## HSLIC Expanded Services for Course Reserves

by Kaylee Nauer on June 30th, 2020 | [o Comments](#)

Due to limited operations while the Health Sciences Library and Informatics Center building remains closed, print materials on Course Reserves will not circulate. To assist faculty in making course reserves material available to students, we will provide a new Scanning & Permanent Link service starting Wednesday, July 1, 2020. Faculty members can now submit requests for course reserves material to be scanned for use in their course by filling out the [Scanning & Permanent Link Request Form here](#).

If the library has electronic access to the requested items, library staff will provide you with a permanent URL (web link) to the material. If we don't have electronic access to a title, but we do have the item in print, requests compliant with fair use copyright law will be scanned as a PDF and sent to the requestor via email.

Faculty may then share the PDFs or links with students via their learning management system, syllabus, or other platform.

Please see our [Course Reserves guide](#) for more information.
