STATE OF NEW MEXICO,
COUNTY OF EDDY.
Office of Treasurer and Collector.

To the delinquent taxpayers whose names appear in the foregoing list and to the unknown owners of property appearing as described therein:

Take notice, that the undersigned Treasurer and ex-Office Collector of taxes in and for the County of Eddy, State of New Mexico, after the expiration of thirty days from and after the last publication of this notice, to-wit: On the 3rd Tuesday in February being the 25th day of February, A. D. 1913, beginning at the hour of ten o'clock a. m. of said day will offer for sale at public auction in front of the County Court House door, in the Town of Carlsbad in said County and Territory, the real estate and personal property described in said notice for the amount of taxes, penalties and costs due thereon as set out in said notice.

This notice is given and said property will be sold in accordance with the provisions of Chapter 22 of the Acts of the Legislative Assembly of the State of New Mexico, for the year 1899, approved March 1st, 1899 and other Acts of the State of New Mexico, which may have been amended by subsequent Acts of the Legislature of the State of New Mexico, to-wit: Chapter 22, A. D. 1912.

W. H. MERCHANT,
Treasurer and ex-Office Collector of Eddy County, New Mexico.

MANURE FROM THE STREETS

Oil Must Be Extracted to Make Equal to Stable Product.

The department of agriculture receives from truckers and gardeners many requests in regard to the use of street sweepings as fertilizer. Collections from sweepings consist chiefly of animal manures, trash and small particles of paving material. At the present time, when the use of power vehicles is so extensive, they also contain a percentage of oil matter.

Experiments were made to test the effects of the sweepings on crops. Good stable manure was also used in order that a comparison might be made. In almost every case the sweepings proved to be beneficial. The effect of the stable manure, however, was much greater.

It was thought that the oil contained in the sweepings might affect their fertilizing properties. In order to study this point the oil was extracted and its effect on plant growth was tested. In every case it proved harmful. The sweepings from which it had been extracted were next tested. In this case growth was about equal to that obtained by the stable manure. In other words, street sweepings from which the oil has been extracted are practically equal to stable manure in fertilizing value. If some method could be discovered whereby the oil could be economically extracted street sweepings, on account of their comparatively low cost, should constitute a valuable source of fertilizer to the trucker and farmer.—Country Gentleman

Time to Change.

Inspector James L. Hughes of the Toronto board of education was illustrating the differences in child minds at a lecture before the City club of Chicago. "I have a little girl whose tastes are strongly mathematical, while her brother has no gift for numbers. He will manage to think quite clearly. My daughter was speculating on the degrees of relationship of her two half sisters, Jane and Helen, and on other possible combinations in fractional sisterhood and brotherhood. 'Papa,' she asked, 'if mother were to die and you were to marry again and have some more children, what kin would they be to Jane and Helen? Would they be half sisters too?' I had not replied when my small son volunteered an answer after his own kind. 'I think,' he said, 'if anybody's going to die, it's papa's turn this time.'—Everybody's Magazine.

Wanted—An Optimist.

A Fifth avenue man had been trying to dig up some literary work for a literary friend, and he finally found a publisher who talked favorably. "Yes," said the publisher, "I can give your friend literary work."

"Thank you! He's a good man."

"But hold on! Is he an optimist or a pessimist?"

"What difference does that make?"

"Makes a deal of difference. I can't give a pessimist. I want a man to edit my seed catalogue."

Cash Basis.

"Does your daughter play by notes?"

"No, we pay cash for all of her expenses."—Sattire

NEW TALES THAT ARE TOLD

When Melba's Music Won.

CUSTOMS OFFICIAL HAD KEEN INSIGHT.

Classified Golf Clubs as Agricultural Implements.

"One of the first men I ever played golf with was Cleveland Dodge," said Woodrow Wilson just before he sailed for Bermuda. "Neither Mr. Dodge nor myself had more than a theoretical knowledge of the game, and our first performances were unique."

"The trouble is," said Dodge, "that we haven't the right sort of clubs. I'll import some."

