| IV. | Program Assessment | <input checked="" type="checkbox"/> |
| V. | Program Funding and Facilities-Budget Report | <input checked="" type="checkbox"/> |
| VI. | Articulation with Main Campus (if appropriate) | <input checked="" type="checkbox"/> |
| VII. | Summary: Program's Strengths, Weaknesses and Vision for the Future | <input checked="" type="checkbox"/> |

Valencia Campus Program Review Worksheet

I. Description of the Program's Mission

The mission of UNM VC Associate Degree Nursing program is to produce responsible, culturally competent, and professional Registered Nurses. The nursing program adopts the mission statement of the college that is: "A quality education-a lifetime of success."

II. Description of the Program's Goals

- a. 80% or greater pass rate of NCLEX-RN on first attempt by graduates
 1. Continue practice of hiring highly qualified faculty
 2. Continue critical student selection process for program admission
 3. Continue integration of Kaplan materials
- b. National program accreditation through Accrediting Commission for Education in Nursing (ACEN) prior to NM Board of Nursing deadline of 1/1/2018

III. Description of Program's Assessment

- a. Previous program assessment was submitted utilizing former outcomes. Faculty have met and developed new level and graduate outcomes (attached) that are consistent with current curriculum.

IV. Changes in Trends in Enrollment (Over the last 5 years)

- a. Enrollment has remained fairly consistent since the program's beginning in 2010. A maximum of sixteen students are accepted annually and eleven to fourteen have graduated since 2012.

V. Program Funding and Facilities-Budget Report

- a. The program has three fulltime nursing positions (one is currently unfilled) and a full time director. Some funding has been available from state "nursing expansion" funds. Currently, some funds are being allocated to support the national accreditation process which is required by the New Mexico Board of Nursing rules prior to January 1, 2018 (NMAC 16.12.3.8.B. 3.a)
- b. Students who are planning to apply to the nursing program often take prerequisites on this campus.

VI. Articulation with Main Campus

- a. Nurses who graduate with an AS continue their education via RN to BSN programs offered throughout the state (including UNM) and elsewhere. These programs consider RN licensure the prerequisite for these admission and specific articulation agreements are not required. Future research on the number of graduates who continue to BSN and graduate degrees would be of value.

VII. Summary

- a. The program's strengths include a 2015 NCLEX pass rate of 91.67%, knowledgeable and experienced faculty as well as campus support for national accreditation. The primary weakness is the current lack of national accreditation. Future plans include adopting the New Mexico Nursing Education Consortium (NMNEC) curriculum as soon as national accreditation is achieved. One of the many advantages is that it is designed to deliver a BSN program of study statewide.

	Level 1 (SLO)	Level 2(SLO)	Level 3(SLO)	Graduate learning outcomes
Patient-centered care	Begin to demonstrate professional nursing practice that is patient-centered and culturally appropriate for individuals, families, and communities.	Apply principles of professional nursing practice that is patient-centered and culturally appropriate for individuals, families, and communities. - C. Meets Expectations, No Revisions Required __C__

VII. Summary

- A. Does Not Meet Expectations
- B. Meets Expectations, But Section Needs Revision
- C. Meets Expectations, No Revisions Required __C__

Overall Comments: This program is in good shape. Their biggest activity currently is their accreditation process with ACEN. They are in process, working with a consultant. We hope to have the site visit next Spring.
