SANTA FE NEW MEXICAN

VOL. 47.

SANTA FE, NEW MEXICO, FRIDAY, MAY 13, 1910

NO 48

PUEBLO INDIANS ON RAMPAGE

Raid the Homesteads of New Settlers in Taos County

DROVE OFF ALL THE STOCK

Fences Cut and Women and Children Assaulted by Drunken Men.

Special to the New Mexican.
Taos, N. M., May 13.—Yesterday a lot of intoxicated Indians from the pueblo of Taos raided the ranches of homesteaders north of town and after cutting fences drove off all the stock. They assaulted Mrs. L. S. Meyers and babies. Mrs. Meyers is the wife of a homesteader. Indignation and feeling runs high. Court is in session here and if the names of the evildoers who sold the liquor to the Indians, as well as of the Pueblos who were participants in the raid, can be obtained, indictments will follow quickly. The Pueblos, being citizens of New Mexico, are amenable to the territorial laws and are no longer wards of the United States except in a restricted sense. The authorities are investigating and arrests may follow when further trouble is anticipated.

Request for Militia.
At the request of citizens of Taos, Judge John R. McFie, this forenoon telegraphed to Governor Mills for a company of militia, the sheriff, apparently feeling himself unable to cope with the situation. Fifty men were mobilized of the two companies in this city and arrangements made for a special train to hurry the men to Taos, in case expected confirmation from the sheriff of the county was received, as under the law, it is required that the sheriff must notify the governor that he is unable to maintain peace before the troops can be sent. Unfortunately, no appropriation is available for an emergency of this kind, but Governor Mills and Adjutant General Brooks will be firm in dealing with the situation, which it is hoped is not as serious as at first impression seemed to be the case.

Governor Hears From Sheriff.
This afternoon Governor Mills received a message from Sheriff Elizandro Quintana saying that the situation is grave and joining in a request for troops.

Tempest in a Tea Pot.
U. S. Attorney for the Pueblo Indians Francis C. Wilson who has just returned from Taos, says that the trouble arose over a claim made some time ago that Myers had fenced in Indian lands and also a public road over those lands. The Indians had threatened to cut the fence but when Mr. Wilson left all was peaceable. However, several of the more hot headed bucks undoubtedly filing up on fire water, went and cut the fences and possibly let the stock out of the pasture and frightened Mrs. Myers and children from the place. Mr. Wilson is convinced that peace can be restored without trouble by tomorrow without the assistance of the militia.

Militia in Readiness.
Fifty men of the National Guard are in readiness at the National Guard Armory. If the situation is not modified by midnight they will start on a special train expecting to arrive at Barranca at 5:30 a. m. There fifty saddle horses will be awaiting them and they will ride across country to Taos and take charge of the situation. Up to the time of the New Mexican going to press, no order had been issued, however, for the militia to proceed.

Later: An order for the militia to proceed to Taos was issued by Governor Mills at 4 o'clock.

SMUGGLED \$300,000 WORTH OF DIAMONDS ACROSS.

San Antonio, Texas, May 13.—Although no official confirmation has been given the report that an American smuggled \$300,000 worth of diamonds across the border at Lugo into the United States, the activity of the custom house officials on both the Mexican and American sides of the river is said to indicate its authenticity. R. J. Cochrane, an American living at Mexico City, while passing through here reported that he had been suspected of being the man and for this reason had to submit to the closest search of his person and baggage. The smuggler is said to have carried the stones in an old grip from which he diverted attention by treating it with the greatest indifference. The grip, however, had disappeared when it was to be inspected and a few hours afterwards the authorities were informed that the diamonds had been smuggled in. The conversation of Mexican customs officials, who thought Mr. Cochrane did not understand Spanish, caused the secret to leak out.

ALL JUDGES ARE CORRUPT

Soft Impeachment of Jurists on New Mexico Supreme Bench

OWNED BY THE RAILROADS

Startling Accusation Made But Promptly Refuted by Andrews.

Special to the New Mexican.
Washington, May 13.—In the Ballinger-Pinchot investigation today, Senator Root reading the treaty with Mexico and the law appropriating \$1,000,000, renewed the former request to Secretary Ballinger on the stand for full information why work on the Rio Grande project is not progressing pursuant to the treaty with Mexico. Root's attitude was very positive and determined. Ballinger promised promptly to furnish a written statement. At the hearing before the senate judiciary committee, Wagner said that all the judges of New Mexico were corrupt and subsidized by the railroads. Delegate Andrews indignantly declared the statement untrue. Catron, Judge Mann, Dobson and others did likewise. The three New Mexico judgeships that are pending will be decided in a few days. There seems to be no doubt of the confirmation of Judge McFie. Attorney General Frank W. Clancy is being mentioned today for the judgeship made vacant by Judge Cooley's resignation.

CARING FOR PUBLIC DEPENDENTS

Roosevelt Studying a Subject Much Neglected in United States

VISITS MODEL INSTITUTION

There Fifteen Hundred Workers Are Kept in Comparative Comfort.

Berlin, May 13.—Mr. Roosevelt in company with Burgomaster Kirchner motored this morning to Buchs suburb where a colony of fifteen hundred worn-out workers, men and women, are maintained in relative comfort at the expense of the city of Berlin. The subject of public dependents is being pursued by the former president who, while in Denmark, investigated a similar institution. Mr. Roosevelt was a guest at luncheon in this city of Ambassador Hill.

Unlucky Day for Taft and Loeb.
Berlin, May 13.—Mr. Roosevelt today authorized an unqualified denial of the recently published report that he had written letters expressing his attitude toward and support of the Taft administration and favoring Collector Loeb as candidate for governor of New York.

HYDE IS CONFIDENT OF ACQUITTAL.

His Fate Will Be in the Keeping of the Jury By This Evening—He is Not Superstitious.

Kansas City, May 13.—By tonight the jury which is to decide the fate of Dr. B. C. Hyde, accused of murder and poisoning in connection with the Swope mystery, will have retired to consider a verdict. If the final arguments of the state and defense are not finished this afternoon, Judge Latshaw will hold a night session. Perhaps this will prove an unlucky "Friday thirteenth" for the physician. However, he does not think so. He is not the least superstitious. "I shall be acquitted," he said this morning. Attorney Brewster for Dr. Hyde and Prosecutor Virgil Conklin for the state made their addresses at this morning's session.

ONION CROP OF TEXAS WILL BE 1000 CARS SHORT.

San Antonio, Texas, May 13.—With practically ninety per cent of the onion crop harvested, it now appears certain that there will be a shortage of about 1000 cars or approximately 500,000 crates of about eighty pounds each. As a result of this, prices, which were rather weak a few days ago, have taken a very firm upward stand. The shortage is based on last year's production, but on the increase of 25 per cent expected. So far nearly 2,800 cars have been marketed. The crop last year reached a total of 3,200 cars. Slightly adverse weather conditions are the cause.

PUBLISHED A PAMPHLET TOO

Methods Against Ballinger Similar to Those Against McFie

VILE CONSPIRACY EXPOSED

Concerted Movement to Destroy Cabinet Officer's Usefulness and Reputation.

Washington, May 13.—Secretary Ballinger on the witness stand today before the Ballinger-Pinchot committee, read a long resume which he said would show the existence of a conspiracy to remove him from public life. The resume had to do with various portions of the testimony introduced in the present investigation by the so-called prosecution. It was all put in by eighteenth of last March. "and since that time evidence has been introduced by me before the commission. An anonymous pamphlet has been circulated, notwithstanding the truth, which has been shown by the evidence in my behalf."

"The pamphlet was circulated secretly and confidentially, purporting to state what the prosecution had shown and expressly declining to state any evidence introduced by me. Reliable information disclosed that these anonymous pamphlets were being distributed from the home of Gifford Pinchot."