"So he sent to Scotland and got an invoice of the finest golf clubs that money could buy. There was an instrument for every possible golfing contingency. When they reached the custom house the officials did not know how to classify them. They knew almost as little about golf as Dodge and myself, and there had been no provision made in the law for an import duty on golf clubs. Finally they levied on them as agricultural implements."

"That," said Dodge, "is a deliberate insult."

"The next day he went on the links with his new clubs. When he returned that night he had changed his mind. 'Those customs officers knew more about the game I play than I did,' said he."—Cincinnati Times-Star.

POULTRY NOTES

CORRESPONDENCE SOLICITED

CANKER AMONG TURKEYS.

It's not often the big thirty pound gobblers with the red funnel crests gets the snuffles and the sore throat. He swings up there in the tip top and seems to enjoy the wintry wind. He shoves his bald head under his thick coat and sleeps as sound as a fellow in a feather bed. But it's the young stock, especially those hatched late, where you find

Photo by C. M. Barnitz.

CANKER IN ROOF OF TURKEY'S MOUTH.

Your winter patients, and these at times get those white spots in the mouth and throat, and such canker patches aren't so easy to treat, as turkeys are so nervous and strong.

You can generally tell the victims by their manner of eating, and we have seen them with such a bunch of the cheesy matter in their mouths that they couldn't eat at all.

Canker sometimes forms in the opening of the windpipes. The turkey gasps for breath, and an examination shows the white plug with a little hole in the center, through which it breathes.

At times the mouth roof cleft is filled. Thus the fowl cannot breathe through its nostrils, and it stands with mouth open.

Canker is contagious and is found where are drafts, damp, foul air and

Photo by C. M. Barnitz.

TURKEY'S LOWER JAW NORMAL.

With it is easily spread when fowl eat from the same trough and drink from the same vessel.

All poultry is subject to it, and we have found the ordinary yellow canker not difficult to cure unless complicated with other disease. The patient should be penned in a comfortable place and the canker patches be gently removed and the raw surface receive frequent applications of peroxide of hydrogen, and moist milk mash should be fed.

The wise turkey raiser has a comfortable, well ventilated shed, where he drives his flock to roost in severe winter weather, and this only shows his practical sense, for the wild turkey does not sleep on trees in the open, but seeks the deepest woods, where the wind cannot strike it.

DON'TS.

Don't store high priced feed in a bug house granary.

Don't sell all your best turkeys and keep the inferior for breeding.

TIMELY FOR FARMERS

Secret of Winter Eggs.

Make your henhouse warm and cheerful, just as nearly like spring as you can, and the hens will not stop laying when cold weather comes. Comfortable quarters, says W. A. Lippincott, professor of poultry husbandry at the Kansas Agricultural college, is the secret of getting winter eggs. The house should be tight on three sides and open on the south, so as to give good ventilation and plenty of sunlight and also prevent drafts.

Feed the fowls plenty of green food, such as beets, sprouted oats, cabbage and steamed alfalfa. They should also have meat food or skim milk to take the place of the insects and worms which they get in the summer and to balance the corn ration.

Provide a dust bath or wallow in a sunny spot. Keep the birds active by making them scratch for their food in straw or similar material and they will not mind the cold so much. This is important. A hen that doesn't have to work to get its food will likely get fat, and a fat hen doesn't lay eggs.

Farm Cheese-making.

On a great many farms for various reasons butter is made instead of selling the cream. On many such farms greater profit and satisfaction would result from making the milk into cheese. Small cheese outfits are obtainable just as is equipment for making butter. At most times of the year the cheese would be more easily and more profitably sold than butter. It is entirely practical to make cheese in a small way on the farm.—Kansas Farmer.

Deep Plowing Pays.

Few farmers plow deep enough. Deep plowing increases the depth of the seed bed and consequently the feeding area of roots. Increasing the depth of plowing can be done more satisfactorily in the fall than in the spring. The subsoil that is turned up in the fall will be incorporated with the surface soil by the process of freezing and thawing, which are excellent agents in pulverizing the soil.

The Head of the Herd.

The most expensive bull or boar a man can buy is a "cheap" one that costs little. There is no herd head that is too good to use.

BURNING STRAW A SERIOUS WASTE.

