CARRIZOZO OUTLOOK

Published Weekly in the Interest of Carrizozo, and Lincoln County

VOL. XI—NO. 52

CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, FEBRUARY 8, 1918

PRICE \$2.00 PER YEAR

Ex-Governor Will Respond to Gov. Lindsey

Meeting of Stockmen and Horse Growers, at Las Vegas Will Be Im- portant One

At the meeting of the New Mexico Cattle and Horse Growers' association in Las Vegas in March, Governor Lindsey will deliver the address of welcome for the state. Former Governor W. C. McDonald will make the response, as a number of the livestock men's association. The program as tentatively drawn up at a meeting of the executive committee in Las Vegas indicates that the sessions will be interesting and profitable.

William R. Morley, president of the association, will deliver the annual address at the morning session the first day.

Robert P. Ervien, commissioner of public lands, will speak on matters relating to the importance of the present state land policies to the livestock industries.

Charles Springer of the Council of State Defense has promised to fill a place on the program and will probably have for his subject, "The Cattleman's Part in Defending the Nation."

Another important talk and one that will be of vital importance to the cattle industry, will be given by the vice-president of the association, Vic. Culberson. Mr. Culberson is one of the best informed stock raisers of the state and his subject, "War Problems and How to Solve Them," is bound to be interesting.

An innovation brought about by the war will be a woman speaker in the convention. Mrs. Miller of the department of education will speak on "Home Economics."—Santa Fe New Mexican.

Remains of Wm. Garvin Interred in Angus Monday

The funeral services of the late Wm. Garvin, were held in El Paso at the Catholic Church last Sunday morning, and the remains brought back to Carrizozo in the afternoon, where they lay in state at the Club House until Monday morning, to allow the E. P. S. W. employees to view the body.

The remains were taken to Angus, where they were interred in the local cemetery at that place.

Wm. Garvin were a man possessed of a friendly disposition, and was most loved by those who knew him best. When the summons came, he approached his couch of death, after a life of usefulness, like the victorious warrior who after serving his generation faithfully, folded his robe around him and lay down to peaceful dreams.

New Mexico-Electra Oil Company Brings in "Gusher"

The following telegram was received from President Lutz, By Secretary Monroe, and is the whole truth in a nutshell:

ED. MONROE:

Carrizozo N. M.

Wichita Falls, Feb. 8-7:30 A. M.

"Well No. 1. brought in last night on Sunshine for New Mexico-Electra Oil Company shooting fifteen feet over derrick. Strongest well on the hill.—HENRY LUTZ."

The derrick mentioned in the telegram, is 80 feet high thus making the height of the gusher 95 feet from surface of the earth.—"SOME GUSHER"

The Ladies Aid

A musical satire, entitled "The Ladies Aid," which was given at the Methodist Church last Friday night, was witnessed by a small but appreciative audience.

The playlet was given by the Women's Missionary Society, under the management and supervision of Mrs. G. T. McQuillen, who is the president of the society.

Three little girls, Mariam Forrest, Dolly Richards and Loreen Stimmel were charming as little Japanese girls. The vocal solo by Miss Carrie Roberts was exceptionally well rendered. The affair netted about \$11.00, which was considered very good, in view of the fact of so much sickness in town.

Oscuro

Mr. Allen and family are an addition to Oscuro. Mr. Allen is pumper here.

The ladies of the Red Cross will meet at the school house Saturday: of course their knitting bags go with them, as every spare minute is taken up with the work.

Mr. Rurcello has moved in to town, so that his children may attend school.

Mr. Tom MacDonald has bought a soto machine for feeding cattle.

Methodist Church

Rev. Lowelling Pastor
Sunday School 9-45 A. M.
Preaching 11 A. M.

Miss Eula Edmiston will sing at the morning service.

There will be no evening service owing to the fact that there will be revival services at the Baptist church.

We hope our people will cooperate with the Baptist people in their evangelistic efforts.

Mrs. Ed. Queen is a patient at the Paden Hospital this week.

Mrs. J. A. Hightower has returned from a two weeks visit with friends in Trinidad, Colorado.

Mr. and Mrs. Lester Bates are the proud parents of a bouncing baby boy.

Ancho Always Succeeds

The box supper given at Ancho Feb. 1st for the benefit of the Red Cross, was highly successful. After all expenses were paid, the Ancho workers found that \$52.50 had been realized. Ancho always succeeds in its undertakings, and when an announcement is made by them it is certain to be carried out to a satisfactory ending. Lincoln County Chapter, American Red Cross is proud of its Ancho auxiliaries.

Corona News Items

Friends in Corona and community will regret to hear of the death of Mrs. Dunn last Monday at Sterling City, Texas. Mrs. Dunn was a daughter of the late Geo. Colbaugh and was well known here. Mrs. Colbaugh went to Texas ten days ago to be with her sick daughter.

An epidemic of chicken pox has struck Corona. We are glad it is not small pox.

The Red Cross had the best meeting of the season last Saturday at the home of Mrs. Tom DuBois. A second consignment of hospital clothing has been finished and another will be begun soon as received. The ladies will meet next Saturday at the home of Mrs. A. W. Varney to make comfort bags.

Miss Reese, who has been teaching the children of Mr. and Mrs. W. R. Lovelace on their ranch near town, left last Friday for her home in southern Texas.

E. H. Boswell made a business trip to Carrizozo Monday.

Rev. Porter, the Baptist minister at Vaughn, filled his regular appointment here Sunday, morning and evening.

Mrs. Berry and daughter were in town Sunday and Monday from their ranch home near the Owens community.

C. B. Mariner last week moved his family from Gallinas to Corona, in order that the children might attend the Corona school.

See "Second Mrs. Tarquary" at the Carrizozo Theatre next Wednesday night.

Teachers Elect President

Let me thank the teachers of the county for their prompt response in voting for a president for the Lincoln County Teachers' Association, which resulted in the election of Mrs. W. L. Gumm for this important position.

Soon preparations will begin to form a program to meet the needs of the times, and all teachers of the County may be assured that the meeting of the Association this year will be as it has always been in the past, a thing worth while. It shall be the endeavor of those arranging the program to obtain some of the best educational talent of the State to address the teachers on that occasion.

Last year we were unfortunate in having our date for the Association conflict with that of another County and many of those whom we invited had previously arranged to be at the other meeting, but this year we shall try to have our date fixed far enough to obtain these parties before they promise to go elsewhere.

Let every one endeavor to make this the best association the County has ever had. It should be the desire of every teacher of the County to be present and participate in the good things that will be enjoyed at the coming of the Association.

From time to time there will appear in the columns of the County papers something concerning the Association and what treats may be expected. Just as soon as the date shall be decided upon, it will be made public through the papers before mentioned.

Let us all work together to make the coming meeting a Grand Success.

J. E. Koonce,
Co. Supt. of Schools.

Card of Thanks

We wish to extend our most sincere thanks to all those who were so kind and thoughtful or in anyway assisted us in our recent bereavement.

Mrs. William Garvin,
Blanche Garvin.

Representative Llewelling is Outspoken

Says the Proposed Highway Along E. P. S. W. Would be a Mistake Favors Bonito Route

If the proposed state highway from Alamogordo to El Paso be built as it is now planned, it would be a mistake, according to Major Llewellyn, speaker of the New Mexico house of representatives, whose opinion was openly expressed this week, in which he said:

"The greatest attraction in the United States to day, is the Elephant Butte dam and instead of the road being built along the El Paso and Southwestern as is proposed, the road should be constructed to run from Las Cruces, where it will connect with a concrete road soon to be finished making a concrete road from that point to El Paso.

This great highway, will cross the Pecos at Roswell; from Roswell up the Rio Bonito to Carrizozo; from Carrizozo crossing the Malpais; thence westward passing through the San Andres mountains; thence to Eagle, and on to Elephant Butte dam.

The great highway will then continue on down the valley of the Rio Grande to El Paso, the queen city of the southwest. No tourist should miss the opportunity of seeing the Elephant Butte dam impounding as it will be the largest artificial body of water in the world."

This great thoroughfare will surely be built and if the opinion of Major Llewelling receives consideration which it should, the big road will prove of great valuation to the business interests of Carrizozo, and neighboring towns all along the line.

Hungry Experience

Mr. Albert Ziegler, who recently made his usual business trip to New York, had an unusual experience between here and the extreme east.

During the blizzard that prevailed over that region, the dining car of the train bearing Mr. Ziegler was put out of commission. The heating and cooking apparatus became frozen, consequently the passengers were without food for an entire day, with the exception of an occasional sandwich. Mr. Ziegler is at present in New York, where after making his purchases, he will visit Seattle, and in all probability return with Mrs. Ziegler, Mrs. Coplin, and the new granddaughter.

Don't say you have no place to amuse yourself on Sunday, when the Carrizozo Theatre is running Sunday matinees.

THE DEEP SEA PERIL

By VICTOR ROUSSEAU

(Copyright by W. G. Chapman)

PAGET SINKS A GERMAN CRUISER AND IDA KENNEDY ENTERS THE STORY.

Naval Lieutenant Donald Paget, just given command of a submarine, meets at Washington an old friend and distinguished though somewhat eccentric scientist, Captain Masterman. Masterman has just returned from an exploring expedition, bringing with him a member of the strange race, the existence of whose species, he asserts, menaces the human family. At the club, the "March Hares," Masterman explains his theory to Paget. The recital is interrupted by the arrival of a lifelong enemy of Masterman, Ira MacBeard, and the former is seized with a fatal paralytic stroke. From Masterman's body Paget secures documents bearing upon the discovery and proceeds to the home of the scientist. Paget proceeds to sea on his submarine, the F55, and encounters a German cruiser.

CHAPTER IV—Continued.

At first the hum of the electric motors dominated all other sounds, but gradually it became blended with a medley of noises. Placing his ear a moment against the plating of the hull, Donald could hear a steady though faint pounding, which came, not from within, but from the bearings of the distant warship, transmitted under water. Somewhere, too, Donald fancied that a destroyer was speeding toward them, for there was a faint and almost imperceptible whirring, as of high-speed machinery. Mixed with the throb of the screws there came the sound of their suction.

At times the seas, breaking over the periscope, obscured his vision. Sometimes, too, the cruiser shifted outside her arc; then the periscope motor started anew, and slowly she would swing back, growing more discernible. Below, the men, who understood that an enemy ship was near, waited in suppressed excitement.

