VOL. 47.

SANTA FE, NEW MEXICO, MONDAY, APRIL 18, 1910

NO 46

## TEXAS MEN ARE WAITING

They Want to Talk to President About Elephant Butte Project

## WILL GET RID OF HALE

Very Likely That Judge Powers Will Be Elected Senator.

Special to the New Mexican.  
Washington, April 18.—Representative Burleson and Smith of Texas are waiting on the secretary of the interior to fix the date for a consultation with the President on the Elephant Butte project. Editor Dingley, brother of Chairman Dingley, of the Lewiston Journal, says Senator Hale will be defeated by Judge Powers of the state supreme court. Without spending as much as a postage stamp, he only lacked 60 votes of defeating Hale in the latter's own county.

### Death of Veteran Editor.

Washington, April 18.—A. J. Halford, formerly a newspaper man of considerable prominence and in recent years editor of the congressional directory, died yesterday after several weeks' illness. Mr. Halford was a brother of Major Elijah W. Halford, private secretary to President Harrison.

Several years ago he was connected with various metropolitan papers as a political writer in Washington. He had also been connected in important capacities with the Associated Press and New York Sun. Mr. Halford was a native of Hamilton, O., and was 59 years old. He was the father of Lieutenant Doane Halford, Twenty-second infantry, U. S. A., and Captain Frank Halford of the Marine corps.

### It Wasn't an Easy Job.

Washington, April 18.—Having served seventeen days as private secretary to Mrs. Taft, Miss Mary Dandridge Spiers, has resigned and beginning tomorrow will resume her duties in the war department. Her successor has not been chosen.

All that Miss Spiers would say last night in regard to the matter was: "You can simply say that I thought it best to resume my duties at the war department."

### Report of the Committee.

The committee on the public lands having had under consideration the bill (H. R. 24416) to amend an act entitled "An act to authorize entry of the public lands by incorporated cities and towns for cemetery and park purposes," approved September 30, 1890, (26 Stat., p. 502), report the same back with the following amendments: In line 1, page 2, after the word "of" add the word "non-mineral." In line 5, page 2, after the word "of" add the word "such." In line 8, page 2, strike out the word "ten" and insert in lieu thereof the word "twelve." In line 11, page 2, after the word "shall," add the following: "Not occupy or use the same for such purpose or shall."

Change the colon in line 14, page 2, to a period, and strike out the words "And provided," in said line 14, and all of lines 15 to 21, inclusive, on page 2.

As thus amended the committee recommended that said bill do pass.

The present statute which is sought to be amended by this bill is as follows:

That incorporated cities and towns shall have the right, under rules and regulations prescribed by the secretary of the interior, to purchase for cemetery and park purposes not exceeding one quarter section of public lands not reserved for public use, such lands to be within three miles of such cities or towns: Provided, That when such city or town is situated within a mining district, the land proposed to be taken under this act shall be considered as mineral lands, and patent to such land shall not authorize such city or town to extract mineral therefrom, but all such mineral shall be reserved to the United States, and such reservation shall be entered in such patent.

It will be observed that the present law does not apply to sewers, and it is deemed important that cities be given the right to take public lands where they are available for sewerage purposes for the health and welfare of the inhabitants. Sites of that kind adjoining cities or towns are usually of little or no value or they would have been settled upon and patented long ago.

The present law does not permit the location of either a cemetery or park upon forest reserves, and in many cases the forest reserves are within a mile or two of the limits of a town and prevent the operation of the existing law. The objects of this bill is to allow the selection by cities and

(Continued on Page Eight.)

## \$10,000,000 LOSS IN IOWA

Frost Destroys Cherries, Plums and Other Early Fruit

## 22 ABOVE ZERO TODAY

Snow Is Falling Today and Damage Reported Is Tremendous.

Des Moines, Ia., April 18.—Secretary Greene of the Iowa State Horticultural Department today estimated the loss to Iowa fruit and vegetables from the recent freezing weather to be between \$5,000,000 and \$10,000,000. Early fruit, cherries and plums in particular, have been totally destroyed. Snow is falling today in many parts of Iowa. It was 22 degrees above zero in southern Iowa last night.

### CHINESE GOVERNOR KILLED BY RIOTERS.

Hankow, April 18.—Late dispatches from Changsha where the natives have been rioting and much property belonging to foreign missionaries has been destroyed, say that quiet has been restored. The provincial treasurer has taken charge of affairs, the governor of the province having been killed by rioters.

## DR. HYDE IS HUMAN MONSTER

According to Scathing Opening Address of Prosecuting Attorney

## DEADLY GREED FOR MONEY

Overpowering Passion of Man Who Must Answer to the Charge of Murder.

Kansas City, April 18.—Picturing Dr. B. C. Hyde as a man whose evil propensities led him during his boyhood to torture animals, in later life to abuse the poor and helpless and in the fullness of his professional success to conceive the most colossal murder plot in the history of criminality, Attorney James A. Reed made the opening statement for the state in the physician's trial for the murder of Colonel Swope today. In leading up to the motive, which the state claims caused the alleged murders; Mr. Reed asserted that the overpowering greed for money had manifested itself in Dr. Hyde. With the purpose of adding to his wealth, Mr. Reed said, Dr. Hyde made love to women and then obtained money from them. The deaths of Colonel Swope, Christian Swope and James Moss Hunton, were dealt with in detail. The charges that Dr. Hyde was responsible for the spread of typhoid fever in the Swope household, and that on three occasions he tried to poison Margaret Swope composed a considerable part of his address. Mr. Reed said that the state would show that Colonel Swope was poisoned with cyanide of potassium as well as strychnine and that both poisons were given Christian Swope. As to Hunton, Mr. Reed claimed he practically was bled to death by Dr. Hyde who was indicted for negligently killing Hunton by bleeding.

### Sparring for Points.

Kansas City, Mo., April 18.—Before the jury was sworn Mr. Conklin said that he expected to call Dr. Tyman to testify as soon as he is able to be about, provided the case is not closed by that time. After the prosecution had objected to the presence of Mrs. Hyde in the court room during the making of opening statement of the prosecution, Judge Latshaw ruled that Mrs. Hyde and Mrs. Swope might remain in the court room but all other witnesses should be excluded. At the first mention by Mr. Reed of Dr. Hyde's alleged intention to exterminate the entire Swope family, attorneys for Hyde made strenuous objection. "We object to the hired counsel in this case making such false statements," said Attorney Walsh. "An attempt will be made to introduce evidence gathered by highly paid counsel, detectives, hars, perhaps thieves, who entered the house and laboratory of this man, while he was absent from the city. Such testimony as they will give is wholly false and will be disproved. But if a review of it is permitted to creep into the minds of the jury, it will create a false impression which will remain." But the objection was overruled.

HON. ANTONIO JOSEPH.

## FORMER DELEGATE ANTONIO JOSEPH IS NO MORE

Distinguished Statesman Died at Ojo Caliente Yesterday At Age of 64 Years. Had Suffered With Bright's Disease and Lingered For Some Time—Was Native of Taos.

Hon. Antonio Joseph, delegate to Congress from New Mexico from 1884 to 1894 and a native of Taos, died yesterday at his home Ojo Caliente in Taos county. A dispatch telling of his death was received yesterday by Judge N. B. Laughlin of this city and while it caused much regret it was not a great surprise to those who remembered how close to death's door the aged statesman was in El Paso the latter part of January of this year. He suffered with Bright's disease, but paralysis was the immediate cause of death.

Just what the funeral arrangements are was not ascertained today, but it is known that Mr. Joseph expressed a wish some time ago to be buried in this city. The body arrived here at 4 o'clock this afternoon.

Former Delegate Antonio Joseph who for ten years represented the Territory in Congress is well known in Santa Fe.

A native of New Mexico the greater part of Mr. Joseph's life was devoted to public affairs. He was born in Taos, Taos county, on August 25, 1846, his parents having gone to Taos from St. Louis and was of Portuguese descent. In the early part of 1848, during an Indian raid, the Joseph home was destroyed and Antonio who was then two years of age and his mother were carried into captivity. They were rescued many months later by Colonel Sterling Price and his men.

Mr. Joseph received a good education, for as a boy he attended the Lux Academy at Taos, Bishop Lamy's school at Santa Fe, and later went to Webster College at St. Louis, Mo., and also spent some time studying at the Bryant and Stratton Business College in St. Louis.

He followed various pursuits in his business career, including stock raising, agriculture and horticulture. For years he lived at Ojo Caliente and was proprietor of the hot springs there.

Mr. Joseph's public service was in the capacity of a probate judge, serving Taos county for six years. For a like period he represented his district in the territorial council and then came ten successive years of continuous work in the House of Representatives whether he was sent by both Democrats and Republican voters, although the delegate ran on a Democratic ticket.

Mr. Joseph was elected in 1897 a member of the Territorial council and was made its president by a unanimous vote. He was a prominent Mason, having taken the 32d degree. He is survived by a widow, one son, a brother, John Joseph, and two brothers-in-law, Robert M. Force, father of Miss Mary Force, of this city, and Joseph Force, of Ojo Caliente.

## SHOT BY THE CITY MARSHALL

Tragedy Enacted at Windmill City in the Quiet of Sunday

## TORRES RESISTED ARREST

Knocked Down Officer Three Times Before the Latter Used Weapon.

Deming, N. M., April 18.—James Hughes, city marshal of Deming, Luna county, shot and killed Clemente Torres yesterday when the latter resisted arrest upon being caught breaking into a store. Hughes was knocked down three times before he could shoot.

## FOUR MAIL CLERKS ARE CREMATED

Another and Three Train Men Badly Hurt In Railroad Wreck

## CARS PLUNGE DOWN BANKS

Wreckage of Flyer From Chicago to New Orleans Caught Fire

Memphis, April 18.—Four mailing clerks dead and three train men and a mail clerk injured in a wreck of the through flyer from New Orleans to Chicago on the Illinois Central five miles north of Jackson, Miss., early today. The engine left the track and plunged down a 15 foot embankment, carrying with it baggage, mail and library cars and two Pullmans. The wreckage caught fire and the bodies of the mail clerks were cremated.

