NUMBER 51.

## CERRILLOS!

One of the Best Towns North of the Metropolis.

Rich Placer Fields Being Judiciously Worked.

What Pay-Day Amounts to Up at Cerrillos.

AN HOUR WITH THE PEOPLE

Conceiving the idea that a CERRILLOS man could not spend an hour more pleasantly anywhere than at Cerrillos, this paper visited one of its rustlers to visit the mining little city, distance two hours' drive, north of the metropolis, yesterday afternoon, and in company with Al. Conner, of Zeigler's, made the trip. Here is what was picked up in conversation with the citizens of Cerrillos:

### PLACERING

H. H. Armstrong, of New York, president of the Gold Separator and Mining company, has leased from the Irrigation and Hydraulic Mining company, which is located and since 1885 has held possession of 10,000 acres of mineral land in the Golden district, eighteen miles south of Cerrillos, several hundred acres of placer, and has on the ground and in course of erection a Brewer battery, capable of treating 100 yards of dirt per day. The complete machine will handle 500 yards a day, but this part of it has just been put in operation and a thorough test will be made. This machine was invented by the late Mr. Armstrong, and is covered by a patent. The one on trial here is the fourth one ever set up complete with gears, track, etc. The cost of the plant is approximately \$50,000 and will give employment to several hundred men, mostly unskilled laborers. This is not a dry washer, but very little water is necessary. The dirt with which the test will be made is to be taken from 100 prospect holes dug at haphazard, but not less than 10 feet apart, a yard of earth being taken from each one. A sample will be taken from each lot and panned and by comparison give an exact knowledge of what the mine will do.

For a long time every sort and condition of man have racked their brains to invent some sort of a machine of large capacity, either a dry washer or one which will require very little water that can be used profitably in handling the rich placer grounds of the Golden and Dolores districts of New Mexico. Many have been tried and an enormous amount of money has been expended in the efforts, and whether it is a Brewer battery or some future invention which is to do the work, a gigantic fortune awaits the man who shall be the first to succeed.

These districts have been worked for hundreds of years in a crude way by Indians, Spaniards, Mexicans and others, and even now there are probably 100 men making a living there with all dry washers run by hand and for the most part working over the old dumps. These placer grounds extend over a large area, and though millions in gold have been taken out, there are yet millions more awaiting the hand of the miner.

### PAY DAY.

Last Thursday was pay day at the placer mines, and the miners are still enjoying the effects. Col. Austin Goodrich, the affable mayor of Cerrillos, always has for the coming of pay day, and there is a great sigh of relief when it is paid. Taxpayers learned yesterday that at least \$18,000 was paid out to the miners and the money went to enrich the pockets of the merchants, principally of Cerrillos. A number of miners lay off a few days after pay day, and the number in which they enjoy the receipt of their hard earned wages is peculiarly their own.

### A SMALL STRIKE.

Monday morning a very funny thing occurred at the hard coal mine. The pickers at the breakers, numbering about forty little boys aged from 9 to 12 years, objected to a delay in receiving their wages without pay. They organized themselves into a meeting and appointed a committee to call upon the superintendent in regard to their grievance. The superintendent listened attentively to the committee, after which he dismissed them, and then followed a general strike of the whole gang. Yesterday they were still out, and the work of picking from the breakers remains uncompleted.

### IF A BAD CONDITION.

Last pay day, Rose Griffith, a native keeper at the Madrid coal camp got

on a desperate spree and used his gun. He shot promiscuously into a crowd of miners, but fortunately did not strike any one in a fatal spot. After the shooting a number of miners collected around the place, breaking the glasses in the windows and destroying the business in the roughest manner. They attacked Griffith and beat him up numerically. His condition is precarious as it is thought, now that erysipelas has set in, that he cannot live but a few days longer.

### THE VIPOND MURDER.

Perfecto Padilla, of Jemez, Charged With the Crime and Placed in Jail.

A number of very sensational developments in the killing of John Vipond, near Copper City, have come to light during the past two weeks. The New Mexican has along been aware of these facts, but in the interests of justice, that the murderer might be located, it has withheld them from publication. Now, however, that the man charged with the murder

### HAS BEEN ARRESTED.

About the 5th of August this paper published an account of the killing of John Vipond by unknown parties in Rio Arriba county, about seventy miles north of Bland City. At this time all the facts were

WRAPPED IN MYSTERY and nothing definite could be obtained as to the guilty parties. Meanwhile, W. C. Vipond, of the Vipond district, about forty miles from Bland, Mont., a brother of the murdered man, S. L. Russell, of the same place and a friend of the victim, and J. C. Harker, of Grand Junction, their brother-in-law, saw the publication of the happening and decided to come immediately to New Mexico to investigate the matter. They accordingly reached Bland on September 16th, and immediately set to work to locate John Vipond's camp. Assisted by a party from Bland they came after many days' search to the place.

### IN THE GALLINA CANYON.

near Copper City, where Mr. Vipond had made his headquarters while prospecting. An examination of the premises, which are in a dense forest, gave a shocking revelation. Mr. Vipond's body was found very near his camp with indications of severe blows on the head that must have caused his death. Burrows and other tracks showed the direction of the murderers had taken in leaving and the animals they had driven with them. The remains were tenderly gathered up and were subsequently brought to Santa Fe. There will here be examined during the next day or two by Dr. J. H. Sloan and will be sent home to Grand Junction, Iowa, for interment.