"We'll have to try her at a mile, Clouts," said Donald to the lookout. He carried only three torpedoes. He would have liked to close in and make sure of his prey, but a shot at almost the extreme range seemed preferable to hazarding the vessel and the lives of his crew.

"Aye, sir!" answered Sam Clouts. Clouts was a man of about forty years, hook-nosed, with bland, humorous blue eyes, and a square jaw under a square, bristling beard. When off duty he was perpetually playing a mouth-organ, and Donald could not help smiling to see his hand stealing covetously toward his pocket even now.

The German could hardly have been more than a mile away when she suddenly changed her course to westward. Donald had been approaching her head on, with the object of maneuvering, when within striking distance, to send a torpedo amidships. The new course of the vessel was a bitter disappointment to him.

Donald realized that she was nearing the Shetlands and endeavoring to make the passage between mainland and Fair Island. That was the most hazardous part of her journey. Once beyond the straits, she would be free in the open Atlantic.

He gave the order to rise. The tanks were blown, the rudders and diving planes adjusted; the F55 began to mount upward. A green translucency appeared. The electric lights went out. The hatches were opened. A gust of fresh air drove the stale atmosphere away. The patrol motors took up the task of the electric ones.

Donald ordered full speed. The vessel drove high through the waves, achieving 12 knots.

A shadow edged the misty horizon. It was Sumburgh head, the extreme southerly point of the Shetlands. Here the cruiser was due to turn.

"Smoke to port, sir!" said Clouts. The German had evidently seen it at the same time, for her speed began to diminish. This meant that she was steering cautiously to gain the shelter of Sumburgh, behind which she might be unobserved for observation.

If it was an English battle cruiser that was approaching, the ship would be hard put to it to escape. It was not likely that the oncoming ship had sighted her smoke through the increasing haze.

Donald drove hard for the main channel. He knew that he could catch the German now, and he was ready to take chances of discovery. Meanwhile, inch by inch, the stranger came up out of the sea.

At first Donald believed she was a British battle cruiser. This hope was soon dispelled, however, when her funnels showed three black stacks, ringed with white the color of the Claude

line, and the heavy hull, built for freight, not speed.

His heart began to thump heavily. For the Beotia was one of the Claude line's ships, and the approaching vessel looked very much like the overdue Beotia.

And Ida was aboard her, and already well within range of the enemy's guns! The two ships had sighted each other. Donald saw the Beotia diminish to a thread line as she turned and ran, prow on, toward the Orkneys.

A spurt of flame broke from the German's bow. A coil of cloud followed it. A few seconds later the boom of the discharge echoed across the water, and a pillar of spray shot up near the Beotia's bow. The battleship turned toward her prey.

And Donald's chance had come. The Beotia had no intention of surrendering. The German, following her, perceived the lurking danger, and at once his guns were trained on the submarine.

The F55 dipped at the bow. A shell hooted over her, and a second, falling shorter, deluged the submersible with water. But the F55 was stern down and sinking. Her periscope shot through the waves, the only target, and in the conning tower Donald sat with his eyes fast on the mirror.

Ten feet below the surface the F55 plunged on toward the monarch of the sea.

The sound of the guns was vastly louder under the waves. A single shot, sent home, would smash through the thin plates as if they were of paper. But Donald knew that it was the supreme moment when danger must be ignored. He seemed to sense the ship, the crew, as a single entity, devoted to a single purpose. He aimed his bow directly into his enemy's port flank. Se was less than a mile away. At that distance it seemed a miracle that her shells failed to strike home.

Down in the torpedo room three men bore a torpedo from the rack and placed it in the slings. They swung it forward into the breach of the tube. One man at the pump rapidly filled the breech chamber with the compressed air that was to send the missile upon its course.

Donald, in the conning tower, still held the cruiser within the mirror. He saw the smoke coil from her guns, he heard their dull reverberation, and knew that at any moment the blinded F55 might be sent staggering to her death through the wake of her wash. But he was animated by the single-minded purpose which inspired all and made the steel and human mechanism a bolt forged for death.

Clouts, at the wheel, did not allow the little craft to deviate a hair's breadth from her course.

"Stand by!" The hiss of the oxygen apparatus dominated all other sounds. At her 45-knot speed the missile left the launching tube with a heavy thud, and the ship quivered as she shook herself free.

And Donald knew that his shot had gone home.

The whir grew less, but all listened until the end of the mile-long journey. On board the enemy ship everyone could see the air bubbles that came up from the speeding missile and its white, foaming wake. There was no time to maneuver the giant ship. They prayed—they could do no more—that the torpedo might not have been shot true; that it might deviate from its imminent path.

It came on inexorably. The firing became wilder. The gunners, absorbed as they were to their task, seemed permeated with the contagious terror caused by that white, rippling pencil line that was extending toward their ship.

The missile struck the battle cruiser amidships, blowing out a section of her hull, a single water-tight compart-

ment. The cruiser hardly staggered from the blow.

The torpedo had struck glancing, and missed the full force of its delivery. The wound was in itself too small to sink or even badly cripple the great ship; a triumph of shipbuilding, and calculated to withstand just such an impact.

Unfortunately for her, the maximum of the shock was received beneath the powder room, adjacent to the ammunition chamber, whose doors were open at that moment for the removal of the 12-inch shells by the ammunition hoist.

The shock was followed by an infinite suspense. Perhaps it lasted for two seconds. The cruiser drove through the waves like some sea monster that had received a deadly thrust unscathed.

Then, with a detonation that was heard from Sumburgh to Sutherland, she went sky-high in tumbling ruin. Donald, within the conning tower, saw a blur frost the mirror of the periscope.

Another second passed. Then the F55 went reeling under the terrific force of the explosion. She spun round under the waves and thrilled as if she herself faced disruption.

The bilge-pumps cleared her diving tanks. She rose, nose upward, scenting the air; her stern followed, and she lay awash in the water once more. The hatches were removed.

Not a vestige of the cruiser was to be seen. She had sunk in less than three minutes.

But hard by, not three-quarters of a mile to port, a pillar of smoke, lit up by flame, curled out of the Beotia's hatches. Seeming her the submarine's

There Was a Woman Aboard and a Man Pulling Wildly at One Oar.

decoy, the cruiser's gunners had ridged her with shells from the two 12-inch guns at the bow.

She seemed to stagger through the smoke that wreathed her. She was dying by fire and water, too, and the twin elements, in their eternal conflict, reeked nothing of her human freight.

And Ida was there—Ida, doomed to perish, if she were not already dead, unless help speedily came!

Donald took the helm. The F55 rushed through the waves in the direction of the Claude liner, which listed hard to starboard. Two boats had already been launched, and bobbed ridiculously beside her; others remained high up in the air, impotent, because the list prevented their being lowered, and dashed themselves to pieces against the hull as they swung from the shattered davits.

As the F55 drew near the ocean seemed to open. Silently, softly, the convexity of the hull slipped down and was lost to view as the sun's edge goes into the horizon. A swirl and eddy in the sea, and nothing remained except the two boats and some tiny, doll-like figures that bobbed in the water.

A gasp of horror went up from the throats of the seamen, clustered upon the deck of the F55, as the swirl sucked down the boat that was the nearer to the maelstrom of the wreck. It sucked down with all its living freight, and spewed it forth into the air again, end on—empty.

The engines stopped. The submarine glided in. The single boat seemed empty. No! There was a woman aboard, and a man pulling wildly upon one oar.

Donald took in the situation instant-

ly. He turned to his aid, Davies, a little, keen-faced middy who was making his first voyage in command of men.

"Tow us, or run for Fair Island!" he cried. Then, flinging off his coat, he leaped.

A few strokes carried him to the whirling boat. And now he realized that he had known all along that the girl in it was Ida, miraculously saved out of the great company of those who had died. His heart beat a penn of joy; at the sight of her his love awakened, and he knew that this was no transient passion, but an enduring one.

But just as he reached the boat he saw the sailor at the oar stagger blindly toward the edge. It seemed as if he were being dragged overboard against his will! He whirled his arms and plunged into the deep with a hoarse cry that rang out far above the waters.

Paget, attempting to rescue his sweetheart, encounters a horde of noisome creatures and finds himself in desperate plight.

(TO BE CONTINUED.)

PRISONERS WENT ON STRIKE

Refused to Go Back to Jail Until One of Their Number Was "Fired" by Workhouse Superintendent.

Perhaps the queerest strike on record was that of workhouse prisoners in Delaware county, Indiana, recently, when they refused to return to jail unless one of their number received his freedom. And it was not that they desired him to be free, either, but because they wished to be freed of his presence.

"I had my gang of prisoners way out by Yorktown, working on a country road that needed repairing," said James Cole, workhouse superintendent, according to the Indianapolis News, "when I noticed, about time to load them into the automobile and bring them back, that the prisoners were hanging back and talking among themselves. Finally one of them came to me with the story and his demands.

"The boys here won't go back to jail with you unless you fire Danny, there," said the spokesman. "They won't ride back in the machine with him because he has vermin in his hair and on his body. You either let him go or no more jail for us. We've agreed to make a run for it if you don't, and you can't catch all of us."

"Of course, I had no right to allow the man his freedom," Cole continued, "but the fellow jumped up and ran away just then and I'm bound to admit we didn't try very hard to catch him. Anyway, that broke the strike."

Days to Come.

As vacation time brings one out to some quiet countryside of the United States there comes a painful sense of the contrast between what we see here and the scenes of desolation pictured in all our magazines. The vineyards about Lake Erie are full of September's promise, but those of Champagne are crisscrossed by innumerable trench systems and tormented by ceaseless shell fire. The orchards of California and Virginia are ripening their burden in drowsy peace, but what of those fought through by armies of czar and kaiser? You can hear a woodpecker half a mile away in the pines of Cheryenne canyon, but there's a different story to tell of the blasted and blood-stained woods of Ardennes. And yet this fever of war will pass. The guns will have had their day, however long and terrible, and in the end nature and the patient folk who serve her will come to their own again.—Collier's.

What One Knot Faster Would Mean.

"For every soldier that we land in France," says the Scientific American, "25 tons of shipping must plow back and forth at a steady ten knots to supply his needs alone. For 25,000 men this means 100 ships—a number that we would be hard pressed to find. And this means curtailment of the vital supplies to our allies.