FIRE AND EXPLOSION CREATE GREAT HAVOC.

Burning Home Funeral Pyre for Five—Car of Dynamite Blows Up in Utah.

Salt Lake, Utah, May 13.—A car of giant powder on the siding near Beck's Hot Springs, five and a half miles north of here, exploded at noon today. All telegraph and telephone wires to Salt Lake and Ogden are prostrated. The extent of the property damage has not yet been ascertained.

Car of Giant Powder Blows Up.
Faribault, Minn., May 13.—Bert Sperry, his three children and their grandmother, were burned to death in a fire that destroyed their home here today. Mrs. Sperry and two children were saved.

RANCHO DE EL PASO SOLD TO COMPANY.

Minneapolis Capitalists Pay Almost Two Million Dollars for Famous California Property.

Sacramento, Calif., May 13.—Rancho El Paso, the famous farm home of James B. Haggin's string of thoroughbreds, has been sold by Haggin and the Tevis heirs to the Minneapolis Land Company. The price paid is between \$1,750,000 and \$2,000,000. The ranch contains 44,000 acres.

PAPER MONEY TO BE SMALLER

But Will Be Just as Hard to Get Enough of It

TO SAVE TREASURY \$500,000

Recommendations to Be Made by Committee of Officials.

Chicago, Ill., May 13.—A special from Washington says a reduction in the size of the paper for United States money will be made if Secretary Treasury MacVeagh accepts the recommendations that will be made to him within a few weeks by a committee of treasury officials appointed to investigate this and other proposed reforms. The object of the proposed change is to supply the country with a size of currency more convenient for handling and save the government half a million dollars a year in paper and engraving. The new size of bank note to be recommended will be about three-fourths the size of the present bill.

ADVANCE FREIGHT RATES. SAYS RIPLEY OF SANTA FE.

Denver, Colo., May 13.—President E. P. Ripley of the Santa Fe railroad, who was in Denver to inspect the plans for improvements between Denver and Pueblo, believes there will be a general advance in freight rates in a short time on account of the increase in prices of material and labor.

HALLEY'S COMET, EARTHQUAKES

And This Is Friday, the Thirteenth, in the Bargain

SHOCKS OF UNUSUAL DURATION

Deadly Cyanogen Has Disappeared from Tail of Celestial Visitor.

Cleveland, May 13.—The seismograph at St. Ignace College recorded a heavy earthquake shortly after 2 o'clock this morning. The tremors lasted one hour and seventeen minutes. Father Odenbacher, the observer, says that the record greatly resembled that made by the earthquake in Costa Rica last week, but was a much more serious earthquake.

Deadly Gas Has Disappeared.

Washington, May 13.—Cyanogen is now practically absent from the tail of Halley's comet according to a dispatch received today by the Georgetown University from Lowell Observatory at Flagstaff, Arizona.

Four Hundred Shocks in One Month.
San Jose, Costa Rica, May 13.—Earthquake tremors continue today. In one month since April 13, 400 distinct shocks have been recorded. The volcanoes in the vicinity exhibit no special activity.

Earthquake in California.

San Bernardino, Cal., May 13.—A sharp earth shock frightened the people of the entire valley. The first shock was a heavy one. It was followed by several tremors and a deep rumbling that created terror in several sections. No damage has been reported.

Medicine Men Predict End of World.
Globe, Ariz., May 13.—The Apache Indians on the San Carlos reservation are preparing for the end of the world, which their medicine men predict will occur on May 18, the date on which Halley's comet will be closest to the earth. They are planning to go to the happy hunting grounds with clean bodies and full stomachs, and are preparing by taking sweat baths, in tepees heated with hot stones, and jack rabbit feasts.

At Rich, 20 miles south of here, there are two medicine men who hold opposing views regarding the coming of the millennium, but all are preparing for the end.

MURDER CAUSED BY VICE CRUSADE AT SEATTLE.

Seattle, May 13.—Wallace A. Bussell, 23 years old, sought to take the Seattle vice crusade into his own hands early yesterday morning by walking into the Monte Carlo saloon and gambling house and shooting the proprietor, Joseph Bonner, to death with a rifle. Bussell is the son of C. B. Bussell, one of the richest men in Seattle.

COOLED OFF AFTER FIGHT

Spectator's at Mill Plunged Suddenly Into Salt Lake

STRUGGLE IN BRINY WATER

Dedication of Hippodrome Marked by a Serious Accident.

Salt Lake, May 13.—An involuntary bath in the Great Salt Lake and a ride home in an improvised hospital train marked the initiation of the hippodrome at the Saltair resort. The hippodrome is the building in which the Jeffries-Johnson fight would have been held had it come to Salt Lake. Three thousand persons went to see the fight between "Cyclone" Johnny Thompson and Pete Sullivan. A hundred of them went into the waters of the lake with a collapsing stairway and more than a score were carried back to their home in this city with broken limbs, contusions or mouths and nostrils scalded and eyes almost blinded by the biting brine of the inland sea. The stairway collapsed when the crowd was leaving after Thompson had knocked out Sullivan in the ninth round. A mad struggle in the stinging salt water took place. Gasping and struggling, seizing one another and fighting loose from the wreckage half of the submerged fight fanciers, four of them women, were one by one drawn from the brine and the injured hastily placed aboard a train and taken to the city.

FOR GOD'S SAKE DROP ME!

Thirteenth Hanging on Friday Thirteenth Hoodoo Even for Execution

WIFE MURDERER'S AGONY

It Took Twenty Two Minutes to Strangle Convicted Brute.

Walla Walla, Wash., May 13.—Moaning: "For God's sake, take me up and drop me again boys!" Richard Quinn the wife murderer of Everett, was hanged and dangled at the end of the rope beneath the scaffold at the prison this morning and was slowly strangled to death, it being twenty-two and a half minutes from the time the trap was sprung, until he was cut down. The horror was not the fault of the hangman. The cords in the back of Quinn's neck are abnormally large, and he held his head back and tensed the muscles as the trap was sprung. The attendants were startled when Quinn's legs began to twitch, and then horrified by his groans of: "Boys, this is awful!" and "For God's sake take me up and drop me again, boys!" He was able to unbuckle the straps about his arms and drop them to the ground. After a moment his words became inarticulate, and shortly he ceased to sway. Quinn was the thirteenth man to be hanged here and the peculiar coincidence is this is Friday, the thirteenth day of the month.

BOLD BANDITS WERE BOYS

Oklahoma Youths Held Up Passenger Train in Arizona

CAPTURE NEAR CASA GRANDE

Pursued Over Desert by Posse in an Automobile—Heavily Armed.

Phoenix, Ariz., May 13.—It was two boys, still in their teens, who held up the Arizona eastern passenger train near here on Wednesday evening and who after a chase across the desert were captured last night. The boys gave the names of Ernest Woodson, aged 18, and Oscar Woodson, 17. They say they were raised in Oklahoma City, Oklahoma. They have been in Arizona only a short time. The boys were preparing to make camp five miles south of Casa Grande, when the pursuing automobile came along. Oscar, thinking the car contained tourists, stepped out and asked for water. He was immediately covered by revolvers and surrendered, and his companion then submitted to arrest.

They Are Tenderfeet.
Phoenix, Ariz., May 13.—The young bandits were veritable walking arsenals. They carried a rifle, four revolvers and two bowie knives. Both are "tenderfeet" and were too weak after an eighty mile desert ride to make a fight.

SOAKED HIS WIFE WITH GASOLINE.

Then Applied a Match and Turned Her Into a Human Torch—Dying Spouse Begs to Keep Secret.

Santa Ana, Cal., May 13.—Following the testimony of his mother-in-law and several neighbors at a coroner's inquest Frank Skelly, a contractor and lumberman, was arrested pending an investigation of the allegations that he murdered his wife, who, until the startling developments of the inquiry, was supposed to have died of burns received Friday in the explosion of a gas stove.

