SANTA FE NEW MEXICAN

VOL. 47.

SANTA FE, NEW MEXICO, FRIDAY, FEBRUARY 25, 1910

NO 12

INTERESTED IN CENSUS WORK

Department of Public Instruction Addresses Teachers of New Mexico

WILL STUDY THE SCHEDULES

District Court for Santa Fe County Convenes on First Monday of March

District court for Santa Fe county will convene on March 7. The grand jurors have been summoned for the first week and the petit jurors for the second week.

Suit to Quiet Title.

In the district court for Torrance county, this forenoon, Attorney G. W. Prichard filed a suit for Edwin W. Roberson, Ralph G. Roberson, Milton Dow, E. H. Ayers, Annie M. Ayers and James Walker vs. The North American Savings Company, the Guaranty Title and Trust Company, the New Mexico Fuel and Iron Company and other claimants, to quiet title to several lots at Estancia.

National Guard Order.

The following officers are assigned to the First Regiment of Infantry, N. G. N. M., and will report by letter to Colonel E. C. Abbott, commanding First Infantry, Santa Fe, N. M.: Lieutenant-Colonel W. C. Porterfield.

Major R. A. Ford.
Major B. J. Viljoen.
Major E. P. Bujac.

Major L. W. Idelf is assigned to the Commissary Department, N. G. N. M., and will report by letter to adjutant general.

Circular Letter to County Superintendents and Teachers.

Gentlemen: The purpose of this circular is to call your attention to the U. S. Census which is to be taken in New Mexico between the dates, April 15th, 1910, and May 15th, 1910. This census is of very great importance to New Mexico; unquestionably it is of greater importance to our territory than to any other or to any commonwealth in the Union. It is highly important that we secure accurate information in regard to the items called for on the census blanks and I trust that every county superintendent and teacher will do all within his power to instruct pupils and patrons concerning the importance of this census and the necessity for accuracy. Blanks will accompany this circular giving information as to the history of the census and as to the exact items to be called for in each community in our territory. I would suggest that each county superintendent or each teacher set a date for the consideration of the census question and invite patrons of the community to a joint discussion of the importance of this enumeration and the details of the same.

The necessity for the consideration of this question is doubly enforced upon me by the fact that in the recent examination of applicants for census work over ninety per cent of the teachers who wrote on the examination failed and about the only work that had to be done in this examination was to fill out the regular enumeration blank.

I need not add that the chief reason why a careful census at this time is of supreme importance to our territory is the advantage that will certainly come to us in our campaign for statehood from an accurate enumeration of our people and a correct statement as to our condition, industrially and educationally.

SIXTH CABLE TO

BE LAID TO EUROPE.

Announcement Made By George W. Ward, Vice President and General Manager.

New York, Feb. 25.—George W. Ward, vice president and general manager of the Commercial Cable Company announces that in view of the public demand for increased cable facilities and greater speed of transmission, the Commercial Cable Company will proceed at once to lay an additional transatlantic cable. This will be the sixth cable which the Commercial Cable Company will own between Europe and America and will greatly accelerate the transatlantic service.

COAL MINERS AND OPERATORS FAIL TO AGREE.

Kansas City Convention Adjourns Without Reaching Tangible Results.

Kansas City, Feb. 25.—The joint convention of coal miners and operators of the Southwest adjourned today, the conference committee appointed to consider the wage scale for the next five years reporting inability to reach an agreement. Amicable adjustment is possible at a subsequent joint convention. The present scale expires on April 1.

COMMITTEE GETS HOLD OF TARTAR

Special Agent Horace T. Jones Didn't Care What Inferences Were Drawn

BALLINGER-PINCHOT INQUIRY

Unexpected Turn Given Investigation by Witness for the Prosecution.

Washington, Feb. 25.—The Ballinger-Pinchot inquiry took an unexpected turn today when Special Agent Horace T. Jones of the land office took a stand for the "prosecution" and made a sensational attack on James M. Sheridan, who was sent by the land office to Seattle last year to take charge of the government's case against the Cunningham Alaska coal land claims. Jones declared that Sheridan had been graduated in law only a year or two, that his conduct of the case was incompetent and he had opposed to him the two leading lawyers of Seattle. He gave a number of instances of Sheridan's conduct of the case. He said that Glavis is not a lawyer, but knew more law than Sheridan did. And he thought it was a reflection on Glavis for the land office to send Sheridan out there to take charge of a case which Glavis had worked up.

Under cross-examination Jones was defiant and aggressive to the members of the committee and counsel alike and said he did not care what inferences were drawn from his testimony.

Favorable Report on Railroad Bill.

Washington, Feb. 25.—The administration railroad bill was ordered favorably reported to the Senate by the committee on Interstate Commerce today, immediately after the consideration of the measure was completed.

Hitchcock Thinks it Funny.

Washington, Feb. 25.—Postmaster General Hitchcock received the announcement with decided amusement yesterday when informed of the story that it was designated to make him one of the senators from Arizona when that territory became a state. He said that the story was "funny."

Government Will Appeal.

Washington, D. C., Feb. 25.—As the result of today's cabinet meeting, Attorney General Wickersham telegraphed District Attorney Wise of New York to note an appeal from the decision of Judge Hough, dismissing for want of jurisdiction the indictment against the Press Publishing Company, (New York World) the charge of libel in connection with the Panama canal case.

Prohibition for Indian Agency Sections.

Washington, Feb. 25.—To enable the secretary of the interior to suppress the liquor traffic with Indians, Secretary Ballinger has submitted to the House the draft of a bill prohibiting the sale and disposal of intoxicating liquors in those parts of the Cheyenne river and standing Rock Indian reservations of North and South Dakota, which are to be opened to settlement April first.

EDWARD PAYSON WESTON LEFT THOREAU TODAY.

Expected to Cover Forty-two Miles to McCarty's, Valencia County, By Night Fall.

Albuquerque, Feb. 25.—Edward Payson Weston left Thoreau early this morning with the intention of walking forty-two miles to McCarty's today, where he will spend Sunday. He is three days ahead of his schedule.

SPORT'S NERVE FAILS HIM

Hands Jailer Pistol With Which He Intended to Commit Suicide

WIFE'S GRANDMOTHER BLAMED

Women in Company of Embezzler When Arrested at Los Angeles.

Cincinnati, Feb. 25.—"Take this pistol, jailer. It was given to me by my wife rather than suffer the disgrace of imprisonment, but I have concluded to live." This dramatic declaration was made by John H. Mackie, former owner of a sporting goods store at Columbus, as he was taken from jail here to the Columbus penitentiary today to serve a sentence of five years for embezzling funds from his wife's grandmother. He was arrested in Los Angeles in company with women.

FLOODS SWEEP NORTHWEST

Roads and Bridges in the Walla Walla Valley Are Washed Out

WORST IS YET TO COME

Warm Weather and Rain Melting the Snow in the Cascades.

Portland, Ore., Feb. 25.—The Pacific northwest is in danger of great floods. Heavy rains are rapidly melting the snow fifteen feet deep that extends for ten miles near the summit of the Cascade mountains and rivers and creeks are fast rising. Rain and warm weather are predicted in Oregon, Washington and Idaho and the situation is regarded as alarming. Roads and bridges of the Walla Walla Valley already have been washed away. La Grande, Ore., is flooded. All towns along the rivers are preparing for the flood.

Blocked By Snow Drifts.

Seattle, Wash., Feb. 25.—The weather here and in the Cascade mountains turned clear and cold last night, and the danger of floods has been considerably lessened. The Northern Pacific opened its tracks today, which has been snow blockaded several days. The Great Northern and Milwaukee roads are still blocked by enormous drifts in the mountains.

STREET CAR STRIKE IS BROKEN

Philadelphia Rapid Transit Company Is Steadily Opening New Lines

SERIOUS OUTBREAK LAST NIGHT

Yesterday Was the Quietest Day Since the Men Went Out.

Philadelphia, Feb. 25.—Encouraged by the success that met its attempt to operate cars last night, the Rapid Transit Company began at daybreak this morning to open up additional lines, some of which had not been in operation since the strike began. Gangs of laborers began at midnight clearing obstructions from the tracks. The company operated 744 cars yesterday but as the usual number is about 2,500, it probably will be some time before traffic is normal. There were a number of serious outbreaks last night, but yesterday as a whole was the quietest since the strike began.

POSTMASTER GRIMSHAW IS ILL WITH PNEUMONIA.

Two Other Postal Officials Laid Up With Colds—Serious Handicap in Handling Mails.

Postmaster S. B. Grimshaw is laid up with pneumonia and his condition is said to be quite serious. He is under the care of a well known physician.

This was stated by a postal official today and at the same time it was said that the postal force has been seriously crippled by an epidemic of colds that has gone through the building. Miss Flo Moore, the general delivery clerk is ill at her home suffering with a severe cold. Daniel C. Ortiz the day distributing clerk is also laid up with a cold. Two other members of Mr. Grimshaw's staff are said to be ill with severe colds, but are sticking at their posts in the hope that they will be able to hold out until some of the others are able to return to their duties.

Carlos Viera, the photographer, gave bond for \$1,000 yesterday and has been appointed an assistant in the post-office during the present epidemic. The necessity for having other special assistants sworn in may arise, it is said.

What is the Cause?

"One of the great troubles with this office," said a postal official today in a hoarse voice, "is that we have drafts and then more drafts. I do not mean of the money order variety but of the galloping-consumption-producing kind. What we need is a cage-door, the revolving kind that is the foe of drafts. If many more officials are taken ill perhaps Uncle Sam or the owner of the building will put in one."

General T. C. Lebo is Dead—General T. C. Lebo of the United States army, retired, well known in New Mexico, died in Chicago.

ROOSEVELT WILL VISIT TEXAS

Intends to Write History of Lone Star State and Its Heroes

INTERVIEW WITH CECIL LYON

Ex-President is Expected to Make Political Speeches for the G. O. P.

Chicago, Feb. 25.—A special to the Record-Herald from Washington says: "Former President Roosevelt intends to write a history of Texas. He will visit the Lone Star state for historical matter after he has recovered from the fatigue of his African trip. 'Colonel Roosevelt always had an interest in Texas,' said Colonel Cecil Lyon, Republican national committee man of that state, 'and long ago expressed a desire to write a history of our commonwealth. He is a great admirer of Sam Houston and other characters who made Texas famous. While in Texas, we hope Colonel Roosevelt will make a few political speeches for the G. O. P. We are not predicting that with his aid we can carry the state, but the seed must be planted before a harvest can be reaped.'"

