## The Paper and Community.

EVERY loyal citizen of a community should take his home paper. The local newspaper is one of the greatest assets of any section of country and should be supported and encouraged as such, not with a feeling of charity toward the editor, as is too often the case, but in the firm conviction that in supporting the paper you are contributing to the uplift of the community and the consequent enhancing of the value of your own holdings. Without your home paper your town would lose much of its attractiveness as a place of abode, would become a barren spot in the field of knowledge. The community would be groping around in the intellectual darkness of uncertainty and speculation, while other cities and towns would be climbing upward and onward to better things.

The dissemination of news would return to the ancient method of mouth to mouth, with its consequent delays, and distortions, and omissions.

The business interests would suffer from lack of a medium of communication between buyer and seller commercial rivalry would be on the wane, and American spirit of "I Will" would sink into disuse and eventual obliteration.

How many years have you been reading this paper, anyway?

And don't you feel deep in your heart that it has been worth more to you than it has cost you?

How would you like to be deprived of the opportunity of ever seeing another issue of it?

In other words, just how would you like to live in this community if there were no paper published here, no medium from which you could ascertain the doings of the people of the community, no medium of exchange in the matter of barter and sale, no medium through which you could make your wants known to the people except by climbing into a buggy and spending days in driving from one place to another?

Just how would you like that? The pill would be somewhat bitter, wouldn't it?

Well, don't worry—you are in no danger of losing your home paper.

This article was written merely for the purpose of causing you to do a little thinking along the right line.

We want you—all of you—to realize that this paper is not being published just for the editor.

It is a public institution, it is an important part of the community itself, it is about the only industry with which the community could NOT dispense without intellectual stagnation, for when people cease to read of home affairs their intelligence pays the penalty.

This paper is for progress, for commercial advancement, for community pride, for the development and encouragement of every legitimate interest that will be of value to our people.

We are laboring to that end, and we want you to labor with us.

And that our labors may cover a greater field and bear better fruit, we want every family in the community to read the paper, to know what others are doing, to lend a helping hand in making of this one of the most thriving and prosperous sections of the state.

Get rid of the idea that when you hand us a dollar you are

## BANKERS URGED TO CO-OPERATE WITH FARMERS

SOUL MATERIAL HAS ENTERED THE BANK VAULTS OF THE NATION.

The Bank a Financial Power House to the Community.

By Peter Radford.

One of the greatest opportunities in the business life of the nation lies in practical co-operation of the country banks with the farmer in building agriculture and the adventure is laden with greater possibilities than any forward movement now before the American public.

A few bankers have loaned money to farmers at a low rate of interest, and oftentimes without compensation, to buy blooded livestock, build silos, fertilize the land, secure better seed, hold their products for a better market price, etc. The banker in contributing toward improving the grade of livestock; the quality of the seed and the fertility of the soil, plants in the agricultural life of the community a fountain of profit, that, like Tennyson's brook, runs on and on forever. Community Progress a Bank Asset.

The time was when money loaned on such a basis would severely test the sanity of the banker; such transactions would pain the directors like a blow in the face. A cashier who would dare to cast bread upon waters that did not return buttered side up in time for annual dividends would have to give way to a more capable man. This does not necessarily mean that the bankers are getting any better or that the milk of human kindness is being imbibed more freely by our financiers. It indicates that the bankers are getting wiser, becoming more able financiers and the banking industry more competent. The vision of the banker is crowding out the spirit of the pawnbroker. A light has been turned on a new world of investment and no usurer ever received as large returns on the investment as these progressive bankers, who made loans to uplift industry. The bankers have always been liberal city builders, but they are now building agriculture.

A Dollar With a Soul.

It is refreshing in this strenuous commercial life to find so many dollars with souls. When a dollar is approached to perform a task that does not directly yield the highest rate of interest, we usually hear the rustle of the eagle's wings as it soars upward; when a dollar is requested to return at the option of the borrower, it usually appeals to the Goddess of Liberty for its contractual rights; when a dollar is asked to expand in volume to suit the requirements of industry, it usually talks solemnly of its redeemer, but soul material has entered into the vaults of our banks and rate, time and volume have a new basis of reckoning in so far as the ability of some of the bankers permit them to co-operate in promoting the business of farming.

God Almighty's Noblemen.

