Title: The School of Medicine Curriculum Committee

Office of Origin: Health and Sciences Center

Description: Information on the School of Medicine Curriculum Committee, as it appears in the HSC webspace.
Curriculum Committee

Vision

The Vision of the School of Medicine is to foster an environment where students, faculty, and staff can engage in meaningful learning experiences that prepare them for a lifetime of intellectual and professional growth. The School of Medicine is committed to excellence in education, research, and patient care, and to fostering a culture of innovation and inquiry that inspires and empowers its members to improve the health and well-being of the public.

Committee Functions and Duties

The Curriculum Committee is responsible for the overall direction and development of the School of Medicine’s educational programs. It ensures that the curriculum is aligned with the School’s mission and goals, and that it meets the needs of students, faculty, and the health care community. The Committee also monitors the implementation of the curriculum and makes recommendations for improvements.

SOP

The School of Medicine’s Office of Curriculum (OARS) is responsible for the development, implementation, and evaluation of the School’s curriculum. OARS works closely with the Curriculum Committee to ensure that the curriculum is aligned with the School’s mission and goals, and that it meets the needs of students, faculty, and the health care community. OARS also monitors the implementation of the curriculum and makes recommendations for improvements.

School of Medicine: Office of Education

Programs

The School of Medicine offers a variety of educational programs, including a traditional medical degree program, a graduate program in biomedical sciences, and a variety of continuing education programs. These programs are designed to meet the needs of students from a variety of backgrounds and to prepare them for a variety of careers in medicine.

SOP

In addition to the traditional medical degree program, the School of Medicine also offers a variety of continuing education programs, including a program for health care professionals, a program for members of the health care community, and a program for members of the public. These programs are designed to meet the needs of students from a variety of backgrounds and to prepare them for a variety of careers in medicine.

SOP

The School of Medicine’s graduate program in biomedical sciences is designed to prepare students for careers in research and teaching. The program offers a variety of options, including a Ph.D. program, a Master’s program, and a combined M.D./Ph.D. program. The program also offers a variety of opportunities for students to engage in meaningful learning experiences that prepare them for a lifetime of intellectual and professional growth.