GARCIA'S LITTLE GIRL IS HELD FOR RANSOM.

Writ of Habeas Corpus is Issued for Body of Child—Father and Mother in Ignorance.

Denver, Colo., Feb. 25.—Held for ransom! Such is now the precarious situation of the baby daughter of Elfrigo Garcia, a wealthy Spaniard of Albuquerque, N. M., who after six months' frantic search has located the little one in the mountain village of Minturn, Colo., where, with another baby, alleged by Garcia's attorney, Isaac Barth, to be harbored for the same purpose, she is kept for the payment of a fabulous sum of money.

Judge Allen of the West Side court issued a writ of habeas corpus for the body of the child and a deputy sheriff left on the noon train to bring the baby into the district court of the city and county of Denver as soon as it can be found. Attorney Barth will remain in a nervous state until the officer from Denver makes his report for he fears that the Minturn people will either hide the baby from the officers or even resort to more strenuous measures to retain it until a cash sum is paid into their hands.

Father and Mother Kept in Ignorance.

The father and mother of the child, who have been recently reunited, have been kept in ignorance of the true condition of their offspring by the attorney, as he does not wish to mar the happiness recently brought about by their reunion and the hope of the immediate recovery of the baby girl.

Barth is parleying with the custodians of the much-sought-for baby until the officer arrives in Minturn. He is constantly communicating with them to make a positive offer for the return of the baby, promising them anything within the bounds of reason until the officer arrives upon the scene.

He made one trip to Minturn in person and expected to bring the baby back with him. He had communicated with Mrs. R. J. Cahill of Minturn, who has the little girl, and she had told him to come on and get it. But when he arrived he found the place occupied by the husband and wife and a number of friends and a demand was made for a large sum of money, but the price was not named. The attorney was asked to make a bid.

Cahill and Wife Demanded Ransom.

According to his statement, the people in possession of the child were practically barricaded in a cabin on the hillside, overlooking the little village of Minturn, and were able to hold it against a siege. The stalwart mountaineer and his wife exhibited the baby, laughing, dark-eyed little girl and then stepped between the lawyer and his long-sought quest and demanded the ransom.

"How much?" asked the attorney. "How much will you give?" was the eager demand made by the Cahills.

DEFAULTING BOOKKEEPER RETURNS TO MASSACHUSETTS.

Promptly Arrested by Federal Authorities Upon His Arrival at Boston This Morning.

Boston, Feb. 25.—George W. Coleman, the alleged defaulting bookkeeper of the wrecked National City bank of Cambridge, arrived here this morning and was arrested by the federal authorities.

Boston, Feb. 25.—Coleman who had been in the west came to Boston for the purpose of giving himself up. Later he was taken before a United States commissioner and was held in \$50,000 bond to the grand jury. His default is said to be at least \$160,000.

PRICE OF WOOD TO ADVANCE

Five Cents More a Load Predicted by Pecos Forest Woodmen

BURROS ARE ON A STRIKE

It is Said Animals as Well as Woodmen Complain of Lack of Wood.

With the advance of the price of table board now comes the advance in another kind of board—fire-board, or the sticks that are brought to the city on the backs of the patient burros, ever ready to stop at your door at the sound of their master's sneeze, (not voice.)

But no more will the burros kneel down in homage to the fire-god for 35 cents. He is on a strike. He must get for his master 40 cents per load.

This was made officially known today by Supervisor Stewart of the forestry office. Mr. Stewart hasn't got it "in" for the people of Santa Fe who burn wood in their stoves and have no steam or water heat to take the chill off their rooms in any other way. He has simply acted on behalf of the government and has had to inform the woodmen that they will surely have to "spare that tree" or battery of trees in the Pecos forest unless they offer consideration to the tune of 25 cents a cord for the wood they hew.

That is the way it has come about. And the woodmen in reply say they will have to raise the price of wood for food is very high and both they and the patient sneeze-obeying burro must still eat.

For some time there was trouble brewing in forestry circles it is said, over the cutting of wood in the Pecos forest. Forestry officials were loath to demand pay from the poor woodmen for the wood they cut and brought to town with such difficulty. They realized that the woodmen had families to support and the payment for the wood was considered scarcely adequate after the burro had been fed.

But Uncle Sam has laws and these have to be obeyed. The woodmen were told about them and the burro somehow got a hint to that effect, too. But with the dear public meeting the extra expense to which the wood choppers and wood haulers are to be put to, a living still may be earned by the wielders of the axe.

Senator Lodge perhaps will also be notified that the price of wood has advanced. That will be another problem for him and his committees.

FORMER BANK PRESIDENT PLACED UNDER ARREST.

Forgeries Discovered That Were Committed to Cover a Shortage of More Than \$90,000.

Kansas City, Feb. 25.—Byron L. Church, former president of the Holyrood State Bank of Holyrood, Kansas, was arrested here today under instructions of State Bank Commissioner Dolley of Kansas. Church's son, M. E. Church and F. W. Thomas, both former officers of the bank, are sought by officers. A special examiner recently discovered evidences in the bank's books of forgeries to cover alleged shortage of more than \$90,000. When the bank was reorganized it is said that the directors made good this loss. The bank never closed and it is now said to be in a prosperous condition. It is claimed the losses were due to a former cashier who speculated in grain with the bank's funds.

LAMA WAS A RUMOR MONGER

Chinese Therefore Declare That His Throne in Tibet Is Vacant.

WILL PROTECT TREATY RIGHTS

Dalai Had Been Trying to Organize General Revolt Against Peking.

Peking, Feb. 25.—The Chinese government has deposed the Dalai Lama as head of the Tibetan government and in an official statement today explains its action. The statement says that the Lama had circulated rumors for the purpose of organizing a general revolt against the Chinese government, telling his followers that China intended to exterminate Lamaism. The statement says that existing treaties of foreign powers with Tibet will be protected.

WOULD ENLARGE CURRICULUM

Superintendent of Schools Recommends Physical Culture Be Added

MANUAL TRAINING, TOO

Also German and Chemistry—Education Board Appoints Committee.

Physical culture, manual training, German and chemistry—these will be added to the curriculum of the public schools in Santa Fe if Superintendent of Schools J. A. Wood has his way. The recommendation of adding these branches was made by Professor Wood at the meeting of the school board which was held last night and which continued until midnight, winding up with an executive session.

Professor Wood said that he had long desired to see the introduction of physical culture here but for financial reasons he did not see just how it could be done. But now a teacher is here able to give the instructions and it need not be expensive. The board appointed a committee of three to take the matter under advisement and make report. The committee consists of C. E. Linney, Jose C. Sanchez and A. R. McCorr. Mr. Linney was also appointed to select suitable dumb bells.

All of the members of the board were present with the exception of Messrs. Catron and Salazar.

The treasurer's report was read and showed a comfortable balance in the school's favor.

Upon Superintendent Wood's recommendation the board authorized the building grounds committee to procure ten book cases not to cost more than \$5 each for each of the ten different rooms where they will be useful.

Miss DuVal Appointed.

The resignation of Mrs. Dora C. Fletcher was accepted. Miss Elizabeth DuVal of this city, was appointed to take her place as teacher of the third grade.

Miss DuVal has had experience. Professor Wood stated, and her appointment is sure to meet with approval.

The board decided to purchase for \$50 the piano that Mrs. Fletcher owned and had left in the kindergarten room. Mrs. Fletcher will go to Billings, Mont., to live and offered the piano to the school.

Praises Miss Grygla.

Professor Wood praised the work of Miss Lucy W. Grygla, art teacher at the schools, and recommended that her salary be increased. The board acted favorably on the recommendation.

During its executive session the board is said to have considered complaints against pupils in the schools. One girl whose name is not given for publication was suspended for the rest of the year, on the charge of "insubordination."

Another girl, who was temporarily suspended, will be re-instated provided she makes ample apology to her teacher. Two other girls who had been suspended, were re-instated upon complying with the order to apologize.

DeVargas Hotel.

The DeVargas hotel project was discussed by the board, but the final action on the matter of selling the lot desired by the hotel promoters was postponed. A meeting will be held at the board's room at 7:30 o'clock tonight. It will be an executive meeting.

One Extra Teacher.

Superintendent Wood stated today that he has earnestly recommended that the board increase the teaching force by appointing an extra teacher and that with this teacher added the manual training and physical culture as well as the teaching of chemistry and German will be made possible.

OFFICIALS OF BEEF TRUST ARE INDICTED.

Charge With Conspiracy to Raise the Prices of Food Stuffs Contrary to Public Good.

New York, Feb. 25.—Indictments charging conspiracy to raise prices of food stuffs contrary to the public good, against all officials and directors of the National Packing Company, the so-called beef trust, were presented to Judge Swayze in the supreme court for Hudson county in Jefferson City this afternoon.

INFORMATIONS SWORN AGAINST TWENTY-FOUR SALOON KEEPERS

Denver, Colo., Feb. 25.—Informations against two dozen saloon keepers have been filed by the district attorney in the west side court. The charge in each case is that the accused kept his saloon open on Sunday.

THE DAILY ROUND UP.

ONLY TODAY.

(From Woman's Magazine.)
Yesterday's sun went down last night,
And the sun of tomorrow is yet to
rise;
Only the sky of today is bright.
Over the path where our journey
lies,
We that would come to the goal at
last
Must wait not to dream beside the
way;
There is hope in the future and help
from the past,
But for work there is only today.

Yesterday's shore is left behind,
And the shore of tomorrow who can
see?
Only today we may look to find
Passages safe where our boats shall
be.
We must trim our sails for the sud-
den blast;
Must wait not to dream beside the
way;
There is hope in the future and hope
from the past,
But for work there is only today.

Yesterday's thread was used at eve,
And the thread of tomorrow now yet
is spun;
Only today may our shuttles weave
Strands of gold in the web begun.
Heed we the lesson and hold it fast,
Hold it and heed it along life's
way;
There is hope in the future and help
from the past,
But for work there is only today.

Daughter Follows Father to Grave—
Two weeks after the death of Willis
Kite from heart failure, his fourteen
year old daughter, Ina May, succumbed
to tuberculosis at Roswell.

Driver of Mail Wagon Disappears—
The other day, the mail wagon from
Lincoln was found in the outskirts of
Roswell without a driver. The driver
has not been located since then.
One sack of mail was missing.