These bankers are God Almighty's noblemen. Heaven lent earth the spirit of these men and the angels will help them roll in place the cornerstones of empires. They are not philanthropists; they are wise bankers. The spirit of the builder has given them a new vision, and wisdom has visited upon them business foresight.

The cackle of the hen, the low of kine and the rustle of growing crops echo in every bank vault in the nation and the shrewd banker knows that he can more effectively increase his deposits by putting blue blood in the veins of livestock; quality in the yield of the soil and value into agricultural products, than by business handshakes, overdrafts and gaudy calendars.

Taking the community into partnership with the bank, opening up a ledger account with progress, making thrift and enterprise stockholders and the prosperity of the country an asset to the bank, put behind it stability far more desirable than a letterhead bearing the names of all the distinguished citizens of the community. The bank is the financial power house of the community and blessed is the locality that has an up-to-date banker.

"helping the editor along."

You are helping the editor, yes; but you are helping yourself more than you are him, for you are getting more than value received for your money.

## AS THE EDITOR SEES IT

FOR PLEASURE—WHY NOT FOR BUSINESS?

DO the dictates of pleasure wield a greater influence over man than the requirements of business? It would seem so if we may judge by the condition of our country roads.

The automobile people of this country are alive, wide awake and up to the minute in aggressiveness, and as a result we see trunk line auto roads springing all over the country. But these roads have been constructed primarily for the purpose of adding to man's pleasures in this life, and they furnish an eloquent practical demonstration of what can be accomplished when men have the will to do.

If the people can construct great car highways for pleasure, why can not we of this community improve our country roads for both business and pleasure?

Muddy, sticky and heavy roads are not conducive to travel, and wherever you find them you see a farming community that is not meeting the most of its opportunities.

Why can we not use as much energy and ingenuity for business purposes on the highways of this community as the automobile people employ elsewhere for pleasure alone? If we first make a success of our commercial pursuits the pleasure will follow as a natural sequence.

Improved country roads will increase wonderfully the material welfare of our people and stimulate the upbuilding of our home community.

\*\*\*

DID you ever pass a little kid on the street and have him gaze wistfully up at you until you passed by, and then turn around and find him still looking at you with those appealing little eyes? Indeed you have, and it is an everyday occurrence right here in this town. It wouldn't do us "growups" a bit of harm to give a kindly word to these little fellows as we meet them, and it would do them a world of good. A bright smile and a cheerful word to them will flood their hearts with the sunshine of life and lift them up to a higher plane and creates men among men.

\*\*\*

NOW is an opportune time to turn yourself loose among the weeds and refuse of your lawn, your garden, and your home surroundings by a closer contact with nature, and it will be an improvement to the appearance of the town and a relief to the community eye. It is these little things that start a town on the up grade—where we ought to be.

\*\*\*

THE man who continually knocks his home town is generally the one who does the least for it and receives his all from. And he is most surely the one who receives the least respect from the rest of the people of the town. If a town is worth living in it, it is worth boosting. To give it a knock is to insult your own intelligence.

\*\*\*

THERE is some slight difference between the poor boy who reaches the top and the gilded youth who sinks to the bottom. Life is just one big ladder, and you can climb as high or slide down as low as you like, and no one will stop you.

\*\*\*

THE German kaiser is reported to have told a delegation of bankers that the war will end in October. If sooner or later, why not sooner? We give our consent.

\*\*\*

THE best man on the job invariably draws the best man's pay. What are you getting?

\*\*\*

OF course the sins of your neighbor are of scarlet, while your own are as white as snow.

\*\*\*

IS your name inscribed in the book of "Men Who Have Made Good"?

You are supporting a business enterprise that labors diligently day by day for the social, intellectual and commercial advancement of yourself and every other citizen of the community. And no other business enterprise can speak louder or more to the point.

"The Golden Rule is our highest standard of conduct," says a writer of note. True, quite true, and it is so high most of us are unable to reach it.

Huerta and his thirteen generals and three privates may take consolation in the thought that for the first time in history a Mexican revolution has failed to revolute.

These wars and rumors of wars have at least one saving grace. They are keeping the Thaw case off the first page.

It's better to be happy than snappy.

## WHY SHOULD WOMEN VOTE?

WOMAN'S SUFFRAGE FROM THE VIEWPOINT OF LEADING FARMERS.

