She left no note of explanation of the rash deed, and in her usual health with the exception of a slight headache. She entered her bedroom, ostensibly to lie down a while, as she told her sister, Mrs. Abram Teller, who after a short time desiring to show her a letter, went to Mrs. Mealy's room and called her. Receiving no answer, she pushed open the door and there her horrified gaze saw the deceased sitting on the floor with her head resting against a trunk and the wall, with a bullet hole in the right side of the head, from which the brains were oozing, upon the sight of which she gave a shriek and ran back to the parlor, where she had left a neighbor, Mrs. L. S. Kelly, sitting, while she went to show the letter to her sister. The only clue to the tragedy was the photograph of her husband and two daughters, who were in the east, lying on the bed. The pistols and the pistol were kept together in a stand-drawer.

The body of the deceased was found in the parlor, where she had left a neighbor, Mrs. L. S. Kelly, sitting, while she went to show the letter to her sister. The only clue to the tragedy was the photograph of her husband and two daughters, who were in the east, lying on the bed. The pistols and the pistol were kept together in a stand-drawer.

The only clue to the tragedy was the photograph of her husband and two daughters, who were in the east, lying on the bed. The pistols and the pistol were kept together in a stand-drawer.

The body of the deceased was found in the parlor, where she had left a neighbor, Mrs. L. S. Kelly, sitting, while she went to show the letter to her sister. The only clue to the tragedy was the photograph of her husband and two daughters, who were in the east, lying on the bed. The pistols and the pistol were kept together in a stand-drawer.

THE WATER QUESTION

Disposition of This Important Case by Judge Lee

The following is a copy of Judge Lee's order in the water works suit:

City of Albuquerque vs. Albuquerque Water Company and Water Supply Company of Albuquerque, N. M.
This cause coming on to be heard upon the motion of the defendant to dismiss the same, and the affidavits and documents attached to the same, being read, the records of the city council of the city of Albuquerque, and having heard counsel, the complaint by the city attorney, Sumner Backlund, Esq., and the defendant by W. B. Childers, Esq., and the court being fully advised in the premises, and of the facts of the case, the court doth order that the complaint be dismissed, and that the defendant be allowed to recover its costs and disbursements.

Now, it looks to be a fine-up-a tree as if there was something wrong about this water question. The people here have complained for years about the exorbitant water rates and several city administrations have investigated and ascertained that the municipality has practically no remedy against the Water company, which claims to have an exclusive franchise for twenty-five years.

During the last session of the legislature the attorney for the Water company, Sumner Backlund, Esq., provided that all franchises against which suits were not brought within six months should be held to be void and should not be subject to attack thereafter. Mayor Field could not get authority from our city clerk to bring the suit to test franchises given out by former administrations in this city, so he cannot out to be held of his own motion.

Now Mr. Childers can afford to come in as attorney for the persons claiming these franchises and gets a conditional dismissal of the suits as can be seen by the above order. It looks odd. As the Water company and the Electric Light company agreed to have the validity of their claimed exclusive franchise tried in court. The people will want to see whether or not within the next fifteen days the democratic adherents will vote to dismiss these suits and thus go back on the platform on which they were elected.

Alfred Pratt and Rankin have always been for the people in these matters. If these claimed franchises are good and exclusive the corporations claiming they will be sustained by the courts, if they are not then it is wrong for our city administration to permit the limitation period of a special act of the legislature to give them life. The people are on the watch.

There is more rich silver and gold ore in Wallapai mining district than any other equal area of Arizona.

Bedell's big teams are now hauling ore from the Senator mine to the mill. It will "smelt" them to keep a supply of ore ahead.

There are great many good veins of mineral in the Cedar country that if properly worked would continue to produce pay ore for twenty years to come.

W. S. Parker sent a small lot of gold ore from Durkin to the sampler this week. The ore was fairly good and ought to pay well if enough can be dug out.

If water sufficient is struck in the mine of the Music Mountain company a good mill will be erected to work the ores in that vicinity, so we are informed.

William Ringle is still sinking on the main shaft of his mine in the Cedar mountains. He will probably reach the copper level in about two months.

Jack Little has some valuable gold claims near Cerbat, that could be profitably worked if there was a custom mill in that neighborhood where the ore could be worked.

Many prospectors are packing their horses into the mountains along the Colorado river in quest of gold. This winter will bring forth some rich properties from that section.

We understand that the Ark mill will be erected in a short time. Carpenters and machinists will go out to the mine the coming week and inaugurate the good work.