"Now, could the average speed of this fleet be raised to 21 knots and could the time in port be reduced 10 per cent, we could release for other service some 60,000 tons of shipping. In other words, we could create immediately that amount of extra tonnage and add it to our merchant marine, not in 1918 but today. And today may be late, the real 'Day,' the day the balance will spring."

Triumph of Justice.

When we attack only injustice, sooner or later we must triumph. In order to insure triumph, then, wish nothing but what is just. Respect the rights even of those who have trampled your rights under foot. Let the safety of liberty, the property of all, without exception be sacred in your eyes, for duty extends equally to all.—Lamenais.

Naturally.

"Motorists never have a good word to say for pedestrians." "Of course not. It is the nature of things for them to be continually running pedestrians down."

Stop That Cold At Once

CASCARA QUININE

The old family remedy—in tablet form—safe, sure, easy to take. No opiates—no unpleasant after effects. Cures colds in 24 hours—Grip in 3 days. Money back if it fails. Get the genuine but with Red Top and Mr. Hill's picture on it. 24 Tablets for 25c.

At Any Drug Store

Salmon for Eastern Streams.
Many thousands of humpback salmon, native of the Puget sound, where they were collected by the government two years ago, entered Pembroke, Denys, Penobscot, St. Croix and other rivers in eastern Maine this autumn as part of the fisheries bureau plan of stocking the East with the pride of the Pacific coast catch. The bureau's investigation shows that the humpback in its new environment retains its Pacific ocean habit of proceeding to the ocean shortly after it begins to swim, and returning to the rivers to spawn and die when two years old. The government has made annual shipments of eggs of the humpback salmon across the continent for the past five years, drawing the consignments alternately from Washington and Alaska.

RECIPE FOR GRAY HAIR.

To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and 1/4 oz. of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Full directions for making and use come in each box of Barbo Compound. It will gradually darken streaked, faded gray hair, and make it soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off. Adv.

Strength of Aluminum.

Aluminum is a widely distributed constituent of the earth, occurring in a number of forms of combination; most abundant as silicates in the different varieties of clay. The most striking property of aluminum is its lightness. Aluminum is not, section for section, comparatively a strong metal. It is only about as strong under tensile strain, section for section, as cast iron, and has less than one-half the strength of wrought iron under ordinary conditions. Under compression the metal has a very low elastic limit, although its extreme ductility allows the metal to flow on itself so freely as to make it for special purposes a very safe metal to use in compression. Pure aluminum is white with a decided bluish tint, which becomes much more marked on exposure, when a thin film of white oxide on its surface prevents further tarnishing from the air, but seems to give by contrast to the metal as a background an enhanced bluish tint.

Pathetic.

"What is more pathetic," asked the sentimental young woman, "than a man who has loved and lost?" "Well," replied the man of experience, "a fellow who has bet about \$20 on a sure thing and found out that he was wrong is entitled to a nook at the waiting place."

Such a delicious drink makes the change easy and better nerves make it a permanent one.

"There's a Reason"

WESTERN CANADA'S CEREAL CROP

One of the Best Ever Harvested.

The cereal crop of Western Canada for 1917 was the most valuable one ever harvested; the returns from all classes of live stock have been equally satisfactory. The wool clip was not only greater than in any previous year, but the price obtained was double that of 1916, which in turn was almost double that of the year before.

As was the case in 1915 and 1916, many farmers were able to pay for their land outright with the proceeds of their first year's crop. Further evidence of the prosperity of Western Canada is shown by the fact that one in every twenty of the population is now the owner of an automobile. If the farming community alone is taken, it will be found that the proportion of automobile owners is still greater. The bank clearings of the leading cities of Western Canada were consistently higher than they were in the corresponding periods of 1916, and then they were higher than the year preceding. In Winnipeg \$500,000,000 more was cleared in the 11 months ending November 30 than in the same months a year ago.

The entry of the United States into the war has strengthened the bonds between that country and Canada. We are now working together for the same ends. Those who are not fighting are promoting a greater production of foodstuffs. In this connection Western Canada offers a wonderful opportunity. Not only can larger quantities of staple foodstuffs be produced, but the cost of production is lower and the remuneration greater than where land is more expensive. Notwithstanding the fact that the price of farm products has doubled during the past three years, there are millions of acres of arable land in Western Canada which can still be bought at a low price.

Western Canada has an enormous acreage prepared for seeding to wheat in 1918. It is larger than in 1917, and will probably surpass the record area put into crop in the year 1915, when the largest crop ever known in the West was harvested. The year 1918 should also see a further increase in live stock activity.

Farmers have been investing considerable sums in cattle; the high prices secured for wool and mutton have opened the eyes of Western farmers to the possibilities of sheep, and such was the demand for breeding animals last fall that it was impossible to meet it adequately; the campaign for greater hog production is expected to yield an increase of between 25 and 50 per cent in 1918.

Those who are contemplating coming to Western Canada cannot do better than come early in the spring when they can put in a crop and harvest it in the fall. In this way they will be able to achieve something that will not only be of great benefit to themselves, but also to the great cause for which the Allies, including the United States, are now fighting.—Advertisement.

Furniture.

"I'd like to visit the weather bureau."

"That isn't a weather bureau. It's an ice chest."

Fortune's Foundation.

"How did you lay the foundation for your fortune?" "I didn't lay it. I'm in the poultry business. A hen laid it."

PISO'S

MY VALENTINE

Who fills my thoughts from morn till night,
Imbuing them with love and light,
Till even cheerless ways seem bright?
My Valentine!

Who turns life's Winter into May,
Makes labor wear the guise of play—
And charms parterres from sterile clay?
My Valentine!

Who loves me for myself alone,
Scorns gold and never yet has known
To want a dollar for her own?
My Valentine!

Who patiently hears me rehearse
My little ventures into verse,
And never says: "It might be worse!"
My Valentine!

Who makes me play the scaramouch?
Who pulls me off my Sunday couch,
And screams with joy when I cry, "Ouch!"
My Valentine!

Who twists my hair and plait my beard,
Until I look both fierce and weird,
Then chuckles when I'm rudely jeered?
My Valentine!

Who robs me of all dignity,
And, though she's only just turned three,
Like a Czarina ruleth me?
My Valentine!

VALENTINES
by
Clarence
Moore

On the morning of St. Valentine's day the boarders at Mrs. Munson's gathered around the long table with perhaps an unusual interest in the morning's mail.

But the postman was late and breakfast lagged. Once or twice Mrs. Munson had thrust her sharp nose into the room and had even asked Mr. Root if there was anything more he wished.

Second helpings of anything being rare at the Munson table, Mr. Root's fellow boarders grinned appreciatively when Selma thudded heavily in with a second cupful of a muddy mixture, politely called coffee.

"Expecting a valentine, Mr. Root?" asked mischievous Ethel Raymond, the little stenographer, who was to be married at Easter.

Mr. Root blushed furiously and looked into his coffee.

"I am looking for an important letter," he said severely.

"Valentines are important," teased Ethel, for she liked the quiet little gray man who had been bookkeeper for twenty-five years in a downtown warehouse. Mr. Root's bachelor quarters at the top of the house had been spoken of as a model of comfort by the men of the Munson boarding house but the women would have it that the little man must be lonesome, and among themselves they had secretly decided that it would be a fitting romance if Mr. Root married Miss Ida Wingfield, the schoolteacher who sat at the end of the table.

Miss Wingfield, once pretty, now pale and tired, with rather a distinguished air lent by her abundant gray hair, always played Mr. Root's accompaniments when he brought his violin down to the parlor.

"There's the postman now!" cried Ethel Raymond eagerly.

A loud knock came at the basement door and Selma plodded slowly to take in the handful of letters.

Ida Wingfield picked up her valentine, broke the seal with a reverent finger and pulled out a charming concoction of lace paper and golden hearts and flying cupids. There were roses and forget-me-nots and arrows scattered everywhere.

"Ah!" breathed the excited table as

Miss Wingfield replaced it in the envelope.

"You are satisfied, Mrs. Munson?" asked Mr. Root in a rasping tone.

"I'd like to know who sent it," sniffed Mrs. Munson as she went out and banged the door after her.

"Impertinent—insufferable!" gasped old Mrs. Dodd, as she followed the schoolteacher out into the basement hall. "I wouldn't remain here a day longer only Mrs. Munson is an excellent cook and as neat as wax—personally she is impossible!" She pounded her gold-headed cane on the stairs as she mounted.

Ida Wingfield slipped into her warm cloak and went out into the snowy streets. The wonderful valentine burned against her heart; she was conscious of its proximity all day. It took away the sting from the comic one she found in her desk, and it upheld her through a trying day with her pupils.

Night found her coming home to the boarding house and her dull room with star-like eyes and flushed cheeks. She looked positively lovely. Romance was not dead after all.

Mrs. Munson came into the dining room with importance written on her sallow countenance.

"Miss Wingfield, I'm dreadfully sorry but I'm afraid that valentine you got this morning isn't for you, after all. Along about noon a lady came in from next door and said that her name was Wingfield and wanted to know if any mail for her had been left here by mistake. Said her name was Inez Wingfield—so I guess, maybe, that valentine was for her."

Ida Wingfield suddenly looked ill; all the light and color died out of her face. Slowly she took the envelope from her bosom and passed it to the hard-featured woman beside her.

There was silence around the table for an instant. Then before Mrs. Munson could move away Ann Root got up and held out his hand.

"I will take that letter, if you please, Mrs. Munson. It belongs to Miss Wingfield—I know—because I sent it to her!" "Perhaps Miss Wingfield will tell you that she is going to marry me very soon," said Mr. Root confidently, although this was not only news to himself but to Ida Wingfield as well.

"Tell them—are you, Ida?" whispered Mr. Root eagerly.

"Why—yes—of course!" murmured Miss Wingfield shyly, and that was the only proposal of marriage that she received from the bookkeeper; but when Easter dawned there were two weddings from the Munson house and one of the brides was Ida Wingfield.

Cross of St. Andrew.

The Cross of St. Andrew is white satin on blue ground, to represent the cross on which the Scottish patron saint suffered martyrdom. It is combined with crosses of St. George and St. Patrick in the Union Jack of Great Britain.

Makes the laundress happy—that's Red Cross Bag Blue. Makes beautiful, clear white clothes. All good grocers. Adv.