Valuable as Bedding, Feed and Fertilizer.

Straw is too valuable to burn, says the Kansas Industrialist. The total value of the fertilizing constituents of a ton of straw is \$2.25. When a ton of straw is burned the nitrogen lost is worth \$1.44. The phosphorus and potassium remain in the ash.

The best way to utilize straw is to use it as bedding. It will absorb the liquid, which contains most of the nitrogen excreted from the animal body. Some farmers will say that they have more straw than they can use to advantage for bedding. Never be afraid to use plenty of bedding, as domestic animals enjoy dry sleeping quarters and will thrive better if they have them. Then haul out the manure. By this method you not only get the full fertilizing value of the straw and the manure, but you also add a large amount of humus to the soil.

Some straw may be used for feed. Stock cattle will consume large amounts of bright straw, especially oat straw. Mature horses doing little or no work in the winter may be kept in good condition by feeding a ration of grain, oats, straw and a little hay.

Preparing Wheat Land.

For wheat a firmly compacted seed bed, with two or three inches of loose soil on the surface, is better than extremely mellow soil. This is because our wheat is sown in a usually dry period, when moisture must be retained to the greatest extent possible. It is advisable to plow for wheat as early as possible and then give constant cultivation to fine and firm the soil as well as to destroy the weeds and insects.

Water in Butter.

Under average farm conditions the amount of overrun made by a dairy buttermaker is about 16 per cent. The farm butter maker rarely considers the moisture incorporated in the butter and when working butter in the churn or in a bowl in the presence of water may exceed the legal limit of 16 per cent, which the creamery is compelled to obey.—Professor H. C. Mills, Indiana.

Discard Poor Poultry.

If there are good reasons for reducing poultry stock the following is recommended: Reduce by discarding all inferior, unthrifty and aged specimens. Dispose of surplus male birds. These eat food and give no return. They also occupy space which should be occupied by profit making pullets. Keep one breed and sterilize.

THIRTY-EIGHT MEN ARE CONVICTED

Celebrated Dynamiting Trial at Indianapolis Ends.

FRANK RYAN ONE OF THEM

Out of Forty Indicted but Couple Are Acquitted. Forty Seven Violations of Law Number of Accusations Made.

As the result of the trial at Indianapolis of forty officials of the International Association of Bridge and Structural Iron Workers, all but two were adjudged guilty. Among those convicted were President Ryan, Vice President Butler and former Secretary Hookins.

All were charged with complicity in the McNamara dynamite plots, which included the wrecking of the Times building at Los Angeles.

President Ryan with some others

FRANK M. RYAN.

was accused of using the union funds to destroy the property of contractors who refused to recognize the union.

After the verdict was announced the Federal courtroom scenes were quite pathetic. Wife of one convicted man collapsed.

Conviction of O. V. Tweitmoore and E. A. Clancy of San Francisco and also J. E. Munsey of Salt Lake City sustained the government's charge that they aided the plot of Los Angeles explosion, causing twenty-one fatalities, and assisted in the escape of J. R. McNamara in his flight from the scene of that crime. Verdict also sustained the charge that the McNamaras were aided by nearly all the union's executive officers, and that they knowingly carried on the conspiracy for years by causing explosives to be transported on passenger trains.

ties, and assisted in the escape of J. R. McNamara in his flight from the scene of that crime. Verdict also sustained the charge that the McNamaras were aided by nearly all the union's executive officers, and that they knowingly carried on the conspiracy for years by causing explosives to be transported on passenger trains.

FUTURE BRIDE SHIPPED Valued Article of "Freight" Item of Inventory.

The most valuable "freight" ever reaching Galveston arrived on British ship Indore from Liverpool in the person of Miss May Simpson, bride-to-be of Arthur Morton chief electrician of the United States reclamation service, now stationed at Elephant Buttes, N. M. She came "consigned" to W. W. Peters, membership secretary of the Galveston Young Men's Christian Association.

The "bill of lading" arrived a few days before. Mr. Peters secured the services of a number of young society women to assist him in receiving the "consignment" and seeing that she was forwarded to her destination.

