New Discovery Interface

by Robyn Gleasner on August 2nd, 2021 | [o Comments](#)

A new version of WorldCat Discovery, HSLIC's public facing catalog, will be implemented on August 4, 2021.

What is changing?

Known item searching, especially for electronic resources has improved. The landing page, authentication box, search results page, and item details page have been redesigned with a more modern look. The My Account feature will now be WCAG 2.1 compliant and adapt to inclusive devices on mobile and tablets.

Please keep in mind that Discovery will no longer support Internet Explorer. Some features may still be available, but will not be fixed if broken.

What is NOT changing?

The functionality and search limits will remain the same as the previous interface. The A-Z List/E-journal finder/citation matcher or link resolver pages, personal lists, and advanced search pages will not change.

More information

If you would like a preview of the changes coming, please copy the following link and paste into a browser that you don't normally use: <https://hslic-unm.on.worldcat.org/v2>. Otherwise your computer will default to the new version before the new interface is implemented. For more information about the changes to the new interface, click below for the information session given July 29, 2021.