### STRIKING STREET RAILWAY MEN SLOW TO RETURN.

Philadelphia, April 18.—The striking motormen and conductors of the Rapid Transit Company, who were last night directed to return to work by their executive committee were slow to follow orders. Up to noon, only about 100 had reported at the barns.

## ELECTION NOT IN IT WITH ROOSEVELT

Hungary Greatly Excited Over Visit of Distinguished Visitor

## LIKE BARGAIN COUNTER RUSH

Chief of Police of Buda-Pest Has Leg Broken by Immense Crowd.

Budapest, April 18.—Although Hungary is having an exciting general election, the visit of Mr. Roosevelt is monopolizing public attention. The newspapers of Budapest today print columns about his arrival and extended editorials of "Welcome Home" appear in English. The character of the crush at the railway station last night when the former President arrived may be judged from the fact that the chief of police suffered a broken leg and several other persons were injured. Today a big crowd cheered the distinguished guest as he left the hotel and entered the automobile to begin the day's program.

### THREE CORNERED FIGHT SATURDAY AT LAMY.

As the result of a three cornered fight in Lamy Saturday night Toribio Encinas, a deputy sheriff at Lamy, is laid up at his home on Canon road with two bullet wounds in his right leg and his forehead bruised from a blow from a pistol. Francisco Larribas, another deputy, also of Lamy, is in jail here charged with the shooting. Jose Maria Encinas, of Lamy, is also in jail having been bound over today for the action of the grand jury by Justice Garcia on the charge of assaulting Larribas by hurling rocks at him.

There are several versions how the fight started and one is that the two deputies quarreled about arresting a man. Toribio Encinas insisting on making the arrest and Larribas urging him not to do so. The men are said to have finally come to blows and Larribas is said to have knocked Toribio Encinas down and shot him in the right leg after striking him over the forehead. Larribas maintains that he shot in self defense. Jose Maria Encinas was seen this morning by a reporter but declined to make any statement about the fight. It is said that he defended Toribio by hurling rocks at Larribas.

The men were brought here yesterday morning. The wounded man is said to be suffering a good deal but he is expected to recover.

### PRESIDENT TAFT WELCOMES DAUGHTERS.

Washington, April 18.—President Taft made the address of welcome to the delegates to the convention of the Daughters of the American Revolution, which opened here this morning. In Convention hall, the home of the organization which has just been completed. Nearly a thousand delegates were in attendance. The session promises to be lively.

## BELÉN GIRL'S TERRIBLE DEATH

Is Hurled 300 Feet Down Mountain Cliff In Sight of Friend

## WAS WEDGED IN A CREVICE

Her Waving Hair Nearly Strangles Her—Finally Dies.

Special to the New Mexican.  
Agricultural College, N. M., April 18.—To find herself suddenly trapped on a cliff in the Organ mountains, while climbing up to get a better view or for the excitement of the ascent, and then to slip faster and faster and finally lose complete control and be hurled downward several hundred feet with ever accelerating speed suddenly to be brought to a standstill wedged tight in a mountain crevice, her back injured, both legs broken and her hair tied like a noose around her throat and mouth, was the terrible experience of Miss Ella Pohl of Belen, N. M., Saturday. When finally extracted from her position Miss Pohl lived only a few hours. Miss Ethel Shearer whose residence could not be ascertained today, was near Miss Pohl when the accident happened and called for help but to no avail. She was uninjured.

The girls were pupils at the Agricultural College and today a cloud overhangs that institution which has never had such a sad death among its pupils as that of Miss Pohl.

### How It Happened.

Miss Pohl with other students were out on a picnic. Miss Pohl and Miss Shearer took great delight in mountain climbing as does almost every one in this country and had gone up a cliff when they suddenly found that they had placed themselves in a very dangerous position. Both tried to get to a safer spot and Miss Shearer succeeded. Not so her companion. Seeing her friend's danger Miss Shearer called for help but it was already too late.

Miss Pohl struggled bravely to maintain her footing but it was to no avail. She began to slip and horror was depicted on her countenance as she took in at a glance the probable fate that awaited her. In a few seconds the terrible descent began and the unfortunate girl rolled to her death. Rescuers succeeded in reaching Miss Shearer who was taken from her perilous position and others started for the crevice below where the unfortunate girl lay wedged. The accident happened at about 4:30 p. m. but it was 9 p. m. before the rescuers could get the girl onto smoother ground where a stretcher could be used.

When the first rescuers, who were young men at the college reached the unfortunate girl, she was still conscious and able to speak. She asked them to remove the waving hair from her face as it was smothering her. This was promptly done and the girl breathed with less difficulty. Blankets were brought and the girl carried in them. Dr. N. Boyd who was in the party rendered all the medical attention possible under the circumstances.

### Foretold Death.

Miss Pohl seemed to realize that her death was near at hand and told her friends who were near her that her back and both legs were broken and that she had not long to live. It was discovered later that she was mistaken as to her back being broken but one hip was dislocated and her head was badly bruised. She was also injured internally. She did not long survive her rescue.

Mr. Strong, the undertaker of Las Cruces, left yesterday morning to prepare the body for shipment to Belen and the dead girl's father was notified by telegraph. Funeral services were held at the St. James Episcopal church at 7 o'clock last night. It is arranged that the matron of the dormitory, Miss Caroline Daniels and several girls are to accompany the body to its final resting place.

### POSSES SCOURING COUNTRY FOR ROBBERS.

Every Outlet Around San Francisco Is Closed Up by Determined Men and Outlaws are Sure to be Caught.

San Francisco, April 18.—With daylight this morning, fresh posses set out to surround the section in which the robbers who held up the Overland Limited on Saturday night, are believed to be in hiding. Several posses are heading toward Oakland, allowing no gully or cave in the broken country between Martinez and Oakland to escape observation. Every outlet to the thirty miles of the country is being carefully guarded. In this city and all places around the bay the police are guarding every approach, and provided the bandits did not escape by train early yesterday morning, it is believed certain that they will be caught.

## THE DAILY ROUND UP.

### CHILDREN OF THE PLAY.

"These our actors."—Shakespeare.  
(Albert Ellery Bergh, in the Colum-  
bia.)

The stage with glowing fancy teems  
To fill our lives with pleasant dreams  
That chase dull care away;  
With human nature's kindly art  
They soothe and heal the aching  
heart,  
These Children of the Play!

With music, jests and words of  
weight,  
From grave to gay they alternate  
Our sorrows to allay;  
They travel many, many miles  
To wreath the some care-worn face in  
smiles,  
These Children of the Play!

When want and famine blight the  
land  
They lend a loving, helping hand;  
Thus cherish them, I say!  
For they are all that's bright and  
kind,  
With tender heart and strength of  
mind,  
These Children of the Play!

Smith Sues for Divorce—George M.  
Smith has filed suit for divorce at Las  
Vegas against his wife Laura B.  
Smith, who refused to leave Pueblo,  
Colo., to come to New Mexico, accord-  
ing to plaintiff's allegation.

Forester Loses Home by Fire—  
James A. Scott, chief clerk in the for-  
est office at Capitan, Lincoln county,  
lost his residence and most of its con-  
tents by fire last week. While attempt-  
ing to extinguish the flames he re-  
ceived some severe burns.

Fight at Magdalena—Five men en-  
gaged in a free-for-all fight at Magda-  
lena, Socorro county, and all suffer-  
ed more or less badly battered heads  
and a slight dent in their pocketbooks.  
Four of them were fined five dollars  
and costs by Justice of the Peace  
Flores and one Jose Carillo, who is  
charged with starting the trouble,  
will be taken to Socorro by Deputy  
Sheriff Olguin, to work out a fine of  
twenty-five dollars and costs.

Held Under Heavy Bond.—W. T.  
Arnold was held to the grand jury  
at Roswell under a bond of \$10,000  
in connection with the killing of A.  
S. Luckie Wednesday. He readily  
gave the bond. At the preliminary it  
was learned that Arnold did not call  
to Luckie's daughter to bring him  
his gun, and that the girl did not take  
such part in the affair. The statement  
was made by Arnold that Luckie called  
to his wife to bring him his gun.

Sold Tract of Land.—Mrs. Nathan  
Jaffa has sold twenty acres near the  
Country Club to Cyrus M. Ditzler, a  
prominent farmer of Pearl City, Ill.  
The farm is one of the beautiful, high-  
ly developed tracts that surrounds  
Roswell, having five acres in orchard  
and fifteen acres in alfalfa. Mr.  
Ditzler has large farming interests in  
Illinois and is here for his wife's  
health. He will take possession at  
once.—Roswell Daily Record.

Victorio Company Will Except—The  
Victorio Land and Cattle Company,  
whose land, to be submerged by the  
Elephant Butte reservoir the govern-  
ment seeks to condemn, will file a bill  
of exceptions in the office of the clerk  
of the district court at Socorro fol-  
lowing the report of the board of  
commissioners filed this week and  
which placed the damages to be as-  
sessed in favor of defendant company  
at nearly \$200,000. The bill of excep-  
tions, to which Gregorio Gonzales is  
also a party, specifies fifteen items.  
All but four are purely technical. The  
others are as follows: Raising the  
question of the constitutionality of the  
act of Congress under which the pro-  
ceedings were instituted. Alleging  
that the government has not proceed-  
ed in accordance with such act, even  
if constitutional. Alleging that the  
government failed to comply with pro-  
visions of territorial law in regard to  
appropriation of water. Stating that  
the proceedings to condemn the land  
were instituted before the issues in  
the case were determined.

### HOW'S THIS.

We offer One Hundred Dollars Re-  
ward for any case of Catarrh that can-  
not be cured by Hall's Catarrh Cure.  
F. J. CHENEY, & CO., Toledo, O.  
We, the undersigned, have known F.

Faultless  
in every detail.

## MINOR CITY TOPICS

Denver, Colo., April 18.—  
The weather forecast for New  
Mexico is fair tonight and  
Tuesday with light frost in  
northern portion tonight.

