CLOUD BURST NEAR

PORTER.

Those who live in the Porter neighborhood report that their section was visited by a terrific rain and hail storm, Monday night which amounted to a water spout in violence. Brown B. Daugherty said that it washed his lister out of the field and a thousand feet from where he unhitched from it that evening. The hail drifted, and Cameron, were in town Thursday washed in the channel of the stream untill it clogged the channel, and the water cut a new one. He said the day Thursday, at the Simington that at this time Thursday morning the hail was yet 10 feet deep in the Orvil and Tom Denton and old channel. Thirty acres of land friend, are digging a well on Eagle he had plowed and partly planted was entirely washed away as deep as it had been plowed.

MAKE THIS COUNTRY YOUR HOME

(By E. W. Morton)

Some one in my rounds has called my attention to the fact that no one ever speaks of this country as his home. That all have come to make a little money and return HOME to live. This is by no means a worthy ambition, so far as you are concerned.

The home is an institution of God; it's basis is the family. The house you live in has little to do with this real basis, but it has something to do with it when you have only a makeshift for the housing of your family and suffer all kinds of privations in order that you may make a little money (which you may never make alter all) that you may return Home to enjoy the money you have made here. Be content to make this country your home now and build you as comfortable a home as your means will allow. You will find Jon Station,) has been 4.21 inches, that this will add to your ambition which has mostly all gone in the to fix up your place and make soil and put a good season in the everything grow on it that can be

NATIONAL CATOTITATA

Compulsory Education Regulations and Illiteracy

ASHINGTON.—Although six states in the Union are still without com-pulsory school-attendance laws, and four others have laws that apply

only partially, definite progress during the past decade is reported in a bul-letin just issued by the United States bureau of education. Since 1905 eight states previously without compulsory laws have adopted them, and it is thought to be a matter of only a few years when compulsory school attendance will be in effect in every state and territory of the United States.

The six states still without compulsory school laws are: South Carolina, Georgia, Florida, Alabama, Mississippi

and Texas. The four local-option states, where the law is in effect in certain counties only, are Maryland, Virginia, Arkansas and Louisiana.

The bureau's investigation of the subject reveals a close connection between lack of compulsory attendance laws and illiteracy. The states rank in percentage of illiteracy very much in accordance with the length of time compulsory schooling has been in effect and the completeness with which it is enforced.

The states vary widely in number of years and amount of attendance required each year. The period of compulsory attendance is from eight to twelve in North Carolina and Virginia. In most states it is eight to fourteen or fifteen. The present tendency is to raise the upper limit of compulsion. In 17 states the compulsory age limit is sixteen years or above; in Idaho it is eighteen. As a general rule, however, children in all these states are allowed to leave school at fourteen years of age if they secure employment or have completed the eighth grade in school. There is a constantly increasing effort to safeguard the child between fourteen and sixteen years of age, the period of special importance for the vocational preparation of most children.

As little as 12 weeks of school attendance during any one year may be required in Virginia, Oklahoma, Delaware and Nebraska, while in Vermont and other states there must be 150 or more days of actual school attendance every year. Many states require attendance "during the full time school is in session," which may mean anything from 41 to 194 days. Some states secure attendance during long terms by conditioning state appropriations upon the number of days of actual school attendance.

Some Visitors Uncle Sam Does Not Want

THE recent seizure by the New York customs authorities of the village of meadow ants which Mrs. C. W. Morse wished to bring with her from

Europe is only an episode in the perpetual war waged against undesirable immigrants, human, animal and vegetable. Mrs. Morse's village, like the one which reached Philadelphia about a fortnight before, was probably a byproduct of the increased interest in nature study, but the United States government not only discourages such aids to amateur research but absolute-ly prohibits them. By a law passed in 1906 the importation of living insects into this country is forbidden

and there are other laws which regulate so strictly the importation of larger animals that in many cases no discretion is left to the authorities. The classic instance of misguided enthusiasm is the introduction in 1869 of the destructive gipsy moth by a scientist named Trouvelot. Trouvelot, a Frenchman by birth, an astronomer in Harvard; unfortunately he was also

an ardent entomologist who had devoted much of his leisure time to the consideration of the silk worm industry. In an evil hour he conceived the idea of breeding a hardier worm which might withstand the diseases which then were ravaging rearing establishments in France, and in pursuit of this purpose imported some gipsy moths, intending to cross them with some of the native species found in the United States. It so chanced, however, that he left the window of his study in Medford, Mass., open one day. When he returned a mass of eggs laid by the gipsy visitors had disappeared apparently it had blown out of the open window. At this point Trouvelot's ments stopped. Their results did not.