**Held to Federal Grand Jury at Las
Cruces**—Oliver Elliott has been held
to the federal grand jury at Las Cru-
ces by Commissioner George P. Oliver
to answer the charge of conspiracy to
smuggle Chinese into the United
States.

Woman Swallowed a Pin—Mrs. M.
C. Branch of Dexter, Chaves county,
was operated upon at Roswell hospi-
tal, to remove a pin from her throat.
She held several pins in her mouth
when one slipped down her windpipe
and lodged there. The dangerous
operation of tracheotomy had to be
performed to save her life.

**Miss V. Trujillo's Death is Investi-
gated**—Coroner J. H. Gullfoil was cal-
led from Aguilar, Colo., to investigate
the circumstances surrounding the
death of Miss V. Trujillo, 60 years old,
who died under mysterious circum-
stances near Trinidad. It is said by
members of the family that death was
due to cancer of the stomach. An
abvason on the body led to the belief
that the woman possibly may have
met with foul play.

Tramp Flags Special Train—After
being put off the Golden State Limited
over the El Paso & Southwestern,
Jerry Wells, a 15 year old boy of
Wichita Falls, Texas, flagged the
special train of President James Dou-
glas of the Southwestern at Hanley,
N. M., and rode into Pastura, a dis-
tance of sixty-five miles, before being
discovered. A cow on the track was
his undoing. While riding the pilot
of the limited he shifted his position
to avoid possible impact with the cow,
and was discovered. After being
ejected from the president's special at
Pastura he caught the tail end of a
light extra, clinging to his suitcase
while he rode into Carrizozo.

There is more Catarrh in this sec-
tion of the country than all other dis-
eases put together, and until the last
few years was supposed to be incur-
able. For a great many years doctors
pronounced it a local disease and pre-
scribed local remedies, and by con-
stantly failing to cure with local treat-
ment, pronounced it incurable. Science
has proven catarrh to be a constitu-
tional disease and therefore requires
constitutional treatment. Hall's Catarrh Cure, manufactured by
F. J. Cheney & Co., Toledo, Ohio, is
the only constitutional cure on the
market. It is taken internally in doses
from 10 drops to a teaspoonful. It
acts directly on the blood and mucous
surfaces of the system. They offer
one hundred dollars for any case it
fails to cure. Send for circulars and
testimonials.

stipation.

YOUR BACKACHE WILL YIELD

To Lydia E. Pinkham's
Vegetable Compound

Bloomdale, Ohio.—"I suffered from
terrible headaches, pains in my back
and right side, and was tired all the
time and nervous. I could not sleep,
and every month I could hardly stand
the pain. Lydia E. Pinkham's Vegeta-
ble Compound restored me to health
again and made me feel like a new wo-
man. I hope this letter will induce
other women to avail themselves of
this valuable medicine."—Mrs. E. M.
FREDERICK, Bloomdale, Ohio.

Backache is a symptom of female
weakness or derangement. If you
have backache don't neglect it. To
get permanent relief you must reach
the root of the trouble. Nothing we
know of will do this so safely and surely
as Lydia E. Pinkham's Vegetable Com-
pound. Cure the cause of these dis-
tressing aches and pains and you will
become well and strong.

The great volume of unsolicited tes-
timony constantly pouring in proves
conclusively that Lydia E. Pinkham's
Vegetable Compound, made from roots
and herbs, has restored health to thou-
sands of women.

If you have the slightest doubt
that Lydia E. Pinkham's Vegeta-
ble Compound will help you,
write to Mrs. Pinkham at Lynn,
Mass., for advice. Your letter
will be absolutely confidential,
and the advice free.

MINOR CITY TOPICS

Denver, Colo., Feb. 25.—
Weather forecast for New
Mexico: Generally fair tonight
and Saturday with stationary
temperature.

Death at Albuquerque—Trinidad
Salazar, aged nineteen years, son of
Mr. and Mrs. Cipriano Salazar, died
at Albuquerque.

Charged With Horse Stealing—Dion-
icio Padilla was brought into Las
Vegas yesterday by Deputy Sheriff
Abrañ Apodaca and was given a hear-
ing on the charge of horse stealing.

Arrested for Robbing Freight Car—
Grover Clark, Harry Russell and Hen-
ry Tainer were arrested at Azul sta-
tion near Las Vegas on the charge of
larceny. It is alleged that they broke
into a box car while stealing a ride
on a Santa Fe freight train.

**Thousand People at Las Vegas
Masked Ball**—Chief Justice Mills, Mrs.
H. M. Smith, Mrs. J. S. Duncan, Jr.,
Mrs. Frank Strauss and A. A. Jones,
were the judges at the masked ball of
the E. Romero Hose Company at Las
Vegas this week, which was attended
by a thousand persons, one hundred
of whom were masked.

**School Board Sued for \$600 Dam-
ages**—John F. Taylor, the deposed su-
perintendent of schools of Clovis,
Curry county, has brought suit for
\$600 damages against the board of ed-
ucation of Clovis, claiming this as the
amount of salary which would have
come to him as superintendent had he
been permitted to remain in office to
the end of the term.

County Teachers' Convention—The
first convention of all the public
school teachers of the county of Santa
Fe, will be held tomorrow afternoon
at two o'clock in this city. County Su-
perintendent John V. Conway is the
president of the association.

Two Deaths at Insane Asylum—
Juan Garcia, an inmate in the terri-
torial asylum for the insane at Las
Vegas, died at the age of 56 years. He
came from Lincoln county. Saban
Trujillo from Dona Ana county, aged
thirty years, died on Tuesday at the
asylum.

Must Pay Alimony—Harry W. Rit-
gers, who was recently ordered by
the court to pay \$62.50 a month al-
imony, is charged by his wife with hav-
ing gone to Denver to evade payment
of the alimony and intention to kid-
nap the seven year old daughter Edna
whose custody was awarded by the
court to Mrs. Ritgers.

IF WOMEN ONLY KNEW

What a Heap of Happiness it Would Bring to Santa Fe Homes.

Hard to do housework with an aching back. Brings you hours of misery at leisure or at work. If women only knew the cause—that Backache pains come from sick kidneys.

"Would save much needless woe. Doan's Kidney Pills cure sick kidneys."

Santa Fe people endorse this: Miss Adela Arias, 106 Griffin street, Santa Fe, N. M., says: "There is no praise too strong for me to give Doan's Kidney Pills. The splendid results I obtained from their use several years ago have been lasting and for that reason, my confidence in them has been increased. I suffered from a dull heavy ache in the small of my back and I was subject to headaches and dizzy spells. I always felt tired, had no ambition and was in very poor health when I procured Doan's Kidney Pills at Stripling, Burrows & Co.'s drug store. It did not take them long to cure me and from that day to this I have been free from kidney complaint. I willingly confirm the public statement I gave in January, 1907, telling of my experience with Doan's Kidney Pills."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Small Holding Claim No. 1419. (Serial 012529.)

Pecos Forest Reserve. Not coal land Department of the Interior. United States Land Office.

Santa Fe, N. M., Feb. 21, 1910.

Notice is hereby given that the following claimant has filed notice of his intention to make final proof in support of his claim under sections 16 and 17 of the act of March 3, 1891 (26 Stats., 854), as amended by the act of February 21, 1893 (27 Stats., 470), and that said proof will be made before register or receiver at Santa Fe, N. M., (U. S. Land Office) on April 15, 1910, viz: Jose E. Roybal, heir of Gregorio Roybal, of Rowe, N. M., for the lots 1 and 2, and S 1-2, NE 1-4, Sec. 32, T. 16 N., R. 13 E., 15.172 acres.

He names the following witnesses to prove his actual continuous adverse possession of said tract for twenty years next preceding the survey of the township, viz:

Visenter Quintana, of Pecos, N. M.; Ramon Rodriguez, Cleofes Garcia, Caletano Garcia, all of Rowe, N. M.

Any person who desires to protest against the allowance of said proof, or who knows of any substantial reason under the laws and regulations of the Interior Department why such proof should not be allowed will be given an opportunity at the above-mentioned time and place to cross-examine the witnesses of said claimant, and to offer evidence in rebuttal of that submitted by claimant.

MANUEL R. OTERO, Register.

NOTICE.

Notice is hereby given that a meeting of the Democratic central committee of the city of Santa Fe, N. M., will be held on the 2nd day of March, 1910, at the office of Hon. N. B. Laughlin at 10 a. m.

All Democrats and persons interested in good city government are cordially invited to attend.

TO NORTH POLE IN A DIRIGIBLE

Dr. Frederick J. Fielding Offers \$30,000 to Prove Peary's Claims

GETS LITTLE ENCOURAGEMENT

Explorer Does Not Answer and Society Turns Him Down.

San Antonio, Texas, Feb. 25.—While not doubting that Robert E. Peary may have reached the North Pole, Dr. Frederick J. Fielding of this city, is of the opinion that corroboration will be needed before the world in general will recognize this country's claim to the discovery of Peary. What is more he is quite willing to dedicate his own efforts and money to that purpose. Although he has corresponded with both the National Geographical Society and Commander Peary he has so far made little progress towards that end; the former have advised him that they are fully satisfied with the achievement of Commander Peary, and the explorer has so far failed to even reply to the letter of Dr. Fielding.

Is in Earnest.

"I am in earnest about this thing," said Dr. Fielding when interviewed on the matter. "I have no doubt that Commander Peary reached the pole, or possibly thinks that he has reached it. While I am not fully familiar with the instruments he used in his observations I have been informed by a number of leading scientists that the ordinary instrument used for orientation purposes would hardly prove to be serviceable in the Polar regions. Whether this is so or not I am not in a position to say, though the men who have warned me to take along special instruments in case I should go, are above having ulterior motives."

"The North Pole question is not settled by any means because the National Geographical Society says it is fully satisfied with the achievements of Commander Peary. Their refusal to submit Peary's data to other learned bodies, while excusable from certain points of view, is somewhat unscientific. The fact that the expedition was conducted under their auspices, no doubt, gives them the right to pass on the case first, but to remove such scepticism as may well exist the papers should be submitted to other learned bodies, the University of Copenhagen, for instance."