College Wins 10 to 7.—St. Michael's  
ball team won a game from the  
Gregg's Peerless team yesterday af-  
ternoon by a score of 10 to 7. In  
the first inning the Peerless boys lost  
the game by errors which netted the  
College boys six runs.

Salmon's Change of Ad.—Attention  
is called to the display advertisement  
of Nathan Salmon's Big Store on  
page eight. The well dressed man  
and the man who desires to be well  
dressed, will be interested in what Mr.  
Salmon has to say about clothes.  
Some one has written that it is "a  
social obligation to look every inch  
a gentleman" and clothes well made  
will greatly assist in giving this look.

Office on Sandoval Street.—Al-  
though it has been some time since  
Justice J. M. Garcia has moved his  
office to his home, 107 Sandoval street,  
a good many people do not seem to  
be able to find it. The justice has  
many callers, however, and he has  
asked them to tell their friends where  
he can be found. The justice has two  
large desks in his present office and  
situated almost in the heart of the  
city, it is easy of access.

Pleasant Weather Again.—The  
weather man sent us good weather  
yesterday, the maximum having been  
63 and the minimum 27 degrees. The  
relative humidity took a drop and re-  
gistered 45 degrees while the lowest  
temperature last night was 35 degrees.  
The fine weather yesterday thronged  
the plaza with people, young and old,  
and the band concert was much en-  
joyed. A year ago today the maxi-  
mum was 68 and the minimum 37 de-  
grees with 88 per cent of sunshine.

Verdicts Returned at Las Cruces.—  
The third judicial district court had  
a busy week. Those who will have to  
account to the territory on charges of  
misdemeanor are: Blacido Gardes,  
charged with larceny, jury trial, found  
guilty; A. L. Lane and C. H. Currier,  
charged with burglary, jury trial,  
found guilty; Fernando Flores, charged  
with larceny, pleaded guilty; Epi-  
fanio Romero, charged with larceny  
of goats, pleaded guilty; A. M. Palm  
quist, charged with writing worthless  
check, default bond with Park R.  
Birdwell, C. Armijo and Kate E. Bird-  
well, in the sum of \$500, alias warrant  
ordered; A. Baum, charged with lar-  
ceny, bond reduced to \$500 and case  
continued to second Monday of next  
term; defendant released on bond fur-  
nished by John Barncastle and Her-  
man Wertheim.

### TEXAS CATTLE SHIPMENTS

CEASE FOR THE SEASON.  
San Antonio, Texas, April 18.—As  
the result of a very generous rainfall,  
the heavy cattle movement which  
began about two weeks ago has been  
brought to an abrupt end and only fat  
beef cattle will be shipped. From  
three to eight inches of rain all over  
southwest Texas have eliminated the  
necessity of shipping cattle to the Ok-  
lahoma and north Texas grass lands  
for conditioning for the market.

The rains also insure a bumper crop  
of cotton for these parts. It is be-  
lieved that the drought which has had  
this territory in its grip for the last  
two years has been broken.

OLIVE OIL

of the best quality is obtained from olives picked before  
maturity and immediately pressed. It is then called  
"Virgin Oil" and has a greenish tinge.

The quality here offered is Virgin Oil of especially fine flavor imported from known  
sources and therefore free from adulteration of any kind.

ZOOK'S PHARMACY

## MAKES RAPID HEADWAY.

Add This Fact to Your Store of Knowledge.

Kidney disease advances so rapidly that many a person is firmly in its grasp before aware of its progress. Prompt attention should be given the slightest symptom of kidney disorder. If there is a dull pain in the back, headaches, dizzy spells or a tired, worn-out feeling, or if the urine is dark, foul-smelling, irregular and attended with pain, procure a good kidney remedy at once.

Your townspeople recommend Doan's Kidney Pills. Read the statement of this Santa Fe citizen:

Jose Ortiz y Baca, Alto street, Santa Fe, N. M., says: "In 1907 I procured Doan's Kidney Pills at Stripling Burrows & Co.'s drug store and used them for pains in my back which had troubled me at intervals for three years. Doan's Kidney Pills brought prompt relief and proved so satisfactory that I willingly gave a public statement in their favor. Now, after two and a half years have passed, I gladly confirm every word of that testimonial. I can add that I have since used Doan's Kidney Pills, giving me more thorough trial and have received the greatest possible benefit. I know that this remedy is a sure cure for backache and kidney complaint."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

## COL. R. E. TWITCHELL

## MAKES A HIT.

He Tells Pueblo of Great Advantage of Hearing National Irrigation Congress This Year.

Pueblo, Colo., April 18.—When R. E. Twitchell of East Las Vegas, N. M., first vice president of the National Irrigation Congress, left here, he expressed himself as not only delighted with the occasion of his visit to Pueblo, but that he was convinced the spirit of Pueblo, the Arkansas valley, and the entire state would carry the big event here next September to a point that the eighteenth sessions would be the most successful in the history of the organization.

Mr. Twitchell spent a busy day and night here. He saw Pueblo, commented earnestly on the complete availability of Mineral palace, was pleased with the hotel situation and conferred constantly with the board of control and its officers in the rooms on the third floor of the Central block. In his speech at the board dinner at the Maine hotel, Mr. Twitchell related some of his own trials in helping conduct a congress, the sixteenth, at Albuquerque, in 1908, when he was secretary of the board of control, and said the benefits and advantages of town and state are inestimable. He cited one instance, that Mr. Canfield of Greeley, who was attracted to a half million proposition in New Mexico by reason with his identity with and interest and attendance at the Albuquerque congress.

More than that, Mr. Twitchell pointed out the great fact that a quarter of a million acres now being brought under reclamation in the Territory of New Mexico, due entirely to the impetus given by the congress.

"The Sixteenth National Irrigation Congress put New Mexico on the map," was Mr. Twitchell's significant statement.

"I have been asked," said Mr. Twitchell, "why I, a lawyer, not engaged even in my law practice in matters pertaining to irrigation, having no land, being interested in no irrigation enterprises, one way or another am so earnestly interested in the work of this congress."

"To all such I say that I consider it a sociological question. We are bringing up in this mountain-west, through irrigation and the work of this great congress, a race of Anglo-Saxons that will commercially dominate the entire world. We are doing this through the stimulus of the land, homemaking, production, all under irrigation. It is a great work, a national and international work, and one to which any good and energetic citizen of the country may give his best effort."

One of the strongest points made by Mr. Twitchell was his suggestion that the officers of the board of control of the Eighteenth Congress bring all their force to bear on the manufacturers of the Mississippi valley. He said the men who make overalls and plows and wagons and implements should be interested in knowing what is being done for agriculture; where the men actually engaged in production are; and that once interested, they will do the rest.

"Commercial supremacy," said Mr. Twitchell, "will make great demands on the American people, and when it comes, the resources will not be in the cities, but in the land of the tillers of the soil. The call will surely be made, and here will the fulfillment of the destiny of the American people be found."

While here in attendance at a meeting of the board of control of the Eighteenth National Irrigation Congress, Pueblo, September 26-30, 1910, and conferring with Secretary Hooker and Foreign Secretary Gray of the national organization, R. E. Twitchell of East Las Vegas, N. M., first vice president of the congress, related an incident that was very interesting.

In 1892, Mr. Twitchell, then a young man and a citizen of New Mexico, for only a few years since he had been graduated from the University of Kansas, was mayor of the city of Santa Fe, capital of the Territory. He went to Chicago to attend mayors' day at the World's Columbian Exposition, and had the honor of riding in the carriage with the famous Carter Harrison, then serving his fourth term as mayor of Chicago, and father of Carter H. Harrison, who later served as mayor for four terms.

"How did you come to have the honor of riding with Mayor Harrison, out of all the mayors of the country there that day?" was asked Mr. Twitchell.

"That is easy," replied the irrigation congress booster. "I was the youngest mayor of the oldest city in the United States."

This was the fact. Mr. Twitchell was only a boy, and had shortly before entered upon the practice of the law at Santa Fe. That town, as everyone knows, is the oldest city in the United States.

"But I was only mayor for about a year," added Mr. Twitchell. "I had 365 days of grief, and I never tried the job again."

In his address to the board of control at its dinner, Mr. Twitchell opened by saying: "I think I have as good a right as anyone to talk to a Colorado and Pueblo audience. Sixty odd years ago, you were a part of the Territory of New Mexico."

This, also, was a fact. For at the time of the war with Mexico, the northern boundary of the Territory of New Mexico ran up to the Arkansas river and included what is now the south side of Pueblo, the Mesa. On this side of the river are located most of the important industries of Pueblo, such as the Colorado Fuel and Iron

## Bakes—Roasts—Broils—Toasts

New Perfection

AUTO TURNS TURTLE;  
FRANK OWEN ESCAPES.

Peak Climbing Was the Program for Party of Autoists But the "Spring" Was Added.

While attempting to scale one of the "peaks" a half mile or more behind the home of A. B. Renahan, to show off the climbing powers of his automobile, Frank Owen had a narrow escape from serious if not fatal injuries yesterday afternoon. His car turned turtle and he saved himself by a magnificent vault just in the nick of time. With him, but several minutes before Mr. Owen took the leap, were Dr. J. M. Diaz, who is one of the greatest auto enthusiasts in the Territory, A. J. Griffin and J. H. Walker. They made a rapid descent from the car before it turned turtle and in order to save it if possible from attempting the feat.

It appears that Mr. Owen has become very proud of his machine and especially likes the ease with which the car can be kept under control. He thought a demonstration of its hill climbing abilities would prove of interest to some of his auto friends and remembering that Dr. Diaz is also a surgeon he seemed to have no fear when he began to seek higher altitudes. All worked well for a while but in some way the car came too close to a deep hole and started the rolling act. Mr. Owen declared that bowling was not in the program and he stuck to the machine trying to steer it shy of the hole. His companions thought another altitude would suit them just as well and lost no time getting out of the machine. Mr. Owen continued steering and suddenly felt as though he were in a Wright flying machine and the propeller had begun to get out of order. Then with a whirl mother earth and the automobile parted company for a second or two. There was a cloud of dust and a whirling sound and a cry of alarm from the three onlookers who expected to find Mr. Owen crushed to pieces. But he had made a record vault, escaping the hole and the machine.