Everything Was All Right Except the Logic

FORMER Senator Joe Blackburn, now in the city, is bringing to light a lot of forgotten anecdotes of the day when a black slouch hat simply had to

THINGS COULD

be worn by a statesman otherwise he was no statesman at all. Whenever I look at the cotorie of statesmen on the hill nowadays who wear brown derbies, I wonder how far along they would have gone in the old black slouch-hat days. Anyhow, this little story comes

from Senator Blackburn.

When Charlie Towns of Minnesota was in the senate, serving his 28-day term by appointment, he made a speech. Sort o' short time to get in a

speech in the senate, but he did get it in. It was a rip-snorting speech, full of wit and blood and thunder, just the sort of speech that you do not hear every day in the senate. It was a criticism of the Republican policy in the Philippines, and to tell the truth a lot of Republicans were secretly tickled over it, but just didn't dare say so. Among those present was Senator Depew of New York, who just thought to himself he would take a crack at that brand-new 28-day senator. When Towne had closed and his friends were crowding around to congratulate him, up marched Senator Depew. "A magnificent effort," he said, "a wonderful speech. Your diction was

elegant, your delivery forceful, but your logic was execrable." But Towne was not overpowered by this. He smiled as he returned the

Thank you, senator, for your appreciation of the things in my speech which you could understand."

Buy Coal for Poor With Climbers' League Fund

HERE is a story that is "right so," as they call it down here, and, being true, of course, will scarcely be believed; but if the people who have

thousand-dollar bills where these derelicts had pennies would follow their lead there would be much less suffering when cold weather comes. It is just the story of one John Parks, who used to be a deckhand on a liner. He came to town last fall and joined the Climbers' league down at the Salvation Army hall in Pennsylvania avenue. The idea of the Climbers' league is to see which member can stay longest on the "water wagon." Each mber is employed by the army and

each drops a nickel into the league treasury each week. In the spring the league gives a "banquet" with the nickels saved in winter. The nickels accumulate rapidly, as forty or fifty men belong to the league. When the treasurer reported at a meeting recently that the members had saved \$15 in nickels prospects of a fancy "banquet" were bright. The "banquet," by the way, marks the end of the winter and the departure of the league memhers for the highways. But John Parks upset the program at the meeting. He got to figuring on that "women and children first" rule, and he made a ch. The burden of his words was that he didn't think a bunch of "bums" ought to buy a "banquet" when women and children needed food and coal.

Parks made a motion that the \$15 saved by the league be used to buy three es of coal. The motion passed unanimously, and as a result Major Evans, charge of the army, bought the coal and distributed it between several . Could there possibly be a more glorious charity than this?

DISEASES OF CABBAGE TEETH IN SHOVEL AND SPADE

INTERESTING EXPERIMENTS AT MARYLAND STATION.

Early Varioties Do Best on Sell Rich and Full of Humus, While Late Plants Thrive on Sed Field Broken in Spring.

In a bulletin of the Maryland experiment station, by C. P. Close and T. H. White, an account is given of cultural and variety tests of cabbage, together with the general directions for the culture and care of the crop.

The authors being of the opinion that the susceptibility to rot and disease of cabbages growing on very rich, highly cultivated land is due more to something unsuitable in the soil rather than to the direct attacks of bacteria or fungi, a study was made to determine the effect of stable manure, of various chemical fertilizers, and of different cultural treatments, such as ridge planting, level planting, and proper drainage as correctives of the condition favoring the development of cabbage diseases.