"I am not interested in this matter from a controversial point of view, nor do I look upon the proposition as a picnic. It would cost me all of \$30,000 to finance the expedition as far as my part of it goes, and while spending this sum would not hardship me, I certainly do not want to spend it uselessly, and make a fool of myself besides. The fate of Dr. Cook has not the slightest attraction for me. If the National Geographical Society and possibly Commander Peary think this is a joke they are badly mistaken. I have invited both of them to participate in this undertaking not because I intend to disprove anything but merely to establish Peary's claim beyond the slightest shadow of a doubt. For this reason I want the National Geographical Society, the United States government, or any other body qualified to do this, to furnish me two or possibly three scientists of recognized standing to go over the work and definitely verify it. One of these should be Commander Peary himself, but in case he refuses to accompany me, another man should take his place. With me the whole thing is not a matter of glory but of geography. Peary's fame will not suffer from my trip and on the contrary it will be enhanced, for I take the liberty to say that the sceptics, even in our own country, still far outnumber the believers."

Offer Turned Down.

"On January 16, I sent a letter to the National Geographical Society outlining roughly what my intentions were and received from the following reply: 'I would acknowledge the receipt of your communication of January 16 in reference to your proposed expedition to the North Pole in a balloon, and beg to advise you that the address of Commander Peary is The Oakland Apartments, Washington, D. C.'"

"The National Geographical Society is not in a position to take up the matter with you, having fully satisfied itself as to the achievements of Commander Peary."

"With appreciation of your courtesy in bringing the matter to our attention, I am, very truly yours, 'O. P. AUSTIN, Secretary.'"

"To Commander Peary I addressed on January 5 the following letter: 'Dear Sir—I am enclosing a copy of my letter to the National Geographical Society of Washington, the secretary's reply, and also a clipping from one of our daily papers.'

"Am pleased to note the society has fully satisfied itself with your achievement, and I assure you, Sir, that my letter carried with it no reflection on your great success, but to the contrary. You are probably aware some people are still incredulous, and in order that every doubt of your recent expedition to the North Pole may be completely eliminated I propose to take yourself and two other

scientific observers, to the North Pole in a dirigible balloon. This balloon will be fully equipped for your special comfort and safety. I will build a hydrogen gas balloon of 200,000 cubic feet capacity, capable of making from 50 to 75 miles per hour, and carrying at least six passengers, including the necessary supplies and a tank filled with hydrogen gas to replenish the balloon at the North Pole for the return trip. The only condition I ask, is that you or some other interested party, transport my outfit to and from the nearest navigable point to the North Pole.

"Of course nothing would be gained by the proposed expedition, unless you could induce one or two other scientific observers to go, whose report on our return, would carry absolute confidence to the entire world. I assure you that it is to fully corroborate your report that I have interested myself in this matter."

"I hold the record for the longest distance ever made in a balloon in this country, having left Chicago on the afternoon of July 4, 1908, in a balloon of 72,000 cubic feet and landed West Sheffield, Quebec, on the afternoon of July 5, making 895 miles in 23 hours and 15 minutes, winning the Byron J. Arnold trophy valued at \$5,000 for the longest distance, and the E. Bartlett endurance trophy, valued at \$500."

"I merely mention this fact, that you will understand I have had some experience in the air, and have every confidence that with your assistance, and a properly constructed balloon for the purpose, that I can make the trip to and from the North Pole with absolute safety."

"Trusting to hear from you at your earliest convenience, I have the honor to remain, very respectfully,

"FREDERICK J. FIELDING."

Now Ready for Others.

"So far I have not heard from Commander Peary and I am not likely to hear from him now. For this reason the offer as outlined by me is open to any qualified body that may wish to avail itself of it. Who they are I do not care provided they have the highest standing in the scientific world."

"Speaking of the feasibility of invading the Polar regions with a dirigible balloon, Dr. Fielding said that there was not the slightest chance for failure."

"The dirigible balloon has been shown to be perfectly safe if handled properly and by experienced men. Using hydrogen gas will enable me to make the flight to the pole and the return passage, without mishap. Aboard the dirigible will be a tank of compressed hydrogen gas which will be used for compensating leakage if there should be any. This will enable us to remain in the air at any altitude for a much greater time than will be needed. I propose to equip the machine with a 200 horse-power motor, which will enable us to travel at an average speed of at least 50 miles per hour. From the point where navigation ceases to the pole is only 800 miles and the trip there and back could be made in about 30 hours flight. To guard against accident the machine would carry an extra supply of provision, several sleds and their dog teams, as well as one or two Eskimos. Some of this load would be

carried as ballast and used as such on the return trip."

"My attitude in this matter," Dr. Fielding concluded, "is neither search for notoriety nor iconoclastic."

Dr. Fielding, although wealthy, still practices medicine in this city. From being an ardent yachtsman he became one of the most noted aeronauts in this country, and is now president of the San Antonio Aero Club of Texas.

CHARGED WITH EXTORTION IN U. S. PENSION CASE.

Mrs. Prescilla Shelton Arrested at Albuquerque but Makes Rather a Plausible Explanation.

Albuquerque, N. M., Feb. 25.—Mrs. Prescilla Shelton, formerly Miss Prescilla Arnow, who has been in Albuquerque with her husband for a short time, and who was preparing to return to her home in Vermont, was taken into custody yesterday morning by deputies of the United States marshal's office and taken before Judge Abbott to answer a charge of extortion preferred by the United States pension office, in connection with a pension which Mrs. Shelton secured for a friend some time ago. It is charged that Mrs. Shelton charged \$700 for securing the pension for the friend and that she thus exceeded the statutory limit for such charges by several hundred dollars. She will be returned to Vermont accompanied by her husband and Deputy United States Marshal Forbes, making no resistance to being returned to face the charge.

Mrs. Shelton claims that she was engaged for about five years in securing the pension in question, working without pay in behalf of a poor woman, the beneficiary in the case, and that all she took from the back pension received was the amount of her actual expense connected with the work.

Both she and her husband declare that the matter can be cleared up easily and that the charge of extortion cannot stand. She says that she undertook to get the pension from pure philanthropy and that she asked no remuneration but merely the money expended by her in trips to Washington and elsewhere in working up the case.

Mrs. Shelton is a victim of heart trouble and when taken into the court room yesterday morning suffered a severe attack which for a time threatened to be serious. Dr. C. A. Frank who was called, administered restoratives and after a short time she was able to continue the hearing. The charge was made by pension office officials.

TRACT NEAR SAN ANTONIO

SOLD AT RECORD PRICE.

San Antonio, Texas, Feb. 25.—What is considered the record price for property of that kind in these parts was received by W. F. Fifield of this city for a 98 acre tract adjoining one of the city's suburbs; \$220,050 being paid for it. The property will be improved with gas and water mains, cement sidewalks and macadamized streets and put on the market as a highly restricted residence section.

OFFICIAL PAPER OF SANTA FE COUNTY.

The New Mexican is the oldest newspaper in New Mexico. It is sent to every postoffice in the Territory, and has a large and growing circulation among the intelligent and progressive people of the Southwest.

PRESIDENT TAFT AND THE NEWSPAPERS.

The New Mexican regrets that President Taft is bitter towards the newspapers as a class and has given public expression of that bitterness. The provocation, no doubt, has been great, for it takes a calloused mind and conscience not to wince under unjust newspaper criticism, but the attitude of the President toward the press is somewhat to blame for his discomfort and discomfiture. On the other hand, the day is past when the people acclaim and the partisan throws up his hat every time the President does or says anything. The people look to the motive, and even the strict partisan likes to know the reasons and dares to dissent if the reason does not satisfy him. Hence public criticism, hence insurgency, hence smashing of Presidential legislative programs.

The President of the United States and all other officials must nowadays take the people into their confidence and there is only one way to reach them and that is through the newspapers. President Taft has not done this; by this time he realizes his mistake and the New Mexican hopes, that as soon as the bitterness is worn off, that he will profit by it. The omission was not intentional, it was temperamental. President Roosevelt made the newspapers an instrument for good government, a vehicle for informing the public of his plans, of his motives, of his aims, did not disdain to write for them, and in consequence, even though his acts were severely criticized, his motives were seldom questioned, the public began to accept as a fact his sincerity, and approved of his frankness. The journalists did their best to stir the public imagination in favor of Roosevelt and today, Roosevelt, perhaps, no greater than Taft, is the most beloved and most admired American in the entire world.

In New Mexico, a similar example of the right and the wrong attitude toward newspapers has been given in late years. Herbert J. Hagerman, endowed with every element for success, a brilliant scholar, an experienced diplomat, wealthy, polished, well meaning, disdained the newspapers, held himself aloof from "mere" reporters, kept away from the rabble. From the start he was therefore misunderstood and misjudged, his administration drifted from failure to failure, his acts were misinterpreted because he did not know what Governor Curry knows so well, that the way to gain the sympathy of the people is to let them judge of his motives for themselves by explaining his actions to the newspaper representatives. In fact, Curry went farther, the newspapers often knew long before his closest friends, what action he intended to take, and being thus informed, they did not misinterpret his acts for they judged these by what they knew would follow and they explained that his actions were but the logical working out of a plan for the public good.

President Taft has been on the bench. Newspapers and the public are slow to criticize the bench; they expect a judge to hold himself aloof from the common run of humanity, but they will not forgive this aloofness on part of an executive or even an administrative official. They pay the salaries, they provide the means for carrying on the government, officials owe to them their position and therefore the public has a right to know the why and wherefore of each important action, not only the formal, official reason, but the human main-spring of it. The judge on the bench in handing down a decision goes learnedly into the matter, in his opinion he makes the facts square with the law, every one has access to the opinion, no further explanation is needed, and the public generally is satisfied. The executive officer, owes it to himself and the public to be equally as careful in giving an opinion, that will square his acts with exalted motives, but the only way he can impart this opinion to the public, whose servant he is, is through the newspapers. The newspapers, as a rule, are eager to serve, to explain for others; they can be made the greatest power for good on part of officials and government, they need but be given the opportunity. Officials need not have any secrets from them, for the newspaperman who is trusted will not betray them. Much of the grief of the present administration, from the Ballinger-Pinchot fight, down to the most recent complaint of the President himself, is due to the fact that the newspaper men have not been gathered about the President, as they were under Roosevelt, and informed of the plans and their why and wherefore. Taft can no more "avoid

the newspapers" than he can the judgment of the people or his party.

The newspaper representatives at the Capital, naturally, act as interpreters of the acts of the administration. The rest of the nation takes its cue from them, as it were, and these journalists therefore can do very much to make or unmake an official or a politician. The wisest of the latter know how to make the best use of the press by treating its representatives not only with courtesy but with frankness. Had President Taft done this, he would never have uttered the bitter plaint at the recent banquet at Newark, New Jersey:

"I had not intended to say anything on the subject of my first year in the White House, but after what Governor Murphy has graciously said, I cannot refrain from a personal word or two."