The autoists set to work and took the machine apart finally placing it in running condition again. "I am proud of the material in my car," said Mr. Owen this morning, "and if any one can be prouder than I am it is Dr. Diaz who knows automobiles and had a few of his own in wrecks."

English Mission Begins AT THE CATHEDRAL.

Eloquent Redemptorist Preaches Forceful Opening Sermon—Bell Told Every Evening.

The Rev. Father Vogt, the Redemptorist, who has come here to conduct a mission at the Cathedral for the English speaking Catholics and any one who desire to attend the services, opened the mission at 9:30 o'clock mass yesterday morning. He preached an eloquent sermon in which he outlined the plan of the mission which is to continue a week and said that there will be mass every morning at 6 o'clock for the working people who could not attend the 8:30 mass. The services in the evening will consist of a sermon, rosary and benediction.

In his sermon yesterday morning Father Vogt urged his listeners, who filled the church, to attend all the exercises connected with the mission, pointing out the resemblance of these series of services to a chain, all of the links of which are necessary to give it strength. He said there is no telling at which particular exercise or devotion Divine grace may enter

BAKES bread, pie and cake—bakes them perfectly all through, and browns them appetizingly.

ROASTS beef, poultry and game with a steady heat, which preserves the rich natural flavor.

BROILS steaks and chops—makes them tender and inviting.

TOASTS bread, muffins, crackers and cheese.

## OFFICIAL PAPER OF SANTA FE COUNTY.

The New Mexican is the oldest newspaper in New Mexico. It is sent to every postoffice in the Territory, and has a large and growing circulation among the intelligent and progressive people of the Southwest.

## SOMEWHAT OF A GUESSER.

The interest in the census returns has become so great that bets are being laid on the probable population of New Mexico and its principal counties and towns. Those of a statistical turn of mind are making forecasts to see how near they come to the actual report and the census office at Santa Fe is already receiving inquiries for the population figures as soon as compiled. However, these figures cannot be given out at Santa Fe, but will be first announced from Washington. While the census office at Santa Fe, expects to know by June, the actual population, at least, approximately, the official compilation may not be published until September or October. The Albuquerque Journal, publishes a forecast by J. E. Larnard, which will probably come very near the truth. Says Mr. Larnard:

"As the attention of the people is quite generally directed to the fact that a census of the United States is to be taken this year, I thought an article treating of census taking in this and other civilized countries would be timely, and might be interesting to your readers. I am aware that statistics as a rule are considered dry and uninteresting to the average reader. They were never so to me, however. I take delight in them, and have spent many hours of time, as I think profitably, in studying them. Some of the Roman emperors desired to know the number of their subjects, and attempts were made to ascertain the facts, but there does not seem to be any record of a general census of the Roman empire. The census of a country, as we understand the term, is to ascertain the correct number of the inhabitants with other information that may be sought, and to be taken at regular and stated intervals of time. It is of quite recent origin, in fact was established first in this country. Our constitution provided for one to be taken in the United States in 1790 and in every ten years thereafter, and the one of this year will be the thirteenth. The main purpose at first was to secure a correct count of the inhabitants, but Congress has enlarged the scope and plan at various times so that ours now is the most complete and exhaustive census that is taken by any nation. England and France each took their first census in 1801 and they take one every ten years. In 1871 Great Britain included India and other possessions, and their population appears in every census since that time. The Emperor Nicholas of Russia, before his death in 1855, ordered that a general census of the Russian empire should be taken in 1857, and every twenty years after. The last one in that country was in 1897, and the next will be in 1917. The large cities of Russia take more frequent enumeration. Austria-Hungary, Italy, Belgium and other small countries in Europe take a regular ten-year census. Japan takes her census every five years.

"The first census of the German empire was taken in 1871, and there has been one taken every ten years since. The noted statistician Ravenstein estimates the total population of the world at this time at 1,520,000,000, of which number about 600,000,000 live in countries that have never taken a census. The population of North America will be found by the United States census this year and the census of Canada, Mexico and the smaller countries is 1911, to be about 715,000,000, of whom nearly 80 per cent, or 90,000,000, live in the United States. I have made an estimate by states and territories, that gives a total of 90,505,000. I made a similar one early in 1900, and came within 400,000 of the actual result. In that my estimate for New Mexico was 200,000, and the census showed 195,310. This year my estimate for New Mexico is 345,000, which would give an increase for the ten years of 150,000, and a per cent of increase of 76, as compared with an increase of 41,717 and a per cent of 36 for the ten years ending in 1900. I estimate the city of Albuquerque at 12,500, and the suburban towns of Bernalillo and Old Albuquerque at 4,500, making 17,000, that ought to be considered in the city. The county of Bernalillo, about 25,500. I think there is a close race on between this county and San Miguel, as to which is the most populous county in New Mexico. I don't think there is more than 1,000 difference between them.

"Estimated population of states and territories in 1910:

Alabama .....	2,125,000
Arizona .....	200,000
Arkansas .....	1,500,000
Alaska .....	100,000

California .....	1,800,000

Wyoming .....	135,000
Total .....	90,505,000

It seems as if the death roll of distinguished citizens of New Mexico, has been especially long the past year. Yesterday two more names were added. Hon. Antonio Joseph of Ojo Caliente and Editor W. S. Burke of the Albuquerque Morning Journal. Both well along in years, they wielded a great influence in the formative period of this commonwealth. It was only death that links their names together in today's newspapers, for they were workers in different fields although both were zealous for the advancement of New Mexico.

Mr. Joseph in the political field was a host in himself and represented the Territory ably in Congress. His kindness of manner, his generosity, his liberality in thought made him a great man. He was not a mere narrow politician and his broadness of character made him well beloved even in the camp of the enemy.

Mr. Burke was New Mexico's most forceful editorial writer. He wielded a classic and a powerful pen and often those who knew him, wondered how so gentle and lovable a character could pen so bitter an editorial that made even the bravest wince. But it was in the performance of what he deemed his duty that he scourged the politicians and those whom he deemed enemies of the public good, and if the political atmosphere of New Mexico is cleaner today than ever before, much of it is due to Editor Burke, even though he may have at times done an injustice and inflicted cruel hurt where it was not deserved.

The editor of the Gazette at Questa, Taos county, forgets that newspapers often use the scourge and have succeeded in uncovering crime and graft and bringing them to punishment when all other agencies failed and the most powerful influences sought to smoothe over matters. It is true, that a wise editor will not take sides in every quarrel, or denounce every petty falling of those around him, or is often slow to cast stones at an erring mortal, but there are occasions when the true newspaper smites right and left without fear or favor. However, in general, it is true when the Gazette says:

"A certain writer has said that no newspaper which took truth for its standard would make a pecuniary success. The press might return the compliment by remarking that no minister who told the truth about his congregation, alive or dead, would occupy the pulpit much longer than one Sunday afterward. The press and clergy go hand in hand with the white-wash brush, rosy spectacles magnifying little virtues and kindly throwing little deformities into oblivion. The pulpit, the pen and the gravestone are partners in saint making."

"Barbarous Mexico" has found more than a rival in "Barbarous Mississippi" and "Barbarous Tennessee."

The men who twenty years ago declared that the greater part of New Mexico would always remain an open range because of the lack of water took no account of the underground waters nor the habits of scientists who are accustomed to overcome what seem to others insuperable obstacles. Says the El Paso Herald, of one portion of New Mexico, always thought to be about the driest to be found anywhere:

"At Columbus, N. M., less than three hours of railway travel west of El Paso, in a region until lately regarded as fit for nothing but grazing and not very fit for that, a well has been sunk that supplies water sufficient for 160 acres, using modern irrigation methods. The water comes to within three feet of the surface. The great basin known as the Mimbres valley, though apparently dry on the surface, carries an abundance of water underground easily accessible. Within a few years this entire section will be settled by home makers and transformed into a farming region of wonderful richness.

"Every acre of the Rio Grande basin can be brought into cultivation through pumping the underground waters, and the 200,000 acres to be reclaimed by the Rio Grande project will represent not more than one-half of the acreage to be eventually reclaimed for agricultural purposes. Here is our greatest asset, and it is not at all to our credit that we are letting it lie idle and comparatively unproductive."

Strange to say, even the Democrats enjoy the reduction in the tax rate, although it robs them of the best campaign argument they had. Says the Carrizozo News, paying indirect tribute to Republican financial management:

"This reduction of 3.45 mills means that Lincoln county will next year keep something like \$7,000 at home, which, at the old rate, would go to the territory. And just here is where we have been 'dug' for years. With this announced reduction in the territorial rate, the difference in individual payments of taxes should be noticeable. The county rate may be reduced in some particulars, especially in the court fund. We now have a very large court fund and an increase in the valuation will permit a decrease in the rate and yet produce sufficient revenue for two terms of court a year, a condition that has not existed in this county for many years. Therefore, it is with pleasure we make the foregoing announcement; for we know it will be received by the tax payers in the same spirit."

Of the good work that the Territory is doing in road building, the Carrizozo News speaks as follows:

"The territorial road crew, under Assistant Engineer Lewis, began work on the Nogal hill last Friday, and from the rapidly the work has proceeded to date, that hill will soon cease to be an impediment to the traveler. A long stretch has already been cut out and leveled up, and the work presents the appearance of a railroad grade. About forty men are employed on the job, and the work promises to be completed in a reasonably short time. This hill is practically in the center of the county, and must be crossed by most of the travel from east to west. Its completion, on the plans outlined, means a great deal to Lincoln county."

The New Mexican hopes to speak similarly soon of the completion of the Scenic Highway to the Pecos from Santa Fe, now that ample funds are available.

