NUMBER 14

John C. Chace would make a model police judge.

The first way to bring down taxes is to remove the cause of high taxes.

The topic given the cheering news that the Montezuma hotel at Las Vegas had springs may be opened in the early spring.

This city has a powerful friend in D. B. Robinson. He has given convincing proof of his friendship in several ways the past month.

The lady managers in session yesterday at Santa Fe discovered what had been done by the New Mexico exhibit at the World's Fair.

Two several counties of New Mexico will have empty treasuries for the next six months, on account of the extension of the time of tax paying.

Five or six more oranges will pass east over the Atlantic & Pacific road this season. The company has the contract to ship 4,000 each.

Rocky civilization is forcing ahead and the railroad now provide smoking cars for women. How the angels cry tears must enjoy the luxury.

In Las Vegas had a few new men like Jefferson Reynolds, the enterprising banker, that town would be a hummer and hard to beat in any thing.

A Santa Fe correspondent of the Nation Range says Secretary Miller now cherishes his himself a good deal and admires by himself a good deal.

Wesley Weiskopf is the right man for president of the territorial fair. He will have nothing to do to make the exhibition next fall a complete success.

A writer in the Utah Statesman called Judge Price in legislative desks at the territorial capital, and he is said to be on the lookout for more new county schemes.

Look-able with the majority of the house members in that assembly, they thought, "one side says yes, and then they go and sell out to the other side. This complicates things."

John F. Fack is a democratic statesman about out of a job, and a scheme is being pushed at Santa Fe to create a fictitious attorneyship for him to demand of Dona Ana and Grant counties.

Two commissioners of Colfax county have designated the Nation Range as the official paper of that county. This is a deserved recognition of one of the best weekly papers in New Mexico.

The Gallup Citizen contains the suggestive paragraph: "The Albuquerque Morning Democrat has launched a new suit of clothes, but not at the expense of the legislative committee of Summit county."

The Las Vegas Optic has inspected the territorial penitentiary, and pronounced everything about the institution in good working order. Col. Bergman is the right man for superintendent and should be retained in the position.

Ten persons who are occupying the seat of J. J. Rankin in the legislature offered to vote for Summit county for \$250. When the money was tendered him he refused, leaving the inference that the opposition to the county had resigned the limit.

It is reported that Gov. Thornton is seriously thinking of nominating Mariano Arango, of this city, territorial superintendent of public instruction. Mr. Arango is a good friend of public schools and would make a good school official.

One of the strange things has happened. Capt. John P. Hyland, the publisher of the Kinman Flash, has disappeared. He is charged with being John O'Connor, the mining postmaster of Marysville, Mo., who disappeared several years ago.

SENATOR THOMAS recently gave the public the benefit of the following estimate of the amount of gold we send out of the country annually. For interest on American securities held abroad, \$120,000,000; for expenses of American tourists.

The British "financiers" have lost no time in expressing their willingness to take our issue of \$500,000,000 in bonds if they are made payable in gold. In fact they intimate that they have been making preparations for just that sort of thing.

There is considerable reason to expect that an extra session of the Fifty-fourth congress will be called by the president soon after the 4th of March, to consider the financial question. The probability of definite action at the present session is remote.

The Occident Sun, published at Flagstaff, is contemplating the issue of a special edition of that paper, setting forth the agricultural, grazing and mineral resources of its county and bringing to the attention of the world the matchless scenery of the Grand Canyon of the Colorado.

STAKE must look out for that clause about elude, that Pedro Perez slipped into the insane asylum bill. That's a scheme to defeat the capital appropriation, for there won't be any use for a house for the legislature to meet in at Santa Fe if all the elude are to be sent to Las Vegas.

As women become self supporting, they seem less and less inclined to matrimonial ventures. As an illustration of this declining tendency toward marriage, we see it stated that there are 1,000 girls employed in the British postal department, and that there was only 1 per cent of them married last year.