The romance began in England several years ago during a visit of Mr. Morton to that country. He was unable to get leave of absence to go to England for the wedding so the lady decided to come to this country and have the ceremony take place at her future home in New Mexico.

WILSON VISITS BIRTH CITY Celebrates Fifty-Sixth Anniversary at Staunton, Va.

Governor Woodrow Wilson Saturday celebrated his fifty-sixth birthday at Staunton, Va., his native city. He was enthusiastically received. At night he delivered an address in the Presbyterian church, in which he was baptized.

Great pleasure was expressed by the president elect when Frank T. Ware, who was shot through the crowd and caught the governor's hand. The aged negro "toted" the next president around the streets of Staunton over half a century ago. "Uncle Frank" Ware was invited to stand in the reception room with the "important" citizens.

Slain on Square.
Milton Ware, a young negro man, was shot through the left lung on the public square at Waco soon dying. Tommy Lewis, his cousin, was jailed on murder charge.

SHOOT AND SUICIDES

Does a Man From Cleveland at Island City.

WOMAN SERIOUSLY HURT

A. M. Funk Name of the Party Doing the Bloody Work, and His Reason is a Question That Cannot Be Answered.

A. M. Funk of Cleveland, O., who had been in Galveston for something near two weeks, shot and wounded his wife seriously in their room at a hotel in that city and then shot himself to death. Four shots were fired, running screaming from the room, the boy of the couple, ten years old, gave the alarm. Mrs. Funk was taken to the John Sealy hospital. Funk, who shot himself in the head, instantly expired.

Funk had registered under name of Fankle, but a letter to Dr. C. H. Dunlap of Brooklyn, brother of his wife, revealed his real name. In this letter, written by Funk, it appears that the man had been in poor health for some time and expressed fears for future.

At the hospital it developed that the woman had been shot in the back of the head and through a hand. She has several wounds on top of the head and this indicates that she was struck before the shots were fired.

No injuries were sustained by the little boy.

KILLED BY KNIFE

Is a Negro at Dallas, Another Under Arrest.

After having been knocked down, kicked and beaten at Dallas by Henry Johnson over some trunk checks at the union depot, Will Myers, both of them negroes, drew a pocketknife and stabbed his assailant to death.

Both men were express drivers and their rigs were stationed near the baggage room at the depot when trouble arose. Johnson accused Myers of taking a baggage hauling contract which did not belong to him and at once knocked the other man, aged sixty years, down. Later arose and drawing a pocketknife grappled with his opponent and stabbed him twice in the right side, the blade penetrating a lung and severing an artery. Before he could be placed in an ambulance

the wounded man bled to death. Myers was arrested and a charge of murder docketed against him.

LUCKY TRULY LUCKY.

In the Nick of Time Innocent Man Escapes Prison.

Benjamin Luckey of Birmingham, Ala., a circus employee, justified his name when he was about to be sentenced at Boston to prison after a conviction for alleged manslaughter. It was found that another man owed up to the crime and Luckey was set free at once.

When a circus was at Boston last June there was a clash between the paraders and several boys. One of the latter was killed. Luckey was put under arrest, tried and convicted.

When he came up for sentence his counsel produced a confession from James Gaughan, an inmate of the state reformatory. His confession was accepted by the district attorney and the case against Luckey dismissed.

Woman Killed

Myrtle Smith, the proprietress of a rooming house at Houston, was found dead in bed with her head frightfully crushed. She was disrobed. A bloody hammer lying on the floor indicated the weapon of death. Door to her room was locked and the key was on the outside. Females of the place could shed no light on the matter. But little is known of the woman at Houston.

Loose Diamonds

Miss Lucy Hoke Smith, daughter of United States Senator Hoke Smith of Georgia, requested the Washington police to make a search for a \$5,000 diamond brooch which she lost at a navy yard ball. Miss Smith told the police she distinctly remembered having lost it on her gown at the ball and so city people are assisting in ferreting out the present possessor of the valuable gem.

Own Gas Plant

J. M. Daniels, living eight miles northeast of El Paso, Tex., found gas in a well at a depth of 145 feet several years ago. Now he has ceased off the water and procuring fixtures is using gas for cooking, lighting and heating. This is one of three gas wells of shallow depth near El Paso.