The movement to establish four more land offices in New Mexico is caused by the rushing of the five existing land offices and the fact that the people tributary to Taos, Farmington, Socorro and Fort Sumner have such a long way to go to the land office now having jurisdiction. Last year, the newest land office of the Territory, that of Tucuman, took in the enormous sum of \$166,333.99 in fees. There were two thousand filings in 1909, in that one office alone; also 1676 land contests while almost a thousand homesteaders were patented. This gives a glimpse of the growth of the Territory, for, the Tucuman office has jurisdiction of the smallest of the five land districts of the Territory, while the Santa Fe office covers an area larger than that of New Jersey, Maryland, Connecticut and Massachusetts combined.

There is talk of the Republican city council making life miserable for the Democratic mayor of Santa Fe. The New Mexican hopes that there is no truth in it. Just now, the welfare of Santa Fe is far above any party political consideration, and those who would block Mayor Seligman's efforts to give this city an efficient police force and a progressive and economical municipal administration may be loyal to their party but they are traitors to their town.

The editor of the Swastika, published at Des Moines, Union county, brags in last week's issue that he has been fighting the Socialists, the leaders of the Republican party, foreign missions and the pope. Good thing he advertises the fact or the parties attacked would never have known it. There are people in Santa Fe too, whose long suit is fighting but never hurting anything or anybody but themselves.

Wish those tardy senators could hear the way the census returns are dropping into the New Mexico's supervisor's office. If they did they would pass that statehood bill poco pronto.

The First National Bank  
OF SANTA FE.

The Oldest Banking Institution in  
 New Mexico. Established in 1870

Capital Stock ..... \$150,000  
 Surplus and Undivided Profit ..... 80,000

Transacts a general banking business in all its branches. Loans money on the most favorable terms on all kinds of personal and collateral security. Buys and sells bonds and stocks in all markets for its customers. Buys and sells domestic and foreign exchange and makes telegraphic transfer of money to all parts of the civilized world on as liberal terms as are given by any money transmitting agency public or private. Interest allowed on time deposits at the rate of three per cent per annum, on six months' or years' time. Liberal advances made on consignments of livestock and products. The bank executes all orders of its patrons in the banking line, and aims to extend to them as liberal treatment in all respects, as is consistent with safety and the principles of sound banking. Safety deposit boxes for rent. The patronage of the public is respectfully solicited.

S. C. Hall, a hardware salesman from Trinidad, is at the Claire.

Former U. S. Attorney Earl Cranstons of Denver, who spent the past few days in Santa Fe on irrigation matters left for his home this afternoon.

Miss Jessie Fairfield of Chicago is the guest of her brother C. W. Fairfield at the Nussbaum residence on Washington avenue. It is likely that she will stay for a month.

**WILLIAM SMITH BURKE**  
LAYS DOWN PEN.

Death Comes to Nestor of New Mexico Journalism—For Twenty-Nine Years Editor of Albuquerque Journal.

Albuquerque, N. M., April 18.—William Smith Burke, for the past twenty-nine years editor of the Albuquerque Morning Journal, Nestor of journalism in New Mexico and for more than a quarter of a century one of the most widely known and most influential members of the profession in the west, died Saturday afternoon shortly after 4 o'clock, at the home of his son-in-law, Dr. James H. Wroth, corner of Fifth and Copper avenue, at the age of 73 years. At the end Mr. Burke was surrounded by the members of his immediate family, his wife and children and those who have been nearest to him in his home life. The end was very peaceful and had been anticipated for several days.

With the rare nervous vitality that was one of his remarkable characteristics, Mr. Burke, although never robust and although of late strength had been leaving him rapidly, continued to perform his duties until about ten days ago, when he was forced by extreme physical weakness to allow himself to be taken to his home on West Coal avenue. A few days later he was taken to the home of Dr. Wroth that he might have more constant medical attention. For the past three days, however, he had been unconscious and he passed away in sleep as peacefully as a child. The funeral services will be held at the home of his son-in-law, Dr. Wroth, at 10 o'clock Tuesday morning, April 19. The service will be in charge of the G. K. Warren Post, Grand Army of the Republic, and the friends of the deceased are invited to attend. The interment will be in Fairview cemetery.

Besides his wife, Mr. Burke is survived by one daughter, Mrs. James H. Wroth, and one son, Wallace Burke, both of Albuquerque, also by two brothers, Hugh M. Burke, of 2012 Devisadero street, San Francisco, for twenty years an editorial writer on the San Francisco Call, and for many years connected in an official capacity with the National Soldiers' Home there; and Finly Burke of Council Bluffs, Ia.

For fifty-nine years, practically without intervention, Mr. Burke followed his chosen profession of journalism. He was born in West Virginia in November, 1837. He lived in Wheeling as a small boy and there received his primary education. At about fifteen years he removed to western Iowa with his parents and there learned the printer's trade.

Following the war, Mr. Burke went to Leavenworth, Kan., where he became associated with Colonel D. R. Anthony, the famous editor of the Leavenworth Times. For much of the time of his connection with that great newspaper and while in Leavenworth was the principal city of the Missouri river territory. Mr. Burke was practically the editor of the Times. He took a very active part in the development of Leavenworth and in the building of the newspaper.

Always a pioneer; always a developer, Mr. Burke followed the westward movement of population and came to New Mexico in 1880. He was one of the first residents of the new city of Albuquerque, and in 1881 founded the Albuquerque Journal. In this venture he had as his associates and backers Governor E. S. Stover, Mr. Hazledine and Mr. Smith, Governor Stover is the only one of the four now living. Mr. Burke, with a single brief interval of about two years when he was connected with another newspaper, has been the editor of the Morning Journal.

From this he passed quickly into writing and played an active part in the earliest development of the state, up to the opening of the Civil war. When the war broke out he at once enlisted in an Iowa infantry regiment with which he served up to the battle of Shiloh. Participating in this battle, Mr. Burke contracted a severe case of rheumatism which left him completely incapacitated for duty. He was retired with the rank of captain. His service to his country made him, while not an invalid, yet a man of delicate health for the rest of his life.

Following the war, Mr. Burke went to Leavenworth, Kan., where he became associated with Colonel D. R. Anthony, the famous editor of the Leavenworth Times. For much of the time of his connection with that great newspaper and while in Leavenworth was the principal city of the Missouri river territory. Mr. Burke was practically the editor of the Times. He took a very active part in the development of Leavenworth and in the building of the newspaper.

## PENNSYLVANIA COAL ON UPPER PECOS.

Uncommon Formation Discovered in Several Localities in Territory Described by J. H. Gardner.

(From Mines and Minerals.)

It is well known that west of the Great Plains, the Pennsylvania series is represented by beds chiefly marine in character. The nature of these beds testifies to the marked contrast in the physiography of the western as compared to the eastern portion of the United States toward the close of Carboniferous time. There is evidence, however, to show that occasionally the floor of the western Pennsylvania sea was elevated sufficiently to bring about fresh-water conditions and the accumulation of carbonaceous deposits.

The carbonaceous beds in the Pennsylvania west of Kansas and Nebraska consist chiefly of dark shales intercalated between beds of limestone and sandstones bearing marine fossils. But even beds of coal are found in like position.

Blake and Dumble have described a trace of coal of poor quality in the

Carboniferous of Arizona occurring in the Chiricahua mountains, the San Carlos region, and northward. No use has ever been made of this coal because of its limited thickness, low fuel value, faulted conditions, and the effects of intrusives. At one point in the Chiricahua mountains the bed has been metamorphosed to graphitic anthracite.

In 1906, Keyes writing briefly under the subject "Carboniferous Coal Measures of the Southwest," mentions the occurrence of limited quantities of coal in the Carboniferous of the Rio Grande valley. No sections nor thicknesses of coal beds are given in this article. He states that Carboniferous coals have been generally unknown in the west and "it is therefore, of considerable interest that in central New Mexico, coals of the Carboniferous age have been recently discovered." The following is quoted from the third paragraph of his paper:

"The name of this coal-bearing sequence, the Ladronean series, is taken for the Sierra Ladrone, near which place, important outcrops of the formation occur. The known area of the coal-bearing series is quite limited; however, it is surmised that the formation will eventually be found widely distributed, though probably in more or less isolated areas. The known exposures are confined to the Rio Grande valley in the Sierra Ladrone, about 30 miles north of Socorro, and also in the foothills of the Sierra Filicia, 10 miles east of the same town" (Socorro.)

Lee mentions traces of thin coal beds associated with one member of a general section in the Pennsylvania one mile east of Rowe, N. M., but the writer is unable to find any description in literature of the beds reported in the following paragraphs.

On the Rio Pecos, in the western portion of San Miguel county, N. M., Pennsylvania coal has been mined in and near the base of about 1,400 feet of limestones with occasional sandstones and thin beds of clay shale. These beds rest directly on the pre-Cambrian complex of the Santa Fe range. Above the lower or limestone division of the Pennsylvania containing the coal, there occur over 2,000 feet of red beds consisting of sandstones conglomerates, shales, and some limestones; these beds belong to the Carboniferous system with the possibility of the Permian series being represented at the top.

The lower or limestone division contains an abundant invertebrate fauna. Five lots were collected from above and below the coal, all of which represent closely related faunas and evidently belong to the same fauna. Among the fossils are Zaphrentis sp.,

Productus inflatus, Productus aff. wallacianus, Marginifera aff. muricata, Marginifera aff. splendens, Phynchopora illinoensis, Squamularia perplexa, Clythyridina orbicularis, Hustedia Morrisoni, Phillipsia sp., Derbya bennetti, Composita subtilita, Cyathoxonia sp., Rhombopora lepidodendroides, Derbya cymbola, Spirifer, cameratus and Spirifer rockymontanus. Dr. George H. Girty, who made an examination of the fossils is disposed to think they belong rather low in the Pennsylvanian series.