According to the testimony of the mother-in-law, Mrs. T. J. Lewis, there was no stove explosion, but Skelly threw a quart of gasoline over his wife and then applied a match. Mrs. Lewis swore that her testimony was based on a statement her daughter had made as she lay dying last Sunday in a hospital here. She declared her daughter begged her to keep it a secret for the sake of the children.

TEXAS POLITICIAN HAS PECULIAR PLANK IN HIS PLATFORM.

San Antonio, Texas, May 13.—Bob Barker, candidate for the comptroller of the state, and an ardent anti-prohibitionist, may be credited with having somewhat of a novelty as a plank in his platform. He promises that if elected he will turn out every clerk in the comptroller's department for the purpose of giving someone else a chance.

WILL BE GATE CITY'S GUEST

Citizens Want to Show Governor Mills Their Approval and Support

LAND SELECTIONS APPROVED

Farmers' and Merchants' Trust Company Files Incorporation Papers.

Governor Mills has accepted an invitation to be a guest of the citizens of Raton at a reception to be tendered him on the evening of May 19. The following will accompany Governor Mills to Roswell on May 23: Colonel and Mrs. Padgett, of Las Vegas; Colonel J. D. Sena, Colonel Robert Smart, Colonel Secundino Romero, Colonel E. W. Dobson, Attorney General and Mrs. Frank W. Clancy, Ex-Governor M. A. Otero and Adjutant General and Mrs. Brooks.

National Guard Promotion.

Corporal Charles J. Phelan of Albuquerque, has been promoted to second lieutenant.

Hydrographic Station Established.
Hydrographer J. B. Stewart yesterday established a stream measurement gauge and station, in the Santa Fe river, half a mile above the big reservoir. A cable was swung across the stream which the gauge is suspended.

Lieu Land Selections Approved.

Commissioner of Public Lands R. P. Ervlen received today official approval by Secretary of the Interior R. A. Ballinger of lieu land selections amounting to 3,853.84 acres, this being list No. 4 to be approved.

Incorporation.

Incorporation papers were filed today by the Farmers' and Merchants' Trust Company of Nara Visa, Quay county. The capitalization is \$15,000, divided into 150 shares, subscribed by a large number of stockholders, none subscribing more than ten shares. The directors and incorporators are: A. A. Koop, 5 shares; E. H. Patterson, 5 shares; O. O. Gragg, 10 shares; J. E. Buskirk, 5 shares; Edward U. Engle, 10 shares; C. H. Connell, 5 shares; Willard Belknap, 5 shares; Fred W. Anderson, 10 shares; V. E. McNeill, 5 shares.

KHAKI UNIFORMS CAUSED A LIVELY STIR.

Mobilizing of Troops Made Santa Fe Think of Old Geronimo Days—Friday 13, to Blame.

The soldier boys took the order to mobilize in true warrior spirit and it was interesting to see how quickly they threw off their civilian clothes this afternoon to bud forth as defenders of the red, white and blue.

If there were any superstitious persons in the companies, thinking of bad things in store because today is Friday the thirteenth, they did not show it.

The sight of the boys in khaki uniforms, hurrying through the park, and standing around the armory amazed the Santa Fean who had not heard of the Indian troubles at Taos and again and again some one was stopped and asked to explain the unusual sight.

There was some joke making about the need of calling out the "old guard" and several gray haired warriors of by gone days were asked if they were ready to shoulder the musket.

"Don't let 'em scalp any buttons off your clothes," was the admonition given one soldier by a friend who evidently still had in mind what the mill workers in Philadelphia did to the polished militia boys some weeks ago.

The mobilizing of militiamen for the proposed Taos expedition apparently met with little approval on the part of the fair "co-eds" at the high school. One pretty lass dressed in blue silk was heard expressing her views on the subject right after the mother's day celebration. "Isn't it perfectly awful that they should come to our school and take all those young and nice chaps and prepare to send them up to Taos to fight those old Indians," said she. "If I were governor I would keep those boys right at the mother day's celebration and not let them get out of Santa Fe. After all, there are not too many young fellows here to date with, any way, and what right has Taos to be calling for them? I think it is just awful." And then there was a chorus of "It is indeed awful, Mabel," by her non-sympathetic friends. But the complainant's name was not Mabel and she smiled.

HIGH SCHOOL FROLIC CAUSER EIGHT DEATHS.

Wilkesbarre, Pa., May 13.—Eight high school students, six girls and two boys, lost their lives today while boating on the paper mill dam at Huntington mills, about twenty miles below this city.

THE DAILY ROUND UP.

ONE MORE DISCOVERY.

(By Henry F. Bowling.)
Nor among the ice of ages, where the
frosty storm fiend rages
Have I sought to claim the laurels
earned by Peary, claimed by Cook,
Nor by efforts strong and manly vied
with Roosevelt, or with Stanley
To confine the world's equator in a
copyrighted book.

From such arduous toil exempted,
none the less have I attempted
Long to penetrate a realm uncharted
since the dawn of days.
Seers have sought, but never found it,
broken hearts are strewn around
it;
And this sweet, elusive goal is called
"The Drift of Woman's Ways."

Child Died on Train—The nine-year
old daughter of Mr. and Mrs. J. H.
McKinstry of Roswell, died on a
Santa Fe passenger train near Encino,
Torrance county, of heart failure.

Walked Off With Grips—A stranger,
who looked like a railroad employe,
A. E. Roberts and wife, walked off
with their grips at the Albuquerque
depot yesterday, under the pretense
that he wanted to help carry them. A
gold watch, some money and wearing
apparel were in the two satchels.

**Silver City Healthseeker Dies at El
Paso**—James W. Clark, an attorney,
died in El Paso Tuesday on his way
from Silver City, Grant county, to his
home at Cedar Rapids, Iowa. He was
removed from the train, dying after
a few hours in El Paso. Mr. Clark
was 36 years of age. The body will
be shipped east Wednesday night.

Chief Justice Pope Was a Passenger
—When Elmo Rainbolt, a driver for
the Roswell Auto Company on the
Roswell-Vaughn stage and mail line,
cranked his auto near El Arroyo de
La Cienega del Macho, about 25
miles from Roswell, the back kick of
the crank broke his arm. After driv-
ing about seven miles in his effort to
reach Roswell with his only passenger
Judge William H. Pope, returning
from Carrizozo, the severe pain com-
pelled Rainbolt to stop and await the
arrival of a car sent out from Roswell,
as is always done when a car is de-
layed.

District Court in Session—Judge M.
C. Mechem is presiding over district
court at Hillsboro, Sierra county. On
the docket is the Francisco Baca mur-
der case, Baca being accused of hav-
ing been implicated in the murder of
Manuel Madrid, for which the wife of
Madrid and a negroess Alma Lyons are
serving a sentence in the territorial
penitentiary. Both convicts were taken
to Hillsboro by Mounted Police-
man and Mrs. J. W. Collier to appear
as witnesses.

**Young Woman Drinks Carbolic
Acid**—Guadalupe Gonzales, who com-
mitted suicide by drinking carbolic
acid, was found in her home at Tenth
street and the alley between Santa Fe
and El Paso street at El Paso. The
dead woman was 23 years of age and
the wife of Jesus Gonzales, a carpen-
ter, from whom it is said she has been
separated for two days. Despondency
is alleged to have been the cause of
the deed. The body was taken by the
woman's mother as soon as she learned
of her daughter's death.