"Cold in the Head"
Is an acute attack of Nasal Catarrh. Persons who are subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the system, cleanse the blood and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh.
HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system. All druggists 75c. Testimonials free. \$100.00 for any case of catarrh that HALL'S CATARRH MEDICINE will not cure.
F. J. Cheney & Co., Toledo, Ohio.

Feeble.
Mr. Trumble—The elevator isn't running as fast as usual this morning.
Elevator Boy—No sir; I don't feel very strong today.

For Pimples Faces.
To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. For free samples, address "Cuticura, Dept. X, Boston." At druggists and by mail. Soap 25c, Ointment 25c and 50c.—Adv.

An Apt Student.
A young woman who went to Columbia to take her degree of doctor of philosophy married her professor in the middle of her second year. When she announced her engagement one of her friends said:
"But, Edith, I thought you came up here to get your Ph.D."
"So I did," replied Edith; "but I had no idea I would get him so soon."

GREEN'S AUGUST FLOWER
has been a household remedy all over the civilized world for more than half a century for constipation, intestinal troubles, torpid liver and the generally depressed feeling that accompanies such disorders. It is a most valuable remedy for indigestion or nervous dyspepsia and liver trouble, bringing on headache, coming up of food, palpitation of heart and many other symptoms. A few doses of August Flower will immediately relieve you. It is a gentle laxative. Ask your druggist. Sold in all civilized countries.—Adv.

Hot Weather.
"Bliggins is always getting into hot water."
"Yes," replied Miss Cayenne. "He is so cold-blooded I suppose it is a kind of relief."

There are two sides to every story. The victory you win means defeat for the other fellow.

A man can't have his cake and eat it, too—especially on his first trip across the pond.

SELF DEFENSE

Defeat Backache and Kidney Trouble With Anuric

Many people in this section have suffered from rheumatism and kidney trouble and have found that Anuric was the most successful remedy to overcome these painful and dangerous ailments.

The lucky people are those who have suffered, but who are now well because they needed nature's warning signal in time to correct their trouble with that wonderful new discovery of Dr. Pierce's called "An-u-ric" (double strength). You should promptly heed these warnings, some of which are dizzy spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To delay may make possible the dangerous forms of kidney disease, such as diabetes or stone in the bladder. If you want quick relief buy it now, 50 cents, all druggists, or send Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., 10c for trial pkg. This will prove that "Anuric" eliminates uric acid as hot water melts sugar.

—that's what thousands of farmers say, who have gone from the U. S. to settle on homesteads or buy land in Western Manitoba, Saskatchewan or Alberta is especially attractive. She wants farmers to make money and happy, prosperous homes for themselves by helping her raise immense wheat crops to feed the world.

You Can Get a Homestead of 160 Acres Free

or other lands at very low prices. Where you can buy good farm land at \$15 to \$30 per acre that will raise 20 to 45 bushels of \$2 wheat to the acre—it's easy to become prosperous. Canadian farmers also grow wonderful crops of Oats, Barley and Flax. Mixed Farming is fully as profitable an industry as grain raising. The excellent grasses, full of nutrition, are the only food required either for beef or dairy purposes. Good schools and churches markets convenient; climate excellent. Write for literature and particulars as to reduced railway rates to Dept. of Immigration, Ottawa, Canada, or to

WOMEN OF MIDDLE AGE

Need Help to Pass the Crisis Safely—Proof that Lydia E. Pinkham's Vegetable Compound Can be Relied Upon.

Urbana, Ill.—"During Change of Life," in addition to its annoying symptoms, I had an attack of grippe which lasted all winter and left me in a weakened condition. I felt at times that I would never be well again. I read of Lydia E. Pinkham's Vegetable Compound and what it did for women passing through the Change of Life, so I told my doctor I would try it. I soon began to gain in strength and the annoying symptoms disappeared and your Vegetable Compound has made me a well, strong woman so I do all my own housework. I cannot recommend Lydia E. Pinkham's Vegetable Compound too highly to women passing through the Change of Life."
—Mrs. FRANK HENSON, 1316 S. Orchard St., Urbana, Ill.

Women who suffer from nervousness, "heat flash," backache, headaches and "the blues" should try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound.

YOU GET STRONG, if you're a tired-out

or "run-down" woman, with Dr. Pierce's Favorite Prescription. And, if you suffer from any "female complaint" or disorder, you get well. For these two things—to build up women's strength, and to cure women's ailments—this is the best medicine to benefit or cure.

The "Prescription" regulates and promotes all the natural functions, never conflicts with them, and is perfectly harmless in any condition of the female system. It brings refreshing sleep, and restores health and vigor. All druggists. Liquid or tablets. Tablets 60c.

If you eat the right foods, and not too much of them, the poisons in your system can be kept down and thrown out by taking a natural laxative, such as that composed of May-apple juice of aloes, root of jalap, and long sold by druggists as Dr. Pierce's Pleasant Pellets.

YOUR FLAG AND MY FLAG

What of the Harvest

The Department of Labor is arranging to bring into the United States 110,000 laborers for railroad and farm work, from Porto Rico and the Virgin Islands, according to Louis F. Post, assistant secretary to the Department of Labor.

What are we to do with this influx of foreign labor after the war is over, and our boys have returned from the battle field, to again settle down to private life and take up their old positions in the industrial world.

To bring into this country 110,000 foreign laborers to take the place of our boys who have gone to the front, if only for a temporary relief of the labor situation, to be sent back to their native lands when the war is over would sound more like business, but will this be done?

If it is not done, what market will our boys be able to sell their labor in, with their old places taken by foreigners?

With every industry in the hands of the United States, we would have nothing to fear from a condition like this, but private corporations blinded by self interest too often overlook the interest of others, and sometimes violate the rights and privileges of those they deem helpless.

We are not alarmists, pessimists, or in any manner do we assume any other attitude than that which is for the good and welfare of all concerned. But we simply ask the question—Who are the wise that will furnish us with the answer—what will the harvest be?

Without Remuneration

Washington, D. C., Jan. 30—According to a canvass of the fourteenth Division offices of the American Red Cross, 150 out of 255 executives, or 59%, are women. These figures apply only to those holding important executive positions in Division offices, and do not include Chapter officials. The canvass further shows that 56% of all executives are full-time volunteers, serving without remuneration.

Red Cross Bee Hive

The work room of the Red Cross has been a busy place this week. Mrs. Parker of Denver is here giving valuable instruction to the patriotic ladies of Tucumcari. The work room has been a bee-hive of activities. Mrs. Parker is an expert in Red Cross work and has made many helpful suggestions.

Those in charge of the Red Cross wish to publicly acknowledge the generosity of the Pearson Lumber Co. in donating material for a work table and Mr. O. G. Reeder who skillfully manufactured the best table in the work room. We are pleased to express our appreciation to the many who have made donations to the Red Cross at various times. Among others the local papers that have given space for notices whenever asked. The Red Cross is not a select club neither is it a church, but a patriotic organization for relieving distress and every true American is eligible for membership.—Tucumcari News.

Must Be Fire Proof

Along with the news that a modest gentleman named Williams is planning to start a democratic newspaper at Willard comes the announcement that he will construct a fireproof building for his plant. He must expect to get out a hot one, and he might improve it some by printing on asbestos.—Las Cruces Citizen.

EVASION OF FOOD CONTROL.

Food is bought in Germany surreptitiously in violation of Autocratic Rulings.

Even the autocratic food control of Germany has been powerless to prevent surreptitious sales, according to semi-official reports reaching the United States food administration. Illegal sales of butter are being made in Germany at prices ranging from \$1.75 to \$2.25 a pound. Eggs sold contrary to the German food regulations are bringing 10 to 15 cents apiece, according to these reports. And bacon or ham is bringing from \$2.25 to \$3.25 a pound.

BIG HERDS GONE

World War Wastes Europe's
Meat Supply.

American Stock Raisers Co-operate
With Food Administration in Con-
servation Measures.

It is probable that Europe for many
years after the war will look to a
great extent to America for its meat
supply.

Europe's herds are dwindling under
war's demands faster than they can be
replenished.

When the German armies retired
from occupied portions of France and
Belgium approximately 1,800,000 head
of cattle were appropriated. This ad-
dition virtually safeguarded Germany
from cattle shortage other nations now
suffer.

In England some 2,400,000 acres of
grass lands have by compulsory mea-
sures been forced into grain production,
thus reducing pasturage and hay lands.
A declining scale of maximum meat
prices for live cattle was ordained in
England, as follows: For September,
\$17.75 per hundred pounds; October,
\$17.25; November and December,
\$16.08, and for January, \$14.40. The
evident intent of this measure was to
drive the beef animals into market as
soon as possible.

According to official French figures,
the cattle of France have decreased to
a total of 12,341,000 as compared with
14,807,000 in 1913. Today, due to lack
of forage principally, France is pro-
ducing only one gallon of milk where
before the war two and one-half gal-
lons were produced.

Meantime the United States food ad-
ministration has taken steps to con-
serve our flocks and herds and to in-
crease their numbers. The stock breed-
ers of this country show a disposition
to co-operate with the government in
this.

For many years it has been a prac-
tice among many of the dairy people
of this country to kill male calves at
birth and in many instances the fem-
ales if not needed to replenish their
herds rather than go to the expense of
nursing them into veal. The high
prices of meat caused the virtual dis-
continuance of this killing. Another
encouraging fact is 75 per cent. of
calves killed for veal this year were
males.

Somebody has very aptly said that
the wars of the world have been won
with grease, meaning that bacon and
lard have been as essential to success
in war as powder, which is true.

The hogs of Europe have been very
greatly sacrificed to present day needs.
This makes the American burden all
the more heavy and makes doubly es-
sential an increased pork production
in this nation. In Italy grain is now
forbidden to be fed to hogs. In Den-
mark under a recent order one-fourth
of the hogs were ordered to be killed.
It is estimated that one-half have now
been killed.

SEIZURE OF HOUSEWIVES'
FOOD STOCKS IMPOSSIBLE

The government has never consid-
ered any plan of seizing foodstuffs
owned by householders. Nor is there
any policy of this kind suggested for
the future.

In spite of this fact, the United
States food administration has been
obliged repeatedly to issue official de-
nials of rumors that the government
intends commandeering preserves and
canned goods put up in American
homes.