The coal is exposed in two localities. In the NE 1-4 of the SE 1-4, sec. 5, T. 16 N., R. 12 E., and in the NE 1-4 of the NE 1-4, sec. 28, T. 18 N., R. 12 E., N. M. Principal Meridian. Several years ago, a drift was made in the bed in T. 16 N., R. 12 E., and considerable coal taken out for local use and for experiments in making coke. The bed ranges from less than one foot to more than three feet in thickness; the floor is fireclay and the roof consists of about two feet of clay shale capped by calcareous sandstone 10 feet thick, grading upward into limestone. The coal is very poor in quality and evidently contains a large percentage of mechanically mixed argillaceous material. Some cleavage faces are bright and it might be possible to wash it so as to produce a good quality of fuel. A poor grade of coke has been made from this coal as taken from the mine, but the probabilities are it will never be developed for this purpose. The bed is likely not persistent enough in thickness to justify the erection of a washing plant or coke ovens. About 300 feet back from the entrance of the drift the coal thins to one foot in thickness. At a distance of one-half mile in either direction along the outcrop, the bed apparently thins out and disappears. It is quite probable that future prospecting will show coal of workable thickness at local points on this same horizon.

The coal in T. 18 N., R. 12 E., is exposed by a drift in the west cliffs of the Rio Pecos, as is the case of the previously mentioned bed. The two beds occupy practically the same horizon in the Pennsylvanian rocks, but they are separated geographically by more than 8 miles of barren strata. The drift in T. 18 N., R. 12 E., was made by the Pecos Copper Co., of Cowles, N. M., with the hope of finding a sufficient quantity of good coal to use in connection with the reducing of metallic ores.

The coal bed exposed in the drift rarely exceeds 15 inches in thickness. It has a bituminous shale roof one foot thick beneath heavy sandstone, while the floor is sandy shale. In quality the coal is similar to that described in a previous paragraph. This coal has been used for local purposes at Cowles with fair satisfaction.

The above description bears additional testimony that the beds of the Pennsylvanian in the Rocky mountains do not represent, in their entirety, the coalless phase of that series.

## FIGHT THOSE WHO SOUGHT TO SAVE HER.

Horrible Agony of Woman Who Took Poison Because She Could Not Bear Husband.

San Antonio, Texas, April 18.—With grim determination to end a life that to her seemed a burden she could no longer bear Anastasia Villareal, 23 years of age, married and pretty, fought off for hours physicians and members of her family who implored her to permit them to do something to counteract the effects of the deadly poison she had swallowed. Though she suffered excruciating agonies as the result of having taken a dose of rat poison, she rejected every offer to have her pains alleviated or her life saved.

The woman took the poison at eight o'clock in the evening and shortly afterwards her groans attracted the attention of her family. Medical aid was summoned immediately and there is no doubt that she would have been saved had it been possible to administer an antidote. But neither entreaty nor force made this possible. Though her agonies were horrible to behold the woman did not utter a complaint during the long hours that elapsed before her end came at five o'clock next morning.

Domestic trouble with her husband, whom she had married but a few weeks ago, are said to have been the cause of the tragedy.

## NEW MEXICO STOCKMEN HAVE ANOTHER ENEMY.

Caterpillars Are Destroying the Range in Northwestern Portion of the Territory.

A very unusual and serious state of affairs has recently been found to exist in northeastern New Mexico, where the caterpillar of a large moth has been attacking the grass and cattle ranges in increasing numbers and over continually widening areas, says a dispatch from Washington. Hundreds of acres were ravaged last year, leaving the ground as bare as if it had been burned over. In October and early November the moths swarmed over the country, flying long distances, and depositing their eggs in millions. The pest bids fair to render a great extent of territory absolutely worthless for grazing, unless something can be done to fight it.

This particular work is under the charge of F. M. Webster, an entomologist of high reputation, who was formerly connected with the agricultural experiment station in Ohio. His division of the bureau attends to the

## Cough Caution

Never, positively never poison your lungs. If you cough—even from a simple cold only—you should always heal, soothe and ease the irritated bronchial tubes. Don't blindly suppress it with a stupefying poison. It's strange how some things finally come about. For twenty years Dr. Shoop has constantly warned people not to take cough mixtures or prescriptions containing Opium, Chloroform, or similar poisons. And now—a little late though—Congress says "Put it on the label! Very good! Hereafter for this very reason mothers, and others, should insist on having Dr. Shoop's Cough Cure. No poison marks on Dr. Shoop's labels—and none in the medicine, else it must by law be on the label. And it's not only safe, but it is said to be by those that know it best, a truly remarkable cough remedy. Take no chance then, particularly with your children. Insist on having Dr. Shoop's Cough Cure. Compare carefully the Dr. Shoop package with others and note the difference. No poison marks there! You can always be on the safe side by demanding

## Dr. Shoop's Cough Cure

STRIPLING BURROWS CO.

business of fighting insects which attack food crops and forage crops—such, for instance, as the Hessian fly, the wheat-straw worm and the much-feared "green bug" of the southwest.

## S.S.S. UNEQUALED FOR BAD BLOOD

Normal, healthy blood contains millions of tiny red corpuscles, which are the vitalizing and nourishing element of the circulation. These corpuscles are constantly forming in healthy systems by the extraction of nutriment from food eaten, and this nutriment is then supplied through the circulation to every portion of the system. Any system which does not receive the proper amount of blood nourishment is not prepared to withstand the countless disorders that assail it. Bad blood can not nourish the body, the circulation must be pure, rich and strong if we would enjoy good health. Bad blood manifests itself in various ways. With some it takes the form of skin diseases and eruptions, others become bilious and malodorous, with sallow complexions, torpid liver, etc. If the germs and impurities in the blood are of a more virulent nature than bad blood becomes more serious and produces Rheumatism, Catarrh, Sores and Ulcers, and like troubles. Nothing equals S. S. S. for bad blood. It is Nature's own blood purifier, made from roots, herbs and barks. It goes into the circulation and removes every impurity or poison, strengthens and enriches the blood, and in this way supplies the body with the proper amount of nutriment to maintain good health. S. S. S. is likewise the finest of all tonics and while purifying the blood builds up every portion of the system. S. S. S. cures every ailment coming from bad blood, and it does so simply because it purifies the circulation. Book on the blood sent free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

THE RECENT FLOODS  
IN THE SEINE.A Comparison With River Floods in  
the United  
States.

The recent floods in the Seine at Paris has been noted with great interest by American engineers, especially in connection with the several projects for preventing damage by similar floods in the future.

## Size of Basin of the Seine.

The Seine is the fourth largest river in France, ranking in size below the Loire, the Rhone, and the Garonne. Its drainage basin (30,370 square miles) is larger than that of the Susquehanna (27,400 square miles) or of the Sacramento (27,100 square miles.)

## Flow of the Seine at Paris.

Paris, however, stands 226 miles above the mouth of the Seine, measured along its course, and the area drained by the river above the city is only about 17,600 square miles. The mean discharge of the Seine at Paris is about 9,000 cubic feet per second (or, as engineers phrase it, "second-feet"); its greatest discharge in the flood of 1876 was 58,600 second-feet; its discharge at the height of the recent flood (January 27, 1910) is reported to have been 83,500 second-feet. This is less than one-eighth the flood flow of the Susquehanna in 1889 (720,000 second-feet) and less than one-fifth of the flood flow of the Potomac at Washington, in the same year (470,000 second-feet), when boats were paddled along Pennsylvania avenue, in the heart of the city.

## A Relatively Narrow Channel.

The Seine at Paris runs between stone walls in a channel that is spanned by many bridges. The width of this channel may be seen by noting that the largest and finest of these bridges—the Pont Alexandre Trois—is but 352 feet long. The construction of the flood water within this relatively narrow channel was impossible, so it overflowed a large area along the banks of the Seine.

## Extent of the Flood Damage.

Some of the Paris newspapers have deplored what they have called the exaggerated foreign accounts of the flood, but no complete or trustworthy estimate of the damage done has yet been made.

The Economiste Francais says: "It is desirable to challenge many of the statements that have appeared to the effect that the national wealth has been seriously diminished and that it will be necessary to contract large public loans to cover the expenditures involved."

M. Rene Tavernier, engineer of the French department of public works (Points et Chaussees), writes

to M. O. Lighton, chief hydrographer of the geological survey:

"No bridge has been seriously damaged. The underground works, the sewers, and the tunnels of the Metropolitan Railway have in general withstood the flood perfectly, despite the abnormal pressure to which they have been subjected by the encroachment of the water. The damage, so far as public works are concerned, affects principally the docks, excavations and unfinished works."

The details of the several projects proposed to prevent future overflows of the Seine at Paris will be studied with general interest when they become available.

## Cost of Floods in the United States.

Engineers of the United States Geological Survey estimate the annual damage by floods in the United States at \$100,000,000. It is too early, perhaps, to undertake to prevent or to diminish this immense loss, but its very magnitude invites a serious study of means of prevention, and the recent misfortune of France may lead to practical work that will serve as an object lesson to America.

## Flood Studies by the Geological Survey.

Studies of floods are contained in the United States Geological Survey's Water Supply Papers 88, 92, 96, 147 and 162. Water Supply Paper 88, by G. B. Hollister and M. O. Leighton, discusses the flood in the Passaic in 1902; Water Supply Paper 92, by M. O. Leighton, discusses the Passaic flood of 1904. The three other papers cover floods in the United States in 1903, 1904 and 1905. Copies of all these papers can be obtained without charge by applying to the Director of the Survey at Washington.

UNCLE SAM'S NEW WAY  
OF BUYING COAL.

The United States government buys about seven million dollars' worth of coal every year for use in the navy, in public buildings in Washington and other cities, and for other purposes, about one-third of it—mainly coal used in public buildings—on specifications under which prices are fixed according to the value or quality of the coal delivered by the successful bidder. A definite standard of quality for the coal thus purchased is specified by each bidder and this standard is considered in awarding the contract. If the value of the coal furnished is below the standard fixed a discount is made from the contract price; if its value is above the standard an allowance is made for the excess of value and a proper sum is paid in addition to the contract price. The value is determined by tests and analyses made by the Geological Survey on samples taken from the coal furnished by the contractor. These an-

Special Offer  
to owners of  
Edison Phonographs

Unless your Phonograph is of the latest type it will not play Amberol (four-minute) Records without the Amberol attachment. Without this attachment it is furnishing only half the entertainment it should.

