NUMBER 70

## Gigantic French War Exhibit to Tour State

Exhibited in Albuquerque Today

There is now being assembled at Waco, Texas, several car loads of every conceivable kind of fighting apparatus that is used on the battle fields of Europe, in the submarine warfare, and in the sky. The exhibit is the property of the French Government and is in charge of Mr. H. B. Coles, representative of the French High Commission. Mr. Coles is being aided in the arranging of the trophies by Mr. M. L. Fuller, special representative of the Missouri Pacific R. R.

This priceless collection will, when ready, be transferred to the American Government, and in turn into the care of the officials of the Eleventh Federal Reserve District.

Arrangements have been completed to divide the exhibit into two trains of five cars each, each train being composed of two flat cars, two baggage cars, and sleeper. The routing and transportation of the trains over the territory comprising this Federal Reserve District, is in the hands of Mr. O. W. Campbell, assistant to chief operating officer of the M. K. & T. Ry. The itinerary will allow for the inspection of the exhibit by the largest number of people possible in the various sections of the District. Two to three hour stops will be made at cities and towns en route. Each train will have a lecturer to explain in detail the history of the relics, and American soldiers will act as a Guard of Honor. The trains will start on this pilgrimage on the morning of April 6th, the opening day for the Third Liberty Loan drive. To attempt to describe in detail the history of this collection would be to tell the full story of the war. Nothing like it has ever been seen in America.

There is shown the type of torpedo that sank the Lusitania, airplanes, parts of Zeppelins, and every description of rifle and cannon that is being utilized.

They look—the airplanes and the 75's, the mitrailleuses and the trench mortars, and the caissons and the big gun carriages with the barrels shot away—as if they had been through every known kind of warfare.

The big French 75 millimeter cannon, a part of this exhibit, was damaged at the battle of the Yser. It shoots 23 times per minute, and without rest, an automatic cooling process making this possible. This immense gun is so perfectly balanced that one man can move it around. The range is four miles. The barrel is perforated with machine gun holes, made in close quarter fighting.

These are the guns that helped save Paris at the Marne, when the Germans were within fifteen miles of the capital.

A captured German airplane of the "Albatross" type, with a speed of 125 miles per hour is shown. When brought down, the two occupants, both officers, were dead; one of them wore the "Iron Cross" of bravery, and the machine itself, evidently for previous meritorious service, was designated with the same insignia.

There is a large German mortar of the "Minniewerfer" type, which was captured at the Marne by General Joffre's men. This piece is used to break down heavy defenses, and wherever it hits, everything is annihilated within a radius of several hundred yards.

You will see one of the French 400 millimeter guns that shoots a 16 inch shell and carries 24 miles, and is effective at 20 miles.

There is a collection of German 12 inch shells, captured at the Battle of Ais.

A notable relic is a Zeppelin bomb weighing 175 lbs. Each Zeppelin crew consists of 14 men, 2 machine guns, and 14 tons of projectiles.

There are liquid bombs for incendiary purposes. A defective German shell that burst out at the side, probably killing the nearest Boche—a French machine gun that shoots 550 shots per minute, the cartridges being fed on steel clips containing 26 cartridges each—a German trench mortar captured at Soissons—French catapults, a medieval style brought up to date, which throw grenades with immense force.

A peculiarly interesting piece is the gun carriage of one of the giant 120 millimeter French siege guns. This particular gun carriage was recently recognized by a French Officer visiting Waco, who declared his promotion was gained in an action around this gun. He shed tears of emotion when he satisfied himself of the gun's identity.

For trench war-fare, gun rests with periscopes are shown, so that the gunner can fire his weapon without putting his head in jeopardy. Supporting these mute but eloquent relics are upwards of four hundred actual battle front photographs, some of very large size.

The desperate character of the fighting above the earth is depicted in a vivid way by a close examination of the captured Albatross biplane, whose canvas wings are perforated in hundreds of places, and whose control wires are all wrenched and twisted into tangled masses.

The big Zeppelin bombs, the aerial bombs with fluted rudders, tell their grim story of death to women and children. The whole atmosphere of this hallowed collection of battle scared relics is redolent of deeds of valor, of sacrifice, and the determination to put out of the way for all time, this damnable Prussian actus whose poisonous tentacles must be loosed once and for all.

## THE PENALTY OF CARELESSNESS

By S. W. English,  
Fire Prevention Expert.

Every time you hear the cry of "Fire!" you can be almost absolutely safe in thinking that someone has been careless. Fires don't happen. They are the inevitable result of combinations of preventable things. When analyzed to the last equation it will be found that carelessness is the root whence spring nearly all fires.

What a penalty industry pays to carelessness! Fire is the great destroyer. The wealth of a generation can be wiped out in but a brief hour.