Meanwhile, the party returning to Bland got a clue as to the murderers from a couple of miners, Judge McGinnis, of Bland, and William Fetherberg, his companion, who had seen a Mexican with the murdered man's burros, and had taken them into their possession. Having located

### THE SUSPECTED MAN.

Messrs. Vipond, Russell and Harker returned to Santa Fe, where a warrant was immediately taken out for him. This was placed in the hands of the proper officers and last Sunday Officer Jack Harris and Deputy Sheriff Juan Delgado arrested Perfecto Padilla at Jemez pueblo, while he was on his way back home after placing his daughter in school at Santa Fe. Padilla is the party who had Mr. Vipond's burros in his possession. He will be given a preliminary hearing upon Judge Laughlin's return from Mora.

The officials have one or two other parties in view on suspicion, but no other arrests will be made until further developments have taken place. The two Vipond brothers were men of prominence in their district of Montana and the killing of the elder Vipond was a shock to a large circle of friends. No efforts will be left untaken by the family to bring the guilty parties to justice.—New Mexican.

### ME MENTION ON THE TRACK.

Albuquerque, N. M., Oct. 25.—I have reconsidered my withdrawal as a candidate on the democratic ticket for river commissioner, and will make the race—this upon the urgent appeal of many friends. ISAAC JACKSON.

### A GOOD SHOWING.

Bratstreet's report for the nine months ending Oct. 1, shows twenty eight business failures in New Mexico during that period, against the same number for the same period of 1893. The total assets in this year's failures, however, were only \$23,700 against \$61,404 liabilities; while in 1893 the assets in the failures aggregated \$234,012 against \$809,300 liabilities. The great decrease in the amount involved makes a fine showing for the business interests of the territory.

## CONVENTIONS!

Four Political Conventions in Session at Las Vegas.

Four Parties Join Hands and Name a Ticket.

Bank Robbery in Iowa by Use of Dynamite.

SMALL FOX AT WASHINGTON.

Special to Citizen. Las Vegas, Oct. 26.—There were four conventions held here yesterday—Republican, democratic, independent and populist.

After meeting in the morning and organizing and hearing reports of committees, after the dinner conference committees were appointed to see if a fusion ticket could not be nominated by the four conventions.

At 7:30 the committees reported to the different conventions and the conference reports were adopted by each and in accordance with agreement the nominations were made as follows: By the republicans—For council, Miguel Salazar; county commissioner, Atanacio Roval; probate judge, Pablo Ulibarri; probate clerk, R. L. M. Rose; treasurer, George Chavez.

By the democrats: For council for San Miguel and Guadalupe counties, J. S. Duncan; county commissioner, F. A. Manzanarez; surveyor, R. B. Rice.

By the independents: For representatives, J. M. H. Alarid;—Gallegos; county commissioner, Lorenzo Lopez; sheriff, Juan Martinez; assessor, Juan Gallegos; school superintendent, C. F. Rudolph; collector, Aniceto C. Abeyta; coroner, Ramon.

By the populists: For representative, M. M. Milligan. After each convention had made its nominations they were sent to all others and added to the nominations already made by them. All had been finished, about 1:30 o'clock this morning, the delegates met in the court house where speeches were made for a couple of hours, after which a procession was formed and paraded both towns till near breakfast time. The joint ticket is regarded as a very strong one.

The Union party are in session at present but have only got committees appointed yet.

### Bank Robbery.

Malvern, Iowa, Oct. 26.—The Farmers and Mechanics bank was visited by burglars this morning, and it is supposed \$2,000 was stolen. Nitro glycerine was used to open the vault. The building was practically blown to pieces and money and other contents sent into the street. The thieves left the money scattered over the floor in their haste to get away.

### Snatches.

Washington, Oct. 26.—Another case of snatches was developed this morning. James I. Parker, of Indiana, a law clerk in the division where the other cases were reported, was the victim. Secretary Smith has issued directions today to have the department closed to-morrow on account of fumigation.

The small pox scare at the interior department culminated in a panic. The case of Owens is the most serious of all Owens is messenger to the chief clerk and it was part of his duty to distribute documents to bureaus. In this way he came into contact with about every branch of the service under Secretary Smith. Dr. Woodward, health officer, made an urgent appeal to Secretary Smith to close the entire interior department, and the order was issued this afternoon closing every bureau.

Flagstaff, Arizona, Oct. 26.—Messrs. Campbell, Cox and Norris speak here tonight at a democratic rally.

The republicans will have a grand rally the night of the 29th, at which Judge Wright and others will make addresses and answer the accusations of Henry and others.

Flagstaff is the liveliest now that it has been since the panic, two large gangs of men working on the new court house and Reform school, and the contract for the new eight room public school will be let the 15th of November. COCONINO.

### Burned.

Chicago, Oct. 26.—The large warehouses of the William Deering reaping works burned to-day; loss \$100,000; insured.

### Murderer on Trial.

Victor Lujan is the name of the individual who has been apprehended, over at Mora, for complicity in the murder of John Doherty, he having been implicated in this most heinous deed by a confession from the lips of Tomas Lucero. It is thought that the jury in the Rael case will have been selected by to-night and that the trial will occupy at least ten days.—Las Vegas Optic.

### Politics With a Vengeance.

Las Vegas Optic. New Mexico is already sorely afflicted with a political governor and if Judge A. B. Fall, of the Third judicial district, made use of the language attributed to him, the territorial judiciary is also being prostituted for party ends. It is reported

ed that Judge A. B. Fall, at San Miguel, in Dona Ana county, last Sunday week, said: "Mr. Raymond shall not be elected sheriff. We have got to carry the election by fair means, if we can, but we have got to carry it." The same Judge Fall is credited with having remarked in a cellar in Las Cruces:

"I am judge of this district; if you will support the democratic ticket and accept an office, we can get the whole Mexican vote, and the indictments against you shall be dismissed; if not, it shall be prosecuted."