Looks Good for an Extension—Col.
W. S. Hopewell, vice president of the
New Mexico Central Railroad Com-
pany, and John Finley Stevens, now
consulting engineer of the Gould sys-
tem, but formerly vice president of
the Rock Island and later chief engi-
neer of the Panama canal, have been
at Roswell in connection with the pro-
posed extension of the New Mexico
Central from Torrance to Roswell and
thence on southeast to some point on
the Texas & Pacific, so as to make a
through line from the northwest to
the Gulf of Mexico.

Mining at San Pedro—Says the Al-
buquerque Morning Journal: "A cup-
shaped ingot of pure yellow gold
weighing five pounds and valued at
\$1,500 was exhibited at the Morning
Journal office yesterday morning by
A. B. Stutz, the well-known mining en-
gineer, who came in from San Pedro
mining camp in Santa Fe county
northeast of here. The chunk of the
precious metal attracted considerable
attention among local mining men
yesterday. It is only a sample of the
kind they are turning out frequently
from the mines there, according to Mr.
Stutz. He declined the services of
a bodyguard and would not listen to
an offer to borrow the chunk for ex-
hibition purposes. There is, however,
a suspicion that he put it in the bank,
for there are too many chances in car-
rying around \$1,500 worth of money
in one hunk. The bullion was the
product of a run on fifty tons of ore
from the Gold Coin mine of the Cav-
ern Gold Mining Company at San Pe-
dro, and forms a striking object les-
son as to the productiveness of the
mining district around San Pedro."

MINOR CITY TOPICS

Denver, Colo., May 13.—Fore-
cast for New Mexico: Partly
cloudy tonight and Saturday
with local showers in east por-
tion tonight.

**STRAWBERRIES, 10c PER BOX,
AT HAYWARD'S MARKET.**

Cattle Shipments Start—The first of
the season's cattle shipments has
been made from Silver City and con-
sisted of 2,000 head.

Silver City Store Burglarized—The
store of M. F. Downes and Company,
Silver City, was entered by burglars
and fifteen dollars taken out of the
cash register.

**Stricken With Heart Failure While
at Work**—Morris Tornoff, an old time
resident of Grant county, was stricken
with heart failure and died while at
work at Silver City. He was a native
of New Jersey and a Civil war veteran.

Cleofes Romero Resigns as Sheriff
—After ten years of service, Cleofes
Romero, now warden of the territorial
penitentiary has resigned as sheriff of
San Miguel county. His brother, Sec-
undino Romero, now district clerk,
will be chosen to succeed him.

Valmora Ranch Sold—The Valmora
ranch near Watrous, Mora county, was
sold yesterday by Special Master W.
E. Gortner under a foreclosure of a
mortgage for \$6,000. It was bought in
by J. M. Blaser of Chicago and it is
the intention to make a large sanita-
rium out of it.

**Fined for Using Railroad Pass
Wrongfully**—Mrs. Lodema Troxel and
her daughter, Minnie Troxel, of Colo-
rado Springs, pleaded guilty yesterday
in federal court at Las Vegas to ac-
cepting and using a railroad pass
wrongfully. They were fined \$100 by
Judge Parker. The Troxels are promi-
nent socially at Las Vegas.

**The Pace That Leads to the Peni-
tentiary**—Harry E. Kelley, late post-
master at Lynn, Colfax county, and
son of a former treasurer of Kansas,
was sentenced to three years in the
federal penitentiary at Leavenworth
yesterday by Judge Frank W. Parker
at Las Vegas. Kelley helped himself
to \$3,257.31 of postal funds which he
spent on chorus girls, strong drink and
other frivolities. His parents are
wealthy, but did not come to the aid of
the black sheep of the family.

Horticultural Meeting Last Night—
At the meeting of the New Mexico Hor-
ticultural Society held last night and
presided over by David Miller, it was
decided to take steps at the next meet-
ing to put the society on an education-
al basis and begin a campaign of edu-
cation that will be territory-wide. It
is proposed to make the society a ter-
ritorial institution thus increasing its
scope of work. No report was submit-
ted last night on the selection of a site
for holding the fair in the fall.

**Showers and Thunder Near Santa
Fe**—Showers and a thunder storm vis-
ited the mountains around Santa Fe
last night and the lightning could be
seen by Santa Feans. The wind blew
with violence but the storm spent its
fury outside of the city. The maxi-
mum temperature yesterday was 66
degrees and the minimum 51 with a
relative humidity of 50 per cent. The
temperature at 6 o'clock this morning
was 52 degrees. A year ago today the
maximum was the same as yesterday,
but the minimum was 35 degrees with
88 per cent of sunshine. There were
showers west and north of the city
in the forenoon.

NEEDFUL KNOWLEDGE.

Santa Fe People Should Learn to Detect the Approach of Kidney Disease.

The symptoms of kidney trouble are so unmistakable that they leave no ground for doubt. Sick kidneys excrete a thick, cloudy, offensive urine, full of sediment, irregular of passage or attended by a sensation of scalding. The back aches constantly, headaches and dizzy spells may occur and the victim is often weighed down by a feeling of languor and fatigue. Neglect these warnings and there is danger of dropsy, Bright's disease, or diabetes. Any one of these symptoms is warning enough to begin treating the kidneys at once. Delay often proves fatal.

You can use no better remedy than Doan's Kidney Pills. Here's Santa Fe proof:

Hyman Lowitzki, 115 Guadalupe Street, Santa Fe, N. M., says: "I can recommend Doan's Kidney Pills, as they have been used by myself and other members of my family with splendid results. The value of Doan's Kidney Pills for relieving pain in the back and other kidney difficulties has been thoroughly proven to me. I take pleasure in making the merit of this remedy known to other kidney sufferers."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

It is an admitted fact that real estate, financial men and merchants all say that quickest and best results are obtained by advertising in the New Mexican.

THE MOST REMARKABLE MONUMENTS IN AMERICA

Uncovered by School of American Archaeology of Santa Fe During the Recent Expedition to Guatemala—Will Exhibit Photographs in Old Palace.

Director Edgar L. Hewett, of the School of American Archaeology, in the following interview tells of the satisfactory results achieved in the recent archaeological expedition of himself, Prof. Morley and Prof. Jesse Nusbaums to Guatemala:

"A work of considerably greater magnitude was opened up by the expedition of the School of Archaeology to Guatemala and Honduras than was anticipated in advance. It was expected on starting, that the campaign for this year, would consist mainly of a reconnaissance of certain ancient cities of Central America with a view to selecting a site for future work. The intention of the expedition was to find a place from which could be carried on, for a number of years, systematic studies of the southern Maya culture, which occupied mainly the basin of the Motagua river, in Guatemala and Honduras. This was the oldest branch of the ancient Maya people. They excelled all others in certain lines of art, especially that of monumental sculpture, and progressed very far in the art of hieroglyphic writing.

"The two principal seats of the southern Maya civilization were Quirigua, in Guatemala, and Copan in Honduras. These places were not cities of residence, but religious centers—holy cities—where the temples, sculptures and monumental records of the people were set up in a form that has lasted through the ages, and about which, probably for many miles, were clustered the ordinary houses of the people, doubtless built of perishable material, such as bamboo, palm, etc., and of which all trace has disappeared with the exception of mounds, which are to be found for miles in every direction.

"It so happened that on our arrival in Guatemala it immediately became possible for us to secure possession of the site of the old city of Quirigua, owing to the extension of the plantations of the United Fruit Company, which has recently acquired large tracts of the heavily forested lands of the Motagua valley with a view to converting them into banana fields. With a liberality and an appreciation of scientific research that can not be too heartily commended, the officials of the company proposed to place the site of Quirigua under the control of the American school. We were authorized to survey out a tract of land including all the ruins; to surround it with a road twenty feet in width; to do such clearing as was necessary for the opening up and protection of the ruins, and to do whatever seemed best for the preservation and investigation of this, one of the richest prehistoric sites on the American continent.