Why should women vote? That is the question that is ringing from ocean to ocean and reverberating from the Canadian boundary to the Mexican border. It is the mission of a newspaper to give the news and the action of the Texas Farmers' Union in opposing woman's suffrage when that question was recently before the Texas legislature is significant as representing the attitude of the organized plowmen. We reproduce in part the argument presented by Hon. W. D. Lewis, president of the Texas Farmers' Union, in opposing the bill:

"It is gratifying to note that it is not the farmer's wife who is clamoring for the ballot. She is too busy trying to make happier homes, molding the minds of future citizens and sharing with her husband the cares of life to indulge in political gossip. The ballot will give her no relief from drudgery, give no assistance in clothing the children or bring to the home additional comforts, conveniences or opportunities in life. It is, as a rule, the city woman promoted to idleness by prosperity, who is leading the suffragette movement.

"From many standpoints, perhaps a woman has as much right to vote as a man. So has she as much right to plow as a man; she has as much right to work in a factory as a man; she has as much right to shoulder a musket as a man, but we would rather she would not do so from choice and we regret that necessity oftentimes compels her to earn a living by engaging in gainful occupations. We do not consider misfortune a qualification for suffrage or a business accident a reason for granting franchise. We are opposed to woman at the ballot box the same as we are opposed to woman in the field, in the factory or in the army and for the self-same reasons. We had rather see her plant flowers than sow wheat; gather bouquets than pick cotton and rear children than raise political issues, although she may have as much right to do one as the other.

Opposed to Unsexing Humanity.

"Sex qualification for suffrage may have its apparent inconsistencies. No general rule adjusts itself perfectly to all conditions. It is a favorite argument advanced by the proponents of woman's suffrage that many cultivated and noble women are far more capable of intelligently exercising sovereignty than a worthless negro, but the South never was anxious for negro suffrage, and while culture and refinement, and even morality, are desirable virtues, they are not the only qualifications for franchise.

"The primary, inherent and inseparable fitness for suffrage is supporting a family. The plow handle, the forge and the struggle for bread afford experience necessary to properly mark the ballot. Government is a great big business and civilization from the very beginning assigned woman the home and man the business affairs of life.

"There has been much freakish legislation enacted during the past decade that no doubt appeals to woman's love for the ridiculous, but to undertake to unsex the human race by law is the height of legislative folly and a tragedy to mankind.

"We are opposed to the equal rights of woman—we want her to ever remain our superior. We consider woman's desire to seek man's level the yellow peril of Twentieth Century civilization.

"Woman is the medium through which angels whisper their messages to mankind; it is her hand that plants thoughts in the intellectual vineyard; it is through her heart that hope, love and sympathy overflow and bless mankind. Christ—the liberator of woman—was satisfied to teach the lessons of life and He was a man. He chose to rule over human hearts and refused worldly power and men followed after Him, women washed His feet, little children climbed upon His knees and the Ruler of the universe said that in Him He was well pleased. Can woman find a higher calling?"

Miss Jane Addams, returning from Europe, "the war must end."

A big head is always a full one.

Don't hesitate to give your neighbor a compliment. He'll sorb it like a sponge.

## INFORM THE EDITOR

One of the most difficult of the editor's jobs is to get facts about births, marriages and deaths. People seem to think he ought to know things by intuition. If not that, the birth, marriage or death is of such importance in the immediate family that it is presumed the editor will be informed by some wireless or just grow into the information. Then, when the paper comes out, and no mention is made of the event, the editor is blamed for not running a good newspaper or not getting all the news. Remember there are a good many people in this county. If the editor knew each of them by name, besides their family history and the chief events in the lives of every individual, he wouldn't be an editor. He'd be a demi-god, resting his feet on a cloud and sipping ambrosia instead of inhabiting a broken-down office chair and wondering where the money for the next white paper bill is coming from. The life of the average newspaper man is a gay one. Gathering news is second nature to him, like picking his teeth with the office pen and cussing the office towel. Just the same, there's a limit to his omniscience. Last week, we thought of a million, eight hundred and forty nine thousand three hundred and sixty four things of importance, besides a couple of hundred thousand small items unworthy of mention. And it was a slow week. We're anxious for news for the paper, and it won't put you out much to drop by the office or telephone us what's happening at your house. Then if the item doesn't get in the paper, you have a right to come down and kick the stuffing out of the cat. Otherwise, don't blame us.