Plummer's Report Denied. Washington, Oct. 26.—The Indian office has received a report from E. C. Vincent, in charge of the irrigation work on the Navajo reservation in New Mexico, refuting the statement of Lieutenant Plummer, acting Indian agent, that money was squandered on irrigation works, and the work was not being properly done. Vincent's report is accompanied by photographs showing that the work has made good progress. Of \$10,000 placed to Vincent's credit last March, but \$5,000 has been used, Lieut. Plummer has officially notified the Indian office that he has never seen the work.

Operation on a Train. London, Oct. 26.—A statement purporting to come from Lividia by way of Paris, alleges that the operation of thoracentesis has been performed upon the czar with success. The releasing of liquid matter by puncturing greatly relieved the patient's breathing and pressure around the heart. Prof. Leyden has declared there is no danger of immediate collapse.

Resigned. Berlin, Oct. 26.—It is rumored that Chancellor Von Caprivi has resigned and it has been accepted.

A DEADLY SHOT. Particulars of the Killing South of the Metropolis.

WRONG MAN KILLED. E. L. Hall, United States marshal for the territory, came up from the south last night, and is in the city attending court to-day. In regard to the shooting of a Mexican by Deputy Sheriff Williams, near Rincon Wednesday, which was exclusively published in THE CITIZEN yesterday, the marshal gave the following additional particulars:

About six years ago the section foreman at Natch station was shot and killed by a Mexican, named Silva. The murderer, considered one of the bandest men with his pistol in southern New Mexico and very dangerous, escaped over into Mexico. A few months ago word reached Sheriff Lohman, of Las Cruces, that Silva was frequently in the neighborhood of Rincon and Colorado, and he detailed Williams to hunt down the murderer.

Last Wednesday, on arriving at Colorado, the deputy sheriff deputized a Mexican, called Pedro, to go with him to identify Silva to a sheep camp, where he had an deserted that Silva was stopping. They started out and after traveling a few miles met a man with a flock of sheep. They saw the man move away from the sheep, leaving his rifle lying on the ground. The officer and Pedro crawled along the ground toward the man, and when in speaking distance told the man "to halt" that they were deputy sheriffs. Instead of complying with the order, the man made a break for his rifle, whereupon Pedro remarked to Williams "if you don't shoot, he will kill us both." Seeing that the man would undoubtedly shoot, Williams pulled down on him, sending a bullet through the breast of the man. The man fell to the ground and expired in about fifteen minutes. Mr. Williams and Pedro went up to the body, and the latter identified the unfortunate not as Silva, he murderer they were after, but as a half-witted Mexican. Williams and Pedro returned to Colorado and after reporting what they had done, gave themselves up to the constable of that town. Sheriff Lohman was notified and came up to Colorado from Las Cruces at once. Thursday afternoon an inquest was held on the body of the dead Mexican, and the jury returned a verdict that the "deceased came to his death through murder." Both Williams and Pedro were then held to answer the charge of murder. They are now out on bonds.

District Court. The court is taking recess until the day after election, in order that Judge Collier may have the time to prepare his opinions in cases assigned him by the territorial supreme court.

The criminal docket will be called to-morrow afternoon, defendants arraigned and cases set for trial.

The United States court adjourned on Wednesday afternoon and Attorney Heningway and his assistant, Mr. Money, have returned to Santa Fe.

On last Tuesday, on the United States side of the court, J. W. Scheldt, receiver of the defunct Albuquerque National bank, secured judgments in several cases brought by him to the beginning of the present term. These were cases in which no appearance of defendants were entered, or no plea filed by them.

The territorial grand jury returned a number of true bills, among them being indictments against Atanacio del Valle, Tiburcio Lujan, Antonio Torres and Filomeno Marco, the Bernalillo white caps.

## AT JEROME!

One of Arizona's Great Mining Camps.

A District Operating Its Own Railroad.

Rich Mineral Bearing Rock Clearly in Sight.

OTHER ITEMS.

Jerome, Oct. 26.—"There's millions in it," as Col. Sellers would say. To write of Jerome fully and intelligently is a most difficult undertaking, especially so from the fact that the officials in charge are extremely reluctant as to its extent, the output and prospects for the future. The mere statement that a railroad has been for nearly 25 miles, at a cost of \$300,000, to transport coke, machinery, grain, etc., into the district, and the matte and ore produced by the efforts of an army of men employed to delve into the hidden recesses of Montrose mountain, is in itself enough to convince even the most captious.

The Jerome mine was discovered early in the eighties, but not worked to any extent prior to 1884. K. G. Tittle made a desperate effort to win at the undertaking, but unfortunate circumstances resulted in an utter loss to Mr. Tittle, from which he has never recovered. The United Verde Copper company leased the mine in 1886, W. A. Clark, of Montrose, being ostensibly the company's smelter, with a capacity of two hundred tons a day, and a 30-ton jacket, also a reverberatory furnace and converters, were introduced. These, with early development, other machinery, teams, tramway, machine shops, offices, lodging and boarding house, and other incidentals, not to include the railroad, must certainly have involved the expenditure of \$1,500,000. As before stated, the extent of work inside the output and prospect ahead, is not made public, so that guessing is resorted to by knowing ones.

It is positively asserted by many that ten years' work is in sight, that it is possible to run one hundred years, and that \$100,000 is taken out monthly in copper, gold and silver, the former predominating. Roasts extending around the hills on three grades are the first indication of a big mining camp. These are active all the time, employing a score of men to carry the ore and return the same roasted to the smelter, besides great quantities of wood, to burn under the ore, the fuel being delivered by Mexicans, under contract, at \$5 per ton, burros carrying it in from the hills adjacent.