The experiments were conducted for three seasons on a piece of rather stiff clay land that has been manured and planted to truck crops for many years and upon which cabbage had previously rotted badly. The various treatments given failed to act as correctives of the supposed excessive salts or poisonous matter in the soil. Good cabbages, on the other hand, were grown on soils of the same character and drainage conditions with the exception that the land had been in sod from which hay had been cut.

It is concluded that whereas early cabbages do best on soils that are rich have worn down, which means after and full of humus, late cabbages generally do best on a sod field broken early in spring and well manured.

The varieties tested are classed into three general types relative to their disease resistance. The disease-resistant stock all appeared to conform to one type of vigorous growth with green or purplish-green curled and

crinkled leaves. This type was found to be quite disease-resistant and hardy. remaining in the field throughout the winter and producing seed in the spring. Cabbages of the Savoy type were also fairly disease-resistant, standing conditions that usually destroyed cabbage of the ordinary flat Dutch type. The ball-headed varieties were most subject to disease.

comparative test of low-priced and high-priced fertilizers indicated that the former sometimes give as good results as the latter. It appears, however, that the same results cannot be expected from any particular brand of fertilizer under all conditions of soil and seasons. On the whole, the use of a fertilizer with a high nitrogen content is recommended. In raising late cabbage plants many growers are in the habit of using a piece of poor, light soil for a seed bed, to which is applied a very liberal dressing of commercial fertilizers. This appears to produce toughened plants quite resistant to the checks from transplanting. Experiments were conducted for two years to determine a fertilizer suitable for this purpose. The results indicate that it is profitable to use nitrate of soda on the plant beds at the rate of 450 to 600 pounds per acre.

The Silo. Besides corn, excellent silage may be made from alfalfa, clover, oats and peas, rye, sorghum, kafir corn, millet and milo for silage; it is often made from other plants, especially during drought seasons, when excellent sorghum and kafir corn can be grown as a catch crop. The first cutting of alfalfa hay during a wet season is often lost. This could be put in the silo and saved, and by feeding out during the summer months, the silo can

The Squash Bug. The squash bug, although confining its attacks largely to the squash and other plants of the gourd family, is early spring, when emerging from its plant is available.

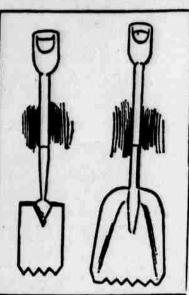

be refilled in the fall with corn and

kafir corn.

Wind-Break for Orchard. wind-break for orchards is desirable in nearly all sections. Spruce, poplar or willow are suitable for this purpose, and if planted with uniformity they beautify the farm.

Ponetrate the Earth When Broad Blade Would Scarcely Make a Mark—Unusually Long-Lived.

Those of us who have ever used a shovel or a spade where the ground was hard know how difficult it is to get a start in digging. Not so if we have one of the shovels or spades invented by a New York man and described by him as "Yankee-toothed." The blades of these tools are made of high-grade steel and along the bottom edge are teeth, about an inch and a half long. These teeth will penetrate the earth when the broad blade

Useful for Hard Earth.

would scarcely make a mark, and they do not use up so much of the wielder's strength. The teeth are slightly rounded at the points and are practically self-sharpening. Even after they long usage, the workman still has a tool equal to the ordinary type, so these may be considered unusually long-lived.

FRUIT FERTILIZED BY BEES

Colored, Fragrant Petals of Blossom Are Advertising Board Telling Where Honey is Located.

(By FRANCIS JAEGER, Minnesota Agricultural College.)

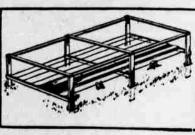

If there were no bees, fruit trees and other plants could not produce fruit. Apple, plum, cucumber, clover, alsike, alfalfa are fertilized by bees. Honey is the bait with which the bee is induced to perform this task. The colored, fragrant petals of the blossom are the advertising signboard telling the bee where the honey may be found. If the blossom is to "set fruit," the bee with its fuzzy body must brush some of the yellow dust called pollen from the male organs or antlers of the blossom, and flying away to another blossom, deposit this pollen on the female organ called the stigma. The blossoms are so arranged that to get at the honey the bee must first brush, with its pollen-covered body, against the stigma, thus completing the pollination. As soon as it has perd this duty, it may for the work in the form of a drop of honey at the bottom of the blossom. While drawing this pay, the bee is involuntarily covered with pollen again and made ready to proceed to the next blossom and repeat the pro-

FRAME AS PLANT PROTECTOR

Particularly Adaptable for Use in Cultivation of Peppers, Tomatoes and Other Vegetables.