Why not fight fires before they start? Why not so conduct your habits and so keep your premises that when the fire demon wants to offer your savings as a sacrifice he will pass you by, just as those of Egypt of old were passed over when the sign they had been told to place over their doors, were seen?

Too often when those who are responsible from fire cry out they are the victims of bad luck, they are but paying the natural penalty for their own carelessness.

If you want to keep down your fire insurance rates, wage eternal warfare against those things that ever breed fires.

## RURAL SCHOOL TERM SHOULD BE EXTENDED

By P. P. Claxton,  
U. S. Commissioner of Education.

In most States school days for country children are fewer than for city children. The average length of school term in cities of the United States is one hundred and eighty-five days; in rural communities one hundred and thirty-eight days, a difference of forty-seven days. In some States the difference is much greater than this average. In many counties the average length of the rural school term is less than one hundred days, and in some districts it is less. On the other hand, in the States of California, New York and Connecticut, the country schools are in session one hundred and eighty days in a year, and in several other States almost as long. The country schools of Rhode Island are in session one hundred and ninety days in a year.

If all children are to have an equal opportunity for education we must even up the school terms of the country and give to all country children at least as many days as are now given to city children. One hundred and eighty-five days of schooling a year for all children will not be too much. There are countries in which the schools, both for city and country, are in session from two hundred and twenty to two hundred and fifty days or more in the year. American children need as much education as those of any other country, and this applies to the rural as well as urban districts.

## AN AGRICULTURAL COUNCIL

By T. N. Carver,  
Professor of Economics, Harvard University.

Every city has its chamber of commerce or its Board of Trade. The purpose of such an organization is to study economic and business opportunities of the city and promote enterprises which will help to build the city. Does any one know of a good and sufficient reason why every rural neighborhood ought not have a similar organization?

In Germany they already have such organizations. They are generally called the "Landwirtschaftsrath" or agricultural council. Some students of the problem of rural organization are strongly of the opinion that such an agricultural council is necessary before much can be done for the bettering of rural credit or the marketing of farm produce. There is no object, for example, in having more capital in a farming neighborhood unless the farmers know without any guess-work just how to use that capital so as to increase the production and the profit of their farms. If all the leading farmers of a neighborhood would lay their heads together and talk over the situation and study the opportunities for new investment, they would be less likely to make mistakes than if they work secretly, as separate individuals.

tail so as to increase the production and the profit of their farms. If all the leading farmers of a neighborhood would lay their heads together and talk over the situation and study the opportunities for new investment, they would be less likely to make mistakes than if they work secretly, as separate individuals.

## CIVILIZATION'S GREATEST TRAGEDY.

Extract from article by W. D. Lewis, president Texas Farmers' Union, opposing woman's suffrage:

"We are willing to join in every effort to elevate woman but will assist in none to drag her down. The descent of womanhood is the most awful tragedy in civilization. As she sinks she may, like the setting sun, tint the horizon with the rays of her departing glory. She may tenderly kiss the mountain tops of her achievement farewell; she may, like the sinking sun, allure the populace with her beauty as she disappears for the night but when she steps downward, the earth is as certain to tremble and plunge into darkness as death is to follow life."

## Hollands Magazine on sale

The ladies of Belen have undertaken the sale of Holland's Magazine—The magazine is \$1.00 for two years, and by securing one hundred subscriptions they get \$50.00 commission, which will be given to the Red Cross. This is your chance to get a good magazine and at the same time help the Red Cross.

## Cooper to prove famous theories

His Remarkable Medicine  
Accomplishing Wonderful  
Results in Leading Cities.

Referring to the visit to Denver and other western cities of Mr. L. T. Cooper, the millionaire philanthropist and Lecturer, who has commanded such wide-spread interest in the East with his health theories and celebrated medicine. Tanlac, E. C. Harris, his representative recently said in Denver:

"Thousands of the most prominent people in Cincinnati, Cleveland, Denver, Salt Lake City, Detroit, Louisville, Dallas, Atlanta, Memphis and other cities, where his celebrated medicine has been accomplishing such remarkable results, are even more enthusiastic over Tanlac than Mr. Cooper himself.

"As previously stated, Mr. Cooper contends that nine-tenths of the diseases and ill-health of the average person is due to a catarrhal condition, which produces faulty digestion and improper assimilation of the food.

"In a recent interview, Mr. Cooper was asked if Tanlac would relieve kidney trouble, liver complaint, rheumatism and a dozen other ailments, and in this connection, said:

"As I have repeatedly said; my medicine acts directly on the mucous membrane, stomach and blood, exelling from them the impurities and toxic poisons, and rendering to them a strong, healthy condition. I am convinced that the stomach regulates the condition of the blood, and is the fountain head of health of disease, as the case may be. My medicine is intended primarily for the regulation of the stomach and catarral inflammation, but it is no uncommon thing for persons who have used it to come to me and explain that it has relieved them of rheumatism and many other ailments, not generally recognized as having their origin in stomach trouble."