Until the railroad is ready to transfer in and out, a large number of teams have done the hauling to and from Granite station, on the Santa Fe, Prescott & Phoenix, previously to the construction of the latter, hauled to the Atlantic & Pacific. A tramway of several miles in length was built to convey that which was brought in by teams to the other side of the mountain, and matte by return. Part of this was found incapable of performing the service, and now five miles of tramway serves the purpose, in a measure. The matte goes to New Jersey and New York, and some is exported.

About 400 men are on the pay roll of the company, probably one-third of the number being Mexicans. Machinists and engineers are paid \$4 a day, miners \$3.50, experts in the smelter \$3 and common labor \$2.25.

Forty company cottages are leased and twenty are to be built shortly. A hospital is conducted, the men paying \$2 per month to sustain the institution, which is under the control of Dr. Wood, an experienced surgeon.

The engines in the smelter are three in number, the 500 horse power machine for the blower, that of 200 horse power for the power, and one of 140 horse power to give power for the electric light plant and power for the machine shops, etc. General lighting outside and for the town is not yet introduced.

Joe L. Giroux is superintendent and H. J. Allen financial agent, under whom are a number of clerks in the business department of the institution.

THE TOWN is divided into two districts, a number doing business, such as saloon, laundries, restaurant and barbershop, in close proximity to the smelter at the bend. Half a mile down the road is the town proper, and taking all classes, there must be 700 people in the immediate vicinity of the mine and smelter. Besides the Herald's saloon at the bend are seven more in town, barber shop, laundries, G. W. Hull, T. F. Miller & Co. and Merrill Bros., mercantile houses, five restaurants, two meat shops, postoffice and lodgings.

The town is perched on the mountain side and the better class of residences occupy the upper side, or above the road out of business.

Merrill Bros. have about completed a large store building of brick and stone, as also Dave Conners.

A fire in April and another in June almost cleaned up the business end. There are no signs of the effect other than improvements.

From the hillside and along the railroad the Verde valley, a broad expanse, is seen and a grand sight is thus presented.

Pat Stanley, late of Gallup, is building for Dave Conners, mentioned above.

Billy Morris, of whom several Gallapian papers desired to know, left here early in October and is thought to be in Albuquerque.

Mrs. Boyd entertained Superintendent Tom Roach who visited your correspondent to "think" with him in the rush of Saturday night.

Pete Musparron, brother of Hugh M. Sparrow of Gallup, is in camp.

Wm. Giffrey runs a tent restaurant on leased ground (many houses are built cheaply and located on leased grounds) Main street. He was with Grosvenor and the Arango while in Albuquerque.

SKILL IN CHAMBER who has charge of the boarding house which seats to meals just now, 220 men, and employs some twenty persons, has a history that would fill a book. Nellie was born in Ireland forty-five years ago. In 1862 she crossed the isthmus where she chartered a steamer to cross the Gulf of California. Headed an expedition to Cassiar, Alaska, from Victoria, B. C., in 1873 and was the only woman in the party; wore snow shoes on all expeditions and adopted men's attire on this trip, which occupied 77 days. The expedition bore supplies for sick soldiers in the north at Miss Cashman's expense, \$1500. Slept out doors this trip. Has made trips, leading the way, in California, Idaho and Arizona, and once 22 days without water in a trip of 120 miles on foot. Though exposed to disease, Nellie never laid up a day and looks hearty enough to do it all over again. Some years ago Miss Cashman was a partner of Judge Holt in a hotel at Kingston, N. M. Fortunes have been made and lost, and much of Nellie's hard earned money has been given to aid, or loaned in helping those who came to her for relief to "bridge over." In all these years mingling with rough men, Miss Cashman has borne a most excellent character and is today one of the best known women in Arizona. She says it is wages now, but with prospects not yet developed she will be again in liberal means to settle down in retirement.

Congress district will be heard from in my next letter.

Miners Entombed. Iron Mountain, Mich., Oct. 26.—The fate of the eleven entombed miners in Pawlake mine can not be known for some hours yet, probably not until 2 o'clock. An immense mass of rock, iron ore and broken timbers twenty feet in length are to be cleared away. Superintendent Brown is confident that all but three will be taken out alive, and has hopes for all. The accident was caused by the sandstone capping on the hard level shaft in No. 11 giving way.

The fate of the men in the pit will not be definitely known before to-night. The following is a list of the men: Thomas Pouglass, William Oliver, Samuel Husband, George Wilcox, Stephen Allen, William Baird, George Porreco, John Thomas, George Richard, Peter Heilberg, John Farrill and Peter Hanson, shaft boys. The only man known to have escaped uninjured states that the accident was caused by running water eating away the sandstone capping in a room 100 feet in height on the third level. This immense mass of rock, weighing hundreds of tons, crashed through the floor of the level, carrying away timbers and everything to the fourth level, on which the men were working. He heard a thundering crash, and by fast running escaped. Peter Gabardi, a trapper at work under the falling rock, was crushed to death. His body has been recovered. Cutting a road to the room in which the men are entombed cannot be done for the walls have to be heavily timbered as the work progresses to avoid another fall of ground. Although hard and persistent work has been done since the disaster occurred, by as many eager men as could be worked to advantage, only the seemingly short distance of fifteen feet has been cut and fifteen feet have yet to be cut which will take until evening. The ominous feature and the one that convinces many miners that the men will be found dead, is that although only fifteen feet away a sound has been heard to indicate that they were alive. The miners agree that were the men alive this fact would have been made known by some noise. It is the general impression that they have been suffocated by gunpowder gas. Supt. Brown, who heads the rescue party, maintains that there is an abundance of good air in the room and is very confident that eight of the imprisoned men will be found unhurt. Three, he thinks may have been crushed to death.

