A Bird in the Hand

Special Information Service, United States Department of Agriculture

HOW TO KEEP FOWLS HEALTHY.

Generally it is advisable to kill the sick bird immediately, as doctoring is expensive.

KEEP DISEASES OUT OF FLOCKS

Poultrymen Are Urged to Practice Proper Preventive Measures in Fighting Ailments.

CAUSE OF HIGH MORTALITY

There Are Some Cases in Which Medicine May Be Used Advantageously—Danger Is Great Where Fowls Are Crowded.

Fowls are subject to a considerable number of diseases, some of which spread rapidly through the flock and cause a high mortality. They may also be infected by various kinds of parasites, some of which live on the surface of the body and others in the crop, stomach or intestines. These parasites are injurious because they take a part of the nourishment which should be used by the bird to put on flesh or to produce eggs, and also because by their movements and their biting they cause irritation and inflammation of the parts which they attack.

Keep Birds Healthy.

The contagious diseases which are caused by animal and vegetable germs, and the weakness and loss of flesh caused by the larger parasites to which reference has just been made are the most important conditions which the poultryman has to consider in the endeavor to keep his birds healthy. These germs and parasites should be kept out of the flock by suitable preventive measures, because disease may be avoided much more easily and cheaply than it can be cured.

Use of Medicine.

There are some cases in which medicine may be advantageously given or applied to fowls, but as a rule, when a bird becomes sick it is better to kill it, because the cost of medicine and the value of the time required to carry out the treatment are greater than the value of the bird which is cured. Another reason for killing sick birds is that they may be affected by a contagious disease which before it is recognized may spread to many other birds in the flock. A third reason for killing is the fact that a bird has the sick influence that it is more susceptible to disease than the other birds of the flock, and in order to establish a flock which is able to resist disease such susceptible birds must be eliminated.

This practice the number of birds kept upon any farm or plot of ground, and the more they are crowded together the greater is the danger from contagion and parasites, and the more important are the measures for excluding and preventing the development of these causes of disease.

Control of Sealy Leg.

Another species of leg mite attacking chickens, turkeys, pheasants and guinea fowls is the cause of a condition known as sealy leg. While this mite is usually confined to the legs, it may occasionally attack the comb and wattles. This disease occurs in most cases as a result of contagion from other birds, although the mites may also be transferred from the roosts to the feet of healthy birds. It spreads slowly and most individuals escape it entirely although constantly exposed to it.

The disease is easily recognized by the enlargement of the feet and legs and the rough appearance of the surface of the feet. The parasite begins its attack in the clefts between the toes and gradually spreads forward and upward until the whole of the foot and the shank become affected. The two legs are usually attacked about the same time and to the same degree. At first there is only a slight roughening of the surface, but the continued irritation by the mite causes the formation of a spongy or powdery substance beneath the scales, which raises them more and more until they are nearly perpendicular to the surface and are easily detached. In the most severe cases the joints become inflamed, the birds are lame and scarcely able to walk, a joint or an entire toe may be lost and the birds, unable to scratch for food, lose flesh and die from hunger and exhaustion.

For the treatment of sealy leg it is advisable to smear the roosts with wood preservative or crude petroleum as a precautionary measure to prevent the further spread of the disease. The uninfected birds should be isolated from the infected, and the latter should have their legs washed with soap and warm water, removing all loose scales. Dry the legs and apply an ointment containing 2 per cent carbolic acid or sulphur ointment or Petroleum-balsam wash. Another good remedy well recommended is made by mixing oil of caraway one part with vaseline five parts, or the caraway oil may be mixed with five parts of castor oil and rubbed gently into the skin. Some poultrymen who have large numbers of birds to be treated make a mixture of one-half pint of kerosene and one pint raw linseed oil in a quart can, take it to the poultry house at night and dip both legs of each affected bird into the can for a minute after removal, and then replace the chicken on the roost. The centers of the leg must not be wet, as the causes irritation and sometimes burns the skin. The treatment should be repeated in three to five days.

PRACTICE CLEANLINESS

Chickens, turkeys, ducks, geese, and pigeons are susceptible to many diseases, some of which are highly infectious. Bacterial poisons pass rapidly from bird to bird of the flock, and may be carried by one house or another to neighboring flocks, producing extensive outbreaks, or epizootics. Sanitary and other measures which have been found successful in the control of poultry diseases may materially reduce the great annual losses in flocks if they are properly applied.

Grinding Good for Scraps.

Table scraps and kitchen waste are best prepared for feeding by running them through an ordinary meat grinder. After the material has been put through the grinder it is usually a rather moist mass, and it is well to mix with it some cornmeal, bran, or other ground grain until the whole mass assumes a crumbly condition.