The Scientific American in describing a plant protector, invented by E.

R. Drake of De Land, Fla., says: This invention is an improvement upon the one for which Mr. Drake received letters patent No. 932,972 particularly adapted for use in the cultivation of plants, peppers, tomatoes, eggplants and other vegetable. The engraving shows a perspective view of a skeleton frame which is rect-

Plant Protector.

angular and oblong. The object of using the two boards at the bottom which are on the south side of the frame is to blend the rays of the sun from the time the plants are set out, so as to prevent the rays striking the plants with full force; and the object of the wires is to hold the plants or vines and keep them off the ground. The top of the frame may serve for supporting burlap or other coarse fabric or planks for protecting the plants.

Absence of Alfalfa.

Considering the comparative ease and certainty of getting alfalfa estaboften very injurious to cucumber in lished, when proper methods and care are used, the absence of fields of this winter quarters. It finds its way into legume on thousands of farms where the cold frames in which the plants it should represent 10 to 50 per cent are being started, when no other food of the total cultivated acreage is astounding.

Desirable Sheds.

Machine sheds are very desirable, but in the absence of shelter, cleaning, oiling and painting the machinery will go a long way towards preserving it from rust and decay.

It is the peacemaker, not the pace-maker, who is blessed.

SKIN TROUBLE ITCHED BADLY

Glenns P. O., Va.-"My baby's trou ble began with an itching and then a little bump would come and she could not rest day or night. The trouble affected her whole body. The bumps festered and came to a head and the corruption looked like thick matter, kind of a yellow color. The sores itched so badly until it seemed to me she would scratch herself to pieces and then a sore would form and her clothes would stick to her body and pull off the little scab. In some places she would scratch and irritate the sores until they seemed to be large. She was affected about a year.

"I wrote for a sample of Cuticura Soap and Ointment. I bathed her body in warm water and Cuticura Soap and then I applied the Cuticura Ointment, and they afforded relief after twice using. I bought some more Cuticura Soap and Ointment and inside of two weeks she was cured." (Signed) Mrs. J. R. Greggs, Nov. 21,

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address postcard "Cuticura, Dept. L. Boston."-Adv.

Suspicion is not worse than certainty to the one who is suspected.

The Success Label.

Upton Sinclair, commenting in Baltimore on the enormous fortunes now existing in America, said:

"In no other place in the world over are such fortunes to be found. One reason is that our laws regulating financial transactions are less stringent than those of other countries, and another reason is that even where we have laws our magnates forget

about them. "In fact," Mr. Sinclair concluded with a laugh, "the histories of some of our largest American fortunes show clearly that on the door of success is 'push' in brass."—Chicago Record-Her-

Succinct. Representative Simeon D. Fess of in looking for the brightest side of life; he is "strong" for optimism. His distinction between ap optimist and a pessimist is apparent in the following definition which

he sometimes gives: "A pessimist," says Representative Fess, "asks 'Is there any milk in that pitcher?' But the optimist says, 'Pass the cream."

Softy.

WRITE FOR DELIVERED PRICE

PLIANT MATERIAL IN HIGH FA-VOR WITH MILLINERS.

Possibility of Its Becoming Over-Popular is Something to Be Reckoned With-Trimmings Are of All Shapes and Designs.

The milliners have taken up taffeta, particularly the changeable colorings. so enthusiastically that they are very likely, like the manufacturers of readymade frocks, to overdo the matter. If a woman wants to buy a taffeta hat she will be wise if she buys one and wears it at once, for the taffeta model bids fair to become too popular, though a hat made by a master hand, whatever the material, is easily distinguished from an ordinary model and retains its smartness, no matter how popular the style.