Some of the entombed men are alive. This fact was ascertained by signalling with hammers. It is now confidently believed that the men will be reached by 6 o'clock.

It May Be on March for You. Mr. Fred, Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years and that his bladder was affected. He tried many so called kidney cures, but without any good result. About a year ago he began use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only fifty cents for large bottle. At Dr. F. H. Burgess & Son's drug store.

Honey-James mineral water, the greatest purgative water known, at F. Frank & Co's.

## Why Was It

that Ayer's Sarsaparilla, out of the great number of similar preparations manufactured throughout the world, was the only medicine of the kind admitted at the World's Fair, Chicago? And why was it that in spite of the united efforts of the manufacturers of other preparations, the decision of the World's Fair Directors was not reversed?

### BECAUSE

According to RULE 15—"Articles that are in any way dangerous or offensive, also patent medicines, nostrums, and empirical preparations, whose ingredients are concealed, will not be admitted to the Exposition," and, therefore—

Because Ayer's Sarsaparilla is not a patent medicine, not a nostrum, and not a secret preparation.

Because its ingredients had nothing to conceal when questioned as to the formula from which it is compounded.

Because it is all that it is claimed to be—a Compound Concentrated Extract of Sarsaparilla and in every sense worthy the endorsement of the most important committee called together for passing upon the manufactured products of the entire world.

Ayer's Only Sarsaparilla. Admitted for Exhibition AT THE WORLD'S FAIR 1893.

### TEXAN INVASION.

Times that Tried Men's Souls in New Mexico.

The Texas Invasion and how it was repulsed. General Sibley conceived the project of setting up western headquarters of the Confederacy at Denver. The plan had Jeff Davis' approval. Sibley's force was the very best that could be recruited in Texas, and after the state had been practically drained. For the most part his men were very young. They were splendidly mounted and well equipped except for firearms. All the best rifles had been diverted into another channel. There was a six-shooter or a pair to each man. In many instances there were without other than these side arms. Scores of them carried squirrel rifles and shot guns.

Before the war Sibley had been a second lieutenant at Fort Marcy, adjacent to Santa Fe. He knew New Mexico like a book. It was his scheme of campaign to crush and recruit from all resistance not in that territory. He first encountered resistance at Fort Craig. The victory was an easy one. Canby had his artillery too far from its support. Sibley captured the guns and turned them on the Union forces. Sibley knew that retreat must be to Perito and he defeated Canby in the race to that place. Canby, on getting reports from scouts, flew toward Marcy. There he found Sibley entrenched.

Lieutenant Colonel Spenglerberg was a prisoner of Sibley's. Spenglerberg was a Santa Fe business man, and had a large stock of goods and a bank there. He and Sibley had been intimate friends before the war. The officer in whose charge the lieutenant colonel happened to be was a man unworthy any uniform. At the point of the pistol he forced Spenglerberg to lead him to the merchandise and bank in the old city. It was the rascal's intent to return to Santa Fe and step into an immense fortune. Spenglerberg had in his pockets some gold. With this he bribed a guard to carry a note to Sibley. Cancellation of the deed and protection of the property were requested. In fifteen minutes Sibley had the villainous officer in irons. Santa Fe was not sacked. The work of destruction was confined to the burning of the half completed state house and a few other public buildings. The union forces retreated to the north and were closely followed. They managed to effect a juncture with the First Colorado, under Wynkoop and Chivington. Then followed the decisive battle at Glorieta. This slaughter dispelled all dreams of a confederate principality in the wide and wild west.

Glorieta lay at the narrow end of a long canon. Breastworks were thrown from wall to wall. The fearless and dashing Sibley saw that a charge was the only thing. In the center were the Coloradans. A good many of these soldiers were from the mountains. They had good rifles. Sibley's light brigade was allowed to ride within a short distance of the works. They approached easily, their fine horses prancing and their laughing and shouting. There is many a man in Denver and through the Centennial state who can tell how the saddles on Sibley's horses were emptied of the lancers at short range, how the charge was repeated a second and yet a third time, and how Sibley was repulsed and driven from the field and pell-mell toward Texas with frightful loss.—Denver Field and Farm.

Hall's Vegetable Sanifair Hair Renewer has restored gray hair to its original color and prevented baldness in thousands of cases. It will do so to you.

**LEVI STRAUSS & CO'S**  
**COPPER RIVETED OVERALLS**  
**AND**  
**SPRING BOTTOM PANTS**  
**EVERY PAIR GUARANTEED.**  
**ADDRESS SAN FRANCISCO CAL.**

From Wednesday's Daily.

W. D. Hoffman, of Trinidad, passed through the city last night.

U. S. Attorney Hemingway and his assistant left on the afternoon train for the north.

Miss Marguerite Heister, sister of Mrs. J. R. Denair, returned to her home in San Francisco last night.

J. A. Smith, of Jones, is in the city. He is here to arrange certain matters in regard to his bath house.

E. L. Stringer, general foreman Postal Telegraph company, came down to the metropolis last night from Trinidad.

The Misses Wright, residing on Silver avenue, have moved into the residence recently vacated by M. W. Flournoy.

J. B. Tagerer, national bank examiner, arrived from the west this noon. He is on a tour of examination of national banks in this district.

John Cunningham, a boy aged 17 years, was killed yesterday in one of the mines at Gallup. The particulars have not been received at this office.

W. A. Sanders, general agent of the Equitable Life Insurance company, left this afternoon for Lawrence, Kas., where his mother is quite ill.