Thomas McMahon came in from Layne Springs Monday afternoon. He says that himself and W. W. Clark have a good showing of ore and also have a nice shipment on the dump of Rip Van Winkle mine.

Mr. Mix was in from Wallapai mountain this week. He says that he will put a small smelter in Wallapai mountain next spring to work his own ores. There is all kinds of fluxing material in the mountains and plenty of timber from which charcoal can be made.

There are several good gold properties in Gold Basin owned by R. G. Patterson and the estate of the late S. C. Rowe. Some of them are immense big lodes that will average about fifteen dollars per ton, while the smaller lodes will run much higher.

At least fifty hobos arrived this morning on a freight train from the north. The city police were apprised of the coming of the gang and on their arrival were loaded in the car and warned not to leave it. The conductor of the train, later however discovered the party of tourists and made them get off. When they protested that the city police had warned them not to do so the conductor replied that the railroad company had something to say as to whether they should ride over the road and they were ousted. It was a hungry dirty looking gang that then scattered about the city. It was composed of professional bums who would not work if they were offered good wages. None of them have been arrested but the police will see that they do not tarry here many hours.

The first plaster—Dampen a piece of flannel with Chamberlain's Pain Balm and lay it over the seat of pain. It is better than any plaster. When the flannel is on the seat of pain, the shoulder blades, will often prevent pneumonia. There is nothing so good for a lame back or a pain in the side. A sore throat can nearly always be cured in one night by applying Chamberlain's Pain Balm.

Two Pay Days This Month.
The Santa Fe road has given notice of the fact that all employees of the road will receive the pay due them for September's work on the 15th of this month, and that on the 25th inst. money will be forthcoming for October's pay roll. This is cheering news to the employees of the road, and is generally cheering from the fact that two pay days so near together will place in circulation considerable money, as well as from it being an indication of a revival in the business of the road and the inauguration of better times through the west.

cial club. It being regular ladies' night a large number of ladies were present. Mr. Robinson and family will remain in the city until tomorrow morning visiting their many old friends and will then proceed to the east where they will spend a few weeks. Mr. Robinson has a warm corner in his heart for Albuquerque and expresses himself as confident of the city's ultimate greatness.

PLEASANT RECEIPT

The Commercial Club Entertains D. B. Robinson and Party.

As a compliment to visiting guests, who are taking more than ordinary interest in New Mexico's largest city, the Commercial club of the southwest country, many of Albuquerque's citizens assembled at the Commercial club last evening to entertain and that they did so beyond dispute. Dancing was one of the prime features, and this was thoroughly enjoyed to excellent music, always insured at entertainments arranged in our most attractive building. Refreshments were served and these were of a most palatable character. Herewith is a complete list of those participating: D. B. Robinson and wife, Henry Kinsey and wife, Mrs. Julia Richardson, Miss Lena Robinson, James and Harry Robinson, the guests, Mrs. Storer and wife, Judge Storey and wife, W. B. Childers and wife, Walter C. Hall and wife, J. M. Kent and wife, Andrew Smith and wife, W. S. Strickland and wife, F. R. O'Connell and wife, Maynard Homer and wife, J. B. Saint and wife, W. P. Metcalf and wife, Dr. Harrison and wife, G. L. Brooks and wife, Col. Bonafide and wife, J. M. Wheeler and wife, Capt. Hemmsher and wife, Dr. Euterday and wife.

Messieurs Harzoline, Sanders, Cruise, Maynard.

Misses Flournoy, Fox, Merritt, Lee, Kent, Hubbard.

Misses M. W. Flournoy, A. A. Keen, Calvin Whitting, John Deakin, F. Lowen, Thiel, A. W. Chabell, Dr. Louis Baer, A. B. McFarland, Percy Chabell, C. M. Allen, C. C. Hall, Julius Eisenmann, C. E. Cray, Ernest Grimsfeld, Montague Stevens, E. S. Garvin, M. Mandell, F. M. Rose, John A. Lee, W. H. Harrison, F. B. Sutton.

From Kincaid Mine.

F. W. Thiel is now working several men on the Schuyler tunnel at Chloride.

John Griffin has several tons of ore on the dump of the Blackfoot mine ready for shipment to Kincaid.

There is more rich silver and gold ore in Wallapai mining district than any other equal area of Arizona.

Bedell's big teams are now hauling ore from the Senator mine to the mill. It will "smelt" them to keep a supply of ore ahead.

There are great many good veins of mineral in the Cedar country that if properly worked would continue to produce pay ore for twenty years to come.