The usual method is to feed the table scraps at noon or at night, or at both times, as may be desired, in a trough or on a board. All should be fed and if any of the material is left after one-half or three-quarters of an hour it should be removed. If allowed to lie it may spoil and would be very bad for the hens.

Don't Turn Out Your Toes Or You'll Get Flat Feet: High Heels No Guarantee

Do you turn your toes out farther than necessary when you walk? A good many people do, asserts an expert, and there are two reasons why the practice is a bad one—for one thing, it gives an awkward and affected gait, which may even be a warning sign of the habit of a pronounced flatfoot. It is apt to produce flatfoot, that misshapen and often painful disability.

One hears a good deal about flatfoot these days, and it is shocking how many otherwise able and efficient candidates for the army have to be turned down by physical examiners because of this disability—flatfoot. So much attention is being paid to the welfare of the foot now that flatfoot is likely to be far less prevalent in the next generation, but those who have been fortunate enough to escape the trouble so far in this generation should be very careful not to let it come upon them.

The common causes of flatfoot are improper shoes and faulty ways of walking or standing. Flatfoot will not be prevented, as many women seem to fancy, by the continuous wearing of high heels. There are people who wear heelless tennis shoes all summer long without injury to the arch of the foot. It all depends on the way one steps. Barefoot people for the most part walk with the toes pointing straight forward—if anything a trifle inward. The Indian always walks in this way; so—if you will note—does the barefoot lad in the country. The toes in this method of walking get a firm grip on the ground and help to propel the body forward.

To avoid flatfoot wear supple, roomy shoes and take care not to toe out excessively. Make all the toes do their work in propelling the body forward.

German Birth Rate Shows a Drop of Forty Per Cent Since Beginning of War

The birth rate in Germany for 1916 fell off 40 per cent from the figures for the year 1913, according to Dr. Charles Greiner, Chairman of the University of Geneva, writing in the New York Medical Journal.

Doctor Crampton's figures are taken from a report prepared by the intelligence department of the local government of Switzerland. Doctor Crampton says in part:

"During the war there has been a heavy fall in the German birth rate. The first three years of the war alone reduced by more than 2,000,000 the number of infants who would have been born had peace prevailed. I would add that the infantile death rate has been kept well down, but is 50 per cent higher than in England.

The birth rate, which had risen from 39.1 per 1,000 inhabitants in the decade 1841-1850, to 39.1 in the period 1871-1880, fell in the succeeding decades to 36.8, 36.1 and 31.9. The rate for the last year of the decade 1901-1910 was 29 per 1,000 inhabitants, and the continuance of the fall brought the rate as low as 28.3 in 1912. In 1913 there were 1,820,000 live births. In Germany, in 1916, there were only 1,101,000, a decrease of 40 per cent as compared with 1913."

Musical Notes.

Some musicians have sharp eyes and flat feet.

Of course the sharp eyes are the more essential. Unless a fellow can see natural he may play off key.

Most any musician can pass a double bar without stopping if he is pressed for time.

Bill Shakespeare must have been at least a dub musician or he couldn't have written "Measure for Measure."

Man is like a violin. Some body is always stringing him. And he is also like the string—soon broke.

Must Purchase Sugar Every 15 Days Instead of Weekly

Approximately 20,000,000 pounds of sugar will be saved per year by a new ruling of the food administration which will prevent anyone from obtaining more than two pounds of sugar per month. Many people were unconsciously breaking the regulations regarding the distribution of sugar by purchasing their sugar on the basis of one-half pound per capita per week. On this basis of four weeks to the month there would be only 48 weeks to the year, or 336 days. This would leave 29 days, or practically another month, during which sugar would be consumed on a basis of two pounds per capita. With a population of 100,000,000 people this would require about an additional 200,000,000 pounds of sugar. The new regulation requires the consumer to purchase his allotment of sugar every fifteen days, or semi-monthly, rather than every week.

Increases of Food Prices.

Retail prices of food increased 4 per cent from August 15 to September 15; 14 per cent from September, 1917, to September, 1918, and 72 per cent from September, 1915, to September, 1918, the bureau of labor statistics announced. The increases were determined from reports by retail dealers of 25 articles of food.

Potatoes Feed the World

Different Ages and Sizes of Tubers Demand Special Preparation and Aid in Keeping Body Tissues Alkaline

The general use of potatoes in the average family and the better customs prevailing in many homes in preparing the tubers for food are based on sound economic and dietetic reasons, according to specialists of the office of home economics of the United States department of agriculture.