Fatal Liquor Drinking

Rafael Jackson, a negro boy, five years old, got hold of a jug of whiskey at the family home in Houston and drank a quart of it. In a short time the boy was taken violently ill, dead quickly resulting.

Crushed to Death

Plunged under a Cotton Belt rail-way engine which turned over Merchison, ex. Fireman Sam Russ of Tyler lost his life. Engineer Jewell Abston was badly burned on the face.

TEXAS TOLD TALES

A Southern Pacific train was wrecked at Alexander, Switch, thirteen miles east of Beaumont. The train was three hours late and was at the time running forty-five miles per hour. Engine left the rails and for about 200 yards and toppled over into the ditch. Five cars either rolled to the ditch or turned over on the track. Six cars did not turn over and the Pullmans remained on the track. Fireman Ed Firth was caught under the engine as it rolled into the ditch and was burned about the head and chest. No one else was injured.

Hiram Glass, counsel for the Philadelphia capitalists who have an option on the state iron furnace at Rusk, announced at Austin that the option would be taken up and that the capitalists intend to operate the plant. A check for \$1,666.66, option earnest money, was placed in the hands of the governor in payment for the option.

Felix Doran, long a resident of Dallas and many years engaged in meat packing business, is dead, aged fifty-five years. He was formerly a street city commissioner. A widow, seven children, four brothers and four sisters are left.

Clyde Smith, a city fireman of Houston, was stabbed to death. About a couple of hours afterward Ernest Eekman, a tinner, was arrested.

From his grove, ten miles north of Sweetwater, D. S. Wells has marketed over 4700 worth of pecans.

A burglar in escaping from the residence of Mrs. J. C. Moore at Odessa struck the lady, who was alone with a couple of children, a terrific blow, knocking her unconscious. She lay thus two hours.

From the office of the American Express company at Gainesville about twenty-four quarts of whiskey was taken. Entrance was effected by sawing through a bar holding the door.

Walter E. Sherrard, a chauffeur of Galveston, was shot to death. Bray Lyons, a restaurant cook, was placed under arrest. Sherrard, who was aged thirty-three years, leaves a widow, his mother and two sisters. He was an Odd Fellow, a Pythian and a Woodman, and had a good reputation.

Bethel Patten, eight years old, was accidentally shot through the head and killed in a church at Austin at a Christmas tree festival. The weapon was in the hands of a brother thirteen years old and was a small shotgun. He was hit below an ear.

\$700.00 REWARD

About a quart of strychnine was poured into the lead pipe at my walls in San Simon range which was detected by my herder in time to save all but a few sheep that were poisoned by drinking the water. I will pay the above reward (\$700.00) for evidence that will convict the perpetrator of the outrage.
2-Jan-10 E. W. ALSTON.

FOR SALE

"Snow White" Orpingtons.
As I need the room for my breeding pens I am offering extra large, early hatched cockerels, also a limited number of pullets cheap.

I took first and third cockerel, first and second pullet and first pen at Roswell last November.

EGGS FOR HATCHING: First and second pens \$5.00 per 15, third pen \$3.00 per 15.

GUY A. REED,
Carlsbad, New Mexico.

The reported marriage of Marie Gonzales and Antonio Peleas, proved without foundation of fact, the senorita wishing it contradicted.

Marie Gonzales desires to thank her many friends among the Americans for the many Christmas presents received which she highly appreciates.

FOR SALE

One gentle eight year old horse; one Jersey cow; buggy, and single harness; two sets good team harness; one disc cultivator with shovel attachments; one breaking plow and many other farm tools. See me at once.

V. C. HARLAN.

LOST—A ladies necklace, somewhere in Carlsbad—short chain, containing twelve pearls. Return to Club Stable and receive suitable reward.

CARD OF THANKS

I wish to thank the Carlsbad Fire Department and other citizens for the prompt and faithful work performed in saving my property Wednesday night. I wish also, to express my appreciation for the excellent service rendered by the Public Utilities Company in furnishing abundant water pressure.

R. OHNEM.