To introduce Amberol Records into your home and demonstrate the added advantage of having an Edison Phonograph that will play both the Edison Standard and Edison Amberol Records, any Edison dealer is authorized to equip your Phonograph with an Amberol attachment at a small charge—\$4.00 to \$7.50—according to the style of instrument you have, and give you, for \$1.00 additional, ten specially made four-minute Amberol Records. That is

Ten Amberol Records for \$1.00  
If You buy the Attachment

These special Amberol Records are not for sale and will not be listed. They have been made for this special purpose. Go to any Edison dealer and hear them. Then you will realize what an Amberol attachment means to you. If there is no dealer near by, write us.

Edison Phonographs ..... \$12.50 to \$200.00  
Edison Standard Records ..... 35c  
Edison Amberol Records (play twice as long) ..... 50c  
Edison Grand Opera Records ..... 75c to \$2.00

National Phonograph Company, 75 Lakeside Avenue, Orange, N. J.

alyses and tests show the quality of the coal in terms of fixed carbon, volatile matter, sulphur, ash, and moisture, and especially its heating value in British thermal units, as determined by calorimetric tests.

## The Old Way.

Until within a few years the agents of the government, in buying coal, relied upon the integrity of the dealer and the reputation of the mine or district from which the coal was obtained, and these formed the only possible assurance that the coal was equal in quality to the grade to be furnished. The new method has been so successful that it will probably be gradually extended to cover a larger share of the government's fuel supply.

## Bulletin Explaining New Method.

A full statement of this method of buying coal is contained in a recent bulletin of the United States Geological Survey (Bulletin 428) entitled "The purchase of coal by the government under specifications with analyses of coal delivered for the fiscal year 1908-9" by George S. Pope.

The bulletin includes a statement of the factors affecting the value of coal, a description of the methods adopted for sampling and testing, a form of specifications used under the new plan, a list of government contracts for coal for the fiscal year 1909-10, and a table

of analyses of coal furnished for the fiscal year 1908-9.

The new plan has not yet been applied to fuel purchased for the vessels of the United States navy, but does cover about 400,000 tons of coal bought for use on the Isthmus of Panama and about 140,000 tons used on steamers plying from New York to Colon.

IMPORTANT ANNOUNCEMENT  
TO NEW MEXICO COLLEGES.

Prizes Offered for the Best Essays on  
Economic Subjects by Chicago  
Business Men.

An opportunity to compete for economic prizes amounting to \$2,000 has again been given to the students of the New Mexico colleges. The invitation comes from Prof. J. Laurence Laughlin of the University of Chicago, who is chairman of the committee in charge of the contests.

The prizes have been offered from year to year by Hart, Schaffner & Marx for the past six years and have brought out so many excellent studies of commercial and economic subjects that they are now renewed for the seventh year.

The subjects of the essays cover such important topics as:

The value of protectionism to American workmen.

The economic reasons for or against building a deep waterway from the Lakes to the Gulf.

The valuation of railways.

The effect of modern immigration in the United States.

The value of organized speculation.

The history of the rate of interest in the United States.

The universities whose students have produced winning essays in the past are Washington and Lee, University of Chicago, Harvard, Oberlin College, University of Wisconsin, University of Pennsylvania, University of Illinois, Wesleyan University, The Branch Normal College of Pine Bluff, Ark., Northwestern University, University of Michigan and Bowdoin College. Some of the essays have been of such merit that they have been published in book form.

The prizes are to be divided as follows:

Class "A," first prize \$1,000; second prize \$500.

Class "B," first prize \$300; second prize \$200.

Class B includes only those who at the time the papers are sent in, are undergraduates of any American college; class A includes any other Americans without restrictions. A contestant in Class B is eligible to a prize in Class A.

Members of the committee in charge of the essays are as follows:

Prof. J. Laurence Laughlin, University of Chicago, chairman.

Prof. J. B. Clark, Columbia University.

Prof. Henry C. Adams, University of Michigan.

Horace White, Esq., New York City.

Prof. Edwin F. Gay, Harvard University.

## MARKET REPORT

## MONEY AND METALS.

New York, April 18.—Call money 2 1/2@3 per cent; Prime mercantile paper 3 1/2-4; Mexican dollars 44; Amalgamated 76 3/8; Atchison 114; New York Central 124 1/8; Reading 166 1/2; Southern Pacific 127 3/4; Union Pacific 187; Steel 86 1/4; pfd. 121 3/4.

New York, April 18.—Lead dull, spot 43 1/2@44 1/2; copper dull, standard spot and May 12.70@12.85; Silver 53 3/8.

## GRAIN, PORK, LARD AND RIBS.

Chicago, April 18.—Wheat—May 106 1/2@107 1/8; July 101 1/8.

Corn—May 57 1/8@58 1/4; July 60 1/2.

Oats—May 42 1/8; July 40.

Pork—May 20.60; July 20.90.

Lard—May 11.85; July 11.85.

Ribs—May 11.87 1/2; July 11.75.

## WOOL MARKET.

St. Louis, Mo., April 18.—Wool, steady; territory and western mediums, 22@24; fine mediums, 18@20; fine, 11@14.

## LIVESTOCK.

THE FAMOUS "FLOWER GIRLS"  
"A Stubborn Cinderella" to Be Played at the Elks' Theatre Wednesday Nig ht.

## Plays AND Players

The first act of "A Stubborn Cinderella," the latest musical comedy success of Messrs. Hough, Adams and Howard, authors of "The Time, the Place and the Girl," "The Goddess of Liberty" and other successes, is laid on the campus of the University of Columbus, at the unveiling of a statue. The second act depicts a realistic railway wreck and the third an Orange Fete at Del Coronado Beach, Calif. The plot of the piece is interesting and unusual and concerns the daughter of a Scottish Earl who has never spoken to a stranger. She is among the guests at the unveiling of the statue of Columbus and meets Mac, the leader of the college, with whom she falls in love at first sight. She, however, is engaged to Grand Duke Boris, so

Colonel Hunt, her body-guard, interrupts the affair with Mac. The young couple meet next at an Orange Fete in Del Coronado Beach, Cal., where Lady Leslie is to see for the first time her affianced husband, Grand Duke Boris. It is here that she becomes obstinate and chooses Mac.

Homer B. Mason, a great favorite

with local play-goers, will be seen as Mac, and Carolyn Lilla is the prima donna. Others prominent in the cast are Bessie Merrill, Marguerite Keeler, Frank Carter, Don MacMillan, Geo. Romaine, O. H. Samson, Tessie McAdams, Bessie Graham, James P. Houston, Walter Hofs, and many others, including a chorus of forty beautiful girls who can sing, dance and act.

"A Stubborn Cinderella," is beautifully staged and the costumes of the show girls will prove a delight to the feminine eyes, being noted for their

gorgeousness, beauty and originality. The slang which played such a prominent part in the authors' other successes, has been eliminated entirely in this, which deals with the smart set. Among the song hits, which number sixteen, are "Love Men Just Because," "What's the Use," "Don't Be Cross With Me," "I'm in Love With all the Girls I Know," "None but the Brave Deserve the Fair," "When You First Kiss the Last Girl You Love," and many others.

At the Elks' theatre on Wednesday night. The seat sale is at Fischer's drug store.

the employ of the New Mexico cen-  
sus bureau as a temporary clerk.**Regent for University.**  
Governor Mills today accepted the  
resignation of E. S. Stover as a re-  
gent of the University of New Mexico  
at Albuquerque and appointed Post-master R. W. Hopkins to succeed him.  
**Resigned as Trustee.**W. F. Buchanan of Tucumcari to-  
day resigned as a trustee of the ter-  
ritorial asylum for the blind at Ala-  
mogordo.**District Court.**  
District court for Santa Fe county  
reconvened this forenoon and several  
cases were set for a hearing before  
Judge John R. McFie this afternoon.**National Guard Inspection.**  
Adjutant General A. S. Brookes is  
much pleased with the result of the  
National Guard inspection. Every  
company except one showed up very  
well and in all 639 men out of a total  
strength of 750 reported at the inspec-  
tions. The light battery at Roswell  
had 112 men in rank at the inspection.**Educational Trips.**Superintendent of Public Instruction  
J. E. Clark and Professor Pettingill  
were at Las Vegas yesterday and to-  
day and tomorrow will be at Wagon  
Mound from where they will go to  
Bernalillo and Albuquerque.**Sandia Pueblos Do Not Want to Be**

Counted.

The Indians of the pueblo of Sandia  
in Sandoval county are in rebellion  
against the Census Enumerator Pablo  
Lujan and have emphatically refused  
to answer his questions. Superintendent  
Perry has been appealed to and  
hopes to convince the wily Indian that  
the enumerator means him no harm.  
U. S. Indian Attorney F. C. Wilson  
and Special Agent Elmer Marsh will  
also take a hand. If necessary, how-  
ever, the U. S. marshal may have to  
lend his assistance in getting the  
red skins counted. Trouble is also  
anticipated at San Felipe where the  
Indians are aroused over a recent  
murder for which one of their number  
is to be prosecuted, a fact which they  
resent very much.**Minor City Topics.**

(Continued From Page Two.)

**New Board of Education.**—The new  
board of education will organize on  
the first Monday in May.**Archaeological Auxiliary Committee.**  
—The Ladies' Auxiliary of the Archae-  
ological Museum held its first meet-  
ing in the Puye room in the Old Pal-  
ace this afternoon.**W. C. T. U. Meeting.**—There will be  
a regular meeting of the Woman's  
Christian Temperance Union at 3 p.  
m. tomorrow. Some matters of im-  
portance are to be considered and all  
members are urged to be present.**Wreck on the Santa Fe.**—An engine  
and several freight cars going into  
the ditch on the Santa Fe below Lamy  
yesterday forenoon, tied up traffic the  
greater part of the day. It was five  
o'clock before the train from the south  
due at noon arrived. Today the train  
from the south was an hour late.**Episcopal Convocation.**—Tomorrow  
the convocation of the Episcopalchurch for the district of New Mexi-  
co, will begin its annual session in  
Saint John's church, Albuquerque. The  
representatives of the Church of the  
Holy Faith, Santa Fe, are as follows:  
Clerical: Rev. F. W. Pratt, warden, L.  
Bradford Prince; delegates, Frank  
Newhall and R. F. Asplund.**Large Seat Sale.**—The seat sale for  
"A Stubborn Cinderella" at Fischer's  
drug store has been large. There  
was a great rush Saturday morning  
to get desirable places and there are  
still a few good ones left. The man-  
ager of the Elks theater is much grati-  
fied at the prospects of a big house  
Wednesday night. It is said that the  
company is really carrying the number  
of people advertised.**Rich Silver Find.**—"Reports come  
from the Gran Quivira country of an  
accidental silver find which is rich be-  
yond relief. Several parties, among  
them citizens of Carrizozo, have had  
returns from the assay office as high  
as 620 pounds, yes, pounds, of silver  
to the ton. The extent of the deposits  
have not been estimated as yet. These  
samples were taken from an old hole  
about twelve miles from the Gran  
Quivira. The hole was found acci-  
dentally by a sheepman."—Carrizozo  
Outlook.**TEXAS MEN ARE WAITING**

(Continued From Page One.)