Potatoes are easy to cook in a variety of ways. From the point of view of dietetics, they furnish starch in one readily digestible form, contain mineral substances of importance to the body, and a few less generally known—food to make the tissues and fluids of the body alkaline, so counteracting the tendency of meats, eggs, fish and like foods to create acid conditions. Since the body does its work best when its condition is either neutral or slightly alkaline, potatoes, like most vegetables, perform an important function in the diet besides furnishing energy-producing material. This scientific fact justifies the custom that is prevalent in many families of serving a goodly supply of potatoes or other vegetables with each helping of meat.

Potatoes, however, while a valuable addition to a mixed diet, alone are not suited to meet the needs of the body because of their poverty in proteins and fat. Of these latter important elements protein is furnished in meats, eggs, fish, milk, beans and similar foods, and fat in butter, bacon, table oils and the fats and oils used in cooking.

Greater care than commonly is exercised should be taken in peeling potatoes. Very often 20 per cent of the potato is pared away. This results not only in the waste of considerable potato but also in the loss of one of the most valuable portions of the tuber, since the soluble mineral salts are present in the material near the skin, which should be removed and thrown away. These salts can be preserved by a more careful removal of the skin, as by shallow paring or rubbing, and also by boiling or baking the potatoes in their jackets.

Paring before boiling, however, may be the most desirable method of cooking potatoes, which through an undue exposure to light may have acquired a bitter taste, or those which have been kept until late in the spring, since in this way more of the disagreeable flavor is eliminated. Such potatoes may also be soaked before cooking.

While these methods may be desirable with potatoes which have been exposed to light, they result in the loss of considerable food value without compensating advantages when applied to new or well-matured potatoes. If such potatoes are boiled after paring, they should be dropped into boiling water instead of being placed on the stove in cold water. By the latter method there is twice the loss of protein, or tissue-building elements, resulting from the former. The loss of mineral matter is about the same by each method. There is no loss of starchy material in boiling unless portions of the tuber break off.

Practically the only loss when potatoes are baked in their skins is of the water which escapes as steam. The more or less common custom of pricking holes in the skin of baked potatoes or breaking them is explained by the fact that unless the steam which is formed inside the skin is allowed to escape it will change back into water and produce soggy potatoes.

Potatoes which have turned green and sprouting tubers have present a considerable quantity of solanine, an acid poisonous substance which, though not dangerous in the quantities ordinarily met with, gives a disagreeable flavor. It is best, therefore, to avoid such potatoes or to cut out green or sprouting portions.

Balloons and Pigeons Were Used to Carry Mail During Siege of Paris in 1870-71

Although airplanes were unknown in 1870, balloons played an important part in the siege of Paris, relates a writer in New York Evening World. So closely were the Prussian lines drawn about the city that communication with the outside world was cut off. The military authorities called upon the aeronaut Duroc to make a balloon flight from Paris. Carrying 250 pounds of letters, he made the attempt, and after a flight of three hours landed at Evreux, far beyond the zone of Prussian control. A regular mail service was then established, and though many flights ended in disaster, it continued until the surrender of the city. It was in this way that Gambetta, the statesman, made his escape from Paris to Tours, where he recruited a new army, which offered a desperate but vain resistance to the invaders.

The balloon service was maintained throughout the investment, from September 23, 1870, to January 28, 1871. Letters to be sent "par ballonnets" were written on very thin paper, and among the most interesting relics of the siege are the letter journals, invented by Le Petit Journal. The news of the besieged city was printed in very small type on one side of a thin letter sheet, and the other side of the sheet was left blank for personal communications. About a score of Paris papers loaded these parcel sheets, and practically all letters were written on them.

Getting letters into the beleaguered city presented a more difficult problem, but this was partially solved by sending carrier pigeons out with the balloons. Letters and dispatches were photographed and so reduced that a single pigeon holding its way to Paris often carried thousands of dispatches in a quilt attached to its tail. One pigeon carried to Paris dispatches representing 300,000 francs in postage.

Why Troops of the Kaiser Were Given Title of "Huns"

The Huns were a brutal race of savage people who invaded Europe about 350, slaughtering the inhabitants and destroying property. When the Kaiser sent his troops to China, July 27, 1900, he said to them: "Use your weapons in such a way that for a thousand years no Chinese dare look upon a German as a Hun." Because of the Germans' brutality and wanton destructiveness in the present war they have been called Huns.

Gives \$1,432,374 for Belgians.

For relief work in Belgium during the ten months ending last June 30, the American Red Cross appropriated \$1,432,374 and it has set aside \$1,947,323 for the remainder of the present year.