"The operations planned will extend over a term of at least five years. The first work consisted in making the survey necessary for the segregation of the site. A tract of eighty acres was surveyed out and this we have named Quirigua Park. The forest, covering the valley in this region consists of trees of enormous size, and of almost every variety known to the tropics. Besides this there is a well-nigh impenetrable jungle of underbrush, the luxuriance of which can hardly be comprehended by one who has not attempted to penetrate it. This was cleared in the vicinity of the mountains, so as to protect them from the injurious effects of the vegetation, and sufficient of the larger growth of timber cut away to protect the ruins from falling trees. Certain parts of the park where there are no

ruins are left in their native condition in order to preserve a representative area of that most interesting of natural phenomena—a tropical jungle. It will also serve as a preserve for the myriads of tropical birds, mammals, etc., which inhabit the region.

"With a force of about fifty natives we made the preliminary clearing of the park. The final landscape work still remains to be done. The monuments, which are among the most remarkable ever found in America, were cleared, the moss removed from them, photographs made, the preliminary steps taken for the preservation of those which are standing, and for the setting up in the future of those which have been thrown down, probably by earthquakes. This can only be done after an extension from the Guatemala Northern railroad is laid to the park, and the railway wrecking machinery made available for lifting the heavy stones, for some of these sculptured monuments are as much as 26 feet high and weigh from 40 to 50 tons. So far as I know they are the largest stones ever handled by the prehistoric races on the American continent. The quarries from which they were obtained are to be found in the hills a few miles away. As there was no machinery in ancient times they could have handled these enormous blocks only by means of vast numbers of men.

"The work of setting up the monuments, and excavating the temples will begin next January and continue for a term of years. I believe that a sanitary system can be developed which will render the place as healthful as the Isthmus of Panama has become since the government took charge. That place would now make a good health resort and there is no reason why Guatemala should not be made just as healthy.

"After finishing the work that could be done this year at Quirigua, we made a short expedition into Honduras to the old city of Copan. Here the ruins are more extensive than at Quirigua, though the sculptures are not in as good a state of preservation, owing to the fact that here the material used was soft trachyte, while at Quirigua it was a good quality of sandstone. As an art city Copan is peerless in prehistoric America. No where else did monumental sculpture flourish to such extent. While the monuments do not equal in size—by thousands of pounds—those at Quirigua, yet because of the more favorable material the art attained a higher level. In richness of decoration, depth of relief carving and general execution, these sculptures were unequalled in the art of ancient America.

"On or about the first of June an exhibition will be opened in the Museum rooms, of enlarged photographs made during our recent expedition, which will give the public a much better idea of the character of the ruins upon which we are working than any description can.

"It is a pleasure to say that our work meets with the most cordial encouragement from the governments of Guatemala and Honduras. No pains were spared by the officials to facilitate our work in every possible way, and to afford us, under all circumstances, every assistance that we might need.

"That country will soon be opened up to travel and there is no doubt in my mind that in the not distant future one of the world's greatest tourist routes will be to start from either the east or west, visit the ancient ruins in Colorado and near Santa Fe, then south into Aztec, Mexico, down the Pan-American railway, which will soon run trains into Guatemala City, see the ancient cities of Quirigua and Copan, then up into Yucatan, where the old temple-cities of Uxmal and Chichen Itza are to be seen, then home by way of New Orleans, New York or Galveston by sea. It would be as interesting as a trip to Egypt and far more instructive. It would show people the past and present conditions of a part of our own continent of which they know almost nothing, and point the way to what is plainly the next great region to be developed in America."

HON. L. BRADFORD PRINCE PRESIDES OVER MEETING.

Protest Against Dog-in-the-Manger Policy of Reclamation Service Regarding Waters of Rio Grande.

The meeting at Albuquerque yesterday to protest against the embargo on the waters of the Rio Grande and tributaries by the Reclamation Service, was called to order by President B. Spitz, of the Commercial Club, and ex-Governor L. Bradford Prince was elected permanent chairman. In his address the ex-governor declared it his belief that the meeting could reach an amicable agreement on the questions at issue. He cited the instance of the irrigation congress at El Paso in 1894, when there was a three-

hundred fight. "We should work for the best interests of the whole territory," he declared. "We must live together and we have made concessions all our lives and should make them now to secure an agreement."

Vice presidents were named for the various counties represented. Eugenio Barcia was named for Bernalillo county, Adolfo Bevia for Valencia county, L. Clapp for Dona Ana county, Ralph E. Twitchell for San Miguel county, Robert L. Cooper for Santa Fe county, and ex-Governor Prince was elected for Rio Arriba county. Taos, Sierra, Socorro and Sandoval counties were expected to have representatives present, but they had not appeared at the time of the selection of vice presidents. They will be named later.

Mr. McMillen followed setting out the objects of the meeting. He declared that there were \$80,000 acres of irrigable land in the Rio Grande valley in New Mexico and that it was proposed to irrigate only 110,000 acres in the territory under the dam.

"In 1905 the government appropriated 750,000 acre feet for the dam," he said. "The reclamation service was not content with that but then appropriated all the hitherto unappropriated waters of the Rio Grande and its tributaries."

"Notice was served on all contemplated projects that appropriation of waters would be resisted."

"I believe that the best results can be secured by beginning irrigation near the source of the stream and using the waters uniformly down the stream. I wish to state clearly that I talked with the Las Cruces people this morning and that one man admitted that unless the Elephant Butte dam can have all the waters it would be worthless."

"It is time for the people of the upper valley to wake up and realize their needs as the people of the lower valley have done. And when they do wake up they will oppose this project. The government has no right to appropriate all the waters for a few, because the government is for all the people. If the government cannot distribute the waters equitably I believe in keeping its hands off."

LOWER FREIGHT RATES

TO NEW MEXICO.

W. N. Rosenthal, of Las Vegas, has won in his fight for lower freight rates from Chicago and thereby established a precedent of far-reaching import that is sure to have its effect. He was apprised by the interstate commerce commission, before whom his case has been pending since January 8, 1910, that the commission had sustained his complaint in its entirety and that the reparation prayed for had been awarded.

The case in question was entitled W. N. Rosenthal vs. the Atchison, Topeka & Santa Fe Railway Company, G. M. Stephens appearing as counsel for the plaintiff and J. L. Coleman and D. L. Meyers for the defendant.

"The decision of the commission is of far-reaching effect," said Mr. Rosenthal. "It will affect practically every furniture dealer in New Mexico. Besides, it will pave the way for the securing of a more equitable adjustment of the existing freight rates on other commodities shipped to New Mexico from the east in carload lots. While the amount involved in my case is insignificant from a financial standpoint, at the same time it will amount to no little sum in the aggregate. The victory is not only a personal one, but every furniture dealer in the territory will share in it. It is a reduction from the heretofore exorbitant rate of \$1.80 per hundred pounds on freight from Chicago to Las Vegas, to \$1.60, on a saving of twenty cents per hundred pounds. It is a matter which every wholesale and retail dealer both here and throughout the territory should take cognizance of and follow up by getting redress from the railroad companies where existing rates are unreasonable."

MEXICO MAKES MARVELOUS PROGRESS IN MINING.

San Antonio, Texas, May 13.—According to the latest Mexican government statistics there are now in operation in Mexico 6,987 mines, of which number 4,821 have reached the productive stage of development. Fifty-one per cent of the capital invested in this field is American. The Guapajuto district is reported as the most active, \$20,000,000 gold having been invested there within the last eight years. The same locality carries off the record in production for a single mine; the Valenciana property having so far produced gold and silver to the value of \$350,000,000 gold.

Weak Kidneys

Weak Kidneys, surely point to weak Nerves. The Kidneys, like the Heart, and the Stomach, find their weakness, not in the organ itself, but in the nerves that control and guide and strengthen them. Dr. Shoop's Restorative is a medicine specifically prepared to reach these controlling nerves. To doctor the Kidneys alone, is futile. It is a waste of time, and of money as well.