These rumors were originated partly
by pro-German propagandists and par-
tly by conscienceless grafters, who
sought to profit through buying from
misinformed housewives.

The year 1918 will see home canning
and preserving practiced on greater
scale than ever before in the nation's
history, officials in Washington believe.
And they are assuring all patriotic
housewives that foods so saved are
theirs, and theirs alone.

Wrist Watch Again.

Old Convert—I can't understand
why the wrist watch is such an object
of levity. I'm sure it is a great con-
venience.

New Convert—Yes. With the old
kind, in order to find out the time I
had to unbutton my coat and fish
around in my waistcoat pocket for my
watch. Now all I have to do is un-
button my coat, fish around in my
waistcoat pocket, discover that my
watch isn't there, and then pull up my
sleeve and look at my wrist watch.

"Best in the Long Run"

STATE OF NEW MEXICO
NOTICE FOR PUBLICATION
PUBLIC LAND SALE
LINCOLN COUNTY.

Office of the Commissioner of Public Lands
Santa Fe, New Mexico.

Notice is hereby given that pursuant to the provisions of an Act of Congress approved June 25, 1910, the laws of the State of New Mexico and the rules and regulations of the State Land Office, the Commissioner of Public Lands will offer to public sale, in the highest bidder, at 2 o'clock P. M., on Thursday, March 24th, 1916, the land described below, to wit:

Tract No. 1001 - SW 1/4 Sec. 16, T. 12 S., R. 10 E., containing 160 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Tract No. 1002 - W 1/2 Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Tract No. 1003 - NE 1/4 Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Tract No. 1004 - All of Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Tract No. 1005 - E 1/2 Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Tract No. 1006 - NE 1/4 Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Tract No. 1007 - All of Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Tract No. 1008 - All of Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Tract No. 1009 - All of Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Tract No. 1010 - All of Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

No bid on the above described tracts of land will be accepted for less than THREE DOLLARS (\$3.00) per acre which is the appraised value thereof and in addition thereto the successful bidder must pay for the improvements that exist on the land.

Tract No. 1011 - E 1/2 Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Tract No. 1012 - SW 1/4 Sec. 21, T. 12 S., R. 10 E., containing 80 acres, more or less, situated in the Santa Fe and Grant County Railroad Bond Fund. There are no improvements.

Each of the above described tracts will be offered for sale separately.

The above sale of lands will be subject to the following terms and conditions, viz:

Except for land selected for the Santa Fe and Grant County Railroad Bond Fund, the successful bidder must pay to the Commissioner of Public Lands, or his agent holding such sale, one-twentieth of the price offered by him for the land, four per cent interest in advance for the balance of such purchase price, the fees for advertising and appraisal and all costs incidental to the sale herein, and each said all said amounts must be deposited in cash or certified exchange at the time of sale, and which said amounts and all of them are subject to forfeiture to the State of New Mexico if the successful bidder does not execute a contract within thirty days after it has been mailed to him by the State Land Office, said contract to provide that the purchaser may at his option make payments of not less than one-thirtieth of ninety-five per cent of the purchase price at any time after the sale and prior to the expiration of thirty years from date of the contract, and to provide for the payment of any unpaid balance at the expiration of thirty years from the date of the contract, with interest on deferred payments at the rate of four per cent per annum, payable in advance on the anniversary of the date of contract, partial payments to be credited on the anniversary of the date of contract next following the date of tender.

The sale of land selected for the Santa Fe and Grant County Railroad Bond Fund will be subject to the above terms and conditions except that the successful bidder must pay in cash or certified exchange at the time of sale, one-twentieth of the purchase price offered by him for the land, four per cent interest in advance for the balance of such purchase price and will be required to execute a contract providing for the payment of the balance of such purchase price in thirty equal annual installments with interest on all deferred payments at the rate of four per cent per annum in advance payments and interest due on October 1st, of each year.

The above sale of lands will be subject to valid existing rights, easements, rights of way and reservations.

The Commissioner of Public Lands or his agent holding such sale reserves the right to reject any and all bids offered or sold.

Possession under contracts of sale for the above described tracts will be given on or before October 1st, 1916.

Witness my hand and the official seal of the State Land Office of the State of New Mexico, this 15th day of January, 1916.

ROBT. P. ERVIN
Commissioner of Public Lands,
State of New Mexico.

In the Ranks.

The American House Manager is today a member of the army that is fighting to save democracy in the world. More than 11,000,000 managers of American homes have enlisted for the duration of the war and pledged themselves to support the fighting men by the way they buy, cook and serve food. Food will win the war, and these women will help to win it. America must send food to Europe. The armies cannot hold out if we fail to send it. Only certain foods

can be shipped—those that pack the most food value into the smallest shipping space. These foods are wheat, meat, fats, sugar. We cannot eat them and send them too. We cannot eat them and send others. We must send these foods, and in order to do that we must eat other foods ourselves. The American House Manager will see to it that no food comes into her home that does not do its full duty under her management in winning the war.

PUT ONE OVER ON THE GUARD

Challenged Soldier Demanded Sentinel's Name on Pretext of Reporting Him to Lieutenant.

Among the members of the Indiana university ambulance corps at Allentown, says the Indianapolis News, there is one man who from this time on will require, while on guard duty, any person whom he challenges at night to furnish his full pedigree. There is a reason.

Recently, while the section was on guard at the camp this man was stationed at a distant post on the grounds, at a place where the guards experience a great deal of trouble with men climbing the fence during the wee hours.

Shortly after one o'clock in the morning the guard saw a man climbing the fence. He hurried up, challenged the man, and asked for an explanation. It was forthcoming.

"Well," said the challenged one, "you are to be congratulated. I have been coming over this fence every night for a week and I have never been challenged before. I would like you to give me your name and your section number, and I will report you to your lieutenant."

In a dazed manner the guard did so and the man walked off. Not until he was "huddled" by his section mates on telling the story did he fall for his being duped. He is now on the trail of the man whose ingenuity saved himself.

PARTY IS SAFE IN LABRADOR

Message Received Indicates Explorers Have Traversed the Peninsula From South to North.

The peninsula of Labrador has been traversed from the south to the north for the first time by a scientific exploring party, according to an announcement by Dr. W. J. Holland, director of the Carnegie museum, at Pittsburgh, following the receipt of a telegram from St. Johns, Newfoundland, announcing the arrival at that point of the expedition, which undertook the journey.

The expedition was jointly financed by the Carnegie museum, the National Geographic society and Alfred Marshall of Chicago, who was a member of the exploring party. In addition to Mr. Marshall, the personnel of the expedition included W. B. C. Todd, the curator of ornithology in the Carnegie museum, and O. J. Murie, the curator of mammals in the same institution. They took with them a number of Indians.

The telegram received by Doctor Holland gave no details of the expedition other than its safety and success. A number of similar attempts by explorers

LEVEL FAMOUS CANTON WALL

Thousand-Year-Old Landmark in China Gives Way to Modern Trolley Line.

San Francisco.—The thousand-year-old walls of Canton, China, which withheld many an onslaught of Tartar brigands, are being torn down to make way for a trolley line.

The Chinese are substituting the American bathtub for the usual dip in the river.

This information was brought to this country by Gen. Chiang Ting Tui of the Chinese army, who is in the United States to inform the war department of the extent to which China intends to operate against Germany.

General Chiang says that the survey for the road before which the ancient Canton walls are crumbling has already been completed. It will be a belt system and will follow the line on which the walls were erected.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one "cure" for that disease that has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Bevo
A BEVERAGE

Our boys in the Navy enjoy their Bevo. The Navy Department has put its official seal of endorsement on this triumph in soft drinks, by allowing it to be sold and served on all naval vessels.

Ashore or afloat, you will find in Bevo a palate-pleasing, refreshing and nutritious beverage.

Just the thing to take along for sail or cruise—auto trip or camp and for the ice-box at home.

Bevo—the all-year-'round soft drink

Bevo is sold in bottles only and is bottled exclusively by

INCORPORATED

500,000 Acres Opened in New Mexico for Stockmen

Washington, D. C. Feb. 6. — More than 500,000 acres of land in eastern Chaves county, N. M. and including a portion of the Roswell land district, have been designated for entry March 11th under the stock raising homestead act, Secretary Lane announced today.

Approximately, 250,000 acres are vacant public lands; the remainder are already covered by applications which have preference in right of entry. The lands have been classed as chiefly valuable for stock raising and forage crop raising.

Opportunity for Young Men

New Mexicans and Texans, desiring to enlist in the Medical Department, will be interested to learn that Major Macamant, Commanding Officer of the 111th Sanitary Train, has fifty vacancies and has wired the Recruiting Office for El Paso District, authorizing the enlistment of this many men.

Competition to join this organization was always keen, and Captain F. W. Fonda, in command of the El Paso District Recruiting Office, assures applicants, they will have every consideration in applying for enlistment in the 111th, and should apply to their nearest recruiting station at once.

No especial qualifications are necessary further than that applicant must have a high school education and some clerical experience, or must have had experience in handling horses or as a chauffeur.

Chances are the organization of the 111th Sanitary Train will be completed upon the enlistment of these fifty men, and interested young men, eligible to voluntary enlistment, should lose no time in making an effort to join this organization.

Houses for Ancho

A substantial rumor is afloat to the effect that a number of new houses are soon to be erected in Ancho. Business in general is better and people are desirous of locating there, but houses must be built for them to live in. Hence the necessity of building.

Willow Springs Mine

Ernest Matthews, an old mining expert in company with several more gentlemen from El Paso were visitors here this week, negotiating for the old Willow Springs coal mine. Mr. Matthews was formerly a Carrizozo resident and was identified with several mining enterprises in this locality.

Mrs. Fetter's Hostess

A delightful home social was held at the home of Mrs. Fetter last Friday night.

The entertainment consisted of music and social games, after which an enjoyable home luncheon was served. A goodly number of town folks attended.

Locate in Carrizozo

Mr. and Mrs. C. P. Huppertz of Tucumcari, are now residents of Carrizozo. Mr. Huppertz will superintend the interests of the E. P. S. W. and Wells-Fargo Express Co. in the offices at this station.

NUTRITIOUS CORN BREAD.