Salt From Salt Lake.

The inhabitants of Palmyra get all their salt by dipping buckets into the neighboring salt lake and allowing the water to evaporate.

After the Grip What?

Did it leave you weak, low in spirits and vitality? Influenza is a catarrhal disease, and after you recover from the acute stage much of the catarrh is left. This and your weakness invite further attacks.

The Tonic Needed is Peruna.

First, because it will assist in building up your strength, reinvigorating your digestion and quickening all functions. Second, because it aids in overcoming the catarrhal conditions, helping dispel the inflammation, giving the membranes an opportunity to perform their functions.

Thousands have answered the question after grip by the proper use of this great tonic treatment. You may profit by their experience.

Liquid or tablet form—both safe and satisfactory.

THE PERUNA CO.
Columbus, Ohio

He pressed his "germinal" nose flat against the candy case, his round blue eyes fixed on the tempting array of all-day suckers, but he reached his money up to the drug clerk, this lady with the sweet tooth, and lisped: "Please give me 10 cents' worth of nasafetina, 'cause she don't want us to get the flu."

"Well, I'll be jiggered," said a bystander. "Nasafetina instead of candy! I'll bet on the former as a germ knockdown, though, but when had I thought of it?"

"Forty years ago when we kids went to the country district school with a bag of the perfume that round our necks, did any 'flu' germs dare turn its guns on us? Not on our life."

"It's me up a quarter's worth, Joe."

You May Try Cuticura Free. Send today for free samples of Cuticura Soap and Ointment and learn how quickly they relieve itching, skin and scalp troubles. For free samples, address, "Cuticura, Dept. X, Boston." At druggists and by mail. Soap 25¢, Ointment 25¢ and 50¢—Adv.

Alert Suspicion. "We won't quit till the Kaiser comes out of business," remarked the emphatic citizen. "No," replied Mr. Dustin Sticks, "and what's more we'll see to it that he doesn't try to start up the same old shop with a bunch of dummy directors."

Ten smiles for a nickel. Always buy Red Cross Bag Blue; have beautiful, clear white clothes. Adv.

Safest Plan. "We have been married ten years without an argument." "That's right. Let her have her own way. Don't argue."—Louisville Courier-Journal.

Getting Off. "I see General Ludendorff has resigned." "Yep. The rats always quit a sinking ship."

A woman may say "There is no use talking," but she never thinks so.

HOW TO FIGHT SPANISH INFLUENZA

By DR. L. W. BOWERS.

Avoid crowds, coughs and crows, but fear neither germs nor Germans! Keep the system in good order, take plenty of exercise in the fresh air and practice cleanliness. Remember a clean mouth, a clean skin, and clean bowels are a protecting armor against disease. To keep the liver and bowels regular and to carry away the poisons within, it is best to take a vegetable pill every other day, made up of May-apple, aloes, jalap, and sugar-coated, to be had at most drug stores, known as Dr. Pierce's Pleasant Pellets. If there is a sudden onset of what appears like a hard cold, one should go to bed, wrap warm, take a hot mustard foot-bath and drink copiously of hot lemonade. If pain develops in head or back, ask the druggist for Anurie (anti-uric) tablets. These will flush the bladder and kidneys and carry off poisonous germs. To control the pains and aches take one Anurie tablet every two hours, with frequent drinks of lemonade. The pneumonia appears in a most treacherous way, when the influenza victim is apparently recovering and anxious to leave his bed. In recovering from a bad attack of influenza or pneumonia the system should be built up with a good herbal tonic, such as Dr. Pierce's Golden Medical Discovery, made without alcohol from the roots and barks of American forest trees, or his Frontal (iron tonic) tablets, which can be obtained at most drug stores, or send 10¢ to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial packages.

Persistent Coughs are dangerous. Get prompt relief from Pisco's. Stops irritation, coughing. Effective and safe for young and old. No equal in

PISCO'S

LOCAL AND PERSONAL

M. C. Porter, of the Porter Mercantile company, Corona, was here Saturday night.

Robert Leslie, an old subscriber of the News, was in Saturday and advanced his subscription two years.

We meet all competition. Write for our prices. - Western Garage.

Mrs. George E. Ehrick returned this week from a visit to El Paso.

Attorney C. A. Perkins visited Captain and Lincoln the first of the week on professional matters.

George C. Clements, our incoming county clerk, has been here this week, making preliminary arrangements to take over the clerk's office on January 1st.

Mrs. Frank R. Miller visited Howell last week, expecting to return in a day or two, but the serious illness of a sister has detained her.

Fred Neighbour was in Monday from his ranch north. He reported much snow in his region, which has been greatly augmented with this week's fall.