## A Good Thing Push it Along

The secretary of the navy has asked Thomas A. Edison and many others of the greatest inventors of America to serve on an advisory and research board for the purpose of devising new inventions for pelling an attack by a foreign foe.

It is a good move and comes none to soon. It would have been a better move a year ago, and a still more effective one five years ago.

These men have the brains if they are allowed the time for the development of their ideas and the manufacture of the engines of destruction.

But will they have the time?

## THEMISTOCLES

When Themistocles was asked by his host at a dinner party to entertain the guests by playing the lute, he replied that he could not play the fiddle, but that he could make a small town a great city. We have in this nation many politicians who are good "fiddlers," but they cannot make a small town a great city. We are overrun with orators who can play upon the passions of the people, but they can't put brick and mortar together. We need builders.

Let those who hunger and thirst for power understand that the highest glory of a statesman is to construct, and that it is better for a man that he should build a public highway than that he should become Governor of a state, and that he start a plow than that he become the author of a law. The true test of statesmanship is the plow and the hammer, so let those who would govern, first build.

If nothing happens to the contrary, we'll electric lights.

## THE VITAL PROBLEM OF AGRICULTURE

By Peter Radford.

There is no escaping the market problem and the highest development of agriculture will not be attained until it is solved, for a market is as necessary for the producer as land on which to grow his crop. Governmental and educational institutions have spent \$180,000,000 in the United States during the past ten years for improving soil production and improving seeds and plants, but very little attention and less money has been given to the marketing side of agriculture.

The problem is a monumental one and one which will never be solved until it gets within the grasp of a gigantic organization where master minds can concentrate the combined experience and wisdom of the age upon it. It is a problem which the farmers, merchants, bankers, editors and statesmen must unite in solving.

The Farmers' Union stands for all there is in farming from the most scientific methods of seed selection to the most systematic and profitable plans of marketing, but does not believe in promoting one to the neglect of the other. We consider the work of farm demonstrators valuable and we ask that governmental and commercial agencies seeking to help us, continue to give us their assistance and advice, but we believe that their influence should be extended to the marketing side of our farm problems also.

We cannot hope to develop manufacturing by over-production of the factory; we cannot build up mercantile enterprises by the merchants loading their shelves with surplus goods and no more can we develop agriculture by glutting the market with a surplus of products.

## DARIUS

The neigh of a horse made Darius King of Persia, the six contending powers for the throne agreeing among themselves that the one whose horse should neigh first should possess the kingdom. This ancient method of settling disputes among politicians could be revived with profit today. If our partisan factions and petty politicians could only settle their disputes by the neigh of a horse, the bark of a dog or the bray of a donkey, it would be a great blessing and would give our citizens a better opportunity to pursue the vocations of industry free from political strife.

Let those who pick political plums by raising rows and who flash swords dripping in the blood of industry understand that they cannot turn the public forum into a political arena and by a clash of personal aspirations still the hammer and stop the plow and that their quarrels must be settled in the back alleys of civilization.

Bernalillo county is again the last of the twenty-six counties to remit its monthly state taxes, \$2,654.02 being received. Curry county remitted more rapidly than Bernalillo county, \$2,784.94.

John G. Schuman filed suit on a note of \$2,5000 against Anita J. Chapman in the county clerk's office at Santa Fe. Friend Palmer, of Cerrillos filed suit on a note for \$214.49 against Everardo F. Montoya.

Pete Vichi's store, Third street and Tijeras avenue, at Albuquerque, was robbed Sunday afternoon. Someone entered through the outside cellar store, climbed the stairs into the store and got away with \$32.50 in the cash drawer.

The theft of two horses from S. Epstein's place across the Rio Grande was reported to the Albuquerque city and county authorities, last Sunday morning. The corral fence was torn down in the night and the horses were driven off. One was a buckskin and the other black.

"Baseball reminds me of the household," he remarked; "there's the plate, the batter, the fowls, the flies, etc."

"And it reminds me of marriage," she retorted: "First the diamond where they are engaged, then the struggles and the hits, then the men going out, and finally the difficulty they have in getting home."