"It is true I told him I wanted to make good a year ago. I am not certain of doing it now. He said something about the newspapers. When the newspapers are prone to criticism and sometimes unite in hammering your administration, treating it sometimes with contemptuous disdain and sometimes with patronizing friendship, it is hard to overcome the feeling that perhaps you ought to begin all over again."

"In view of all that, to have received the welcome which introduced today, gives a little hope that perhaps the newspapers don't carry in their pockets all of the public opinion, that perhaps the American people are liable to see through something of hypercriticism, something of hysteria, and something of hypocrisy and to have real sympathy with the man, who under a considerable responsibility is doing the best he can."

"They say that sometimes demonstrations are misleading, but I am going to believe as I have said, that your reception today and tonight is sincere and I am going to take that flattering unctious to my soul as I go back to Washington and avoid the newspapers."

"You see therefore that when I came here today I was in a frame of mind which made your welcome as balm to my soul and I carry away a sense of gratitude that will never depart from my memory."

THE REPUBLICANS AND THE BEVERIDGE BILL.

Under this heading the Roswell Register Tribune, expresses itself very sensibly, falling into line with the New Mexican on this same subject. It says:

"Great significance attaches to the action of the territorial Republican central committee last week in conference on the statehood situation. The resolutions adopted at that meeting were published in full in the Register-Tribune. It was done with pleasure, as showing what combination of sane, sensible business men led the Republican party in New Mexico."

"In direct opposition to the snarls of the Democratic leaders and press, the committee in a dignified and unmistakable manner points out that the Hamilton bill is preferable and more just to the territory, but that if necessary it fully accepts the so-called Beveridge bill, which is practically certain to be the one that passes Congress, with possibly some minor amendments and enlargements as to grants and the like. All recognizing the fact that statehood is a privilege and not a right, and that the people of New Mexico are not in a position to dictate the terms of the bill, and should be ready and willing to accept a reasonable though somewhat severe compromise that will bring statehood in the course of a very short while."

"This is unquestionably the only sensible view to take of the matter; in fact, the only patriotic one. To take any other is to place the territory in the light of disputants rather than as acceptants, and to make enemies and possibly votes against statehood. That there has been so much unreasonableness in the position of many Democrats and other oppositionists has undoubtedly led to the severity of the Beveridge bill, and the committee was extremely wise and happy in its attitude toward it."

"We have read the Beveridge bill carefully, and can see nothing in it to object to, save in passing to remark that it is hardly just in the matter of grants, in which New Mexico should have the same footing as all other states that have been admitted to the Union. However, this is not a point to haggle over. Our resources are so vast that we can attend to our own affairs and prosper exceedingly if once admitted as a state, and it were the practical thing to do to grasp statehood on the plane that we can

get it, and leave unstated what we want and things we should have."

"The point of submission that many of the objectors make such a fuss about is not serious at all. The President and Congress would have the right to pass on the constitution anyhow, and it is difficult to see why the privilege should not be specifically stated. The constitution is going to be all right. The citizenship of New Mexico is for the most part sane, patriotic and intelligent, and the charter they submit will be based upon the scientific principles of good government without the malformations of the Oklahoma document. It will not evade such regulatory measures as the new state will most need. They are a matter of citizenship, in which no party has the monopoly and Democratic and Republican delegates alike will see that they are embodied. Neither can there be any proper question of the final accomplishment of statehood in a year, even though it entails the holding over of territorial officials and such like. We have been waiting so long for statehood that a little delay does not matter. It is simply up to us to act in the spirit exemplified by the territorial Republican central committee, and if we do, the recognition we have been working for a half a century will shortly be at hand."

The appointment of Captain A. S. Brookes to be adjutant general of New Mexico, will be a very satisfactory one, and Governor Mills has thereby manifested his intention to continue the policy of his predecessor in National Guard matters. Being a West Pointer, a regular army officer of experience, and having the past year had the direction of the details in many instances of the reorganization of the New Mexico National Guard, the commonwealth can look forward to the strengthening of the service, making it an instrument of public security. It is understood that Governor Mills contemplates few radical changes, either in policy or in appointive officials, and will satisfy himself with completing or carrying to success many of the policies, such as that of good roads, assessment and tax reform, hydrographic surveys and stream measurements, inaugurated, or at least vigorously prosecuted by Governor Curry. This will contribute to harmony within party ranks and to the welfare of the commonwealth, is certain.

Senator Lodge of Massachusetts, in an address before the Newark Board of Trade recently showed conclusively that the tariff is not the cause of high prices. He said that he could not, and no one else could without laborious investigation, say what has increased the cost of living, but the tariff certainly has not. Cotton is on the free list, it is not controlled by any trust, and yet, cotton has advanced 84 points since 1899. Petroleum, which is also on the free list and is controlled by a trust has advanced 33 points in the last ten years. Sugar which is highly protected and is controlled by a trust has declined 10 points. Those therefore who allege offhand that the tariff and trusts are the cause of high prices are speaking without knowledge of even primary facts.

The unveiling of the portrait of Governor Bent, the first American governor, on inauguration day, will not only be an interesting occasion, but it will be a historic event. It will link the memories of the first executive with the elevation to office of the last territorial governor, and will emphasize to Congress and the world the long time that New Mexico has been waiting patiently to be admitted to the full rights guaranteed its citizens in the treaty of Guadalupe Hidalgo.

According to the El Paso Herald, "during the past three months \$251,637.82 was paid out by the city clerk for the conduct of the city government as shown in his quarterly report to the city council this morning." Santa Fe has been run on less than that for the past three hundred years and yet taxpayers groan about the heavy tax burden and the extravagance of the Republican city government which gets along on one-sixth of what cities like Albuquerque have for municipal expenditures.

Senator Aldrich says that if he were given the privilege to run the United States on a strictly business basis he could save the tax payers \$300,000,000 a year. While this appears to be an idle boast, yet to thoughtful people, it is apparent that government expenses could be reduced without impairing the efficiency of the government service.

Explorer Cook, while in Chile, said that he was disgusted to be met by newspaper men everywhere that he went. The disgust at newspaper men is quite characteristic of men whose actions or character can not bear the close scrutiny of daylight.

Senator Borah would like to insert into the enabling act a clause to permit the women of New Mexico and Arizona to vote at all elections. This gallant move costs him nothing and makes him solid in Idaho for another term.

A German writer says that J. P. Morgan is a menace to the civilized world. That should make him a welcome guest among the barbarians, and

places him on the same level with one Theodore Roosevelt.

The Chinese pursued the Dalai Lama to the borders of Sikkim. This was on February 23. The relation between "Twenty-three" and "Sikkim" is quite apparent.

The New Mexican Printing Company has on hand a large supply of pads and tablets suitable for school work, the desk, and also for lawyers and merchants; good everywhere. We will sell them at 5 cents in book form.

The First National Bank
OF SANTA FE.

The Oldest Banking Institution in New Mexico. Established in 1870

Capital Stock - \$150,000
Surplus and Undivided Profit - 80,000

Transacts a general banking business in all its branches. Loans money on the most favorable terms on all kinds of personal and collateral security. Buys and sells bonds and stocks in all markets for its customers. Buys and sells domestic and foreign exchange and makes telegraphic transfer of money to all parts of the civilized world on as liberal terms as are given by any money transmitting agency public or private. Interest allowed on time deposits at the rate of three percent per annum, on six months' or years' time. Liberal advances made on consignments of livestock and products. The bank executes all orders of its patrons in the banking line, and aims to extend to them as liberal treatment in all respects, as is consistent with safety and the principles of sound banking. Safety deposit boxes for rent. The patronage of the public is respectfully solicited.

WHY PRICES HAVE ADVANCED

Senate Committee to Probe to Bottom Existing Conditions

ADDRESS BY SENATOR LODGE

Shows Conclusively That Tariff Has Not Increased Cost of Living.

Newark, Feb. 25.—Facts, not opinions, are to form the basis on which the Senate committee appointed to inquire into prices of commodities and into rates of wages will act. This declaration was made tonight by Senator Lodge of Massachusetts, chairman of the committee, in an address before the board of trade here.

The speaker said further, that the "facts will be collected and given out without reference to any preconceived ideas and without any regard as to what or whom it will help or hurt. We shall hew to the line," he said, "and let the chips fall where they will."

"The importance of this inquiry cannot be overestimated," he continued. "It is the intention of the committee to make the inquiry thorough and to lay its results before the country, at the earliest possible moment."

The task of the committee is going to be a difficult one, in the opinion of Senator Lodge who said that "the questions involved are complicated and difficult in the highest degree."

Personally he had given some months to an investigation of these questions and the one fact of which he had become certain was that the questions involved in the investigation were extremely difficult and could not be settled or remedied offhand in five minutes.

After outlining in a general way the method of procedure that the committee will follow, he said:

"That combination to control the sale of certain articles have, in some instances advanced prices artificially. I have not personally the least doubt and if I am correct, the facts that will be gathered by the committee will demonstrate and will show the evils and wrongdoing in certain particular cases that we ought to be able to reach."

"An example of such evils is to be found in the case of meat products, in the use of cold storage to prevent a normal decline of prices which your own grand jury has been investigating. But, in many cases other causes are at work affecting prices and we do not want to jump at conclusions or fancy that we can settle these questions by a stroke of the pen."

"The committee will try to determine whether the rise in prices was sudden or has extended over a series of years; whether there has been an advance in world prices or whether the advance is confined to the United States, whether wages and if possible, whether salaries, which are most difficult to ascertain, have risen with prices and to what degrees and if any, and whether the tariff has raised prices; whether prices on certain cases have been artificially advanced by combinations seeking inordinate profits; and finally we shall make a comparison between domestic and foreign wages and prices."

Whatever the facts show will be stated by the committee, said the Senator, "without any attempt either to blacken, whitewash or to mislead." He said he had received during the last few days one letter blaming the tariff and another blaming the trusts as the cause of high prices.

"If the question were as easy of solution," he added, "as the writers of these two letters think, we could deal with it very quickly."

As an illustration of the difficulties that the committee will have to deal with, Senator Lodge took three articles of wide consumption—raw cotton, refined petroleum, and sugar—and made a comparison of the changes in prices and of their relation to the tariff and trust questions.

"Cotton is on the free list and has been for half a century. It is not controlled by any trust. Oil has been and is practically now on the free list and its sale is almost entirely controlled by the strongest, best organized and most relentless trust or combination of which we have knowledge. Sugar is in the hands of a trust or combination and is highly protected."