David Strachan, who was here on court business for the past week, returned to Gallup last night. He expects to again be in the city by Friday.

Deputy Sheriff Booth, of Edify county, is in the city, and will return this evening with Jas. Wray, the colored man arrested a few days ago for theft.

R. C. Montgomery, second cousin of F. E. Sturges, came in from the west last night and is at the European. He represents the Wertheimer Cigar company of San Francisco.

Dr. Winslow has been confined to the house this week with a severe cold, but will be out and in the midst of the political campaign in a few days. He is the chairman of the county republican committee.

Conductor Melly, between Las Vegas and Raton, is taking a lay-off, and Chas. Gardner, regularly between this city and Las Vegas, is officiating in his stead. Melly, good-natured Dick Hays has charge of Gardner's run to this city until Melly returns from his vacation. There are many here who are sighing for the return of Gardner, and they can be seen at the depot frequently watching the headlights as they roll down the track.

Conductor Boucher, who left about the 1st of October for Ohio, where his family had gone on a visit to relatives and friends, returned the other day, and brought down No. 1 passenger train from the north last night, the first since his return to his duties. Conductor Boucher has all the appearance of a man whose short vacation did him lots of good. While absent, Extra-Conductor Lesney was on the run between the metropolis and Las Vegas.

Mrs. H. R. Kaster, a worthy member of the Degree of Honor lodge, sends a communication to *THE CITIZEN* denying the charges of Capt. Tyler that D. J. Hines left the city with the intention of defrauding those whom he owed. The lady says the charges have "cast a slur on both the A. O. U. W. and Degree of Honor," and further states in her communication that the payment of the bill due Mr. Tyler was fully secured before Mr. Hines left the city. Mrs. Kaster also says that the bills Mr. Hines left unpaid amounted to about \$175.

The new fair directors—a majority of whom were present—met last evening at Zeiger's Cafe, upstairs, and elected Wiley M. Weaver president and C. C. Hall first vice president; Andrew Smith, secretary; A. A. Keen, treasurer, for the coming year. The president, vice president and secretary were appointed a committee of three to select an executive committee of eleven to take complete charge of the management of the fair, and consult with the irrigation congress as to dates. Considerable interest was shown for the success of the coming fair.

## Pleasant Visitor

Mrs. A. Webster, from Sardinia, Ohio, arrived in this city on the 14th inst. and opened her school in the college building last Monday, with some twenty-two scholars, including the young Mexican men in the Biblical department, who, in addition to their Biblical studies, pursue the ordinary course of studies. She takes Mrs. Norton's place in said school, and will likely be the superintendent of the Girls' Industrial Home, under the auspices of the W. H. M. S.

Mrs. Webster is a well-informed lady and has had much experience as a teacher. She was three years in South Carolina in charge of the Bishop Simpson Memorial school, under the management of the above named board. She was also connected with the Cladun university, S. C., where her husband, the late Rev. A. Webster, D. D., was president. He was also P. E. of the Charleston district. But for the last six years prior to her return to Ohio, Mrs. Webster had been engaged as a teacher in Concepcion, Chili.

With such an experience we bespeak for her success in her school and mission work in our city.

## Held for the Ticket

The political parties have nominated their choice of men for the various county offices, but the voters of Gallup can see but one ticket, and that is the republican ticket, from Pedro Perez to Jose L. Garcia. To them do we pledge our earnest support, and to them do we look for a division of this county. They will, with our support, be the controlling power after November 6, and no excuse can possibly relieve them of the duty they will owe the people of Gallup. The county republican ticket is made up of good men and will receive the support of Gallup almost to a man—Gallup Gleaner.

## ROBBERY AT HOLBROOK.

Strategist of F. J. Watron Burglar—\$1,000 Worth of Goods Taken—Tief Escaped

Holbrook, Oct. 26.—At the usual hour this morning, Druggist F. J. Watron came down from his residence in the west part of town, to open his place of business. Upon arriving at his store, Mr. Watron discovered that the heavy doors had been forced open, thus relieving him of the necessity of unlocking them. Entering the store, Mr. Watron was confronted by the very unpleasant fact that for the second time in the past four years, his store had been the scene of a bold and systematic robbery. A "jimmy" lying on the floor, the rifled cases, and goods strewn carelessly about, were all evidence of the "job" as having been done in the regulation and approved manner of the members of the "light fingered" fraternity. A canvas bag in the rear of the store had been emptied of its contents, and taken, presumably, to hold the "swag." It seems that the first thing which captivated the eye of this nocturnal collector was a glass case of jewelry, consisting of plate and solid goods to the value of \$500, most of which was new goods just received, all of which he transferred to the bag for "future reference."

Next in line came a case of cutlery, from which about \$300 worth of high grade goods were taken, including two dozen Sultana razors, followed by a selection from the stock of merchandise and brass root pipes and cigar holders and Hoffman House cigars to the amount of \$100. As the bag must have grown heavy by this time, and he had only tagged only about \$300 worth of goods, it probably occurred to him that he had better round the figures out to an even \$1,000 by taking about \$100 in silk goods, which he did, including mufflers, handkerchiefs and ties, and considering the poor light and the absence of the proprietor, he succeeded in making a very good selection, taking only the most popular shades. A C. O. D. package containing \$250.00, belonging to Mr. T. V. Keam, held in trust by Mr. Watron, was also taken. The town and surrounding country was searched today for suspicious looking persons, but no traces of the stolen property were found. A description of the stolen property has also been telegraphed to towns east and west along the railroad, and it is hoped will result in the capture of the thief and recovery of the property. This loss of \$1,000 worth of goods would be felt by all of the business men, but very perceptibly so by Mr. Watron, who laughingly remarked when speaking of the matter this morning:

"Oh it is only my usual luck. I am only surprised that the building was not burned down also, as half burned matches are scattered about everywhere among the indomitable stuff, but," he said with a patient smile, "I am getting used to this sort of thing. First it was a robbery, something like this three years ago, next came a bank failure in which I lost all surplus cash not directly invested in my business, and now I am 'tipped up' by the back for another thousand," but I still have faith in the republican party and I guess we will be all right in '96 if we live that long." But Frank doesn't look like a man that would require an obligatory notice very soon, in fact he is very much alive and the empty cases will soon be refilled and emptied again and again should his customers be so lucky as to sell their clips of "free wool," 100,000 pounds of which is now on the ground at Holbrook begging for a buyer. W.

