

August 28, 50.

Started for the Mumbes to check on Azoria
and Pantosteus spawning.

✓ Picked up a small Pituophis on Coais Road,
four miles above its junction with 85 at Selita.
Was near mouth of the "par" through the lagra.
Short grass & lava flow.

Specimen disappeared - it was undamaged but limp when found.

✓ 1020. By 85 opposite Ladrone peaks.

Overgrazed grassland with Burterrigia and
a sparse mixture of Juniper & Mesquite (sic),
Phrynosoma cornutum. LOR.

✓ 1650 Mumbes R. about 1 mile above Mumbes.
A ♀ 2070 Azoria seemed to be working on
redds but disappeared when I approached closer.

1730 Caught 2 RT. 1 1/2 miles above Mumbes

138-160 ♂ ad. Testes enormous.

295-342 3/4 lb. ♀ ad.

Scales, head & viscera saved
