DATE: May 3, 1977

Executive Committee of the Senate

FROM: Library Committee through Budget Committee

SUBJECT: Proposed Routing Policy for Library Periodicals

A. Approval procedure.

1. Annually, in early September, a department will present to the Faculty Library Committee a list of titles of periodicals they wish routed (only changes from the previous year's list need be submitted, but the existing list will be reviewed annually) together with satisfactory evidence showing that routing is desired by both graduate students and faculty in that department.

2. All department liaison persons will then be notified of the proposed routing and asked to present to the Asst. Dean for Reader Services any objections to the routing of the periodical. A periodical can be routed to a department only if no other department using that periodical wishes it to remain in the library.

3. The Asst. Dean for Reader Services will present and report on approved routing for the academic year to the faculty library committee at its October meeting.

4. When two departments request the same title, the periodical shall remain in the library.

5. Any periodical frequently called for in the Library but not available due to routing will be removed from the routing list.

B. Routing procedure.

1. The routing period will be two weeks.

2. Any department to which periodicals are routed will supply the manpower to pick up, return and perform the necessary bookkeeping involved and will reimburse the Library for its costs at the rate of \$3.00 per title per year.

3. Routed periodicals will remain at all times in a department library or main office where any interested person may have access to them.

4. Issues lost in routing will be promptly replaced by the responsible department, if at all possible. If the library replaces the lost item, the cost of acquisition will be charged to the responsible department.

5. Lack of promptness in pick up and return will be considered sufficient cause for cancellation of routing to the department responsible.

6. No weeklies will be routed.