The Denver Times says: "Popular education is receiving a boom in New Mexico. The people of that territory cannot and themselves and staidness better than by passing the boom for all it is worth. Lack of educational facilities and want of interest in education have been persistently charged against New Mexico, and it is high time to remove the wrong impression."

THE TERRITORIAL BILLS.

The Denver Republican says: It looks very much as though the senate will become responsible for any heretofore injudicious New Mexico bill, and it is probable that the territorial bills will fall in part at this session. It would be a pity, especially to New Mexico, for that territory has been governed from Washington for nearly fifty years. It was prepared for statehood years ago, but the right to govern themselves has been denied its people during all the time that has elapsed since then.

It will be exceedingly unfortunate if New Mexico, at a time when it is not admitted to the union, is to be the victim of the same length of time in the development, which will come only when statehood is established. New Mexico is a country of great natural resources, but it is hampered in its growth by the fact that it is under a territorial government.

People will not migrate to territories where there is a territory as willingly as to a state. This is not natural, for the American people are so used to self government that they are averse to living in what is virtually a subject province.

The friends of New Mexico and of other parts of the west should do their utmost to force the senate to take prompt action on the territorial bills. There is time enough in which to pass them, if the senate will but give the subject proper attention. It is far too important a subject to be treated lightly.

It is to be hoped that the American people, whether American citizens shall be given what is commonly supposed to be an American birthright, the right of self government. It is a right which was promised to the population acquired by the United States by the treaty with Mexico, and has been denied for years.

And how a delay makes the wrong and injustice of the demand greater and harder to bear.

What we have said of New Mexico applies also to Arizona. The people of that territory have not waited as long as established as the inhabitants of Mexico, measuring the time that has elapsed since they became capable of maintaining a state government. But they are fully prepared for such a government now, and they desire the right of erecting a state would be an exercise of justice.

Arizona has grown rapidly within a few years, and its future is bright with promise of development. The admission of these two territories would be of great help to them, and through them to all the remainder of the west. It furthermore would be an act of justice to two communities that have suffered for years through the refusal of congress to accord them their rights.

Both Senators Hadley and Perez, of this county, made good speeches opposing the issuance of territorial bonds to rebuild the capital at Santa Fe. However, the bill passed and the building will be erected. Senator Perez said he thought the matter was one of importance to the people of Santa Fe. He thought that the practical effect of the bill was to make Santa Fe the permanent capital. He said that the territorial debt was \$300,000; our assessed property valuation is only \$141,000,000; therefore, our debt is already 2 per cent of the assessed valuation. He thought, therefore, that under the Springer act it would be illegal to issue bonds. He said that our taxes were already too heavy, and favored postponement on the ground that "in spite of acts of the territorial secretary we are already on the verge of starvation," when it would become necessary to select a permanent state capital. Mr. Perez candidly avowed that he thought Santa Fe was not the proper place for the capital; we should get nearer to the center of population.

THE NATIONAL IRIGATION CONGRESS.

The national irrigation congress is attracting widespread attention. The Review of Reviews, one of the leading western magazines, says on the subject:

"The irrigation movement is accumulating a tremendous impetus, which is visible not alone in the west, but throughout the country. The work of organizing and agitating, through national, interstate, state and county associations, will go forward with renewed energy from now on till the next great international congress assemble at Albuquerque, New Mexico, in the autumn of 1905. That this movement is the hope of prosperity for millions, and that it will safeguard our institutions with a new bulwark of liberty, in form of small landed proprietors, is the confident expectation of western men. Their appeal is to patriotism and the best spirit of humanity. They seek to build to the credit of their country, to the good of their race, to the glory of God."

APPROPRIATION BILL.

The house finance committee has framed the territorial appropriation bill, and it will come up for adoption in a short time. The bill provides for an appropriation of \$50,000 for interest charges, distributed as follows: Penitentiary refunding interest fund, \$4,200; capital interest fund, \$14,000; current expense interest fund, \$10,000; provisional indebtedness interest fund, \$12,000; capital contingent interest fund, \$10,000; insane asylum bond interest fund, \$1,500; refunding bond interest fund, \$5,000.

