# Driving the EBLIP Process

**Jon Eldredge**

# EBLIP Process

- Define the problem & Formulate question
- Gather relevant information
- Appraise the quality of that information
- Make an informed decision

# 1. Formulate a Question

## FAC Method

- F = Focus
- A = Amplify
- C = Compose

# Sample Question #1

- Which approach to teaching EBP searching skills will lead to higher scores in a post-test administered two weeks after the instruction: an online tutorial or an applied, hands-on lab?

# Sample Questions #6 &7

- What is the best way to recruit and select competent employees?

## 2. Find the Evidence

- Local Data
- Regional or National-Level Data
- HSL Literature
- Grey Literature

# 3. Critical Appraisal

- Forms of bias
- Causality
- Confounding
- Validity
- Study Designs: strengths and weaknesses

# 4. Make a Decision

- Cognitive Biases
- Organizational Pathologies
- Implementation