## From Thursday's Daily.

F. H. Kent drove up to his place fields, Hell canon, this morning.

Mrs. S. M. Kaiser, most excellent lady, is in the city from Chicago.

Miss Rosalie Burke, who has many friends in Cerrillos, is here on a visit.

Julius Lesser, the Winslow general merchant, came in from the west Tuesday.

T. G. Mulhern, the division trainmaster, was in the city on business yesterday.

J. K. Saint, receiver of the New Mexico Savings Bank and Trust company, has returned home.

Fred. Virley has a camp near Cerrillos, where he will remain for several weeks and hunt wild game.

John W. Schofield, receiver of the defunct Albuquerque National bank, was in Santa Fe yesterday on business.

J. C. Martin, who is an enthusiastic republican, will go to Bland tomorrow to help roll up a majority for the ticket.

James Stinson and family are in the city from Los Cerrillos, and will be the guests of Mrs. T. L. Wilson, a sister of Mr. Stinson.

Major Baker, the United States paymaster for soldiers, was in the city last night, returning to Santa Fe this afternoon.

John Irwin, the Chilli sheep raiser, came down from Cerrillos yesterday morning, and this morning rode out to his ranch east of the city.

Al Coleman, who was at Cerrillos Wednesday on business, returned last night. Mr. Coleman will go to Bland and Allenton tomorrow on a combined business and electioneering trip.

Chas. L. Gardner, the conductor on the Lake Valley branch of the Santa Fe road, and wife, accompanied by Mrs. L. P. Krausnick and daughter, will leave this evening for the city of Mexico. Mr. Gardner is one of the most popular railroaders south of the city.

W. D. Hodes, who was here yesterday on business and took a casual survey of the foundry, returned to his Trinidad home last night. Mr. Hodes is manager of the steel works of Trinidad, and says that business of all kinds is steadily improving in his neighborhood.

S. A. Van Deusen, of New York City, more recently of Fairplay, Col., his son, R. M. Van Deusen; W. H. Ide, of Columbus, Ohio; Chas. B. Carson, of Havestraw, N. Y., and a real Italian count, G.

## PREHISTORIC MARKS.

Gigantic Footmarks Found in a Texas Canyon.

In the Palo Duro canyon lying north of Amarillo, Tex., the tracking away of a large piece of alluvial earth has recently revealed a singular trace of prehistoric life. This, says the Philadelphia Times, consists of the unmistakable trail of some large animal going over the rocks, followed by another, probably of the human kind, or at any rate of a gigantic specimen of the ape. That it is the former is more likely as the monkey tribe, except in the smallest families, is not found on this continent or in South America.

The first animal, judging from the marks it left on the impressionable rock, was of the reptile family, for its tail, soft underneath, though weighted with scales sufficiently to make it heavy enough to drag an inch and a half deep, left a broad, smooth trench, while the claws by which it assisted itself were of the true alligator type, webbed between. These claws were nearly five inches long, and were evidently intended to aid the creature in climbing on land, as its webbed membrane served it for swimming in water.

But more curious are the marks of the animal which pursued it. These are of two hands, nearly three times the size of the ordinary man's hand, and those of two active feet, both hands and feet possessing five members, though all of equal length, except the thumb. This, while shorter, is yet longer in proportion by half an inch than is found in man to-day. It was also of unusual strength, sinking much deeper than the rest of the hand into whatever it seized upon. The nails are curved and very powerful, those of the feet being particularly so, grasping the rock firmly.

Another singular thing is the position of the marks. They are carved in a rock standing nearly perpendicular to the bed of the ancient river, nine hundred feet below, and which must once have been as wide as the Mississippi, and of a current sufficiently strong to have cut its way through these granite rocks. This position of the marks would indicate that the reptile turning up from the stream was pursued by the other animal, and probably killed on land. This part of the country is pronounced by geologists to be among the most ancient formation of the continent.

The rock on which these marks are to be found is about one hundred and fifty feet below the surface of the earth, and is only to be reached by one swinging over the side of the precipice. They were discovered by an amateur geologist, who, noting the fall of the soil, went down in the hopes of adding to the rich antiquarian spoils this singular charm has yielded. Plaster casts have been taken of the prints, and will be forwarded to the state museum at Austin. The marks are plainly visible from a ledge some fifty feet down the side of the canyon, and have been viewed by all in that section interested in such matters.

## TO FIND THE NORMAL CHILD.

Novel and Valuable Work Now Being Carried on in Washington.

A new kind of scientific work is being carried on in Washington, in which the testing of twenty-five thousand school children, mentally, morally and physically is the preliminary step. Dr. Arthur McDonald is conducting the work, under the auspices of the United States bureau of education, and the results when arranged and tabulated are expected to throw valuable light upon a number of mooted questions concerning the race.