One New York hotel has arranged a thoroughly patriotic soup bread recipe. It combines cornmeal with rye flour, both of which are being consumed in greater quantities this year in order to release wheat flour for the allied nations. This recipe fills a large pan—16 by 22 inches—and contains the following ingredients: One quart milk, four ounces butter substitute, ten ounces light syrup or honey, three eggs, pinch salt, two pounds cornmeal, one pound rye flour and two ounces baking powder.

The butter and syrup are thoroughly mixed. Then add the eggs gradually, pour in the milk, then add the rye flour mixed with the cornmeal and baking powder. Bake in a hot oven.

Allied Governments' Purchases in the United States

Arrangements were entered into shortly after the beginning of the war by the secretary of the treasury, with the approval of the president, with the governments of Great Britain, France, Russia, Italy, Belgium and Serbia, whereby Bernard M. Baruch, Robert S. Lovett and Robert S. Brookings of the war industries board were designated a commission through whom or with whose approval or consent all purchases in the United States of materials and supplies by or on behalf of these governments shall be made.

Under this arrangement these governments communicate their requirements for materials and supplies to this commission through their designated purchasing agents in this country, and the commission then uses its best efforts to obtain offers of the materials and supplies required at the best obtainable prices and terms, of delivery and otherwise, and submits the same to the purchasing agent concerned, it being no part of the commission's duty to prepare and sign contracts, or to supervise their execution, or to determine technical details, or to carry out the inspection of materials, all of which matters are cared for by the governments concerned.

The foreign governments have agreed not to make purchases in the United States otherwise than through or with the consent of the commission. The arrangements provide that nothing expressed or implied, nor anything done or omitted by the commission, shall impose any obligation or liability upon the United States whether to advance moneys, to establish credits, or otherwise. The purchasing commission in carrying out the terms of this agreement, says Commerce Reports, is endeavoring to see first that the wants of the governments associated with the United States in the war are supplied as promptly as possible, and without interfering with the requirements of our own government. This necessarily involves the finding of a source of supply from which articles needed by the allies can be obtained without prejudice to contracts placed with the United States government for articles of the same kind, and in many cases it has been found necessary to develop new sources of supply—that is, to induce some one who has not been previously making the articles needed to produce them.

FEEDING FOWLS FOR MEAT AND EGGS

In feeding the flock an effort should be made to do so as cheaply as possible, consistent with the production of eggs. To accomplish this all table scraps, kitchen waste, etc., should be utilized. Scraps of meat or leftover vegetables which cannot be utilized in any other way make excellent feed. There are also many other waste products, such as beet tops, turnip tops, carrot tops, potato parings, onion tops, the outside leaves of cabbages, waste lettuce leaves, bread and cake crumbs, etc., all of which are relished by the hens and can be used to the best advantage. In saving the scraps and waste it is well to separate the portions adapted for feeding to the flock and place these in a receptacle or pail of their own. Decomposed waste material or moldy bread or cake should never be saved to feed to the hens, as it is harmful to them and may cause serious bowel trouble. Sloppy material, such as dishwater, should not be thrown into their pail. It is also useless to put in such things as banana peels or the skins of oranges, as these have little or no food value. Any sour milk which is not utilized in the house should be given to the chickens. This should be fed separately, however, either by allowing the hens to drink it or by allowing it to clamber on the back of the stove and then feeding it in that condition. When the family's table waste is not sufficient for feeding the flock, it is usually possible to get some of the neighbors who keep no hens to save material suitable for feeding. Many people are glad to do this if a small pail in which to place the waste is furnished.

Table scraps and kitchen waste are best prepared for feeding by running them through an ordinary meat grinder. After the material has been put through the grinder it is usually a rather moist mass, and it is well to mix with it some cornmeal, bran or other ground grain until the whole mass assumes a crumbly condition.

Of Interest to Women.

British women are proving successful as veterinary surgeons.

The original model of Bartholdi's Statue of Liberty is now in possession of Mme. Oliver Basson of Paris.

New York's subway has colored women porters who wear a quite natty uniform.

Mrs. Blanche Wagstaff, poet and traveler, has been appointed to the state charities board by Governor Whitman of New York.

Members of the New York woman's motor messenger corps receive first aid instructions at St. Luke's hospital.

The usual method is to feed the table scraps at noon or at night, or at both times, as may be desired, in a trough or on a board. All should be fed that the hens will eat up clean, and if any of the material is left after one-half or three-quarters of an hour it should be removed. If allowed to lie it may spoil and would be very bad for the hens.

With the table scraps it is well to feed some grain. Perhaps this may be given best as a light feed in the morning. Four or five handfuls of grain (about one-half pint) scattered in the litter will be sufficient for a flock of twenty or twenty-five hens. By handful is meant as much as can be grasped in the hand, not what can be scooped up in the open hand. By scattering it in the litter the hens will be compelled to scratch in order to find the grain and in this way to take exercise, which is decidedly beneficial to them. If the house is too small to feed in, the grain can be scattered on the ground outside. A good grain mixture for this purpose is composed of equal parts by weight of wheat, cracked corn and oats. Another suitable grain mixture is composed of two parts by weight of cracked corn and one part oats.

Movies Showing Methods of Increasing Country's Pork Supply—Boys' Pig Clubs

As a means of helping to increase the pork supply, the United States department of agriculture has released to the motion picture theaters, through one of the large motion picture companies, a film showing the work of the boys' pig clubs which the department is organizing in all parts of the country in co-operation with the extension divisions of the state agricultural colleges. The film shows methods of instructing farm boys, and in some instances girls, who have joined the agricultural clubs, how to raise better pigs and the methods used by club members in carrying out instructions. The first lesson taught in the film story is that it costs no more to feed and care for the pig of carefully selected stock than the scrub, while the results in meat produced is greatly in favor of the well-bred animal. The picture shows further how to feed and care for the pigs, how to protect them from disease, and how to shelter them from the inclemency of winter and the heat of summer. The results of wise selection and intelligent care are shown in the well-groomed, fat, healthy porkers wearing the prize ribbons they have won.

The first pig club was organized in Louisiana in 1910. Now approximately 45,000 members are enrolled in the pig clubs throughout the country.

Colds.

Colds come from lack of sleep, from overwork or like causes which reduce vitality and resistance, and so permit the germs to get in their work, says a medical authority. An upset stomach is never a direct cause, but there are times when the body is so tired of fighting infection that the stomach is not fit to do much, and at such times we had better not eat.

Payment of Funds to Credit of Enemy or Ally Authorized by U. S. War Trade Board

The war trade board has authorized the payment of drafts that have been accepted, drawn on funds to the credit of a person who is an "enemy" or "ally of enemy," or acting for or on behalf of an "enemy" or "ally of enemy," or on which such a person appears as drawer or indorser, when such drafts are presented for payment in the United States: Provided, however, that when such drafts are collected for or on behalf of any person who is an "enemy" or "ally of enemy," or person acting for or on behalf of an "enemy" or "ally of enemy," the proceeds of collection shall be at once reported by the person making such collection to and be held subject to the disposition of the alien property custodian.

No drafts can now be accepted or transferred or dealt in before acceptance which are drawn on funds to the credit of any person who is an "enemy" or "ally of enemy" or acting for or on behalf of an "enemy" or "ally of enemy," or drawn by or to the order of such person, or on which such person appears as indorser, unless a license is first obtained from the bureau of enemy trade, Bond Building, Washington.

The war trade board has also authorized the payment of travelers' checks, not exceeding \$100 in amount, on which there appears the indorsement of a person who is an "enemy" or "ally of enemy," or acting for or on behalf of an "enemy" or "ally of enemy," without obtaining a license therefor.

JUST FOR FUN

Something Suitable.

"What can I make for my husband to eat?" asked the bride. "Something suitable for the honeymoon. I don't want anything prosaic, you know."

"Try angel food."

"We've been having a great deal of that."

"Well, make him some spoon bread."

Breaking the News.

Poor Tim Murphy went up in a premature blast, and Mike Mulligan was delegated to break the news to the widow. After a few casual remarks, Mike asked, "Has Tim any insurance on his life?"

"He has, indeed," replied Mrs. Murphy.

"Well," said Mike, "we can't say our husband, but we'll help ye collect that."

Up Against It.

"Are you the dealer who supplies Cinderella with her glass slippers?"

"I am, and it's a job to fit her, too. I admit she has a small foot, but she thinks it's smaller than it really is. And you know, glass slippers don't stretch."

She Wasn't So Smart.

Mother—I just knew you were going to spill that milk.

Teddy—Well, if you knew, why didn't you tell me?

Had Knowledge of Both.

Banker—Do you know anything about checks and drafts?

Applicant—Yes, sir; I've run our furnace for years.

A Soft Answer.

"These bargains you women are after are really dear things."

"Yes, for I got a bargain when I married you."

After Effect.

First Bill—What makes him so pugnacious?

Second Bill—I guess he's been eating scrap iron.

Oh, How Different.

"That man sure has a handsome mug."

"Why, I think he's as homely as sin."

"I mean he has a handsome mug in the barber shop with his monogram on it."

The Cause of Them.

"Maizie puts on such airs; says she has so many pressing engagements."

"I don't doubt it. She's employed in a laundry."

A Question of Conscience.

"Can doctors honestly take money from their patients?"

"Why not?"

"Are they not all ill-gotten gains?"

Our Part in Feeding the Nation

(Special Information Service, U. S. Department of Agriculture.)

MORE FUEL FROM THE WOODLOTS.

It is Where Team-Hauled Wood Can Be Used Instead of Railroad-Hauled Coal That Changes of Fuel Should Be Made.

FARMERS ASSIST COAL STRINGENCY

Use of More Wood Would Aid Economy in Commodity.

MANY DOLLARS ARE IDLE

It is Where Team-Hauled Wood Can Be Used Instead of Railroad-Hauled Coal That Change of Fuel Would Help.

Are you a coal burner when you might be a wood burner? Have you a woodland that isn't working? What can the town man and the suburban dweller do about the coal stringency?

Much would be accomplished toward meeting the present situation arising from the unmet demand for coal and from the great burden on the nation's railroads, it is believed, if not only the farmers who have woodlands but city and suburban real estate owners possessing more or less wooded tracts of land would draw on these areas for a part, at least, of their fuel supply. In the neighborhood of small cities as well as larger ones there are many woodlots from which much fuel wood could be obtained without encroachment on the needed shade trees and without detracting from the beauty of the landscape. In fact, proper thinning in many cases will help the development of desirable trees.

Save by Burning Wood.