If your back aches or is weak, if the urine is scanty, or is dark and strong, if you have symptoms of Bright's or other distressing or dangerous kidney disease, try Dr. Shoop's Restorative a month—Tablets or Liquid—and see what it can and will do for you. Druggist recommended and sold.

OFFICIAL PAPER OF SANTA FE COUNTY.

The New Mexican is the oldest newspaper in New Mexico. It is sent to every postoffice in the Territory, and has a large and growing circulation among the intelligent and progressive people of the Southwest.

MAKING IT A GREAT HIGHWAY AGAIN.

Missouri, Kansas and Colorado are working hard to rehabilitate the old Santa Fe Trail and will make it again an artery of traffic as well as a tourist line of great importance. New Mexico cannot afford to fall behind and should strain every resource to reconstruct El Camino del Real as provided already by law. The scenic highway between Santa Fe and Las Vegas follows virtually the old mail trail between the two cities and will offer a much appreciated alternative for travel on part of the tourist who seeks to cover the old Santa Fe Trail, which would be a fitting start for the great tourist route that Doctor Edgar L. Hewett suggests in today's New Mexican, a route to extend south into Guatemala and along which all stages of the prehistoric civilization of America from the cliff dwellings of the Pajarito to the superb prehistoric monuments of southern Mexico and Central America could be studied and which might be prolonged into South America to Peru and Bolivia. Says the Pueblo Chieftain and its remarks apply to New Mexico as well:

"Residents in eastern Colorado and western Kansas, who have been connected with the improvement of the Santa Fe trail in this region will be pleased to note the interest that has been aroused in eastern Kansas in the task of rehabilitating the old Santa Fe Trail. Commenting on this work the Kansas City Star says:

"Mayor Brooks of Fort Scott announces that plenty of signatures of farm owners have been secured to insure the building of the proposed Kansas City-Fort Scott road through Bourbon county.

"An investigation of the line as first suggested has demonstrated once more the wisdom of the old frontier pathfinders. The route through the Marias des Cygnes valley will be abandoned and the new road built along the old government trail from Paola to Fort Scott. This will take the road west of La Cygne and Pleasanton, through Mound City, the county seat of Linn county.

"Historic ground would be traversed by the route as now proposed. It would skirt Osawatimie and the old John Brown battlefield, which will be dedicated by Theodore Roosevelt next August as a Kansas state park. From there south through old Twin Springs, once an important trading point on the Fort Scott trail; through Old Moneka to Mound City, where the fight to make Kansas a free state was first opened. From Mound City it would pass through another spot of historic interest, the Mine Creek battlefield, where the only real battle of the Civil War was fought in Kansas.

"The platemen who first established the government trail were real pathfinders. They marked the most feasible route from post to post with the accuracy of the modern engineer. Attempts to find a more accessible and direct way through Kansas to the west than the old Santa Fe Trail have been made by railroad surveyors, but they have been forced to get back to the old-time trail for the easiest grades and for practical utility. Just as the promoters of the Fort Scott road have been compelled to leave their preliminary surveys for the old government trail that was established by the freighters a half century ago.

"This project combines sentiment and practicability to a most pleasing degree. Not only will the trail lead through many historic spots but when completed will give a good road for practical uses all the way from Santa Fe to Kansas City. While this thoroughfare will never be used its entire extent except by pleasure seekers, yet it will be of benefit to residents of various communities for practical purposes. It will be of particular value as an incentive of what can be accomplished in the building of good roads."

WILL NOT BE A PICNIC.

The New Mexican National Guard late this summer will go into camp at Atascadero, Calif., to get a taste of the real thing in a soldier's life. It is not going to be a picnic by any means, but it will be a good thing for the organization and the boys will come marching home every inch a soldier.

The organized militia which is destined to take part in the maneuver camps this summer will be confronted with a practical situation which means real work. The day of sham battles is past. There is to be the minimum amount of the ceremonial in military activity, and there will be absolutely nothing of the spectacular. There are to be drills and marches and exercises, and the working out of problems under conditions which resemble as closely as may be the operations of

troops in the field in time of war. There will be none of the comforts which have hitherto gone with encampments of this sort, and the instructions to the quartermasters who have charge of the fitting out of the camps require the omission of flooring for the tents "and the like semi-permanent arrangements." The troops will camp in the open, and will be surrounded by conditions which will get them acquainted with the bare necessities and, presumably, some of the positive hardships which would be their lot in time of war, when they are separated from comfortable barracks and beds in well-heated and properly ventilated rooms.

It would be interesting to know how this new program is received by the members of the organized militia. There will probably be no complaint from the regular army, which is more or less accustomed to roughing it, although the latest equipment of camps and the provisioning of the soldier in the field constitute veritable luxuries as compared with the conditions of the troops of the Civil war. Now, the commissary, for instance, provides bakeries and trained cooks, with all sorts of portable kitchens, and can furnish hot food on the firing line. The quartermaster has shelter in abundance and varied form, and has produced a uniform which is the acme of comfort with protection against the elements. The latest infantry equipment is a model of its sort, with a reduction in the burden of the foot soldier and the means of carrying a lot of his outfit by wagon instead of on his person. Much scientific thought has been given to the protection of the individual and his varied equipment to make him a valuable unit capable of overcoming the climatic influences and resisting the fatigue and overcoming the causes of physical disability.

There is no fault to find with the military authorities for going a step further and imparting to these maneuver camps the quality of real work and serious purpose. If these joint military exercises are to mean anything in proportion to the amount of money appropriated for their maintenance, the militia must be put on a footing with the regulars and do the same work which would be expected and exacted of them in time of war; otherwise, the biennial maneuvers are futile and represent a flagrant waste of the public funds. If the camps are constructed and conducted as picnic grounds, it will be a very poor preparation for the militia in anticipation of war, and in that event the volunteer troops, which have been counted upon as an important ally of the regular military establishment, would encounter many demoralizing and disastrous surprises. It is well that the maneuver camps are to be on a basis of realism with the least amount of foolishness.

A WISE SELECTION.

The Denver papers speak very highly of the recently selected head of the New Mexico Normal University at Las Vegas. Says the Rocky Mountain News for instance:

"Dr. Frank H. H. Roberts, professor of history and economics at Denver University for the last seven years, has been appointed president of the Normal school of New Mexico at Las Vegas. His first year's salary will be \$3,000.

"Although Dr. Roberts had put in no application and did not put one in after the board of directors of the territorial normal school had communicated with him, he was selected unanimously for the place over seventeen applicants.

"Dr. Roberts has been one of the most popular professors at Denver University, and is so highly valued by the institution that he has been granted a year's leave of absence, with the option of coming back to his old position if he wishes. For years Dr. Roberts has conducted institutes throughout Colorado and Wyoming, having led more than sixty. He has conducted institutes in every county in Wyoming, except two, and has been offered those, but was unable to accept because of other engagements. In the others he has been called back from three to five times.

"During the absence of Professor Le Rossignol in Kansas and Canada, he occupied the latter's chair as professor of sociology.

"Dr. Roberts' many friends among the educators of the state expect to hear great results from his work in the Las Vegas institution."

BUILD THE DAM AND REMOVE THE EMBARGO.

The Albuquerque convention of commercial clubs of New Mexico took the right stand, the stand advocated by the New Mexican consistently for the past two years: "In favor of the Elephant Butte dam and against the embargo on the waters of the upper Rio Grande and its tributaries." It will not be long before the reclamation service will come around to that viewpoint and when even El Paso will abandon its dog-in-the-manger policy which began more than ten years ago when El Paso opposed the building of the dam by private enterprise and the New Mexican fought then as it does today, for its construction.