Stop That Cold

To check early colds or Grippe with "Preventics" means sure relief from Pneumonia. To stop a cold with Preventics is safer than to let it run and be obliged to cure it afterwards. To be sure, Preventics will cure even a deeply seated cold, but taken early—at the sneeze stage—they break, or head off these early colds. That's surely better. That's why they are called Preventics. Preventics are little Candy Cold Cures. No Quinine, no physic, nothing sickening. Nice for the children—and thoroughly safe too. If you feel chilly, if you sneeze, if you ache all over, think of Preventics. Promptness may also save half your usual sickness. And don't forget your child, if there is feverishness, night or day. Heroin probably lies Preventics' greatest efficiency. Sold in 1c boxes for the pocket, also in 25c boxes of 48 Preventics. Insist on your druggists giving you

Preventics
STRIPLING BURROWS CO.

S.S.S. THE REMEDY FOR SORES AND ULCERS

There is but one way to cure an old sore or chronic ulcer, and that is to remove the cause that produces and keeps it open. No matter where located, any sore that remains until it becomes chronic does so because of impure blood; the circulation constantly discharges its polluted matter into the place and it is impossible for nature to heal the sore. S.S.S. heals sores and ulcers by purifying the blood. It removes every trace of taint or impurity from the circulation, and thus completely does away with the cause. No local application reaches below the infected flesh at the spot, and for this reason can have no curative effect on a sore or ulcer; while such treatment is being used alone, the germs and impurities are constantly increasing in the blood and the sore is bound to grow worse. When S.S.S. has cleansed the blood and enriched and purified the circulation the place begins to take on a more healthy appearance, the different symptoms show improvement, the flesh around the ulcer gets firm, new skin and tissues are formed, and aided by pure, rich blood, nature provides a perfect and lasting cure. Under the tonic and blood-purifying effects of S.S.S., the system is built up, and those whose health has been impaired by the dr in and worry of an old sore will be greatly benefited by its use. Book on Sores and Ulcers and any medical advice free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

Neither the trusts nor the tariff are present in the case of cotton. The trust is present and the tariff absent in the case of oil. Both the tariff and trust control are present in the case of sugar.

"Now let us consider the facts in regard to the prices of these articles. Taking 100 as the basis in 1899 the advance in cotton has ranged from 31 to 84 points. It was 59 points higher in 1908 than in 1899 and it is still higher at the present time. Petroleum starting with 100 as the basis in 1899 has advanced 33 points in ten years, sugar during the same time has declined 10 points."

"I make no comment on these facts and offer no opinion. I leave it to you to point the cause of the movement of prices in these three articles which will meet every case."

"This is not a question nor is it a time for reckless haste or violence. But, it is a time for a firmness and justice, for a determination to extricate with a relentless hand the evil borne of greed and unscrupulousness which tamper with the food supply of the people or for the necessities of life."

CITY BEAUTIFUL, SANE AND HEALTHY.

Plan to Expend \$25,000,000 to Make Seattle Finest Town on Pacific Coast.

Spokane, Wash., Feb. 25.—Improvements involving the expenditure of more than \$25,000,000 are contemplated as part of the program of the civic plan committee, to be appointed by Charles M. Fassett, president of the Chamber of Commerce, to make Spokane not only the largest inland city on the continent, but also the best place in which to work and live. Mr. Fassett said in outlining the preliminaries for the work, to be started this year:

"We want Spokane to be beautiful, sane, healthy and happy. We want parks, boulevards, paved streets and a scheme of public buildings that will be a credit to our people. We want perfect water, sewage and garbage systems. We want anything that will make Spokane a better place in which to live, and with these we must implicitly that it will be populated by the right kind of men and women and become as great and strong as the aggregate of its citizenship. We want to combine the beautiful and the practical."

"In connection with these plans we shall also begin a movement to better the condition of the ranchers and other wealth-producers. We believe that if the country tributary to this city with the right kind of farmers, whose lives may be made as comfortable as possible, Spokane will take care of itself."

"The committee to be appointed in a few days will be divided into sub-committees on legislation, physical development, municipal administration, commerce and economics, public buildings and civic art and exploitation, but not be limited to any one improvement or class of improvements. We are more anxious to know where in Spokane is weak than wherein it is strong, so that we may build accordingly."

Applications for Grazing Permits.

NOTICE is hereby given that all applications for permits to graze cattle, horses, sheep and goats within the J. M. E. A. NATIONAL FOREST during the season of 1910 must be filed in my office at Santa Fe, New Mexico, on or before March 10, 1910. Full information in regard to grazing fees to be charged and blank forms to be used in making applications will be furnished upon request. FRANK E. ANDREWS, Supervisor.

ALBUQUERQUE DELEGATION TO ATTEND INAUGURATION.

Learnard and Lindemann Boys' Band Will Head Republican Club in the Parade.

Albuquerque, N. M., Feb. 25.—That Albuquerque will be represented by from 150 to 200 people at the inaugural exercises in Santa Fe next week, is now assured. The Republican Club yesterday concluded arrangements for the attendance of a large delegation of members and the club will also take along the Learnard and Lindemann boys' band to lead the delegation in the parade. The boys who have become expert musicians of late, will add considerably to the inaugural parade and every one will know where they are from for big hat bands are being provided, showing that they represent the Albuquerque Republican Club. In addition to the members of the club about fifty others are expected to attend the inauguration. The band and the greater part of the delegation will go to Santa Fe Monday evening.

FARMERS AND AUTHORITIES TO PROSECUTE GAME HOGS.

Instances Cited Where Pot Hunters Shot Birds Hardly Able to Fly.

Spokane, Wash., Feb. 25.—Farmers and orchardists along the Columbia river in eastern Washington have asked the state game warden and the officers of the Spokane Rod and Gun Club to assist the men discouraging poachers and game hogs during the coming year. In a communication to E. J. Chingren, president of the club, it is reported that much apprehension is manifested by the farmers over the wanton slaughter and illegal shooting of prairie chickens north and west of Wilbur, and they say if this is contained what was once a sportsman's paradise will soon be deserted by the extermination of game birds. They cite instances where pot-hunters shot birds hardly able to fly during last summer, and say that word has come to them that this practice will be resumed the coming summer. A petition is being circulated favoring the appointment of game wardens in every voting precinct in the district.

GOVERNOR MILLS

Will be Inaugurated
MARCH 1st, 1910

For this occasion the SANTA FE will sell tickets from all points in New Mexico, Trinidad and El Paso, to the Capital City at one fare for the round trip.

DATES OF SALE Feb. 27, 28, & Mar. 1st.

GOVERNMENT REGULATION
OF BUSINESS IS HERE.Offer of Washington Dairy Plant to
Aid in Solving the Cause of
High Prices.

Spokane, Wash., Feb. 25.—David Brown, president of the Hazelwood company, operating dairy plants at Spokane, Walla Walla and North Yakima, Wash., Portland, Ore., and Caldwell, Idaho, also more than 100 milk stations between the international boundary to northern California and Montana and Puget Sound, announces that he will press his request to have the federal government delegate a competent investigator to run his business for 90 days to a year to assist in solving the problem of the present high cost of living in the United States. Mr. Brown also gave out this statement:

"Government regulation of business is not coming. In fact, it is already here. Whether we like it or not we shall sooner or later all have to submit to it. All of the people, as represented by the government, will not continue to permit a few, those who control the business industries of the country, to dictate in large measure, or in any measure, the conditions under which we may live, or the prices which they shall pay for the necessities of life. I recognize this condition and am not only ready, but perfectly willing, to submit to it.

"When a private business grows to the size of dominating importance that people compelled to do business with it begin to suspect it is able to dictate the terms upon which that business shall be conducted, it is but natural for the people to begin to look into the methods it employs in conducting its affairs. I do not resent this curiosity. It is the people's business to want to know about how the industries of the country are conducted, and so far as my own business is concerned I am perfectly willing that that curiosity should be gratified.

"In inviting the government to send an agent to take charge of this business I do not expect, of course, that a man will be sent who will look upon it as an opportunity to establish a theory of how business should be conducted. I expect that a competent business man will be sent who can look into it and direct its operation with a view of making the business more useful to the community. What we want to do is to discuss the matter, experiment, if necessary, and work out the best ideas.

"We should begin with the idea that the people must have food. If we are to have food, we must pay such prices for it as will induce those who produce it to continue producing it. I believe we should go a step further than this. I think that we should so regulate our lives and the prices which we pay for food products that those who produce them can live in comfort, have good homes, live according to a high standard and rear families to be good citizens.

Farmers Must Be Paid.

"We must make up our minds to pay the farmer enough for his products that he will be willing to remain on the farm. To do this we will have to pay him enough so that he can live in comfort. Our best citizens come from the farm and we should certainly do nothing as a government or as a trading community which will reduce the supply of these best citizens. "A business which makes money and destroys the home is not a successful business, from the standpoint of the community and should be discouraged by the community. The industry which helps the most men and women and helps them most in their efforts to procure for themselves good homes, to establish for themselves a high standard of living, and to become good citizens, is the best kind of business for a community.

"The government, representing all

the people, should discourage those business and those business practices which militate against good homes and a high standard of citizenship, and should encourage those business and those business practices which make possible good homes and good citizenship.

"We hear a great deal now-a-days about the undesirable citizen. To my mind the undesirable citizen is the citizen who is unable to or who is not permitted to earn enough to enable him to maintain a high standard of living and of citizenship, and to rear his sons and daughters in such a manner that they will be a credit to the community.

"In this experiment, which I have asked the government to undertake, there are several ways in which benefit might result, both to the company and to the community which it serves. We manufacture butter on what is practically a fixed margin, paying the farmer for the butter fat just one half a cent a pound less than we get for the butter. The question will be raised whether we are charging too little or too much, whether we are failing to give the producer or the consumer a square deal, and if not, whether the business could not be managed, with a fair profit, and still do so. Other questions are:

"Are we giving sufficient encouragement to the man who milks and feeds the cows? Are we charging the consumer more than he should be charged for the product? Are we making the best product we can practically make, and is it made under the safest and most modern conditions?"

EUCALYPTUS TREE WILL SOLVE
AFFORESTATION PROBLEM.