As an instance of how coal can be saved by the burning of wood, the United States department of agriculture has cited figures for 17 northern and eastern states with a rural population of about 20,000,000 which, it is estimated, uses annually about 18,000,000 tons of coal. It is figured that the substitution of wood for one-fourth of the coal burned by farmers and for one-tenth of the coal burned in villages would result in a saving of nearly 3,000,000 tons, or between 65,000 and 70,000 carloads.

It is where team-hauled wood can be used instead of railroad-hauled coal that the change of fuel should be made. While it is not expected that

PRIVATE WOODLOTS HELP MEET A COAL SHORTAGE.

Throwing open the woodlot on his suburban place to all who would come and cut, a Washington (D. C.) man aided shivering families to meet the coal stringency a few weeks ago. Then he located some 5,000 cords more in either fallen or dead standing timber in wooded lands nearby and obtained the consent of the owners to allow the public to cut fuel in needed quantities under proper supervision.

Are the woodlots around your town doing their part in the fuel emergency?

the substitution of wood for coal could be complete, it is true that for heating many kinds of buildings wood is the more convenient and ordinarily the cheaper fuel.

This is particularly true in buildings for which heat is required only occasionally, but then is wanted in large volume at short notice.

Fireplaces are built especially for

burning wood in three or four-foot lengths. If a stove grate is too coarse for wood a sheet-iron cover over a good part of the surface will make it suitable, or a few bricks can be used. Wood grates are sold in two pieces which can be inserted through the fire door and placed on top of the regular grate.

In heating value one standard cord of well-seasoned hickory, oak, beech, birch, hard maple, ash, elm, locust or cherry is approximately equal to one ton (2,000 pounds) of anthracite coal. Of soft maple a cord and a half is required to equal one ton of coal, and of cedar, poplar or basswood, two cords. One cord of mixed wood, well seasoned, equals in heating value at least one ton of average-grade bituminous coal.

The most common method of making cord wood is to cut the trees into four-foot lengths with an ax and split the

HOW MUCH WOOD WOULD A WOODCUTTER CUT IF—

Taking white oak as fairly typical of the hard woods and white pine for the soft woods, the figures below will show approximately the amount of cord wood that may be cut from trees of different sizes. The figures will vary considerably with the extent at which the tops and branches are utilized and on the taper of the tree trunks. With forest-grown trees, utilizing the branches and tops to about two inches, these amounts may be expected:

White Oak.

Ten inches in diameter, 50 feet high, one-sixth to one-seventh of a cord; 15 inches in diameter, 60 feet high, about two-fifths of a cord; 24 inches in diameter, 70 feet high, one and one-fifth cords.

White Pine.

Ten inches in diameter, 50 feet high, one-eighth of a cord; 15 inches in diameter, 60 feet high, one-third of a cord; 24 inches in diameter, 70 feet high, seven-eighths of a cord.

larger pieces. The pieces are then piled in a standard cord, which is eight feet long, four feet high and four feet wide. The contents are 128 cubic feet, of which 70 per cent is wood and 30 per cent air.

Best Heating Value.

To have the best heating value as well as to reduce the cost of hauling, wood should be thoroughly seasoned, which means drying it from six to eight months when piled so as to get a good circulation of air. However, 50 per cent of the moisture may be removed in three months.

Because of the unusual demand for cord wood it is believed that the present time offers unparalleled opportunity not only for farmers to improve their woodlands by cutting out the poorer trees and selling them, but for private and public owners of wooded tracts to clear their lands at a profit. Communities which feel they are threatened with a serious fuel shortage will do well to take measures to stimulate the cutting of wood. Such action may be viewed as part of America's co-operation in the national endeavor to feed and sustain America's army and allies.

Without any special inconvenience and without any risk to health or well-being, the sugar consumption of the average person can be lowered. Anyone who uses sugar in excessive amounts will be the better for using less.

LINCOLN'S ONLY WAR EXPERIENCE

Future President Twenty-Three
When He Joined the Black
Hawk Expedition.

CHOSEN CAPTAIN OF COMPANY

With Him Were Men Destined to Fig-
ure Prominently in Country's His-
tory—Spot Where Army Erect-
ed Fort Now Suitably
Marked.

By LILIAN STAIR SCHREINER.

ONE of the most in-
teresting events in
the life of the great
war president oc-
curred at a time
when he was little
known to fame.

This was in 1832, during the Black Hawk war, a war which, in proportion to the number of lives lost, caused more widespread fear and consternation than any other in the history of our country.

When the story of the battle at Stillman's Run, where a small band of savages put to flight a whole regiment of soldiers, and also that of the massacre at the Davis farm, where fifteen women and children were murdered, was spread through the country there was scarcely a farmhouse all through the middle West that was not deserted. Both of the places mentioned were in northern Illinois and soon stockade forts were thrown up and there the people flocked for protection from the vast horde of savages that they believed to be on their trail.

Governor Reynolds of Illinois on April 16, 1832, issued a proclamation for volunteers to organize against the savages, and Lincoln, then twenty-three years of age and living at New Salem, Sangamon county, Illinois, was one of the first to respond. The company was allowed to choose its own captain and much to his joy Lincoln received the largest number of votes. Of this incident he spoke in later years as follows: "Then came the Black Hawk war and I was elected captain of volunteers, a success which gave me more pleasure than I have had since."

In those early days Lincoln showed that same observance to justice and the rights of others which characterized his later years, in evidence of which may be noted the incident of the Indian's coming to General Cass with a letter recommending him for his services to the whites. Some of the men in the company wished him shot as a spy, but Lincoln promptly interposed, saying that this peaceable Indian should not be killed. There is no record to show but what his judgment was correct and his leniency well advised.

One of the most interesting facts in Lincoln's history at this time, and which shows what queer pranks fate can play, is this: Gen. Winfield Scott, then in command at Fort Snelling, sent two young lieutenants to muster in the Illinois volunteers. In the language of a memoir of the times, one of these lieutenants was "a very fascinating young man of easy manners and affable disposition, while the other was equally pleasant and extremely modest. It is further stated that "a tall, homely young man dressed in blue jeans" presented himself to the lieutenants as captain of a company of volunteers. "I was duly sworn in. The one who administered the oath

of allegiance to the "young man in blue jeans" was the lieutenant of the fascinating manners above mentioned. This was Jefferson Davis. The young man in blue jeans was Abraham Lincoln, and the other young lieutenant of "the extremely modest" demeanor was Robert Anderson, commander of Fort Sumter at the beginning of the Civil war. And no premonition told them, as they stood together on that pleasant spring morning, of the important parts they were each to play in that great drama of blood.

In that part of the war that was carried on in Wisconsin, Lincoln was with Early's company of rangers in General Atkinson's command. On June 30, 1832, this company crossed the territorial line into Wisconsin and camped on the bank of the Rock river, about a mile above the Turtle village of the Winnebago Indians, and which is the site of the present city of Beloit. The company was often alarmed by the rumors of Indians ahead, but had no actual engagements. They marched north and on July 1st camped at Storr's lake, a short distance east of where the village of Milton now stands. Striking the main trail of Black Hawk's army they followed it in a northerly direction toward Lake Koshkonong. They reconnoitered here but finding no fresh evidence they followed the trail up Rock river to a spot not far from where the city of Fort Atkinson is now situated. The country at that time was a wilderness, and this army of General Atkinson's had to fairly cut its way through the underbrush, tall trees and clinging vines. He had an army of nearly two thousand regulars. He built a fort on the river bank near its junction with Bark river, and his army remained here a part of the month of July, reconnoitering and following up trails of the Indians through the swamps and woods. Lincoln, a member of Early's company of rangers, took an active part in all the maneuvers, and when word was brought on the 8th of July by some Winnebago Indians that Black Hawk was hiding in the swamp on an island in Lake Koshkonong, five miles down the river, it was Early's company that was sent to reconnoiter. They crossed the river on rafts to the island, Lincoln among them, but the wily Hawk had flown.

This happened on the 9th of July. They returned up the river to the main command, and on the 10th of July Lincoln was mustered out of service. The next day he started out with his companions for his home in Illinois. That night his own horse and that of one of his comrades was stolen, and the rest of the distance was made on foot. Lincoln was very fond of talking in later life of his experiences in the Black Hawk war. On one occasion, in the fall of 1859, he was making speeches in Wisconsin. After speaking at Beloit he was conveyed by carriage to Janesville. They traversed the same route as that taken by the army in the Black Hawk war twenty-seven years before. Lincoln recognized it and talked freely about the events of that time, telling in his humorous way of the difficulties encountered in his journey home after his horse was stolen.

Gradually, however, in the three quarters of a century and more that have passed since the time when Lincoln and his comrades camped in the wilderness, the stockade posts rotted away until there was nothing to show where the fort had stood. Then the Daughters of the American Revolution of Fort Atkinson took the matter in hand and placed a memorial to mark the spot. It is a massive boulder of native stone with a tablet of Massachusetts granite upon which this inscription is engraved: "Near this spot in 1832 in the Black Hawk war, Gen. Henry Atkinson erected a stockade fort. To mark this historic ground the Daughters of the American Revolution of Fort Atkinson erect this memorial."

Neither did they imagine that they would have to fight for their lives and become dangerous and wild. No, they knew of nothing in the great world. They did not even know of the cave in which they were living, for it would be five weeks until their eyes would be opened and they could see. But how happy mother bear was that the month was January and the cubs were safe, so safe!

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

JANUARY BEARS.

"This is the best time of the year," whispered mother brown bear. "Ah, how I love it. I sleep and I have wondrous dreams, and my little cubs are born in this season."

"I Had Such a Good Meal of Berries."

come out on a very warm day—but not until the really cold winter is past.

Of course, they do not go to sleep in the zoo, because they are fed regularly there, and are not allowed to get a great many meals all in one, as they do when they are free.

The polar bear mother goes away and hides for a little while in January, when her cubs are born, for she wants to be sure that no harm will come to them. But often when they are only ten days old she will take them out and they will go swimming in the icy waters where they live.

"I have heard," said mother brown bear, "that sometimes bears have two cubs and sometimes they have been known to have six. But I like my three better than any other number. And they are far more beautiful."

"The little precious woolly bears! How I love them!"

And the bears nestled close to their mother, and she dozed off into peaceful sleep again.