A. J. Rolland, Helen and Margie, visited Alamogordo Sunday. Mr. Rolland says the road was in fair condition, which permitted him to make the round trip between here and Alamogordo in three or four hours.

Mrs. W. C. Pittman went to El Paso Sunday and Mr. Pittman followed the day after in their car. The Pittmans will make El Paso their home, and Pitt will run between El Paso and Carrizozo.

We pay the highest market prices for hides, pelts, etc. The Carrizozo Trading Co.

E. L. Moulton, commissioner-elect from the second district, was here Saturday from Corona.

Mrs. Anna Roberts and daughter, Miss Alma, went to El Paso Monday, returning the day following.

J. W. Baxter, for a number of years in the shops here, but more recently at Dawson, was here Tuesday. He resigned his position with the E. P. & S. W. and accepted a similar position with the Southern at his old home, Columbus, Mississippi.

Doc Tice Dies

Just as we were ready to go to press announcement of the death of A. R. Tice was made. He was apparently in good health until Monday night, at which time he suffered a hemorrhage, and this was followed by others which quickly ended his life. No announcement has been made for the funeral. His sudden death was not only a surprise but a shock to his many friends. Further notice will be given next week.

Christmas Night Carols

The pupils of Carrizozo High school will follow a custom of eastern schools Christmas night and after 7 p. m. will go about town, stopping to sing Christmas carols before each house where a lighted candle is placed in a window. Follows this the custom of treating the singers to Christmas sweets by those before whose houses they sing.

Back From Vegas

Sheriff Hyde and Deputy Harris returned yesterday from Las Vegas. They had taken Candelario Zamora to the insane asylum. The unfortunate man was quite violent and the officers had great difficulty in keeping him under control.

Inaugural Ball Tickets

The Exchange Bank desires to announce that it has tickets for the gubernatorial ball for sale at \$10 each. The inaugural ball will take place at Santa Fe January 1, and each ticket admits the purchaser and two ladies, and includes refreshments.

More "Henrys" Coming

The Western Garage, like all Ford agencies, has had difficulty in supplying the demand for the Ford. In fact, it has sold the last one in stock and is waiting, as patiently as possible, for a shipment. It has been assured, however, that since peace has come the factory has given its time to turning out cars and the production has now about reached normal. Hence, Fords should be plentiful soon and the Western expects its share.

Apportionment of County School Funds

During the month of December the County Board of Education apportioned school funds as follows:

From the county special levy maintenance tax \$15,899.98
From the state school fund 6,836.48

Total for the month \$22,736.46

Superintendent Koonce states that so far as has come to his knowledge the schools of this county have all resumed activities, and in many instances a large portion of the time lost by enforced suspension will be made up in order that the pupils may complete the course prescribed by the department of education.

Mrs. H. S. Fairbank returned Sunday from Tucumcari, where she spent the week-end visiting friends.

Methodist Church

Rev. H. H. Leewelling, Pastor. The 11 o'clock service will be devoted to a discussion of the work and spirit of the Red Cross. This is a fitting close for the drive.

Sunday school at 10. A class for every one, graded and well taught. Senior League at 6:45. Come help plan the frolics for the holidays. Preaching at 7:30. Everyone is invited to be present.

Last Sunday morning Rev. Leewelling baptised at the church Virginia Esther Spence, daughter of Mr. and Mrs. Charles A. Spence; and Mabel Hermon White, David Newton White and Dorothy Pauline White, children of Mr. and Mrs. Joe White.

Sunday night closed the two weeks revival meetings at the church. The strong, sane and practical sermons delivered by Rev. F. M. Neal of Amarillo, Texas, resulted in the strengthening and toning up of the church membership generally and the addition of the following names:

Clarence Spence, Mrs. Clarence Spence, Will A. Spence, Florence E. Spence, Charles A. Spence, Mrs. Charles A. Spence, Miss Sarah A. Spence, Minnie S. Zench, Ora Miri Davis, Bernice H. Murrell, Gladys A. Wilson, Kathryn D. Pitts, Clara A. Bocai, Pearl Kennedy, George Henry Cooper, Walter Place, Mrs. Walter Place, Marion D. Place, Lillian M. Collier, Mrs. E. T. Collier, Shrintha A. Current, Eva Mari Wack, Mrs. Lottie Bentley, Mrs. Maggie Eppy, Mrs. Pearl Hughes, Mrs. R. L. Ransom, G. B. Herron, H. F. Leewelling, Augustus E. Wingfield, E. F. Hamilton, Mrs. E. F. Hamilton, Terrell Hamilton.