San Antonio, Texas, Feb. 25.—Investigation and a number of experiments made in southwest Texas have shown that the Eucalyptus tree, or blue gum, thrives better nowhere. A large plantation in the Rio Grande valley has exceeded all expectations and will result in the afforestation with this tree of large tracts. Both the climate and the soil have been found to be admirably suited to the tree, the semiarid stretches being almost exact duplicates of the interior districts of Australia which are the native habitat of the tree. A company now forming will start a nursery large enough to supply the tremendous number of young trees that will be wanted in the near future. Outside of practical and wild pecans there is practically no large timber in southwest Texas and for this reason the eucalyptus will have a large sphere of usefulness.

MARRIED SIXTY YEARS
AND NEVER NAGGED.

Husband Said if He Had to Do It Over
Again He Would Choose the
Same Girl.

Spokane, Wash., Feb. 25.—Sixty years of married life together without a harsh word is the record claimed by Oliver Ross and his wife, Mrs. Betsy Ross, living at 1603 Broadway avenue, Spokane, where, at a family reunion, Arthur H. Palmer and his wife, Mrs. Hattie Palmer of 2320 Broadway avenue, celebrated the 38th anniversary of their wedding. Palmer also declared that he and his wife have never had a disagreement. The heads of both families are former residents of New York, Ross being born at Penfield in 1824, while Palmer is a native of LeRoy. The former came to Spokane from Brighton, N. Y., in 1884, the Palmers following in 1902. "We have been happy all the time," said Ross, "and if I had to do it all over again I would choose the same girl. We have both worked hard and while not as well-to-do as we were before the panic, 15 years ago, we have sufficient of this world's goods for the rest of our days, which we are passing in wholesome contentment, surrounded by children and friends."

Nature's Gift from the Sunny South

Noah Was the Founder of Indigestion--
He Forgot to Leave the Pigs Ashore

People, in consequence, have ever since been victims of lard-cooked food and indigestion. Lard-soaked food is not fit for human stomachs because lard is made from greasy, indigestible hog fat, and is bound, sooner or later, to make trouble for your inner machinery.

Cottolene is the only rational, national shortening. It is a pure, vegetable product, and its source (the cotton fields of the Sunny South) is in striking contrast to the source of lard—and there is just as much difference in the healthfulness of the two products as in their sources.

Cottolene makes food that any stomach can digest—palatable, nutritious and healthful. If American housewives but knew the superiority of Cottolene over lard, both from a practical and health standpoint, lard would never again enter any well-regulated kitchen.

COTTOLENE is Guaranteed

Your grocer is hereby authorized to refund your money in case you are not pleased, after having given Cottolene a fair test.

Never Sold in Bulk

Cottolene is packed in pails with an air-tight top to keep it clean, fresh and wholesome, and prevent it from catching dust and absorbing disagreeable odors, such as fish, oil, etc.

Made only by THE N. K. FAIRBANK COMPANY

DISCOVERED A CAVE BY
BLASTING LIME ROCK.

Entrance to Underground Chamber
Revealed By Blasts is Fifty Feet
Long and 20 Feet Wide.

Spokane, Wash., Feb. 25.—Nelson J. Tubbs, supervisor of the city engineering department, discovered a cave in a solid rock formation while blasting an excavation for a sewer at Fifteenth avenue and Perry street, here. The entrance to the underground chamber revealed by two blasts, is 50 feet in length, while the main cavern is 30 feet in length from 10 to 20 feet in width and three feet high, with a vaulted ceiling and level floor. The entrance is six feet high and eight feet in width. The formations found in the cave include colored stalactites and other rock of no special value. Local geologists say that the chamber, which is 20 feet below the street surface, probably was caused by an earthquake centuries ago, when what is now the Spokane country was the basin of the Columbia river. The elevation over sea level in that part of the city where the cave was found is nearly 2,000 feet. Caves have been found in various places along the Spokane river, but this is the first encountered on the bluffs in the southern part of town.

SUCCESSFUL OPERATION FOR
GLAUCOMA AT SPOKANE.

Incision Made in the Eyeball to Per-
mit Accumulated Fluids to
Make Their Escape.

Spokane, Wash., Feb. 25.—Mrs. C. F. Uhl, a pioneer resident of Spokane, living at Fifth avenue and Crestline street, has regained her sight following an operation for glaucoma, one of the difficult diseases of the eye with which oculists have to deal. The operation, performed at the Deaconess hospital in this city, consists of raising the eye ball and making an incision to permit the fluids to escape. The disease usually results in total blindness. The first state is a so-called smoky vision caused by hardening eye balls and then periods of blindness, following visions of iridescent light. A sudden shock, and frequently without cause, is followed by blindness. Mrs. Uhl was under hospital treatment less than a week and is now at her home. The operation was the first of its kind performed in this part of the northwest and was successful in every way, in that the woman's sight has been restored and she sees better than at any time during the last 20 years. While giving every credit to the oculist, Mrs. Uhl says her prayer for sight was answered from heaven.

MARRIED PEOPLE UNHAPPY
UNLESS DIVORCED.

New York, Feb. 25.—That energetic and optimistic young wooer, "Sheriff Bob" Chanler was still encouraged over the prospect of winning the hand of Mlle. Lina Cavalleri, despite the fact that the "daily bulletin" on the love affair coming from "the most beautiful singer in the world" was to this ingenious effect:

"Why cannot Mr. Chanler care for me always without marrying me? I do not know that I want to be married; married people are so unhappy unless they get divorced."

SEVENTY YEAR OLD
BARON IS MISSING.

Fortune is Awaiting German Noble-
man Who Left for New York
and Baltimore in 1882.

Spokane, Wash., Feb. 25.—Relatives from Germany, New York and Baltimore, working under the direction of J. M. Londoner of Seattle, assisted by the police of a half dozen states, are searching the Pacific northwest for Baron Herman von Blatz, 70 years of age, who left New York for Spokane two years ago, after traveling extensively in Washington, Idaho, Montana, Colorado and other states between the Pacific coast and the great lakes. The missing man's brother, Baron Adolph von Blatz, who died in Baden Baden a short time ago, left a fortune to Blatz, his wife and daughter. A letter from the latter, Frau-lein Eugenia von Blatz received by the police in Spokane says her father left for America in 1882, passing eight years in New York and Baltimore. He migrated to the Coeur d'Alene mining district in northern Idaho early in the '90s, but failed to wrest a fortune from the hills. He returned to New York by easy stages and two years ago wrote to his family that he intended returning to Spokane. He has not been heard from by his relatives since that time.

WILL BRING OVER
3,000 IRISH FAMILIES.

They Will Be Colonized on a Tract of
30,000 Acres Reclaimed in State
of Washington.

Spokane, Wash., Feb. 25.—Stephen W. O'Brien, a mining man of Spokane, who is backed by a syndicate of local capitalists in a project to irrigate 30,000 acres of fruit and vegetable lands near Northport, Wash., 90 miles north of here, has gone to Ireland to organize a colony of 3,000 families to make their homes along the Columbia and Kettle rivers in Stevens and Ferry counties. O'Brien has filed on numerous water rights on the two streams between the international boundary and Northport, and engineers now on the ground making the preliminary surveys for the canals and laterals say he has control of sufficient water to supply moisture to more than 60,000 acres of land. It is reported here that it is planned to have the Irish immigrants work the land on shares until they are familiar with modern tillage, when they will be permitted to buy the acreage at actual cost. A trained horticulturist will teach them the principles of irrigation.

GRANDPA OF RICHEST BABY
TO REGAIN HEALTH.

San Antonio, Texas, Feb. 25.—For the purpose of recuperating from a severe attack of pneumonia Thomas F. Walsh of Colorado, has made arrangements for a stay in this city until June. He is accompanied by a full staff of physicians and trained nurses.

Mr. Walsh is perhaps best known as the financial agent of the late King Leopold of Belgium and as the grandfather of the richest baby in the United States, the child of John R. McLean, Jr., publisher of the Cincinnati Enquirer. He is a self-made man, having until his discovery of the Camp Bird mine near Ouray, Colo., been a pick and shovel miner.

IMMENSE PROFITS IN
PLACER GOLD FIELDS.

More Than \$100,000 Cleared Last Season in One of the Lesser Dis-
tricts of Idaho.

Spokane, Wash., Feb. 25.—Miners with a full equipment of dredges, hydraulic giants and other apparatus are making preparations to work over the placer ground in the Pierce City district in northern Idaho, where, according to I. D. Cleek, an operator, who has come to Spokane from that camp, more than \$100,000 in gold was cleaned up by one boat, two hydraulic plants and several smaller operations during the season of 1909. Cleek said it is estimated that the output of yellow metal will be doubled if not trebled the coming season, beginning early in May, adding:

"Many of the operations last season were in ground that had twice responded to the efforts of the early miners. Pierce and his associates found wealth in the dirt in 1859 and the succeeding year and after they left the ground was successfully worked by Chinese miners, most of whom returned as rich men to China.

"One of the companies to begin operation in the Pierce camp this year has 180 acres of creek bottom land, and engineers say there is not less than eight feet of wash between the gross roots and bedrock. The concern has equipment to handle 500 cubic yards of earth every 24 hours. The cost of recovery should not exceed eight cents a yard this year, while the yield of gold ranges from 10 to 15 cents, so there will be a handsome profit.

"The area of the Pierce district is about 20 miles square, so there is room for hundreds of operators. The district is one of the richest in the state of Idaho, which is noted for its mineral wealth, and we believe that the best finds are yet to be made. The Pierce camp is orderly and the men are well behaved.

HAS ASHES SCATTERED
OVER MILTA'S RUINS.

Chicago Man Who Conducted Tours
Through Mexico Made Queer
Choice of Resting Place.

San Antonio, Texas, Feb. 25.—With the ashes of her husband, encoined in an urn, Mrs. Reau Campbell of Chicago passed through this city en route to the ruins of Mitla, where, according to the will of deceased she will scatter them among the remains of that high seat of Aztec worship. Mr. Campbell conducted for many years tours through Mexico and came to love that country with a genuine affection. The ruins of Mitla were his favorite spot. He knew every part of them and was well versed with their archaeological character.

About a year ago Mr. Campbell was married and spent his honeymoon showing his bride over the ruins. During the trip he contracted the disease that was to make his wish an earlier fact than he had perhaps anticipated.

AUSTRALIA WILL SEND
DRY FARMING EXHIBIT.