The first taffeta hats shown in the importing houses and worn by women of taste have been

draped models

with some simple

Leghorn.

simply trimmed Hat of Taffeta and with brush, or cockade, or flat motif, or single feather ornament, or prim flower cluster, which makes

good between-season hats.

Flowers are tremendously used. Large flowers and tiny flowers seem to share honors equally, and amazingly natural effects vie with flower shapes and colorings that are never found except in millinery, yet are button-like little flowers of silk, obviously and insistently artificial and suggesting that period of artificiality par excellence, the time of Louis XV ored paste stones. and Louis XVI.

These prim, stiff little buds and flowers are posed stiffly on some of ing well over the instep and up the the smartest hats

and have a cerattractive quaintness in addition to their undoubted value as color notes; but they are used singly or in little nosegays or stiff tittle wreaths. rather than in masses, as, for instance, wreaths of

Leghorn.

the flowers surrounding the crown of one of the new small sailors made of Belgian straw. Or little bouquets placed at intervals named fashion becoming. around the crown of some one of the new shapes, interwoven with narrow velvet or taffeta ribbon in some of the new shades.

Violets of all kinds, from the tiny wood violet and johnny-jump-up to the big Russian and Parma violets, are as popular as ever, and often one sees these violets combined with a huge American Beauty shade.

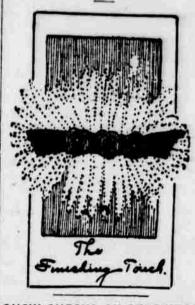

The hat is of the new sailor shape, trimmed around the crown with a wide band of brown velvet ribbon. Directly at the front of the crown is a high upstanding loop of brown velvet ribbon, which is held at the crown by a cluster of violets and a single large American Beauty rose.

The bonnet is with us again, and many of them are charming, some are flower trimmed, others are feather trimmed, with little clusters tucked among the feathers. One of the hats chiffon and wings. shown among the smaller cuts is an attractive little bonnet of leghorn trimmed with a black velvet ribbon dresses, suits and coats.

SEASON OF TAFFETAS ruche around the top of the crown. from under which extend small pink moss-roses, leaves and buds. A hat of fine leghorn, trimmed with pink ostrich feathers, with a slight yellowish tinge running through and at either Port of side of the bonnet, extending out to and over the edge of the narrow brim. San with cluster of small pink and yellow roses, also is shown this season.

MARY DEAN.

NECK ORNAMENT

SHOW CHECKS ON STOCKINGS

Rich and Variegated Designs Are the Most Approved for Wear During Spring and Summer.

Checks on your stocks instead of in them is the latest edict of fashion.

French lisle or ingrain lisle checked stockings are even more popular than the silk ones, but there is very little economy in this, as the new designs in lisle are by no means inexpensive. The new checked patterns are sold for \$1.45 a pair.

The checked patterns come in green and white, brown and white, maroon lovely for all that. There are stiff and white, intense orange and white, as well as in black and white.

In evening stocks there are many ornamented with rhinestones and col-The patterns in these brilliant

stones are very open and light, spreadankle for some distance.

Paste amethysts, jet, topaz, sapphires and pink amethysts, as well as brilliants and pearls, are used for this embroidery, but as the designs are so delicate the effect is not too striking.

There are clocked stockings in black and white, the clocks made of fine stripes of the black on the white or white on black. Stockings of solid colors to match gowns have white silk clocks. There are some very neat looking stockings with small black polka dots, and there are other stockings with two-toned backgrounds which have stripes of white set quite far apart. Not all would find this last

DICTATES OF FASHION

In buttons Chinese effects are very popular.

The proper afternoon blouse is of white satin.

Belts will again be used to a considerable extent.

All bodices affect vest, bolero or peasant lines.

Yokes are a feature of many of the new garments.

All gowns show an increasing fullness in the skirts.

All bodices will be very loose fitting and bloused.

Hats with flower trimmings and edges of fur are worn by many smart

women. For southern wear the white pana

mas are trimmed simply with white All manner of bindings are making

their appearance in connection with

WILL REPAY CAREFUL WORK ADDS TO EFFECT OF LACE

Proper Placing and Stitching of Buttonholes Means Much to Appearance of Garment

"All finished but the buttonholes," is a phrase one often hears, and little importance is attached to the fact, yet the neatness and trimness of a garment are always emphasized by the buttonholes.