For penitentiary current expense fund, including pay of officers and employees and maintenance, repairs and incidental expenses, \$3,910. Other outlays are to be paid out of the proceeds of material or articles manufactured by the prisoners, not to exceed \$10,000.

For the pay of territorial officers, an appropriation of \$27,000 is provided. Section 5, chapter 73 is amended by substituting \$2,000 for \$3,200, thus making a very considerable cut in the salaries of district clerks.

In the miscellaneous fund, a number of items appear interesting. For the incidental and other expenses of the auditor's office, \$900 is allowed, while \$750 is allowed the treasurer's office.

For similar expenses in the governor's and librarian's office, \$500 and \$100 are respectively allowed.

For the historical society \$400 is allowed for the expense of the bureau of immigration, \$2,000; for the salary of the

THE CAPITOL.

Bill Passes to Issue Bonds to Rebuild at Santa Fe.

ON A THIRD OPPOSE THE BILL.

Special to Citizen.

Santa Fe, Feb. 2.—The capitol bill came up in the council this morning and passed without amendment by a vote of 9 yeas and three nays. Gallego, Hadley and Perez. Col. Chace made the preliminary argument in support of the bill, and Mr. Perez and Mr. Hadley spoke in opposition.

Mr. Hadley made a careful argumentative and impressive address, reviewing the present deplorable condition of all the industrial interests of the territory and showing that we were in no condition at this time to take upon ourselves the additional burden of debt that this would impose, especially in view of the fact that many of our most important industries are asking for large appropriations at this session, and the necessities of the case actually demand that these appropriations should be made.

It was conceded on all hands that Mr. Hadley made by far the ablest speech that has been delivered in the council this session upon any question, and though but very few of the large audience present were in sympathy with him, he held every listener to the closest attention and accomplished nothing for his cause he won great respect and admiration for himself. Both houses adjourned until Monday afternoon.

FROM BAD TO WORSE.

It is a striking commentary on democratic administrative ability, that with the banks bursting with money and with millions on millions of capital lying idle, organs of that party declare that the country is confronted with the alternative of a suspension of specie payments or a recourse to a merely temporary relief from a third issue of bonds.

When the democratic party was last in power in the executive and legislative branches of the government, it forced a suspension of specie payments. At that time it also precipitated a civil war. That now, in a time of profound peace and immediately following a period of unexampled prosperity, this grave danger is conjured.

Europe looks on in wonder, as well it may, for never was such a metamorphosis effected with apparent absence of impelling cause.

Two years ago the credit of the government was the highest in the world; but now we are told that Europe has become so suspicious of the United States that it is demanding gold for American securities.

Contented minds make happy homes. Contentment always follows the use of Dr. Price's Cream Baking Powder.

BIRTH.

Mr. and Mrs. Joseph Schwartzmann are reporting over the arrival at their home of a brand new boy baby. The little fellow made his appearance yesterday, and is as healthy as possible. Mr. Schwartzmann is the carver at Klenwort & Stieff's, Third street meat markets.

Toney Michellbach, the well-known sausage maker for the Y and Ned Mills, is a carver at Klenwort & Stieff's, and his face shows signs of happiness. "It is a girl," says Toney, "and when the doctor placed the little thing upon the scales yesterday afternoon at 4 o'clock 8 pounds were recorded. My wife Michellbach and baby doing well."

It is said that men who use knives or razors, and sharp ones at that are not always the happiest men in the world, but if you ever witnessed a man smile, and that smile all over his face, call at the barber shop across "girl" in the care of J. M. Haggis. If he don't smile to your satisfaction THE CITIZEN'S prophet will miss his calculations, and if he don't give you a razor—one of the best in honor of the girl event—you are at liberty to say that this paper don't know what it is talking about. The new arrival came in this morning, and the mother and child are reported all O. K. at 4 p.m. Congratulations, friend Haggis.

R. W. D. Bryan, attorney, left last night for Santa Fe.