Spokane, Wash., Feb. 25.—John T. Burns, secretary-treasurer of the fifth Dry Farming Congress, which will meet in Spokane the first week in Oc-

WANTS

JOHN K. STAUFFER, K. R. S.

tober, has received official advice from Senator James H. McCall, vice president of the congress from Australia, that an exhibit of farm and orchard products will be sent to this city by the government of Australia to compete for trophies and premiums at the dry farming exposition. Mr. McCall writes that he has secured the support of the federal department of agriculture for a collection of the various state exhibits into one consignment, which will be forwarded in bond to Spokane and installed by a representative of the government. The several state governments have taken up the matter of a more extensive practice of dry farming in Australia and good results are looked for. Mr. Burns announces there will be \$5,000 in prizes for displays.

UNCLE SAM IS KEEPING
HIS EYE ON PAULHAN.

San Antonio, Feb. 25.—Acting under instructions from the war department, Lieut. Benjamin D. Foulis, U. S. Signal Corps, and two secret service men, watched the flights of Louis Paulhan, the French aviator with a view of detecting infringements upon patents granted on aeroplane appliances by the United States government. It is understood that the parts especially scrutinized were the motor and counterbalances used by Paulhan. Whether these parts were included in the injunction secured by the Wright brothers is not known, but the impression is that they were not for the reason that Paulhan has appealed the injunction and that therefore the case for the time being is inactive. What the result of the observation is could not be learned.

The New Mexican Printing Company has on hand a large supply of pads and tablets suitable for school work, the desk, and also for lawyers and merchants; good everywhere. We will sell them at 5 cents in book form.

MOTHERS

(Continued From Page Two.)

Real Estate Transfer—Attorney A. B. Renahan has acquired the Narciso Mondragon property on east Palace avenue.

Inaugural Committee—The inaugural executive committee will meet tomorrow afternoon at four o'clock at the office of Mayor Jose D. Sena at the Capitol.

Packing His Law Books—Chief Justice William J. Mills is having packed his large library of law books, preparatory to his removal to Santa Fe. Las Vegas Optic.

Street Railway Tied Up Fifteen Hours—The electric street railway of Albuquerque was yesterday tied up fifteen hours by a break-down of the machinery at the power plant.

Negroes Organize Political Club—The colored people of Albuquerque have organized a political club. T. O. Mason was elected president; J. B. Lott, secretary, and B. Fancett, treasurer.

Astonishes the Natives—Santa Fe trains Nos. 3 from the east and 10 from the south and west arrived on time at the Santa Fe depot today, much to the astonishment of all old timers.

Proclamation by Mayor—Mayor Jose D. Sena this afternoon issued a proclamation asking business men and other property owners to decorate their business places and homes for inauguration day, March 1.

D. S. Lowitzki is Happy—There are many happy merchants in the city, but D. S. Lowitzki is said to be the happiest today. All because of the arrival of a boy in the Lowitzki family. Both mother and boy are doing well.

Ely President of Chamber of Commerce—The business men of Deming, more than one hundred in number, have organized a chamber of commerce and have elected Attorney Ralph C. Ely as president; County Clerk Lee O. Lester, treasurer, and Roy Bedlicheck, secretary.

Charged With Stealing Horses—Sheriff Dufur returned to Aztec from Largo canyon where he had been after Fred Moss, bringing him to Blanco before J. P. Pruesse. He was put under \$1,000 bond. H. P. Shultz and J. Lujan going on his bond. Moss was charged with taking horses belonging to some Indians. Mr. Moss claims he got the horses from a Mr. Weather.

Where Common Sense is Lacking—So voluminous a report was made by a congressional committee upon a new gun that the President pathetically said: "I should want a new lease of life to read this through. Why can't an investigating committee show a grain of common sense. If I send a man to buy a horse for me I expect him to tell me that horse's points—

no how many hairs he has in his tail."

Fair Tonight and Tomorrow—Despite the threatening sky this forenoon, the U. S. weather bureau today predicted generally fair weather for tonight and tomorrow. Yesterday the maximum temperature in the shade was 56 degrees, in the sun 84 degrees. The minimum last night, was 39 degrees and the relative humidity at 6 o'clock last evening was only 29 per cent. A year ago today the maximum temperature was 49 degrees and the minimum 18 degrees. It was a clear, pleasant day with a sunshine percentage of 100.

Belen Man Sues for \$60,000—Ward B. Beatty has filed suit for \$60,000 damages against the Santa Fe Railway Company in the 34th district court at El Paso. The plaintiff sets forth that he is a resident of Belen, N. M., and on November 25, 1909, was employed by the defendant company as foreman of the coal chute at Belen. While attempting to arise from the coal pit he placed his hands on the rails and they were run over by a coal car, both hands being so badly damaged that amputation was necessary.

Many Women in Funeral Cortege—The spectacle of scores of women, wearing black mantillas around their heads bent in prayer was witnessed this morning when the funeral of Isabella Rivera took place from the Cathedral. The funeral cortege was a long one, the women being members of the Sodality of the Blessed Virgin Mary, of which Miss Rivera was a member. Many men also walked in the funeral procession. Interment was made in Rosario cemetery. The Wagner Undertaking Establishment had charge of the funeral arrangements.

Turley Ditch Project—"E. E. Meier, C. E., of the Henry A. Allen Engineering Company, of Chicago, came in Thursday of last week and left Monday of this week. He has been out with Jay Turley looking over the Turley ditch project south of the San Juan river. His mission here, we understand, was to acquire knowledge sufficient so that his company can report to the Capital Security Company, the Hollister interests who have taken over this project, the proper amount for the bond issue for the construction work on this project, which is a good one."—San Juan County Democrat.

Injunction Against Coal Company—Judge Ira A. Abbott of the Second New Mexico district court has granted a temporary injunction against the Rocky Cliff Coal Mining Company of Gallup upon application of the Victor-American Fuel Company, with headquarters in Denver. The defendant company is restrained from further operations in its mines at Gallup, McKinley county, pending the hearing on the petition to make the injunction permanent, and to require an accounting from the Rocky Cliff company for coal alleged to have been taken from

workings said to encroach on the property of the Colorado corporation. The coal land holdings of the two companies at Gallup adjoin, and it is alleged that the Rocky Cliff company, by means of underground workings, has removed thousands of tons of coal from the plaintiffs' property. Hearing on the permanent injunction will take place at Albuquerque March 3.

THREW BOOKS AWAY; GOT HALF HOLIDAY.

Twelve Pupils Play "High Jinks" in School Room—Are Sent Home By Superintendent.

"The children are throwing their books out of the window!"

This was the news brought to Superintendent of Schools J. A. Wood by one of the teachers in the public schools this morning. Professor Wood hurried to the room where all was quiet. If the youngsters had been disorderly the appearance of the superintendent had had the effect of a sedative. "Will the pupils who threw their books out of the window a few moments ago please go out and get them," said Prof. Wood. Then he added: "And by the way, they need not return to school this afternoon."

And twelve youngsters then left the school room, picked up their books and went home. They spent the afternoon as a holiday unless their parents interfered with their amusements at home.

Superintendent Wood stated that the "battle of the books" was a prank or practical joke a dozen of the pupils had put up on a teacher who was replacing one of the teachers who is away on a short leave of absence.

MILLINERY DEPARTMENT TO BE ADDED BY SALMON.

Mrs. Welvart of Albuquerque Will Conduct It—Opening on March 1, 2, and 3.

Mrs. Jeanette Welvart of Albuquerque, and who has conducted for some time a millinery establishment in the Duke City has made arrangements with Nathan Salmon, the well known merchant of this city to open a millinery establishment in Mr. Salmon's store. The opening of the new department is to be March 1st, 2nd and 3d, when there will be a big display of everything in the hat line especially Fisk and Gage make hats.

"The object of bringing this department to my store," said Mr. Salmon today, "is to fill a long felt want. We have of course many lady customers and we have found that it is necessary to supply them in the hat line as well as in others. I know Mrs. Welvart to be a first class milliner and I am sure she is going to give satisfaction."

HE COULDN'T KEEP AWAY FROM BEAUTIFUL SANTA FE.

M. W. Travis, Oklahoma Merchant, Visited Here Some Months Ago—Will Open Store Here.

"I came to Santa Fe some months ago as a tourist—I liked the city so much I come here now as a merchant to stay."

Succinctly put, this is the story of how M. W. Travis, a merchant of Oklahoma, has "left his happy home" in that state and thrown his lot in with New Mexico—soon to be a state.

Mr. Travis has taken the store room at the corner of Washington and Palace avenues in the Catron block and will open a dry goods store.

"This is unquestionably a delightful spot to live in," said Mr. Travis this morning, "and one does not fully realize it until he gets away from Santa Fe. Just look at that sunshine now and then think of the blizzards of the east. And compare this pure air with the sooty stuff one breathes in a large city. Even Oklahoma with its freedom and climate cannot compare with Santa Fe and I am here I hope to stay."

CHILDREN OF DRUNKARDS ARE OFTEN LUNATICS.

Texas to Establish an Asylum for Inebriates and a System of Medical Inspection for Schools.

San Antonio, Texas, Feb. 25.—If the Texas County Medical Society succeeds in having the Austin legislature pass sundry bills it has drafted and advocated publicly, the population of the Lone Star state will within a generation or two consist of only high-browed individuals that will look like an array of statuary of the best period of Hellenic art. One of the bills is designed to do away with all ill health and physical defects due to heredity. Some time ago an investigation into the status and history of a number of insane confined in state institutions revealed ample proof of Dr. G. H. Moody's contention. In practically all cases one or both parents of lunatics had been confirmed drunkards. Among other cases there was one of a woman whose father had been a heavy alcoholic and who was being admitted to the asylum regularly once a year for treatment of recurrent mania. It was shown that she was the mother of ten children, two of which had been married to drunkards while two others were practically imbeciles. Among other measures to be fostered by the association are the establishment of a state asylum for drunkards and the criminal insane, the creation of a state lunacy commission and the employment by the public schools of male and female physicians who are to watch over the health of the children. The society will also take steps towards the creation of a national board of health.

THE BIG STORE

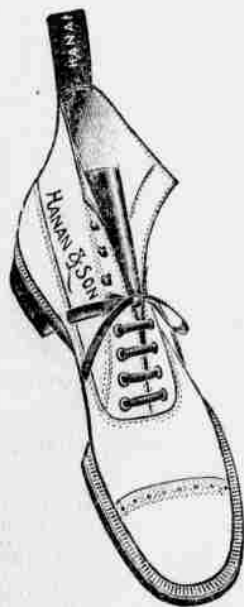

MEN'S SHOES

Perhaps you had better stops and try on your new Spring Shoes