Buttonholes to look well should be placed a quarter of an inch from the edge and crosswise of the material.

Never cut more than one hole at a time. Cut and work each one as you proceed. When a buttonhole is cut run the working thread around it carefully, drawing the needle and thread through gently so as not to stretch or fray it. Do not knot your silk or cotton, but let the end be out a couple of inches; turn it back and

work over it to give durability. When the last stitch has been taken put the needle down through the first stitch and fasten the thread securely with two buttonhole stitches. Cut it off close.

Trains on Dancing Frocks. The latest word that comes from Paris is that trains are to be worn once more with dancing frocks-and this from a city that is tango-mad. It seems, then, that the reign of the short-skirted dancing frock is about over. The trains are long, narrow, and pointed, and end in a silk-covered loop, attached by a cord, which hooks into a fold of the gown, to be invisible while the wearer sits or stands, and is slid over the wrist to catch up the train while dancing.

Decoration That at First Seems Superfluous is One of the Features of the Season's Fashions.

It seems like gilding the lily to embroider good lace flounces with wreaths of tiny silk flowers, or to pick out their dainty design with gold, silver or metallic threads. But more inexpensive laces are sometimes curiously beautified by this simple means, the embroideries carefully introduced to tone in with the color of the belt or gown. Needless to say, in order to be successful, these must be deftly and lightly touched in. A filmy tunic of exquisite black chantilly is decidedly not improved by outlining its prettily patterned flowers with a surrounding of weirdly shaped small jet beads, though, en revanche, another overdress of tambour lace has the charm of its feathery design most effectively heightened by an outlining of dull gold thread. A tunic of imitation black Spanish lace is by no means unpleasing, with its big round flowers worked in heavy white floss silks, and we have seen a flounce of fine embroidered net successfully pen-painted with wreathlets of tiny red roses and their green leaves. A "tango" colored charmeuse gown that made quite a sensation at a recent dance owed half its charm to a loopedup tunic of mellow-tinted imitation Limerick lace, its leaf design outlined with fine gold thread and worked with

MOTHER COMES TO DAUGHTER'S RESCUE

When, Daughter Thought, Every Avenue of Escape Closed, Mother Came to Rescue.

Louisville, Ala.-In referring to her recent troubles, Mrs. Bessie E. Bruce, of this town, says: "After childbirth. I suffered greatly with wasting, and various womanly troubles, and was in bed for six weeks. Half the time, I could not move, only when I was turned over by some one. Oh! how I suffered, no one knows.

I was told that I would have to go through an operation, but at the time of the operation, I was too weak to undergo it, and I decided there was no chance for me.

As a last resort, my mother advised me to try Cardui, the woman's tonic, and my husband bought me a bottle. I could tell from the first that it was doing me good, and by the time I had taken the first bottle, I could stand on my feet. I got another bottle, and before I had taken it up, I was just about well. The pains all stopped, and in a short while I was able to do my work.

I know that Cardul saved my life, and I would not be without it in the house. I almost waited too long, and I advise all suffering women not to wait, but to begin taking Cardui at once."

Your druggist sells Cardul. Get a bottle today.

COULDN'T STAND FOR DEFEAT

According to London Newspaper, Colored Opponent of Irlehman Had Little Chance.

A brawny son of Erin was acting as time keeper in a rough-and-ready fight between his mate and a negro in South America. In the course of the fight a well-planted blow sent the Irishman

"One!" cried the time keeper, in a tense voice, watch in hand. "Two!" he murmured hoarsely. "Pat,

ye fool, git up! There's only eight seconds left!"

The inert mass never moved. "Three!" shouted the time keeper

desperately. "Think of yer old mother, Pat! What's it she'd be saying to ye, Bate the nigger!" Slowly he called up to eight, buck-

ing up his mate with patriotic ejaculations between each long second. When eight had been called Pat slowly staggered to his feet, and by a mighty lunge succeeded in knocking down his black opponent.