Before adjourning the convention adopted the following resolutions:

"That the convention believes that in order to develop the interests of New Mexico full and intelligent uses of her waters is necessary.

"The convention rejoices that public projects on the Pecos and the Leasburg diversion dam have been a success, as have private projects in San Juan and San Miguel counties. It believes that all enterprises that foster irrigation are indispensable.

"The convention believes that there is ample amount of water in the territory for all her needs and that there is in the Rio Grande enough for the Elephant Butte project without interfering with the northern end of the territory.

"On the dam question: Investigation has satisfied us that the use for local irrigation between the Colorado line and the Elephant Butte project of the water needed for that purpose will have no detrimental effect on the water supply at San Marcial, but will rather tend to conserve and equalize it."

"The convention voices the belief that the restrictions upon the water in the upper end of the territory at this time are unnecessary and asks the secretary of the interior to modify the orders in this respect."

AN INTERESTING NUMBER.

The Santa Fe Employees' Magazine, each month brings so much of interest locally that it certainly should have a large number of readers outside of the railroads. The number for May, for instance, opens with an intensely interesting article on "Early Commerce with Santa Fe." The article is illustrated and has many allusions to names which are still well remembered or known in Santa Fe. The second article tells of "Old Timers of the New Mexico Division" and gives the biography of Engineer William Schuitz, a local resident, who is not only an old time engineer, but also a member of the New Mexican Bar. Charlie Haynes of town, comes in for a flowery write up and so does "Dick" Barry who gets blamed every time the branch train returns to Santa Fe behind time, and the Lord knows, that is often enough. The article gives the picture of both. Thus, throughout the number, one finds material of historic and general interest especially to Santa Fe, for after all, a good deal of the history and activities of the Santa Fe system, are more or less wrapped about the ancient and historic city which gave it its name, but which it neglected shamefully until a few years ago, but now is featuring to such an extent that the old sins of omission and commission are almost forgiven by the present day inhabitants of the city.

The New Mexican believes that the situation at Taos is not as critical as the telegraph made it today. The Pueblo Indian problem is an acute one for the Territory, but there can be no danger to life and property. The Pueblo Indians are citizens of New Mexico, amenable to its laws and under the jurisdiction of its courts. That is well and wise, but the federal government steps in as it does in some other matters in which the Territories have outgrown the leading strings. New Mexico left alone would have solved the Pueblo problem long ago. Their lands would have passed into the hands of enterprising men who would have developed them, used the waters of the streams to advantage and made the communities centers of culture and thrift. Instead, the government discourages the alienation of the lands, encourages the community habit which fosters the preservation of heathen dances, the blanket habit and cannibalism which neither civilization nor religion can break. It is time for the government to allot the Indian lands and compel the Pueblos to be men among men.

The Indian School Journal for May prints pictures of work in the manual training departments of the Indian schools and also specimens of the work, including a most beautiful and substantial dining room set in Mission style. It is an advantage that the Indian boy and girl at school have over the white children of Santa Fe, who do not have the opportunities offered by manual training. As a consequence, the average white boy will have to be satisfied with odd jobs at infrequent intervals at 75 cents to a dollar a day if he stays in Santa Fe, while the Indian can get steady employment at his trade, at wages from \$2 to \$6 a day.

The Albuquerque Morning Journal and the New Mexican join in the following plaint to Congress for admission before Halley's comet strikes the earth on May 18, a plaint touchingly made by the Holbrook, Arizona, Argus:

"Arizonans dislike the idea of appearing before the pearly gates and

telling Saint Peter that they come from a dependency of the United States, one of its colonies, so to speak. We would all feel much better about it if we could walk up and proudly announce that we are citizens in good standing of the United States. Won't the senate take our feelings into consideration, and let us in before we go out?"

The New Mexican hopes that the telegraphic report from Washington that the enemies of the Republican party have gone so far as to accuse all the members of the supreme bench of corruption and being owned by the railroads, is unfounded. That the supporters of Judge McFie are "weak-minded," is an accusation that may be condoned, but not the charge of corruption against the judiciary. That demands an explanation or a denial.

The cable says that King Edward died of political worry. Some of New Mexico's politicians had better watch out!

WOODY'S HACK LINE

From
BARRANCA TO TAOS
Meets Both North South
Bounds Trains.

Leaves Barranca on the arrival of the north bound train and arrives at Taos at 7 p. m.

Ten miles shorter than any other way. Good covered hack and good teams.

The First National Bank
OF SANTA FE.

The Oldest Banking Institution in
New Mexico. Established in 1870

Capital Stock - - - \$150,000
Surplus and Undivided Profit - 80,000

Transacts a general banking business in all its branches. Loans money on the most favorable terms on all kinds of personal and collateral security. Buys and sells bonds and stocks in all markets for its customers. Buys and sells domestic and foreign exchange and makes telegraphic transfer of money to all parts of the civilized world on as liberal terms as are given by any money transmitting agency public or private. Interest allowed on time deposits at the rate of three per cent per annum, on six months' or years' time. Liberal advances made on consignments of livestock and products. The bank executes all orders of its patrons in the banking line, and aims to extend to them as liberal treatment in all respects, as is consistent with safety and the principles of sound banking. Safety deposit boxes for rent. The patronage of the public is respectfully solicited.

PERSONAL MENTION

W. J. Harbin, of Estancia, is at the Coronado hotel.

Edward Franklin, a Denver traveling man, is at the Pice.

Miles Adams, a tourist from Louisville, Ky., is at the Palace.

J. A. Murray, a Chicago drug salesman, is calling on the trade.

Mr. and Mrs. M. E. Martin, sight-seers of Denver, are at Gregg's.

Attorney W. A. Martin, of Pueblo, Colo., is here on irrigation matters.

O. A. Arpin, a sewing machine salesman of Trinidad, is at the Claire.

E. S. Waddles, a St. Joseph, Mo., dry goods salesman is calling on the trade.

Mr. and Mrs. I. L. Fletcher, sight-seers from San Francisco, are in the city.

Nicholas Montgomery, of South Bend, Ind., is a sightseer at the Coronado hotel.

L. A. Bland, of Kansas City, and who is a hardware salesman, is calling on the trade here.

E. E. Meier, the engineer in charge of the Arroyo Hondo project, is in the city. He is stopping at the Palace.

W. D. Shea, traveling passenger and freight agent of the Denver & Rio Grande Railroad Company, spent yesterday at Albuquerque.

Dr. Thomas McCarthy has arrived here from Antonito, where he has been doing veterinary work. He will be in the city several days.

Mr. and Mrs. J. F. Byrd, M. Byrd and Alexander Gutierrez, of Mountainair, Torrance county, where they own ranches, are visitors in the city. They are at the Claire hotel.

F. D. Day and family of San Francisco, Calif., are at Gregg's hotel. They came here from the Pacific coast in their automobile in which they will travel across the continent.

E. E. Van Horn, inspector of the cattle sanitary board, has returned from a trip to Taos. The reports that court being in session, the old town is pretty lively. Thus far, Judge McPhe has sentenced three men to the penitentiary.

"Sheriff Cleofes Romero was here today from Santa Fe on United States court business. He will return this evening. Mr. Romero will be here during the term of the district court of San Miguel county, as he has been subpoenaed as a witness in several cases."—Las Vegas Optic.

"Hon. L. Bradford Prince, who has presided in the Rio Grande irrigation convention, is to deliver the annual address at the commencement exercises of the university next Friday. He also is to deliver the commencement address at the School of Mines on May 19, and at the Spanish-American normal school at El Rito on the 26th."—Albuquerque Tribune-Citizen.