"I am so glad," she whispered to herself, when she was half-sleeping and half-waking a little later on, "that I had such a good meal of berries. That will make me feel well and strong when I get up to look after the cubs after I am through sleeping."

And again she looked at the little bears and smiled with happiness. All the little bears are born in January. It's their very own month of the year. And mother bears think January is quite the most wonderful month of the year. It means such perfect things—sleep, warmth and above all, beautiful little cub babies.

The daddy bears are never around. Mother bears are afraid the daddies might not care for them and might hurt them. Anyway, the mothers go off to have their winter nap by themselves, and every January they are sure to have delightful waking moments when they can love and fondle their babies, and urge them to draw closer to their lovely fur-covered mothers.

"They call this the month of January," said mother brown bear, "but I think it is a badly named month. I would call it Joyful month or something like that." And once more she looked at her beautiful brown cubs, and again closed her eyes and licked her paws as she went to sleep.

The little brown cub bears took no interest in anything beyond their mother and themselves. They liked being warm, and that was about all they cared for. And their mother attended to that, as she did to their food and all their comforts.

And little did they think, as they dreamed and slept, of the days ahead in the great world of adventures.

They didn't know that later on they would have to hunt and get their own food. They didn't know the lessons they would have to learn of the right kind of food to eat and the wrong kind which would poison them. They had no idea that there were good berries and also bad berries.

And they didn't for a moment imagine that they would learn to be rough and fight. They didn't guess for a second that they would have to protect themselves, and that there were creatures who didn't care for bears and would try to kill them.

Neither did they imagine that they would have to fight for their lives and become dangerous and wild.

No, they knew of nothing in the great world. They did not even know of the cave in which they were living, for it would be five weeks until their eyes would be opened and they could see. But how happy mother bear was that the month was January and the cubs were safe, so safe!

HIS IDEA

"Hard luck again."
"Why so?"
"Just got hit with a horse and cart; when it might have been an automobile."

Is it Not?
It's easy to say what another should do in the struggle for glory or pelf; But when the same problems are put up to you
Ain't it hard to decide for yourself?

Of Course.
"There's one thing I'd like to know," said Mrs. Dubwaite.
"Well, my dear?" replied Mr. Dubwaite.

"Why is it that when you leave the house for your office in the morning you get there in about twenty minutes, but when you leave the office at night to come home it takes you anywhere from forty-five minutes to three hours to get here?"
"Why—er—that's easily explained. Toward the close of day obstacles accumulate."

Time to Concentrate.
"Why, I fell in love with first one girl and then another before I got married," said the susceptible young man. "I scattered my affections all over the map."

"That is all right, son," replied the elderly philosopher. "Nobody will object to what you did then, just so you broke yourself of the scattering habit on your wedding day."

Superb Strategy.
"Have you any geniuses in this town?"
"I don't recall but one just now."
"Poet, painter or musician?"
"No. He's a chap who contrives to stay illuminated week in and week out, despite the fact that this town is dry."

The Right Advice.
"What do you suppose Miss Pert said when I asked her if I was in the market for matrimonial consideration?"
"What did she say?"
"That I must go to Paris before she could take any stock in my proposition."

MORE CLASSY

"Lovely sunset tonight, Mrs. De Swell?"
"Mercy, I never look at an American sunset! They're so much more classy over in Italy, don't you know?"

Back Given Out?

Housework is too hard for a woman who is half sick, nervous and always tired. But it keeps piling up, and gives weak kidneys no time to recover. If your back is lame and aching and your kidneys irregular; if you have "blue spells," sick headaches, nervousness, dizziness and rheumatic pains, use Doan's Kidney Pills. They have done wonders for thousands of worn out women.

A Colorado Case

Mrs. Dora Brumley, 114 Twelfth St., Greeley, Colo., says: "I had a steady ache in my back and frequent attacks of dizziness made me feel weak and miserable. My kidneys acted irregularly. My feet swelled and ached so that I could hardly stand on them. For three months I hardly slept at all and I was so nervous I couldn't lie still. I used three boxes of Doan's Kidney Pills and the trouble is now entirely gone and I am in good health."

Voluntarily Producers.
Most writers recognized as possessed of genius or of great talent have been voluminous producers, a London writer states. In most cases their talent or genius, as a rule, after being stimulated by success, has literally taken possession of them and forced them to work hard and persistently. Balzac used to have rages of industry lasting for many hours and leaving him exhausted. Scott's prodigious industry was due mainly to his determination to pay off a heavy indebtedness. Dickens was marvelously industrious. But Thackeray was lazy and used to suffer greatly from the thought of work undone. His rages of work were not voluntary like Balzac's, but inspired by desperation. It is the voluminous workers who are most likely to strike the unexpected vein, to make the closest approximations to drawing on their full resources.

Ought to Have.
"He hasn't the ghost of a chance with that girl."
"I don't see why not, when he is a lad of spirit."

Important to Mothers.
Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it Bears the Signature of *Wm. D. Fletcher* In Use for Over 30 Years. Children Cry for Fletcher's Castoria

A Yearn for Beauty.
"Why did you pick out such a handsome shavvy mug?"
"Well, I've never been satisfied with my own mug. I thought I'd indulge my fancy a little in this."

Big Business Building About Ready to Be Occupied

The new Lutz building will soon be ready to be thrown open to the public.

Cities twice the size of Carrizozo, would be glad to have such a magnificent business concern. Forces of workmen are busy, night and day, putting the finishing touches on one of the finest and most complete buildings of its kind between Hutchinson, Kansas and El Paso, Texas.

Goods are being moved from the old place as fast as possible, all of the fixtures are on hand and being fitted in place, showing how carefully and accurately space was calculated on.

When the final announcement is made for the opening, the public will be given a treat, for the Carrizozo Trading Company, will be able to make a showing second to none in this part of the country. The opening announcement will be made the coming week.

BAPTIST CHURCH

(Rev. J. M. Gardner, Pastor.)

The revival meetings are being well attended and a splendid interest is being shown. The pastor is preaching every night except Monday and Saturday.

He will preach this Saturday, Feb. 9 at 3 P. M. "Christ a Mother and a Dead Son." Every mother should try to attend.

He will preach Sunday, 11 A. M. "Christ the Great Power Giver" 3 P. M. "Christ and Little Children." 7-30 P. M. "Christ and Thou that Sleepest Among the Dead."

Income Tax

Mr. E. T. Brickley of the First National Bank wishes to emphasize what has already been said concerning the coming of the Income Tax man, who will be here from the 18th to the 23rd of this month. Pens, ink and stationery will be furnished, and he wishes you to meet the gentleman. The bank bids you welcome.

McAdoo's Request

Washington, Feb. 8. An appeal to the public not to build new homes during the war except when the need is urgent, in order to save the capital, material and labor for essential war enterprises, was issued to-night by Secretary McAdoo.

"Home building is an excellent thing in normal times," said his statement, "but at present, unless there is a real shortage of houses for war workers, I strongly advise that materials, valuable labor and credit be utilized for this purpose. Whether homes should be built should be determined by the urgency of the need. The secretary explained that the treasury is observing this rule to let contracts for federal buildings except in cases of absolute necessity.

What's His Is Hers

A New York judge has confirmed the opinion of several million wives. He decided that a wife has a perfect right to go through her husband's pockets. —Albuquerque Herald.

PERSONALS

Lin Branum, who has been in Electra, Tex. for the past few weeks, arrived home Tuesday night.

J. F. Kimbell was an El Paso visitor Wednesday.

Miss Carolyn Roberts is ill with the measles, but is improving nicely at the present moment.

Mr. and Mrs. Ben Wetmore accompanied by Mrs. Ira Wetmore motored to El Paso Monday.

Miss Vera Harris has returned from El Paso, where she went for an operation for appendicitis.

Rev. J. B. Cochran the efficient Presiding Elder will be in town and conduct services at the Methodist church Feb. 27th. Keep this date in mind.

W. H. Osborn is in Roswell this week on business.

Miss Pearl Harris and Joe Stratton took a trip to Roswell Monday.

O. T. Nye and G. T. McQuillen went to Roswell Wednesday.

Miss Georgie Lesnet is visiting her mother in Roswell this week.

The services show that every department of the Methodist Church is alive and at work.

Bring in your hides, pelts, and furs. We pay the highest cash prices—Ziegler Brothers.

Allie Stover, a prominent merchant of El Paso was a visitor in town Wednesday.

Mr. and Mrs. Ben Wetmore visited at the home of Ira O. Wetmore this week.

Wallace Gumm was a Roswell visitor this week.

Miss Carrie Roberts' solo was enjoyed by a large congregation at the Methodist church Sunday night.

Mr. and Mrs. George Dingwall have moved into their apartments in the new Lutz building.

Mrs. A. H. Harvey has left for El Paso.

Frank Marsh was in from the Jicarilla mountains Wednesday. Mr. Marsh is interested in the mining business in that region.

Don McKenzie, the efficient night foreman at the Ancho Brick Works, reports that business is good in that industry.

The Womens Missionary Society will meet Wed. P. M. at the home of Mrs. Stanley Squier.

When the Kaiser dumps his medals into the ammunition melting-pot, the end of the war will be visible even to the naked eye. —Puck.

Expelled from the old Jerusalem, the Germans are by no means certain of ever reaching the New. —Ex.

If he is at all patriotic, the hold-up man remains quietly at home on all lightless nights. —Puck.

And it may get so that a patch on your trousers will be regarded as a thrift stamp. —Dallas News.

The subject for the Epworth League next Sunday evening will be "What Methodism stands for."

Over the Top to the Coast

Few eastern motorists realize that access to the Pacific Coast is not free and open throughout the entire width of the continent.

As a matter of fact, it is possible to reach the coast by motor for much of the north and south distance, only through a certain few clefts in the mountain wall that cut off the region on the east.

"All those who have traversed the Sierras by any of the routes," writes Charles J. Belden, in the February issue of MoToR, "are well aware that the steepest grades are encountered on the eastern flank, but, unfortunately the climb on this side is but a matter of two thousand to twenty-five hundred feet.

GREETINGS FROM METHODIST CHURCH

We are specializing in short sermons, good music, good fellowship, and as we extend to you a hearty welcome, we ask your hearty cooperation, in bringing sunshine to all who sit in darkness.

We want every home represented in the work for God and for good. Remember that we are specializing all along the line. Come and help us.