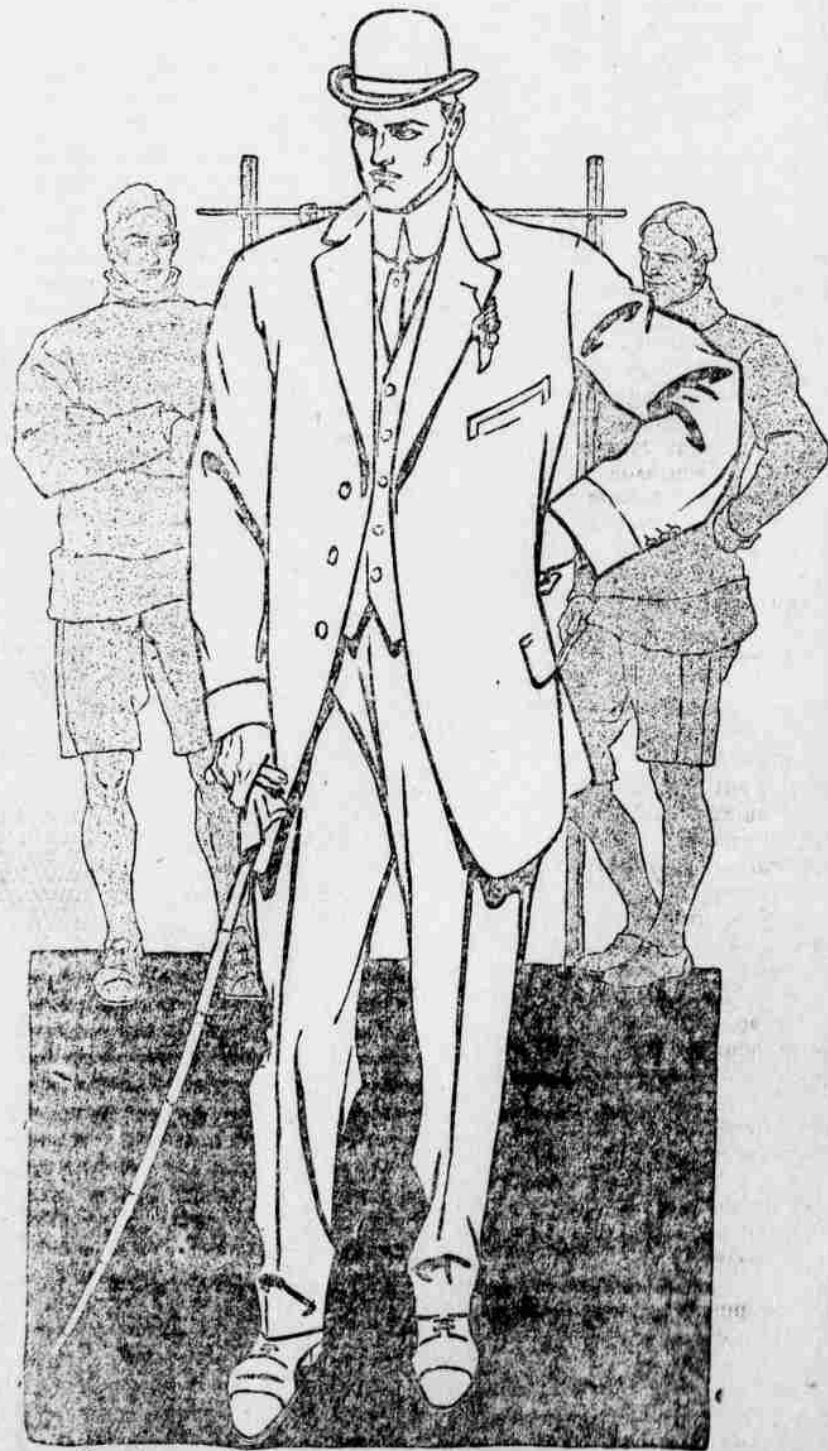

towns of a site for a cemetery or a  
public park within a forest reserve.Under the present statute cities and  
towns are limited in the selection of  
parks to 160 acres, within 3 miles of  
the town. In many cases there are  
no suitable sites for public parks up-  
on the public lands within three miles  
of the town, while there may be  
scenic canyons or groves and other  
desirable places for such purposes at  
a greater distance from the towns.  
The public health and general welfare  
of the inhabitants require that cities  
should have, where possible, an out-  
ing place or picnic grounds for the  
old and young, which is usually used  
for a place for a drive from the  
town, and also for Fourth of July and  
other gatherings of the people.The present law does not expressly  
require payment for the land, while  
the proposed statute requires the pay-  
ment of a dollar and a quarter an  
acre, and limits the amount of land  
that can be taken for parks to one  
section. That amount is often neces-  
sary because the site desired is usu-  
ally some canyon or small grove  
where there is little or no available  
land, and yet it would require that  
much land to control the site, even  
though the available portion of it is  
often less than 40 acres.This act will not apply to mineral  
lands, or coal, or other valuable sub-  
stances nor will it include any land  
that has any appreciable value for  
agricultural purposes, for the reason  
that there are no valuable tracts ofagricultural lands vacant at this time  
within that distance of any city or  
town in the west. All such tracts  
were entered prior to their withdraw-  
al and before the establishment of  
the forest reserves.The committee believes that the  
present statute should be enlarged in  
the respects provided for in this bill,  
and that the objects of the measure  
are very meritorious, and that the in-  
habitants of many towns would be  
greatly benefited by being allowed to  
avail themselves of the provisions of  
this bill, and that it should be enact-  
ed into law.**STRIKE NEAR PITTSBURG**  
**RESULTS IN RIOT.**Thousand Employees of Pressed Steel  
Car Company at Schoenville  
Go Out.Pittsburg, April 18.—A thousand em-  
ployees in the erecting department  
of the Pressed Steel Car Company at  
Schoenville struck today. In a riot  
that followed, one man was shot in the  
arm and Captain Smith of the com-  
pany's police was badly beaten.**Railroad Strike Threatened.**Wilkesbarre, Pa., April 18.—The  
conductors, train men, engineers, fire-  
men and telegraphers of the Delaware  
& Hudson railway have decided to go  
on a strike tomorrow unless the com-  
pany grants the Baltimore & Ohio  
scale of wages.**CARTER LOSES HIS**  
**\$400,000 FORTUNE.**Washington, April 18.—Dismissed  
from the army and put into the peni-  
tentiary for alleged connection with  
fraud on the government improve-  
ment of the harbor at Savannah, Ga.,  
former Captain Oberlin M. Carter, had  
his fortune of \$400,000 swept out of  
his hands today as a further outcome  
of that affair. The government sued  
to recover money which it was alleged  
the former captain held as a result of  
his fraudulent work, and today the su-  
preme court of the United States  
handed down a decree in favor of the  
government.**CHILD STRUCK BY**  
**WRECKING TRAIN.**Special to the New Mexican.  
Cerrillos, N. M., April 18.—The two  
year old child of Gregorio Terrez, liv-  
ing at Ortiz, southern Santa Fe coun-  
ty, five miles east of Cerrillos, was  
struck by the extra wrecking train  
going west yesterday and seriously in-  
jured. The child who was at play on  
the track was struck by the engine  
on the forehead and there is very lit-  
tle hope for its recovery.The annual meeting of the stock-  
holders of the New Mexico Telephone  
Company will be held at its office, N.  
corner Plaza, Santa Fe, Thursday,  
of April 21, 1910, 5 p. m.

# THE BIG STORE

**YOU'LL BE DISTINGUISHED FOR YOUR WELL-DRESSED AP-  
PEARANCE IN ANY COMPANY YOU'RE SEEN IN, IF WE PUT  
the clothes on you. We have the styles here that you want; they're  
such clothes as you don't find anywhere else in this town. They're made exclu-  
sively for us by HART SCHAFFNER & MARX**

and that's all the argument you ought to need. These  
are about the only clothes now that you can depend  
on to be strictly all-wool; and that's important to  
you to know if you consider it important to get value  
for your money.We advise you to be sure of all-wool in your  
clothes; we're pretty certain if you once determine  
that you must have that quality, you'll come to us  
for your clothes.**New Fabrics, Models, Patterns in Spring Overcoats & Suits**This new season is a lively one in the variety of  
weaves and patterns we can offer you. Grays seem  
to lead; plain grays, checks, stripes; plaids, all sorts of  
mixtures; also many new browns and tans, and a big  
range of good blues in all patterns. You'll find some-  
thing good to fit your taste and your ideas of style.The Spring overcoats are also exceptionally inter-  
esting. We have many new models to choose from;  
some very smart new fabrics that will please you.  
**SUITS, \$20 to \$50 OVERCOATS \$16.50 to \$40.**We ought to tell you something more about our new hats for Spring;  
some new blocks that make taste and head-fitting easier than ever.In fine neckwear also the variety is almost bewildering; the only man  
who can't find neckwear to suit him in our stock is the man who doesn't  
wear a necktie at all.Fine shirts, fine hosiery, gloves  
Spring and Summer underwear;  
we can supply any man with the