Carl J. Probst, formerly of this city, now in business at Cerrillos is spending today in this city. He has just completed the difficult task of enumerating the inhabitants and farm wealth of Cerrillos and Madrid precincts for Uncle Sam. Although many different languages are spoken in the district, especially in the coal camp of Madrid, Mr. Probst is such an accomplished linguist that he performed his work without an interpreter.

STRAWBERRIES, 10c PER BOX, AT HAYWARD'S MARKET.

The best of everything in candies—you know where—Fischer's.

Caused by the Comet—The thick haze that enshrouded Santa Fe and the unusual stillness was ascribed by the superstitions to Halley's comet.

Train Late Again—Although reported on time at Lamy, Santa Fe trains Nos. 3 and 10 were over an hour late getting into Santa Fe.

The Clarendon Gardens are ready to supply white carnations for "Mother's Day."

Have a Son—A son was born this morning to Mr. and Mrs. Fred Plomteaux at their home on Manhattan street. Both mother and son are doing well.

Buy candy now while it is in good condition. At Fischer Drug Co.'s.

Telephone to Glorieta—The long distance telephone service to Glorieta is now available, and the New Mexican yesterday had the first message from W. M. Tabor. A switchboard has been put in and will connect with the forest service line up the Pecos.

Buys Banana Farm—A real estate man of this city stated today that Miss Endora Cowperthwaite, who has proved herself to be a successful farmer on the Tesuque Park ranch has purchased a banana plantation in Southern Mexico. She will spend some weeks in this city before leaving for Old Mexico.

Free bowling on Sunday, Monday and Tuesday at the Smoker.

Train Load of Automobiles—Arrangements have been made to run a special train from Chicago to Barstow, Calif., over the Santa Fe, leaving Chicago Thursday or Friday of this week, containing 30 of the new 50 foot cars, loaded with automobiles from Flint, Mich., for Los Angeles and San Francisco.

Just received by express this morning a fresh supply of Allegretti candy. Fischer Drug Co.

Mr. Read's Book in Press—Attorney B. M. Read's book "Resena Historico, Sinoptica de la Guerra Mexico-Americana" will shortly be issued from the presses of the New Mexico Printing Company. The price of each copy will be \$2.50 and any one wishing a copy of the book may obtain same by remitting the price to the office of the New Mexican. The book will be placed on sale as soon as it comes from the bindery. Mr. Read will follow the book with another large work, which will be an up-to-date history of New Mexico.

Nineteen True Bills By Grand Jury—Nineteen true bills were returned by the territorial grand jury for Cha-

ves county at its first report. The following arrests have been made: Henry Foster and Elmer R. Wickham charged with forgery; Tomas Martin, charged with stealing horses from Prager Miller; and Jack Padgett and John Hart, charged with larceny of beef.

Postmaster Charged With Embezzlement—Harry E. Kelly, postmaster at Linn, Colfax county, who was indicted by the grand jury at Las Vegas on a charge of embezzling money order funds to the extent of about \$3,000, was taken to the Meadow City by W. A. Cassman, a deputy United States marshal. Kelly was arrested in Colorado and the U. S. marshal of that state sent him to the U. S. marshal at Albuquerque and he was held in the county jail awaiting the action of the San Miguel county grand jury which convened Monday.

FIRST CUTTING OF ALFALFA IS COMPLETED.

Good Roads Committee Meets at Deming and is Determined to Advance the Cause.

Deming, N. M., May 13.—John Hund finished cutting his alfalfa yesterday. It made a ton and a quarter to the acre. This alfalfa was planted last August and this is the first cutting.

The good roads committee of the Chamber of Commerce had an enthusiastic meeting yesterday forenoon. Various roads and their needs were discussed at great length. It is the determination of this committee to do everything in its power to better the roads of Luna county. Three members of the committee were delegated to make a tour of inspection of several important roads and report at the next meeting what roads need attention first and a rough estimate of the probable cost of putting them in first class condition.

Mrs. Wm. H. Harrison, who lives four miles south of Nondale, is in the hospital at Deming, having undergone a severe operation yesterday morning. She is in a critical condition.

Miss Anna Phillips, whose leg was broken recently by a fall into a forty-foot well, is improving.

S. G. Boyd, while doing some carpentering about his place, suffered a severe accident, being struck in the eye with a nail. It is doubtful if the eye can be saved at all. He left this afternoon for El Paso to put himself under the care of a specialist.

There is a dearth of well-drilling machines in the country surrounding Deming. The outfits that are here are being worked overtime and have contracts months ahead. Many farmers who were desirous of installing plants this season are unable to do so because they have been unable to get wells drilled.

STRAWBERRIES, 10c PER BOX, AT HAYWARD'S MARKET.

Cool Kitchen—Perfect Cooking

The housewife with years of experience—the woman who knows how to cook—finds, after practical tests and hard trials, the New Perfection Oil Cook-Stove is her idea of what a good cook-stove really ought to be.

She finds it requires less attention, costs less to operate, and cooks all food better than any other stove she has ever tried.

She finds the New Perfection oven bakes and roasts perfectly. The

New Perfection WICK BLUE FLAME Oil Cook-stove

has a Cabinet Top with a shelf for keeping plates and food hot. There are drop shelves for coffee pot or saucepans, and nickle-plated towel racks. It has long turquoise-blue enamel chimneys. The nickel finish, with the bright blue of the chimneys, makes the stove ornamental and attractive. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

CAUTIONARY NOTE: Be sure you get this stove—see that the name-plate reads "NEW PERFECTION." Every dealer everywhere; if not at yours, write for Descriptive Circular to the nearest agency of the

Continental Oil Company (Incorporated)

IMMIGRATION CONTINUES UNDER CARLSBAD PROJECT.

Carlsbad, N. M., May 13.—Public improvements in the county are progressing very well under direction of the present board of county commissioners. The roads and bridges have been receiving especial attention the past few months. The bridges across the Pecos, one at Carlsbad, and the other near Artesia are completed. A bridge across Black River is about ready. Another bridge is in course of construction across the Penasco; while many similar bridges are also being put in. The highways are being improved all over the county, the biggest road undertaking at the present time being the roads across the plains to the Texas line. Automobile lines are now in operation to the plains. A contract for a mail line from Carlsbad to Knowles, Monument, Lovington, Hobbs and Roberts has been let and service will begin July 1st.

Immigration has continued without interruption, yet there is still a con-

siderable acreage of land under the Carlsbad project on the market. The Pecos Water Users' Association, the organization of farmers under the project, have considered for some time ways and means for inducing more first class farmers to locate under the project. This campaign has resulted in that the land agents have all got together and from now on they will use every effort to increase the immigration. It is a desire of the Water Users that land under the project with water should be in use before the end of the present irrigation season. It has been demonstrated that the project is all right; the first payment of building charges have been met and the outlook for the future is very encouraging.

It is Important for You to Know—The news of Santa Fe for the city is the capitol of the Territory and matters of great importance are transacted in this city. Hence the wide awake man or woman reads Santa Fe's daily newspaper. Subscribe at once for the New Mexican if you haven't your name already on the roll.

2000 Pamphlets Mailed to Good Dressers

Read Them "MAY WE TAILOR YOU?"

Good Tailoring has been the making of many a Man. A man always succeeds better—always get more of the things he goes after when he is well tailored, than when he is carelessly dressed.

MAKING CLOTHES IS A TRADE!
GOOD TAILORING IS AN ART!

Our sort of Tailoring wins and holds the patronage of the best Dressers in this locality. We win by the force of the merit of our work. Our Cutter is an Artist and our tailors are the most skillful craftsmen that money can employ.

With all our prices are not unreasonable when we say

\$18.00, \$22.50, \$25.00 \$27.50
\$30.00, \$32.50 and \$35.00

for suits or overcoats of the newest patterns in all wool fabrics, and styles.

Nathan Salmon.