"The ingredients or medicinal elements which make Tanlac, come from many remote sections of the earth—the Alps, Pyrenees, Russian Asia, West Indies, . . . mountain states near the Rocky Mountains, Mexico and Peru are among the points from which the principal parts of the preparation are obtained. In the principal laboratory of the Cooper Medicine Co., Inc., under the efficient direction of a chemist of note, those medicinal herbs, roots and barks are assembled in the rough and painstakingly developed so as to attain that high standard of efficiency shown by the uniform preparation—Tanlac."

Tanlac is now sold in Belen by Buckland Brothers.—Adv.

## War Orders Rushed

**T**HE magnitude of the great war in which we are now engaged, has necessitated unusual preparation. Mighty forces are marshalling, great stores of food and munitions are being gathered, and the energies of the nation are focused on problems incident to the war.

At the very beginning of the war, the whole Bell System was placed at the disposal of the Government. No nation has entered the war with such a comprehensive and efficient telephone service.

As our military establishment grows, the demands of the Government upon the Bell System are bound to increase and always they must take precedence over all others.

Increased activity in commerce and industry as the result of larger demands for food and munitions from our allies and for our own use, means more need of telephone service by private business.

But private business must always be subordinated to the Government service. Each individual American will co-operate in this patriotic service, and submit cheerfully to inconvenience or delay in his telephone service, when he understands how vital it is that Government service shall take precedence over all else.

## Oh, You Skinny!

Why stay thin as a rail? You don't have to! And you don't have to go through life with a chest that the tailor gives you; with arms of childish strength; with legs you can hardly stand on. And what about that stomach that flinches every time you try a square meal? Are you a pill-feeder?

DO YOU EXPECT HEALTH AND STRENGTH IN TABLOID FORM—THROUGH PILLS, POSITIONS AND OTHER EXPLODED RIFLES? YOU CAN'T DO IT; IT CAN'T BE DONE.

The only way to be well is to build up your body—all or it—through nature's methods—not by pampering the stomach. It is not fate that is making you a failure: it's that poor, emaciated body of yours; your half-sickness shows plain in your face and the world loves healthy people. So be healthy—strong—vital. That's living. Don't think too long; send 4 cents in stamps to cover mailing of my book, "INTELLIGENCE IN PHYSICAL CULTURE," written by the strongest physical culture instructor in the world.

## The "SILENT SMITH"

—Model 8 shows what should now be expected of a typewriter.

Ball Bearing; Long Wearing

The success of the L. C. Smith & Bros. Typewriters has been due to the fact that the wants of the user have dictated its construction. The user has decided in favor of certain improvements now incorporated in Model 8. Among them are:

**Silence of Operation**—The most silent running efficient typewriter ever placed on the market. Absolute silence has been very nearly attained.

**Decimal Tabulator**—A help in billing and tabulating. There is no extra charge for this convenience.

**Variable Line Spacer**—Enables the operator to start on a given line and space from point of starting; also on ruled lines whose spacing varies from typewriter spacing. A great help in card work.

**Faster Ribbon Feed**—Insures new plates of impact for each typeface.

**Choice of Carriage Return**—Upon special order the new left hand carriage return will be furnished in place of the right hand return.

All the important features of previous models have been retained—ball bearing carriage, typebars and capital shift, back spacer, key-controlled ribbon, removable platen, protected type, flexible paper feed and automatic ribbon reverse.

Write for New Catalog of Model 8. It will explain why the L. C. Smith & Bros. Typewriter is a synonym for superior service.

## Oh, You Skinny!

Why stay thin as a rail? You don't have to. And you don't have to go through life with a chest that the tailor gives you; with arms of childish strength; with legs you can hardly stand on. And what about that stomach that flinches every time you try a square meal? Are you a pill feeder?

DO YOU EXPECT HEALTH AND STRENGTH IN TABLOID FORM—THROUGH PILLS, POSITIONS AND OTHER EXPECTED FIFFLE? YOU CAN'T DO IT; IT CAN'T BE DONE.

The only way to be well is to build up your body—all of it—through nature's methods—not by pampering the stomach. It is not fate that is making you a failure: it's that poor, emaciated body of yours; your half-sickness shows plain in your face and the world loves healthy people. So be healthy—strong—vital. That's living. Don't think too long; send 4 cents in stamps to cover mailing of my book, "INTELLIGENCE IN PHYSICAL CULTURE," written by the strongest physical culture instructor in the world.