For example, writes a correspondent of the Boston Transcript, it is desired to know whether boys of the laboring class are less bright than the sons of the well-to-do. Are they as well nourished? In London not long ago investigation proved that the children of laboring parents in that metropolis were better nourished—that is to say, weighed more at the same age—than those belonging to higher social strata, the latter being fed on too much candy and cake.

The work here being unfinished, conclusions cannot be stated. To begin with, the height and sitting height of each child were taken. Long-bodied races, generally speaking, are inferior. It is desired to know if long-bodied individuals are less clever or less strong than the short-bodied of the same race. Are long-bodied boys and girls apt to be stupid? Long-headed children are usually tall. Tall people are most often long-headed. Tall races are superior. The question naturally follows: Are long-headed children superior mentally? When it is said that a man has a long head is there not significance in the remark?

Are tall children then, superior? Nobody knows as yet. These are among the things which Dr. McDonald is trying to find out. In the classification of the eight thousand negro children in Washington schools have been kept separate so as to compare them with white children. How do they compare in respect to brightness, weight, physical measurements, etc.? The colored child surpasses the white child up to five years of age in mental development; then the white child goes ahead.

Comparisons of girls with boys naturally follow. At the age of entering womanhood girls weigh more than boys; that age with city girls arrives a year earlier than with country girls.

Some more interesting comparative data of the sexes have been already secured. It was determined by a succession of simple, but conclusive, tests, that girls felt pain more quickly than boys, and Dr. McDonald is convinced by this and other tests that the conclusion that women are more sensitive to pain than men is the correct one, although the opposite idea widely obtains. It is worth mentioning, by the way, that in every school there are more bright girls than bright boys. Girls are more faithful in studying and memorize more attentively. A girl will not get impatient and throw her book into a corner as a boy would.

From Friday's Daily.

J. P. Goodlander, the St. Louis drug traveler, is in the city.

Deputy Sheriff Tom Hubbell leaves this evening for Gallup on legal business.

Rev. J. D. Bush, the Methodist minister, came up from Socorro and San Marcial last night.

Al. Polley and J. F. Diamond, two well-known railroaders, are in the city to-day from Winslow.

Chas. Holton, one of the owners of the Syndicate Shows and Paris Hippodrome,

which will show here on Tuesday, Nov. 6, accompanied by his wife and C. A. Clarke, arrived last night from the west, and have rooms at the San Felipe. Mr. Holton states that the shows are being well patronized.

Louis Turner, colored, and Vincent Arias got into a fight this morning, and the latter was badly beaten about the head and face. It seems that Turner owed Arias fifty cents for some hauling, and promised to pay the bill to-morrow. Arias wanted the money at once, and struck Turner on the head with a rock. The latter picked up the rock, and retaliated by administering several vicious blows on the head of Arias. The men were arrested, and Justice Burke fined Turner \$5 and costs. J. W. Palmer stood good for the payment of the fine.

The coal mine, being operated by Austin Goodall and others at Carthage, is showing up splendidly, and the owners are shipping about two cars loads per day. Mr. Goodall stated to *THE CITIZEN* that the freight rates on them, and they find, in consequence, competition is really hard.

Rev. E. B. Cross, formerly in temporary charge of the St. John's Episcopal church, this city, several years ago, is expected here Monday night and will be the guest for a few days of Mr. and Mrs. W. A. Walker. Rev. Cross is on his way to Silver City, where he takes charge of the Episcopal church there.

Mrs. James Mahoney, wife of a passenger conductor on the Atlantic & Pacific west from Winslow, passed through the city the other day for St. Louis, where she will visit relatives and friends. Mr. Mahoney has secured a lay-off and will hunt bear and other wild game for a few weeks.

Austin Calhoun and wife, Robert Calhoun, wife and son, and Messrs. Reed and Luckey, all of Mexico, Mo., arrived last night, and will spend the winter here. They have rented the residence on Silver avenue, formerly occupied by the Misses Wright.

The White Ash coal mine, at the Madrid camp, near Los Cerrillos, which was shut down a short time ago, was started up again Tuesday morning. The hard coal mine was also started up Wednesday, thus giving about 100 more miners work.

Col. J. Francisco Chavez, the republican wheel-horse of Valencia county, is here to-day mingling with his many city friends. The colonel was again honored yesterday by his party nominating him for territorial council.

Chas. Jones, the Atlantic & Pacific yardmaster at Winslow, was called to St. Louis on the receipt of a telegram announcing the serious illness of his wife. Mr. Jones passed through Albuquerque Wednesday night.

Monico Mirabel, a big sheep raiser of San Rafael, Valencia county, is in the city. He attended the convention of Valencia county republicans at Los Lunas on the 25th, and came up to the metropolis last night.

Clark M. Carr, ranchman near Fort Wingate, who attended the republican convention of his county at Los Lunas yesterday, is in the city to-day, accompanied by his wife and mother-in-law.

A. I. Eaton, southwestern traveling passenger agent for the Vandalia road, headquarters at Wichita, Kansas, was in the city this morning, coming up from the south last night.

C. B. and H. R. Williams, two brothers, are at the San Felipe from Cincinnati, Ohio. H. R. Williams is in poor health, and was advised to come to the Rio Grande valley.

Hon. Roman A. Baca, of San Mateo, who will be one of the representatives from Valencia county in the next territorial legislature, came in from the west this afternoon.

Fred Otero, who is the candidate for collector on the Pinto ticket, left this afternoon for the north. He will visit the northern precincts before returning to the city.

Dr. Henry has returned from Kansas City, and will remain here in the future. The doctor states that he has come to realize that Albuquerque will suit him in the future.

Percy Hawley, accompanied by his sister, Mrs. Clarence Blakeley, has returned home from a pleasure trip to Denver. Mrs. Blakeley will remain for several weeks.