Desperately fearing lest he should revive in time, the time keeper set off at top speed:

"One, two, three, four, five, and five's ten! Ye're out, ye black villain!" -London Tid-Bits.

Won Distinction in Three Wars. Gen. John B. S. Todd, a soldier of three wars and governor of Dakota territory, was born one hundred years ago in Lexington, Ky. In his youth he removed with his parents to Illinois. He graduated from West Point in 1837 and for five years thereafter was actively engaged in the Florida war. During the war with Mexico he distinguished himself in the siege of Vera Cruz and at the battle of Cerro Gordo. Subsequently he took part in the Sloux expedition in the northwest. For a short period in the early part of the Civil war he commanded a division of the Army of the Tennessee. After quitting the army he served as a Dakota delegate in congress and was governor of the territory from 1869 to 1871. General Todd died in Yankton in 1872.

Wasted Sweetness.

"Lady," said the Chicago heeler, "here's a box o' candy to take home to de kids."

"Sir," said the lady voter, "candy is deficient in proteids, contains an excess of albumenoids and its use by the adolescent is provocative of many infirmities which we, as new members of the electorate, are trying to eradicate. Furthermore, your ten der of this package is in violation of section 3, 11, 44 of the criminal code, which deals with attempted bribery.' To which the heeler could only re-

ply: "Well, wot T'ell? wot T'ell?"

Sick Komen attention

Is it possible there is a woman in this country who continues to suffer without giving Lydia E. Pinkham's Vege-table Compound a trial after all the evidence that is continually being published, which proves beyond contradiction that this grand old medicine has relieved more suffering among women than any other one medicine in the world?

We have published in the newspapers of the United States more genuine testimonial letters than have ever been published in the interest of any other medicine for womenand every year we publish many new testimonials, all genuine and true. Here are three never before published:

From Mrs. S. T. Richmond, Providence, R. I.

PROVIDENCE, R. I .- " For the benefit of women who suffer as I have done I wish to state what Lydia E. Pinkham's Vegetable Compound has done for me. I did some heavy lifting and the doctor said it caused a displacement. I have always been weak and I overworked after my baby was born and inflammation set in, then nervous prostration, from which I did not recover until I had taken Lydia E. Pinkham's Vegetable Compound. The Compound is my best friend and when I hear of a woman with troubles like mine I try to induce her to take your medicine."—Mrs. S. T. RICHMOND, 199 Waldo Street, Providence, R. I.

A Minister's Wife Writes:

CLOQUET, MINN.—"I have suffered very much with irregularities, pain and inflammation, but your wonderful medicine, Lydia E. Pinkliam's Vegetable Compound, has made me well and I can recommend the same to all that are troubled with these complaints."—Mrs. Jennie Akerman, c/o Rev. K. Akerman, Cloquet, Minnesota.

From Mrs. J. D. Murdoch, Quincy, Mass. SOUTH QUINCY, MASS .- The doctor said that I had organic trouble

MEMORIAL DAY

PROCLAMATION. Memorial Day is again approaching, when all good citizens will reverently and affectionately pay tributes of gratitude to the Nations dead. This day appears to become more and more significant as the years pass. The ranks of the Civil War veterans are fast thinning in the march of time, and the boys who took up arms in the Spanish American War have to some extent taken their places. Within the last thirty days a number of young men gave their lives for the honor of the Stars and Stripes. All these are the Nrtion's heroes and the object of our respect and devdtion on Memorial

NOW THEREFORE, WILLIAM McDONALD, Governor of the State of New Mexico, do hereby proclaim SATURDAY, MAY 30th, 1914 as MEMORIAL DAY In the State of New Mexico. May all true citizens of the State fittingly observe this great day, this day of the highest and noblest sentiments, by participating in suitable exercises in honor of our dead, strewing flowers on their graves, and properly instructing the children as to the true meaning of the day. By honoring those who died for their country we may develop real patriotism.

Done at the Executive Office this 11th day of May, 1914.

WITNESS My hand and the Great Seal of the State of New films. Prompt service. Eastern
